Blue Book of Gun Values

Publisher's Note:

This book is the result of nonstop and continual firearms research obtained by attending gun shows, communicating with gun dealers and collectors throughout the country each year. This book represents an analysis of prices for which collectible firearms have actually been selling during that period at an average retail level. Although every reasonable effort has been made to compile an accurate and reliable guide, gun prices may vary significantly depending on such factors as the locality of the sale, the number of sales we were able to consider, and economic conditions. Accordingly, no representation can be made that the guns listed may be bought or sold at prices indicated, nor shall the author or publisher be responsible for any error made in compiling and recording such prices.

Cover Details

18TH EDITION COVER THE MODEL 1941 SOSSO PISTOL

A prototype pistol whose design lent new meaning to “high capacity” magazines.....Owned by the Grand Admiral of the World War II Italian Navy...Bequeathed to a king. While any of these highlights would serve as groundwork for most articles, all held true for this Sosso pistol.

Guilio Sosso was an Italian engineer (b.1903-d.1965) who was most active in the 1930's and early 1940's. His wish was to design a commercially successful self-loading weapon and fit it with a usually high capacity magazine which did not use a follower and spring. Replacing this feed system was a continuous chain of linked cartridge carriers, similar to a machine gun belt, which ratched around two sprockets contained within the magazine. A lever system, acting through the spine of the magazine, would advance the cartridge linkage counter-clockwise upon slide closure.

Sosso's earliest pistols were readied by 1934. They were of locked breech design and fit with a 19 shot magazine. This more than doubled the capacity of most military sidearms and easily eclipsed the 13 rounds of the “soon to be available” FN-Browning GP-35. Details of his pistol won at least one engineering award and were covered by a number of patents. One of the more interesting descriptions was filed in Britain under the title “Endless Belt Magazine for Small Arms, more particularly Pistols” on 2/19/37.

Guilio Sosso eventually reached a manufacturing agreement with the Italian firm Fabbrica Nazionale d'Armi (FNA) in Brescia. The pistols made under his direction and FNA license, referenced as the Model 1941, were single action, had a tangent rear sight, and an even larger magazine capable of holding 21 9mm Parabellum cartridges. All pistols were slotted along their back strap for a special shoulder stock and were proofed by the Gardone branch of the Brescia arsenal in 1942.

Although it was planned to put the Sosso pistol into general production, wartime concerns allowed only limited assembly. A column in the 9/48 issue of the *American Rifleman* suggested that only 5 guns were completed. The majority were reportedly presented to key political figures: #1-King Victor Emmanuel III, #2-Benito Mussolini, #3-the Field Marshall, #4-the Grand Admiral. Photos of this final gun, previously part of the FNA archival collection, now remain with the Beretta factory.

On the cover is the Sosso Model 1941 made for Aimone Savoia Aosta, Duke of Spoleto, cousin to Italian King Victor Emmanuel III, and later Grand Admiral. The gold crown on the left sideplate was

limited for use by the Savoia Aosta branch of the royal family. Members were considered “Principi Reale” or royal princes, dukes by virtue of their relationship to the king rather than by noble lineage (thereby called “Principi Reale Ducale”). Under the crown are the intertwined initials of Aimone Savoia Aostia. His monogram is unmistakable, further substantiated by examining his signature in the autographed photo.

Aimone Roberto Savoia Aosta (b.1900- d.1948) was encouraged from childhood to seek a career in the military. At age 14 he entered the naval academy and by 35 had become a vessel captain, volunteering for the front in the Ethiopian war. Subsequent years saw promotions to Vice-Admiral (1936), division Admiral (1937), and finally Squadron Admiral in early 1941. Later that year, Aimone Savoia Aosta was named as king to rule the newly formed and partially annexed State of Croatia. Though he never assumed the throne, his “paper” rule under the name “Tomislav II” continued until 1945.

The pistol and photograph of the “Naval Prince” are surrounded by historically appropriate accoutrements. An Italian WWII podium flag, showing the House of Savoy crest, enhances the background. A matched pair of admiral shoulder tabs, customarily worn on the blue service uniform, show symmetric fouling of the anchor rope. Complimenting this ensemble are a naval officer's cap badge and the bronze naval decoration “Medal of Honor for Long Navigation”.

The pistols conceived by Guilio Sosso are amongst the world's most elusive, remaining as mute testimony to his lifelong dream. Their massive presence, unique design, and optional shoulder stock make for dramatic presentation. When coupled with historic ownership, the Model 1941 Sosso pistols may be the most desirable semiautomatics to have ever been made in Italy.

Blue Book Publications, Inc. General Information

While many of you have probably dealt with our company for years, it may be helpful for you to know a little bit more about our operation and what we are currently publishing. As this book goes to press, we have the following publications in print:

Blue Book of Gun Values, 18th Edition
by S.P. Fjestad

Blue Book of Guitars, 3rd Edition
by Steven Cherne, edited by S.P. Fjestad

Blue Book of Pool Cues, 1st Edition
by Brad Simpson, edited by Victor Stein and Paul Rubino

Billiard Encyclopedia, 2nd Edition
by Victor Stein and Paul Rubino

2nd Edition *The Book of Colt Firearms*
by R.L. Wilson

The Art of Colt Engraving
by R. L. Wilson (fall 1997 release)

Mossberg - More Gun For The Money
by Victor and Cheryl Havlin

Classic Sporting Collectibles Auction Service Catalogs
Volumes 1-4

Classic Sporting Collectibles Pocket Guide

Gun Journal
monthly firearms buy/sell magazine

In addition to publishing the above titles, we also sell many of the important firearms and other collectible, related publications needed to make the right decisions and choices when buying, selling, or trading firearms or other collectibles (please refer to pages 18-21). A convenient tear-out order form is provided for re-ordering this 18th Edition and may be found between pages 64-65. Our master order form appears on page 5.

We would like to thank all of you for your business in the past - you are the reason(s) we are successful. Our goal remains the same - to give you the best products, the most information for the money, and the highest level of customer service available in today's marketplace. Please - if something's wrong, tell us first, not somebody else.

Acknowledgements/ Dedication

Over the editions, the amount of consumer input on this project has been unbelievable. Some of you may have already seen your corrections, additions, or revisions published in previous editions. I would like to thank everyone who writes, calls, FAXes, E-mails, sends smoke signals, or whatever it takes to make this book more complete and informational. We try to incorporate as much of this new material as possible every year, but in the end, Old Man Time finally rules. To the following people, a very special thanks is in order - you probably wouldn't be looking at this page today if the contributing editors listed below had not chosen to share their information with all of us. Thomas Jefferson once said that information is the fuel of a democracy - the following people/companies have "mined a lot of coal" for all of us.

HALL OF FLAME

Rain or shine, snow or sleet, it don't make no difference to this dude. Have jumbo coffee cup - will travel. John Allen, seen after yet another shuttle. Performed several mileage melt-downs this edition, + doing a lot of proofing and correcting. Thankx again, John.

Perhaps exhibiting a little fatigue after weeks of elevated trench warfare, Cathryn Coburn appears to be "locked up" and in need of rebooting. Ask her sometime about the Python Elite or Kahr "Canine" model!

If this gal was a gun, you'd have to obtain a Class III license just to touch her (semi-auto isn't on her selector switch). You wish even the best of your editorial, manuscript, and word processing heavy weights could keep up with the withering cyclic rate of Miss Schroeder's keyboard and brain. What Michelle and I have achieved over the years as a writing team in the time allotted to us, is honestly, still astonishing. Having finally graduated from the U of M, this female will be entering pre-med shortly. Every one of you owes this woman a thank you note (she also accepts cash!). Thanks again, Michelle.

Foreword

There comes a point in each new edition that, if you could carve up and serve tension/stress like a Thanksgiving turkey, we could serve 5,000 people (if you could find enough gravy). But rather than bore you by annotating this annual disciplined grind, this scribe knows better, and has decided to recap the past twelve months, in addition to temporarily plugging in my weathered and cracked crystal ball.

1996 may go down in political history as an equal to the final severity of what happened beginning 1994 in terms of heavy incoming artillery fire, major casualties, and yet another loss of territory. What's sad is this prominent chunk of battle turf may never get reclaimed again. A lot of our people in Washington, which had held down the hill for years on gun ownership issues didn't come back after this most recent November election. I don't think a lot of gun owners have really figured it out yet.

While 1996 didn't yield any major catastrophic, new federal anti-gun policies and/or laws, what we lost electorally compared to our victories on Capitol Hill was devastating. While most of us figured out that another four World Series with Slick Willie and his bum knee (really, how many brusksies did he and The Shark consume?) was inevitable given the GOP ticket, many of us thought we would see major offsetting good news in other areas. We wish.

While appearing to sound a little negative, these are the un-sugar-coated facts:

- The NRA spent over \$5 million on this year's election, bringing the total to just under \$11 million since 1994.
- Out of ten anti-gun senators and congressmen the NRA fought hardest to replace, all were re-elected.
- Handgun Control (i.e., the Brady Bunch), after it set its sights on twelve pro-NRA candidates (dubbed the Dangerous Dozen), saw only two survive after they spent a bundle letting constituents know of the NRA support/financial backing. It almost seemed like it became an election liability for even incumbents to admit to NRA tie-ins and support. This is an about-face situation when compared to the dozens of new pro-gun republicans the NRA helped usher in during 1994.
- For the first time, the Democratic Party intentionally targeted the NRA with a major shelling of negative publicity, resulting in an ever-increasing amount of anti-gun voter sentiment. This was mostly generated by the unwritten campaign slogan "NRA bullies and guns - bad; Democrats and anti-gun values - good."
- Eight out of ten hardcore pro-NRA legislators ranked "enemy status" among gun control advocates ended November without their heads.
- The final insult - A. Salvi, the pro-gun Illinois Republican senate-hopeful, when in the stressed out 14th round of this 15-round campaign feature and on his way to the mat lashed out against gun-control crusader Jim Brady by quipping he was "a licensed machine gun dealer before he was shot." The following Democratic Party's public execution of Mr. Salvi due to this erroneous nine-word suicide speech resulted in a 56%-41% loss for the wanna-be senator.
- The real loss may not be counted by pro-gun electoral bodies, however. The NRA's political clout is undoubtedly at a low tide level currently. With membership shrinking, shockingly high

bracketed numbers continuing to show up on financial reports, and the lethargic individual NRA involvement other than making out the yearly membership check, the NRA will close out 1996 basically broke and beaten. And while elections won't siphon off any more dollars next year, 1997 won't get any easier politically.

- Since it has become the responsibility of the NRA to preserve America's gun ownership (during the worst conditions ever), the cohesiveness and individual involvement by individual members is going to have to get a lot more intense if any gains are to be made back legislatively. If the new millennium election anti-gun victories are even close to this year's, all 275,000,000 guns on America could be in trouble.
- Remember, the anti-gun crusader's agenda has been, and will continue to be, to legislate guns into extinction one configuration, one model, one magazine, one caliber, one feature, one barrel length, and most importantly, one law at a time. Even the largest and strongest concrete block, unrelentlessly beaten by a bunch of small ball-peen hammers, will be reduced to dust eventually. I think the coordinated, individual, major offensive against the folks who want us gunless is our only way out at this point. If there ever was a time not to take gun ownership for granted (and/or think that someone else or an organization will shoot down all the anti-gun goblins for you at no extra charge other than membership dues), the next 3½ years will perhaps be more critical than the previous 200 years of American firearms ownership.

1997 should be another good year for desirable collector guns. However, it is doubtful the new gun biz will set any sales records over the next 12 months. With the anti-gun legislative pressure off, many consumers are becoming very selective with what's left of their disposable income. Buying a new gun for the first time? Maybe. Buying yet another new gun? Maybe not.

Once again, my pen has runneth over (no, the plane isn't landing) - 1,408 pages speaks for itself. Don't forget to read Jim Supica's definitive "Guns on the Auction Block" expose on pages 70-87, or Tom Lundin's "Web Page and CD ROM" article on pages 88-89. Again, thanks to everyone who has supported this project and remember, your individual contributions in preserving the ultimate right in any democracy have never been more critical. If every gun owner in America spent ten hours a year getting new people to start shooting and/or collecting firearms, the anti-gun movement would have a lot less people to pass the plate to by the next Presidential election. Making sure that we can keep our guns is not someone else's job anymore - it's our responsibility to the future generations of gun owning Americans.

Sincerely,

S.P. Fjestad
Author and Publisher
Blue Book of Gun Values™

How to Use This Book

The prices listed in the 18th Edition of the *Blue Book of Gun Values* are based on national average retail prices for both antique and modern firearms. **This is not a wholesale pricing guide (I doubt if there could be such a thing). More importantly, do not expect to walk into a gun/pawn shop or gun show and think that the proprietor/dealer should pay you the retail price listed within this text for your gun(s). Resale offers on most models could be anywhere from near retail to 20%-50% less than the values listed, depending upon locality, desirability, and profitability.** In other words, if you want to receive 100% of the price (retail value), then you have to do 100% of the work (become the retailer, which also includes assuming 100% of the risk). Business is business, and making a profit is what keeps the gun powder burning, the cash register ringing, and the coffee pot flush with Folgers.

Percentages of original condition (with corresponding prices) are listed between 10%-100% for most antiques (unless configuration, rarity, and age preclude upper conditions) and 60%-100% on modern firearms since condition below 60% is seldom encountered (or purchased). Please consult our expanded color grading insert (Photo Percentage Grading System™ located on pages 25-64) to learn more about the condition of your firearm(s). Since condition is the overriding factor in price evaluation, study these photos carefully to learn more about the condition of your specimen(s).

Please refer to the Abbreviations Section for complete descriptions on any new additions. Also, the Glossary is now located on pages 1,396-1,399. Updated BATF regional information also is provided in this edition - see page 1,393. You may also want to check out the Store Brand Cross-Over List on pages 1,376-1,382, hundreds of models are cross referenced.

Since this 18th Edition is 1,408 pages, it may be easier to zero in on a particular model by referring to the updated Index on pages 1,400-1,408. Hopefully, the alphabetical tabs on page sides will also assist you in finding your section(s) faster. Remember, the 18th Edition reads like the escort service ads in the Yellow Pages, turn to the next page for possibly another juicy listing.

As in previous editions, the NRA condition standards and grading criteria have been included to make the conversion to percentages easier (see pages 22 and 23). This will especially be helpful when evaluating antiques.

For the sake of simplicity, the following organizational framework has been adopted throughout this publication.

1. Alphabetical names are located on the top of right-facing, odd-numbered pages and appear as follows:

X & Y sections

2. Trademark, manufacturer, brand name, importer, or organization is listed in bold face type alphabetically, i.e.,

BERETTA, HOLLAND & HOLLAND, SAVAGE, WINCHESTER

3. Manufacturer information is listed directly beneath the trademark heading, i.e.,

Manufactured in Brescia, Italy, 1526-present and Accokeek, MD 1978 to date. Beretta U.S.A. Corp. was formed in 1977 and is located in Accokeek, MD. Beretta U.S.A. Corp. has been importing Beretta Firearms exclusively since 1980. 1970-1977 manufacture was imported exclusively by Garcia. Distributor sales only.

4. Manufacturer notes may appear next under individual heading descriptions and can be differentiated by the following typeface,

This new company was formed during 1993, utilizing many of the same employees and original material vendors that the original High Standard company used during their period of manufacture (1926-1984).

5. Next classification is a category name (inside a screened gray box) referring mostly to a firearm's configuration, i.e.,

PISTOLS, RIFLES: BOLT ACTION, SUPERPOSED MODELS

6. A further sub-classification may appear under a category name, as depicted above. These are sub-categories of a major category name.

Colt Thuer Conversions, Model XP-100 & Variations

7. Following a category or sub-category name, a category note may follow and appears as follows:

Note: No suffix in Kimber models denotes pre-1986 action design, "B" suffix models incorporate the new action with improved cocking system, faster lock time, swept-back bolt design, improved recoil lug, and are right-handed.

8. Model names appear flush left, are bold faced, and capitalized either in chronological order (normally) or alphabetical order (sometimes, the previous model name will appear at the end in parenthesis) and are grouped under category names such as PISTOLS, RIFLES, SHOTGUNS, DRILLINGS, i.e.,

GRADE NO. 1, M1 CARBINE, MODEL 122, PYTHON ELITE, SILVER HAWK

9. Model descriptions are denoted by the following typeface and usually include information such as:

— calibers, gauges, action type, barrel lengths, finishes, weight, and other descriptive data are further categorized adjacent to model names in this typeface. This is where most of the information is listed for each specific model including identifiable features and possibly some production data (including quantity and circa of manufacture, if known).

10. Variations within a model appear as sub-models - they are differentiated from model names by an artistic (▲) prefix, are indented, and in upper and lower case, i.e.,

▲ Model 885 Trap, Standard Grade, 1911 A1 Deluxe, PIII Presentation

and are usually followed by a short description of that sub-model. These sub-model descriptions are identifiable by the following typeface:

— additional sub-model information that could include finishes, calibers, barrel lengths, special order features, and other production data specific for that sub-model.

11. Now included is yet another layer of model/information nomenclature differentiating sub-models from variations of sub-models or a lower hierarchy of sub-model information. These items are indented in from the sub-models, have the icon graphic (▶) and are in upper or upper/lower case, i.e.,

▶ Model 96D Centurion, "C" Style Engraving, Carbine Model

A description for this level of model/information may appear next to the sub-entry and uses the following typeface:

— features 6 in. stainless steel barrel and slide, alloy frame. New 1997.

12. Manufacturer and other notes/information appear in smaller type and should be read since they contain both important and other critical, up-to-date information, i.e.,

The rocket ammunition for this model is rare and reports of \$20+/round are not uncommon.

13. Extra cost features/special value orders and other value added/subtracted features are placed directly under individual price lines or in some cases, category names. These individual lines appear bolder than other descriptive typeface, i.e.,

Add \$200 for .50 AE cal.

Subtract 20% for blue finish.

Add 60% for Deluxe Model with checkered pistol grip stock.

14. On recently discontinued models/variations, the last line that may appear under a model, sub-model, or sub-entry heading indicates the last manufacturer's suggested retail price flush right on the page, i.e.,

Last Mfg.'s Sug. Retail was \$64,000.

15. Grading lines normally appear at the top of each page and in the middle if pricing lines change. If you are uncertain as to how to properly grade a particular firearm, please refer to the Photo Percentage Grading System™ on pages 25-64 for more assistance. **The most commonly encountered grading line in this text is from 100%-60%, i.e.,**

Grading	100%	98%	95%	90%	80%	70%	60%
Antique grading lines have additional values listed for 100%-10%, 80%-10%, 100%-Grey grading lines, as older weapons are normally encountered in condition factors of 60% or less. N/A indicates this particular model is not encountered enough in either 98% or 100% original condition to warrant pricing. Examples are as follows:							

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%
\$9,950	\$7,600	\$6,500	\$5,400	\$4,400	\$3,500	\$2,700	\$2,000	\$1,600	\$1,250	\$995	\$825
N/A	N/A	\$475	\$425	\$375	\$340	\$300	\$275	\$250	\$220	\$195	\$165

An additional antique grading line is listed below, starting at 80% as original specimens are seldomly seen or encountered above 80%. Values also start at 80%.

Grading	80%	70%	60%	50%	40%	30%	20%	10%
	\$3,150	\$2,650	\$2,365	\$1,925	\$1,650	\$1,425	\$1,275	\$1,125

The grading line below in lower condition factors includes Traces, which stands for traces of blue, and Grey, which translates into a gun whose overall finish has a grayish color.

Grading	100%	95%	80%	50%	20%	Traces	Grey
Commemorative/limited edition grading and pricing lines will appear as follows:							

Grading	100%	issue price	qty made
	\$650	\$550	2,500

In some cases, an organization's or company's listing (i.e. Quail Unlimited, the National Wild Turkey Federation, etc.) of guns will appear as follows:

MANUFACTURER	MODEL	QUANTITY	YEAR	ISSUE PRICE
Mossberg	Model 9200 12 ga. Auction	600	1994	\$690
New England Firearms	Jakes Topper Jr. 20 ga. Auction	-	1997	-

16. Price line format is as follows - **when the price line shown below (with proper grading line) is encountered,**

Grading	100%	98%	95%	90%	80%	70%	60%
Mfg.'s Sug. Retail	\$379	\$330	\$295	\$260	\$200	\$175	\$150

it automatically indicates the gun is currently manufactured and the manufacturer's retail price is shown left of the 100% column. Following are the 100%-60% values. The 100% price is what you can typically expect to pay for that model in NIB condition. 100% specimens without boxes, warranties, etc., that are currently manufactured must be discounted slightly (5%-15%, depending on the desirability of make and model).

17. A currently manufactured gun without a retail price published by the manufacturer/importer will appear as follows:

No Mfg.'s Retail	\$575	\$500	\$450	\$400	\$350	\$300	\$260
------------------	-------	-------	-------	-------	-------	-------	-------

Obviously, the 100% price is the national average price a consumer will pay for a gun in new condition. The same situation for a stainless steel or limited mfg./special edition firearm without retail pricing will not have prices listed from 80%-60% as this type/configuration of

firearm is priced approximately the same in 60%-80% condition as the 90% price. The price line will appear as follows:

Grading	100%	98%	95%	90%	80%	70%	60%
No Mfg.'s Retail	\$1,495	\$1,225	\$995	\$795			
18. A price line with 7 values listed and represented below indicates a	\$2,275	\$2,000	\$1,750	\$1,500	\$1,2050	\$995	\$775
	N/A	\$400	\$350	\$315	\$260	\$210	\$175

discontinued, out of production model with values shown for 100%-60% conditions. **Values are normally not listed for 50%-10% condition factors since these lower conditions are seldomly encountered on recently discontinued models. 50%-10% values however, will in many cases approximate the 60% price since any gun's shooting value will usually keep the price close to the 60% value.** Obviously, no "Mfg.'s Sug. Retail" will appear in the left margin, but a last manufacturer's suggested retail price may appear flush right below the price line, automatically indicating a discontinued gun, i.e.,

Last Mfg.'s Sug. Retail was \$495.

19. A 4-value price line indicates a current production gun, and prices are not shown in 90% or less condition, since the specimen (notice model description) is either stainless steel, a commemorative, or limited production, i.e.,

Mfg.'s Sug. Retail	\$475	\$415	\$350	\$295
--------------------	-------	-------	-------	-------

This type/configuration of firearm gets priced approximately the same in 60%-80% condition as the 90% price (i.e., shooter value).

20. Early Winchester lever action grading and price lines incorporate price ranges on certain Winchester models which are most frequently encountered in 50% or less condition. These price range lines appear as follows:

Above Average	Average	Below Average
\$3,750 - \$2,600	\$2,450 - \$1,450	\$1,250 - \$600

An explanation of what to look for in these three condition ranges will precede this information in that section. The 18th Edition also includes a grading/price line that represents percentages and respective values for guns above 50% condition (photos 53-59 on pages 52-55). This grading/value line appears as follows:

95% = \$895 90% = \$775 80% = \$600 70% = \$495 60% = \$395 50% = \$295

Since this publication is now 1,408 pages, you may want to take advantage of our new expanded Index (pages 1,400-1,408) as a speedy alternative to going through the pages. Otherwise, first look under the name of the manufacturer, importer, or brand name. Next, find the correct subdivision(s) (either pistols, rifles, shotguns, etc.). When applicable, antiques will appear before modern guns and are subdivided like modern weapons. Once you find the correct model or sub-model under its respective subheading, determine the weapon's percentage of original condition (see the Photo Percentage Grading System™ starting on page 25) and find the corresponding percentage column showing the price.

Commemoratives or special/limited editions will generally appear last under a manufacturer's heading.

For those of you who would like to make notes within this publication, there may be a Notes Page at the end of each alphabetical section allowing you room for notes and miscellaneous observations.

Enlarged in the 18th Edition are sections on Trademark Index (pages 1,323-1,351), Modern Airguns (1,207-1,240), Modern Black Powder Guns (pages 1,241-1,322), Model Serialization breakdown of major trademarks (pages 1,352-1,375), and a Store Brand Cross-Over List (pages 1,376-1,382). Three or four prices will be listed for both Black Powder and Airgun Models. When using the Model Serialization section, make sure your model is listed and find the serial number within the yearly range listings.

ADDITIONAL PUBLICATIONS AVAILABLE FROM

Blue Book Publications, Inc.

Books - if you're serious about any area of collectibility, you really can't get along without them. The listing on the following pages represent the most complete offering of in-print collectible publications we have ever offered. And remember, these books make the perfect gift for any occasion, any time of the year.

We have decided to offer you a special bonus plan when ordering these publications. During the 18th Edition only, this premium bonus offer is in effect:

Placing an order for:

\$75 - \$150	Receive a FREE*
	<i>Classic Sporting Collectibles Pocket Guide</i> (\$14.95 value)
\$151 - \$250	Receive a FREE*
	<i>Mossberg - More Gun for the Money</i> (\$24.95 value)
\$251 - \$499	Receive a FREE*
	18th Edition Deluxe Hardcover <i>Blue Book of Gun Values</i> (\$45.00 value - limited quantities)
\$500 - \$999	Receive a FREE*
	2nd Edition of <i>The Book of Colt Firearms</i> (\$149.95 value) by R.L. Wilson
\$1,000 or more	Receive a FREE*
	Deluxe 2nd Edition of <i>The Book of Colt Firearms</i> (\$395.00 value) by R. L. Wilson

* Note! Add shipping charges for all premium bonus books.

We hope these bonus premium books will be an incentive for you to update your gun library (and maybe provide a gift for a few friends as well). As in the past, all titles contained herein were in stock at the time of this printing, but both prices and availability may change during the course of the year. Shipping charges can vary a lot depending on the weight of the book(s) and location shipped to. When you call, Fax, or mail your order in, we will inform you what the shipping charges will be on your order.

This offer expires March 1, 1998.

Grading Criteria

The old, NRA method of firearms grading — by relying upon adjectives such as “Excellent” or “Fair” — has served the firearms fraternity for a long time. Today’s collectors, however, are turning away from such a subjective system. One man’s “Fair” is another man’s “Good!”

The leading professionals in the grading of firearms now utilize what is essentially an objective method for deciding the price range of a gun: THE PERCENTAGE OF ORIGINAL FACTORY FINISH BLUING REMAINING ON THE GUN. After looking critically at a few firearms, and carefully studying the Photo Percentage Grading System™ (starts on page 25), even the novice can soon tell whether a piece has 100%, 98%, 95%, or less bluing finish remaining. Remember, sometimes an older gun described as NIB can actually be 98% or less condition, simply because of the wear which accumulated by taking it in and out of the box and being handled too many times (commemoratives are especially prone to this problem). Of course, factors such as “depth” and quality of the bluing finish, engraving and embellishment, historical significance, and even the condition of the stock can and do affect the price. But the basic “condition” — and therefore the price — is best determined by the percentage of original bluing finish remaining. The key word here is “original,” for if anyone other than the factory has refinished the gun, its value as a collector’s item is greatly diminished, with the exception of rare and historical pieces that have been properly restored. Study the photographs on pages 25-64. Note how the bluing finish in certain areas of the firearm wears off first. These are usually places where the gun rubs against the holster, hand or body over an extended period of time. A variety of firearms have been shown in four-color to guarantee that your “sampling rate” for observing finishes is as diversified as possible.

It should be noted that the older a collectible firearm is, the smaller the percentage of original bluing finish one can expect to find. Some very old and/or very rare firearms are acceptable to collectors in almost any condition! The average collector, however, will probably never have the opportunity to purchase such a specimen.

For your convenience, NRA Condition Standards are shown below. Converting from this grading system to percentages can now be done accurately.

CONVERTING TO NRA MODERN STANDARDS

When converting from NRA Modern Standards, the following rules generally apply:

New/Perfect — 100% with or without box. Not mint - new. 100% on currently manufactured firearms assumes NIB condition.

Excellent — 95%+ - 99% (typically).

Very Good — 80 - 95% - all original.

Good — 60 - 80% - all original.

Fair — 20 - 60% - May not be original (shootable, not very collectible).

Poor — Under 20%.

NRA Condition Standards

These NRA conditions listed below have been provided by the author as guidelines to assist the reader in converting and comparing condition factors to the Photo Percentage Grading System™ in this publication. In order to use this book correctly, the reader is urged to consult these condition standards when converting to percentages of condition. Once the gun's condition has been accurately assessed, only then can the correct values be ascertained.

MODERN CONDITIONS —

New — not previously sold at retail, in same condition as current factory production.

Perfect — in new condition in every respect.

Excellent — new condition, used but little, no noticeable marring of wood or metal, bluing perfect (except at muzzle or sharp edges).

Very Good — in perfect working condition, no appreciable wear on working surfaces, no corrosion or pitting, only minor surface dents or scratches.

Good — in safe working condition, minor wear on working surfaces, no broken parts, no corrosion or pitting that will interfere with proper functioning.

Fair — in safe working condition, but well worn, perhaps requiring replacement of minor parts or adjustments which should be indicated in advertisement, no rust, but may have corrosion pits which do not render article unsafe or inoperable.

ANTIQUE CONDITIONS —

Factory New — all original parts; 100% original finish; in perfect condition in every respect, inside and out.

Excellent — all original parts; over 80% original finish; sharp lettering, numerals and design on metal and wood; unmarred wood; fine bore.

Fine — all original parts; over 30% original finish; sharp lettering, numerals and design on metal and wood; minor marks in wood; good bore.

Very Good — all original parts; none to 30% original finish; original metal surfaces smooth with all edges sharp; clear lettering, numerals and design on metal; wood slightly scratched or bruised; bore disregarded for collectors firearms.

Good — some minor replacement parts; metal smoothly rusted or lightly pitted in places, cleaned or reblued; principal lettering, numerals and design on metal legible; wood refinished, scratched, bruised or minor cracks repaired; in good working order.

Fair — some major parts replaced; minor replacement parts may be required; metal rusted, may be lightly pitted all over, vigorously cleaned or reblued; rounded edges of metal and wood; principal lettering, numerals and design on metal partly obliterated; wood scratched, bruised, cracked or repaired where broken; in fair working order or can be easily repaired and placed in working order.

Poor — major and minor parts replaced; major replacement parts required and extensive restoration needed; metal deeply pitted; principal lettering, numerals and design obliterated, wood badly scratched, bruised, cracked or broken; mechanically inoperative, generally undesirable as a collectors firearm.

GETTING THE RIGHT GRADE

Someday, a 2086 Quadra-Pentium ACID (Advanced Computer Interactive Device) will have an approved plug-in, portable CAT Scan unit with GAGS (Government Approved Grading Software) that will accept any type of firearm which, after high-res scanning, will tell you that the excellent Deluxe Model 1886 Winchester you paid big buck\$ for 10 years ago is indeed a refurbished bastard with 96.349% non-original case colors/bluing and a replacement barrel, not to mention the renumbered and replacement lower tang welded in place sometime in its past, probably very intentional, to make sure that the factory letter information you received at the time, guaranteeing authenticity (and "originality" you thought at the time), jives with the features on the rifle.

Until that time, however, you will have to put up with the **Photo Percentage Grading System™** (PPGS) on the following pages. Older readers will remember how this whole thing got started, me answering one too many "Sir, could you hold your pitted J.C. Higgins shotgun a little closer to the phone so I can see it better?" requests. Grading anything requires paying attention to everything involved in that collectible microcosm - whether it's Barbie Dolls or 1911 A1's. Many of you will recognize the following photos from previous editions, but in many cases, captions have changed specifically to keep you up-to-date on pricing and other nuances finally coming to the surface, after years of examining press checks.

As has always been the case, but particularly crucial in today's marketplace, the importance of superior, original condition can, and does, unpredictable things to the buyer "smitten with ownership at any cost" syndrome. In other words, don't take out your wallet until you are sure of what you're buying. Some recent auctions have really super-charged the prices of top condition, major trademark specimens. Condition has become so refined, structured, and standardized in the coin industry that some people now believe price determines the grade, not the opposite. In the past, it was pretty hard to overpay for condition - I'm not so sure anymore.

The photos on pages 25-64 represent three primary categories of firearms: Rifles, Shotguns, and Handguns. Please study the photos and captions carefully and compare your specimen(s) to them to ascertain the approximate grade. While no static grading system can be perfect (most knowledgeable dealers and collectors prefer to see, feel, and smell their next potential purchase), the PPGS is perhaps the next best thing to being there.

If you have any questions regarding either the photos or accompanying captions, please contact me. Over the years, your suggestions for improvement have added up to a more useful and complete book. I have always said that the final chapter on intelligence can't be written until you accumulate the additional knowledge learned after you think you know it all. An "expert," properly challenged, should be able to say "I don't know" at least twice a day. We are all still learning.

S. P. Fjestad
Author & Publisher - Blue Book of Gun Values

P. S. - Thankx to Richard Ellis, Patrick McKune, LeRoy Merz, Jeff Sundvall, John Allen, Ward Olson, and Martin Mandall for providing the guns on the following pages. All photos in this section were taken by S. P. Fjestad and Paul Goodwin.

Photo A = S&W Top-Break .38 Double Action Third Model in original box with approx. 80% original nickel finish and some light pitting. An original box (and accessories) helps out any older gun. Interestingly, a 50% - 60% blue finish specimen with similar pitting will still appear better than the gun above, as nickel finish pitting really stands out.

Photo B = Ruger New Model Single-Six .22 cal. revolver in approx. 70% overall condition. Note barrel wear and markings signifying Colorado Centennial/U.S. Bicentennial (1976 mfg.). Rare? Not really. Desirable? Not in this condition. Most limited/special editions in less than NIB condition are priced by the shooting value with no collector premium.

Photo 1 = Model 1911 Springfield Armory in 96% - 97% original condition. Notice markings and trigger wear. Also note scratch from top of trigger guard to slide stop lever indicating careless assembly. Wear on back of trigger, ordnance proofs, and diamond checkered grips are all indicative of this model.

Photo 2 = Model 1911 Springfield Armory in 60% original condition. As wear has accumulated, the metal has become a duller grayish color. Again, note martial markings next to trigger and rear of slide on both guns. Observe difference in color of front grip strap compared to Photo No. 1.

Photo 3 = Model 1911A1 manufactured by Singer for WWII contract. This pistol is ultra-rare in this condition factor - 98%. A very "crisp" specimen, considering only 500 were manufactured in 1942. In today's expensive Colt semi-auto marketplace, this all adds up to \$20,000+!

Photo 4 = Model 1911 manufactured by North American Arms Co. Limited. In this condition (99% overall) it can be considered one of the "Holy Grails" of Colt semi-auto collecting. Price is \$20,000+, and auctions may continue to set the "high-water" mark on prices for any gun with major trademark acceptance in this type of condition.

Photo 5 = Another Model 1911 North American Arms in approximately 85% - 90% original condition. Observe pitting on slide top and great condition of frame. Despite the pitting and upper slide wear, this variation's rarity still makes this specimen very desirable. Many collectors will never see a North American Arms this good.

Photo 6 = Another Model 1911 manufactured by North American Arms in approximately 75% original condition. Compare this pistol against Photo No. 5 and notice this specimen's additional wear on front grip strap and grip safety. Note different smaller 2-digit numbers on back of slide serrations on Photos 4-8.

Photo 7 = North American Arms Model 1911 in approximately 60% original condition. Again, notice the additional bluing wear compared to Photo No. 6. Bluing splotchiness on top of slide is normal once condition reaches this level.

Photo 8 = Another Model 1911 manufactured by North American Arms in approximately 20% - 30% original condition. This pistol's rarity factor, despite its condition, still makes it very desirable. If you are thinking that you can buy this type of poor condition specimen for \$300 - \$400, not the case. \$3,250 - \$3,500 is more like it, because of desirability.

Photo 9 = Model 1911 manufactured under military contract by Remington U.M.C. in 98% original condition. Notice ordnance proofing, crispness of slide/frame markings, and condition of walnut grips. Overall superior condition of this specimen always guarantees a sale.

Photo 10 = Colt Model 1911 Military manufactured in 1913. This gun is in mint (99%+) condition overall as witnessed by grip condition, lack of end of barrel wear, and perfect Colt stallion behind the slide serrations. Note the difference in the coloration of bluing compared to the Remington U.M.C. Model 1911 in Photo No. 9.

Photo 11 = Pre-War Colt commercial in .38 Super cal. (very desirable). This "creampuff" is in mint condition. This pristine specimen (and gun in Photo No. 10) dictate the most demand for collectors/investors. Study this gun carefully compared to the one in Photo No. 12 - you may learn a lot.

Photo 12 = Colt Pre-War Government Model 45 that has been reblued. Note thinning of "patent legend" on slide side with slight corner rounding on bottom of slide and other originally sharp corners. There is a big difference between a rebluing job such as this and a professional restoration pictured in Photo No. 42.

Photos 15 & 16 = German WWII Mauser P.38 in 99% (mint) condition with typical late-war red mottled grips. This late-war variation (byf 44) shows some original machining on metal due to lack of polishing during war-time production. Unfired condition with slightest holster wear observable on slide in front of the "P.38" marking. Diagonal machining evident on frame around trigger guard (good eyes may be able to spot the "WaA135" Waffenamt proofmarking). Pretty hard to get better condition than this.

Photos 17 & 18 = Late WWII German P.38 in 99%+ original condition. "cyq" slide marking designates Spreewerke manufacture - notice visible circular machine marks indicative of most Spreewerke P.38s. Initially, this factory was set up for producing railroad locomotives requiring heavy industrial machinery and tooling. When it was converted to P.38 manufacture in late war, the high cutting rates and tooling were not switched over to more delicate handgun manufacture - hence the outward rough machining appearance. This late in the war, even the quality-conscious Germans did not have time to finish these guns to commercial specifications - over 250,000 pistols were made in less than two years.

Photos 19 & 20 = German WWII Walther P.38 with rare military high polish in 97% - 98% original condition. Note how exterior frame and slide finish differ from Photos 21 and 22. Whited-in numbers and slide logo were not done at the factory, but many collectors apply this removable treatment to highlight the markings. First variation ac 41 (ser. range #1-4833 b) can be detected by "ac" on left trigger guard. Walther switched to rough military blue finish in third variation ac 41 (ser. range 5015 I - 9573 J) for the duration of the war.

Photos 21 & 22 = German WWII Walther P.38 in 95% original condition. Typical military style finish with machine marks and finish imperfections. Rear right side of slide appears to have been "touched up", as horizontal milling marks faded out in circular blotchy area in front of serrations. One-line "ac 43" slide legend indicates later mfg. as well as the Walther type dark brown grips. Front grip strap shows normal wear, as does front of slide and barrel (note shininess). Overall, a good original specimen of a common German WWII military handgun. Normally seen at \$400 in today's marketplace, this specimen drops to the \$325 range due to the alteration.

Photos 23 & 24 = Walther "O Series" P.38 (mfg. 1940) with slide banner, in 93% - 95% original condition. This series was the third variation in testing before regular military production occurred a short time later. Observe the rare high polish throughout, indicative of handmade quality manufacture. Many specimens have red paint on rear sight applied at factory, while earlier examples have black checkered grips. Good strong original gun. Anybody catch the plum colored trigger?

Photo 25 = Mauser WWII byf-43 Model in 70% original condition. This specimen shows dark areas of blotchiness from older oxidation on slide and frame. While this pistol offers little collector value (most commonly available handguns in this condition are the same), it still maintains a minimum "spot price" as a shooter.

Photo 26 = Walther WWII ac-44 Model in 90% condition. While it appears to be original, close inspection reveals a refinished gun (note how tops of slide serial numbers and P.38 logo have disappeared when the gun was over-polished during refinishing). Because P.38's are in good supply in 90%+ original condition, this lowers the value to shooting status.

Photo 27 = Walther PPK Wartime Nazi Police Issue, 7.65 caliber - overall 80% condition. Note areas of bluing wear and rough machining marks on frame (with Nazi Eagle C marking). Plum colored trigger indicates different metal/bluing combination, normal for this period of late war manufacture. In this condition, it is still in the \$295 - \$325 range.

Photo 28 = Pietro Beretta Model 102 .22 LR Target Pistol in 90% original condition. Carefully studying the colors of this gun will indicate three different types of steel/alloy used in its construction. The upper barrel sleeve is a grayish color indicating a different type of pot-metal - all correct for this particular type of construction.

Photos 29 & 30 = 1916 dated WWI military Luger, all original and in a frequently encountered condition (80% overall). Note pitting on bottom of sideplate and "straw" freckling on safety lever, trigger, and takedown lever. Note traces of fire bluing remaining on transfer bar and that all numbers match. Careful examination reveals that grip screw has had a bad screwdriver (and careless hand) to it. Takedown reveals a very crisp bore - indicative that this gun probably was carried a lot more than it was shot. A definite plus on any WWI Luger.

Photos 31 & 32 = 1941 dated WWII Luger in 98% original condition with matching magazine; note how sharp all corners and edges appear; nice crisp numbers on all parts. "2" appears somewhat faint on takedown lever, but is factory weak strike. Grips have nice sharp checkering, except for lower and upper left corners. Horizontal machining striations on trigger and frame metal around trigger guard are definitive signs of original finish on this variation. In today's marketplace (this gun also has a 1940 dated holster that is correct for the gun), this gun has strong collector base and would probably command \$1,500.

Photos 33 & 34 = Fabrique Nationale WWII Browning Hi-Power 9mm Parabellum in 98% original military finish, note Nazi Waffenamt "Wa140" markings on slide and frame. Compare slide legend to gun in Photo 36 - a beginning collector may suspect this gun has been polished a little bit too much before rebluing, thus the faint slide legend. NOT the case - military slide legends can and do look like this. The tangent rear sight makes any WWII Hi-Power in 98% original condition almost double in value (in this case, approximately \$1,195). Unslotted rear grip strap. When finish appears better than this on some WWII military handguns, you may suspect possible refinishing.

Photos 35 & 36 = Fabrique Nationale pre-war Commercial Hi-Power with tangent rear sight and slotted for shoulder stock. Approximately 90% original condition. Note how Commercial proofmarkings and slide address differ from those in Photo 33 - circled "H" marking on end of slide is correct. Also observe edge-wear on this specimen and how grips are in lower condition than in Photos 33 & 34. Overall, a nice original example of a pre-war slotted Hi-Power with tangent sight that would probably sell in the \$700-\$800 range.

Photos 37 & 38 - Mauser "Flatside" Commercial Broomhandle in 7.63 Mauser caliber - 99% (near mint) original condition. Glass-like polished frame, milled-out receiver rails, and concentric ring conehammer are definitive features of this variation. Note nice original yellow strawing on trigger and fire bluing on safety lever and meter adjustment on upper 1,000-meter tangent rear sight. Bore is crisp also. With matching shoulder stock (not pictured). Condition-wise, they don't get much more pristine than this.

Photos 39 & 40 - Mauser 1930 Commercial Broomhandle in 98% original condition. The Mauser banner above grips on frame, solid receiver rails, 12-groove grips (somewhat worn on the bottom), and sideways "Crown U" proofmarks are all indicative of late commercial broomhandle production. This gun has a 920,000 range serial number and the end of production was approximately 921,000. A nice original gun that in the 1931 - 32 Stoeger's *Shooter's Bible* was priced at \$68 (including stock). Ahhhhh - to have a time machine and go back with a few C-notes on board.

Photos 41 & 42 - Before and after photos of a rare Gabbett-Fairfax Mars Pistol manufactured in 1901 by the Mars Automatic Pistol Syndicate Ltd. Top photo reveals severe pitting on frame side just above the trigger and spring housing. The bottom photo was taken after an extensive professional restoration. Carefully observe the straw and bluing colors as opposed to before the restoration. Also, more and more professional restorations like this one are being completed with intentional slight aging to make the specimen look more natural (i.e. most collectors don't like fresh paint). While the controversy continues on restoring firearms, a quality restoration such as this will usually enhance the value of a "tired" rare and desirable specimen.

Photo 43 = Colt Pre-War New Service revolver in mint overall original condition. Notice the grip condition and barely distinguishable vertical striation between cylinder lock-up notches. A high-luster finish, near-perfect bright bluing, and mint grips all add up to a desirable, original specimen.

Photo 44 = Colt Model 1909 U.S.M.C. in 95% original condition with "light freckling". Observe polishing and coloration of bluing. Colt double action collectors should immediately key in on the fire blued screws, especially the one holding the grips in place.

Photo 45 = Colt Model 1909 U.S.M.C. in 90% overall original condition. Note holster wear on barrel tip, striations between cylinder cutouts, and shininess on frame edges. Compare grip screw coloration, muzzle wear, uniformity of Colt prancing stallion marking, and upper trigger bluing to Photo No. 44.

Photo 46 = Colt Model 1889 Double Action in approximately 60% original condition. Notice amount and location of wear, especially upper scratching in back of cylinder. This specimen's condition is about average when examining a number of similar models at a gun show. Still, an older all-original Colt.

Photo 47 = Colt Model 1851 U.S. Navy contract in approximately 90% overall condition. Note case colors remaining on frame, perfect frame screws, and brass grip straps. Cylinder scene is very crisp, and a few readers will spot the inspector cartouche on bottom of grip. A very desirable specimen.

Photo 48 = Colt Model 1851 U.S. Navy contract in approximately 70% - 80% original condition. Note the oxidized brownish splashes on barrel and areas of frame. Cylinder scene again is very sharp and screws show no tampering. In today's marketplace, still 50-60 C-notes of value.

Photo 49 = Colt Model 1851 U.S. Navy contract in 30% - 40% original condition. Note thinning and grayish patina color of bluing. Overall, a very clean original specimen showing honest wear that still deserves a proud placement in any Colt cap-and-ball aficionado's collection.

Photo 50 = Colt Antique (pre-1899 manufacture) Single Action Army (SAA) manufactured in 1875 - a third year gun. Note high luster finish and case colors on this 90% - 95% gun, also observe barrel and cylinder "freckling". If you are a Colt SAA collector, this addition would be a treasured prize.

Photo 51 = Colt 3rd Model Dragoon in approximately 80% overall condition. A beautiful specimen considering 1851 manufacture. As in some other Colt's, note the fire bluing on frame screws and trigger. Also notice the still visible cylinder scene indicating careful use. Overall, this specimen's condition is in the top 20% of its graduating class.

Photo 52 = Colt 2nd Model Dragoon with no finish remaining. While appearing original, this pistol has been artificially aged giving it an older appearance. Fakes in rarer Colt models have become more elaborate. Always get a receipt indicating condition (original or otherwise) when purchasing older Colt's in this price range.

Photo 53 = Model 71 Deluxe Rifle with 98%+ bright shiny original blue overall. Most dealers would consider this a mint specimen. Note how sharp the points of the checkering are. While this gun is not 100%, it is close. Observe the slight wear on rear hammer curvature and corners of frame. The darker appearance is normal on this model.

Photo 54 = Model 1894 Carbine with 95%+ bright shiny original receiver finish and 100% barrel/mag. bluing. Winchester collectors will recognize this as a very fine early gun by the bright vivid case colors still intact on the lever and hammer. This is an extremely desirable specimen - many dealers would call this mint, but corners of frame/loading gate and wood show a little wear. Light dings/scratches on wood are normal.

Photo 55 = Model 1894 Rifle with 90%+ bright shiny original blue on receiver and 98% barrel/mag. blue. Compare almost faded case colors on lever and hammer to Photo No. 54 - again indicating an early gun. Wood is also excellent with perfect fit to metal. A lot can be learned by concentrating on the receiver/lever corner and edge wear on Photos 54 - 63.

Photo 56 = Model 1892 Rifle with 85% - 90% original bluing with some light handling and storage marks. Note the darkness of the wood and the mostly shiny forearm cap. Also, observe the color of the bluing is turning a light patina (oxidized bluing which turns a plum-brown color after aging) compared to Photo No. 57. Overall, a nice original specimen.

Photo 57 - Model 1892 Pistol Grip Takedown Rifle with 75% - 80% original receiver bluing. This is a clean, sharp gun showing no abuse - only normal wear. Notice that the checkering shows wear on the stock and forearm, and the lever has turned shiny due to use. Observe the receiver metal condition compared to Photo No. 61 - while retaining less finish, this rifle is more valuable than No. 56 because of the bright bluing factor.

Photo 58 - Model 1873 Deluxe Rifle with 60% - 70% vivid receiver case colors, 95% barrel blue, and slight oxidation throughout receiver. Observe the natural color mottling on sideplate and receiver rear - also some small brown rust spots from improper storage can be seen on receiver front. Original bright case colors are extremely desirable on any older firearm.

Photo 59 - Model 1892 Takedown Rifle showing approximately 60% receiver finish and 95% barrel blue. Notice that the balance of the receiver has flaked and turned brown. Also, close observation indicates that the frame screws have never been damaged by a screwdriver. Edge wear on this gun is not as prominent as it could be, probably indicating little scabbard use and mostly carrying wear.

Photo 60 - Model 55 Takedown Rifle retaining 40% - 50% of what appears to be an older reblued finish (note how frame corners are rounded due to excessive polishing compared to those on Photo No. 59). The dark wood is generally in good condition. Notice that the top frame screw shows damage and that the lever has been bent (is not flush against lower tang) due to older abuse.

Photo 61 = Model 1894 Takedown Rifle with 40% original blue turning brown on frame and 90% barrel blue. The bottom and top of receiver and takedown ring have turned silvery from handling. This is normal wear and consistent with the rest of the gun's condition. Note that back of forearm wood sticks out next to the takedown ring indicating originality. On some refinished guns, the wood will appear lower than the receiver metal.

Photo 62 = Model 1894 Carbine depicting 20% receiver blue and 90% barrel/mag. blue. Notice the pattern of wear and how the balance of finish is turning a gun metal gray, including the barrel band. This carbine's condition is typical of many older Winchester's. A well used specimen showing no abuse. Receiver screws have been muscled-out once or twice.

Photo 63 = Model 55 Takedown Rifle with no receiver blue remaining (it has flaked off) and 50% barrel/mag. blue. The wood is in very good condition. This is commonly referred to as a "shiny gun". While this gun appears in poor condition due to flaking, it is still a lot more desirable than the Model 1892 pictured in Photo No. 62. Loading gate bluing remains mostly intact, and frame screws indicate no wear.

Photo 64 = Model 1892 Rifle showing a lot of wear with all metal surfaces having turned a dark brown heavy patina due to much use, some abuse (note nails in front of forearm), and neglect. In the business, this is sometimes referred to (choose two only) as "brown gun", "the parts are worth this much", "decaying roadkill", "I got this much into it", "Granopa's favorite", and is the least desirable from a condition standpoint.

Photo 65 = Model 1873 Springfield military rifle in 98% original condition, .45-70 Govt. caliber. Observe almost perfect case colors on breech block and sideplate condition. Stock condition is also consistent with balance of gun - most of the original finish with a few slight nicks and dings. In today's marketplace, this all adds up to \$1,350. Original sling (and other accouterments) are very desirable to military collectors.

Photo 66 = Winchester Model 1886 Deluxe rifle in .40-82 W.C.F. caliber - 90% bright case colors with frame "freckling". Note condition of case colors on hammer, lever, and frame in addition to the smooth and flush wood to metal fit - very important. Winchester and Colt collectors routinely reach way back in their pocketbook to buy this type of good stuff. Less than 1 out of every 1,000 Model '86s look like this!

Photo 67 = Winchester Model 70 Pre-War Super Grade in .22 Hornet (rare) with 99% overall original condition. Eagle-eye readers (and Model 70 aficionados) will note the extra screw on top of rear receiver - the two in front are correct from the factory. In terms of value, it's a \$500 hole (read that subtract \$500).

Photo 68 = Winchester Pre-'64 Model 70 Super Grade rifle in .300 H&H Magnum caliber - 98%+ original condition with non-factory Griffin & Howe scope mount, a popular option at the time. However, because Model 70 collectors don't like to see three extra screw holes and a chunk of stock missing, the price goes from \$1,675 to \$750 in a hurry. Any other questions about alterations on a major trademark?

Photo 69 = L.C. Smith Field Grade (hammerless). A mint specimen of an L.C. Smith Field Grade - unusual, since most Field guns saw heavy use while higher grades mostly saw the gun cabinet. Notice the way the case colors on frame top are mottled, wood to metal fit, and the checkering without points (common in most domestically manufactured field grade models).

Photo 70 = L.C. Smith Ideal Grade with approximately 30% original case colors remaining. This gun has been pictured from the bottom to emphasize the shininess that accumulates on the front and bottom of frame during much use. Note markings on receiver bottom, nail alterations to forearm, and visible stock cracking (adding up to a 40% decrease in value).

Photo 71 - Parker Brothers 20 gauge VH Grade on "0" frame that has been poorly refinished (note the incorrect color patterns on the receiver and opening lever color case hardening). Parker collectors will immediately key on the non-original case colors. Observe the difference between the redone case colors and the original L.C. Smith colors in Photo 69. If this was real - \$3,250. The way it is - subtract approximately 50%.

Photo 72 - Older German 16 gauge back-action with hammers in 60%-70% overall condition. Observe case colors centered around pins on sidelock. While many European non-major trademark shotguns (and rifles), including this one, are extremely well made with the finest of materials, domestic collector interest to date has been minimal. Typically priced at \$450 - \$750, depending on condition and the quality/level of embellishments.

Photo 73 = Remington Model 870 Wingmaster Lightweight 20 gauge Magnum (3 in. chamber) in mint condition. Many dealers may describe this in "as new" condition. Note, however, slight wear on slide rail. Breech block also shows almost no wear with correct vertical machining striations.

Photo 74 = Remington Model 870 slide-action 12 gauge in 95% condition with oxidation freckling occurring on corners of receiver bottom - the pump workhorse champion for both blue and white collar shooters for over four decades. They're not rare - they made millions. Seen priced at gun and pawn shops in the \$175 range.

Photo 75 = Remington Model 1100 Special Purpose 12 gauge Magnum in 95% overall condition. On newer shotguns featuring this type of dull/matte finish, it can be difficult to determine how much it's been used. Observe the horizontal striations on the back of breech block - this gun's been fired more than a few times. Usually priced in the \$300 range.

Photo 76 = Remington Model 870 12 gauge side action shotgun in 75% - 80% overall condition. Pitting and shininess on front bottom of frame and magazine tube is normal, this is where the hunter carried the gun - probably without gloves since corrosive acid from hands has removed bluing.

Photo 77 = What's wrong with this picture? Winchester Model 12 in 99% reblued condition. If you can't figure this out, you better put a one-year moratorium on your next Model 12 transaction until you bone up on Model 12 finishes. Probably the victim of some 1960s gunshop "\$29.95 to reblue your gun - sale ends Friday!". The price tag usually reads "Normally \$275 - this week only, \$195!"

Photo 78 = Older Stevens 16 ga. slide action in 60% turned patina condition. Note overall grayish receiver color with brown oxidation splotching and stock crack. Screws have also been amateurly muscled out. This gun has no collector value. Figure out the shooting value and don't pay a penny more.

Correspondence/Appraisals Information

Our policy regarding the evergrowing correspondence inquiries and appraisals has been changed to the following:

Correspondence that is mailed, FAXed, or E-mailed in and requires a written reply after the research has been completed will be billed at \$20.00 per gun (up to five guns). At six guns, the fee drops to \$15.00 per gun. Payment by check, money order, or major credit card should accompany all correspondence requesting this information/appraisal service. Correspondence sent in without payment will be returned.

Individuals requesting a photocopy of a particular page or section from this newest edition for insurance or reference purposes will be billed at \$5.00 per page up to four pages and \$3.50 per page thereafter.

Individuals who request a telephone appraisal(s) or additional information but do not require written documentation will also be billed at \$5.00/gun. Payment can be made with most major credit cards or personal check.

Phone calls regarding firearms related questions are normally taken between 2-5 pm daily, Monday-Friday during most weeks, unless the responses to written correspondence preclude phone time or when we are unavailable. Voicemail messages and/or call-back slips may be returned, time permitting.

To make sure we can assist you with any correspondence, please include good quality photos of the specimen in question, any information available about that particular specimen, including caliber, barrel length, finish, stocks, barrel markings, and other potentially significant details that would assist us with identifying your gun, and special order features. In addition, be sure to include both your address and phone/FAX/E-mail number(s), giving us an option of how to contact you for best service. To keep up with this constant onslaught of firearms related questions, we have one of the most complete and up-to-date firearms libraries in the U.S., in addition to a large network of both dealers and collectors who can answer some of the questions we receive expeditiously.

For those of you who would like to sell a firearm(s) or have an item(s) appraised that are either difficult or impossible to try to do by written correspondence/FAX, we can assist you in the following manner. Our established international network of reliable dealers and collectors allows your particular appraisal/sell request to be referred to the right company/individual, based on both your region and area of collectibility. Remember, even modern guns (post-1898 mfg.) sent for appraisal must be shipped from one FFL holder to another. In other words, modern guns sent in must be shipped from one licensed gun shop/dealer to another. If this is not convenient for you, we will try to match you up with a selected dealer (from your particular area) to perform this appraisal/potential sale.

In the past, we have answered thousands of gun questions at no charge. In the future, this phone service is possible only when all paid correspondence is caught up. Thank you for your patience and understanding on this matter.

All correspondence should be directed to:

**Blue Book Publications, Inc.

E-mail: bluebook@bluebookinc.com

SORRY - No order or request for research paid by credit card will be processed without a credit card expiration date.

A Unique Concept

The Blue Book of Gun Values is the only book that:

- ✓ Utilizes the professionals' grading system of percentage of original finish remaining - this eliminates confusing descriptions such as "Good", "Excellent", "Fair".
- ✓ Is updated annually and expeditiously providing the freshest information available!
- ✓ Is based on actual selling prices. These are the prices you can expect to pay — not artificial list prices or some "expert's" opinion.
- ✓ Offers you personal consultation by mail on special questions you may have! No book can cover everything.

Individual appraisals and/or additional research can be provided for a fee per gun (see the "Correspondence Inquiries/Appraisals" section on page 68 for more information including prices on this service). Please include a detailed description with all pertinent information about the gun(s) in question in your letter/FAX/E-mail. Good quality photos of the receiver, special markings, etc. would also be appreciated.

BUYING OR SELLING?

Interested in buying or selling a particular firearm(s)? Or maybe hesitating because you are unsure of what a fair market price should be? Depending on what you are interested in, a referral will be made that will enable you to be sure that you are getting what you paid for (or getting paid a fair price). This service is designed to help all those people who are worried or scared about purchasing a potentially "bad gun" or getting "ripped off" when selling. Our established international network of reliable dealers and collectors allows your particular sell request to be referred to the right company/individual, based on both your region and area of collectibility. There is no charge for this referral service (a thank you would be nice) - we are simply connecting you with the best person(s)/company possible within your field of collecting ensuring that you get a fair deal. This hybrid matchmaking can make 25%- 50% worth of difference on potentially buying or selling a gun. All replies are treated strictly confidentially. Written correspondence/replies should be directed to:

GUNS

ON THE

AUCTION BLOCK

"...thuttyfibe-anna-foty-anna-foty-dollah-weeyagimme-foty-NOW-fibe-anna-fotyfibe-weeyagimme-fotyfibe-foty-dollah-bit-now-fibe..."

Scratch your nose & you bought it, bubba. It's an auction and Common Knowledge says that auctions have come more & more to shape the collectible gun market over the past decade.

"Fifty thousand bid on the phone. Is there any advahnce at fifty thousand? Fifty thousand. Fair wahrning..."

Stories abound of record prices and unbelievable bargains. Both? How can that be? Are these people crazy or what? And can you really buy army jeeps at government surplus auctions for \$29.95 like it says in the back of comic books?

In this article, we'll take a look at how auctions **REALLY** work, how to buy and sell to best effect at auction (and just as importantly, when not to), the impact auctions are having on collectible gun values, and the future of firearms auctions (I'm just gonna make up that last part).

TYPES OF AUCTIONS

You'll find guns at all sorts of auctions, from the weekend farm or estate liquidation sale which happens to have a single-shot 16 gauge and a Western Auto .22 in the mix, to large firms specializing in firearms auctions and who move millions of dollars worth of guns a year.

Often, the bargains are not where you think they might be. My theory is that the best way to get double retail value for a rusty old clunker is to throw it into a general farm auction. All the guys getting bored waiting for their wives to buy glassware by the piece will take a glance at the old gun, and it will start to work on them. By the time it comes to the block (usually late in the sale, to hold the audience), half a dozen guys, most of whom have only a vague idea about gun values, will have been waiting for 3 hours for a chance to bid on it, and they'll be danged if they're going to lose it for lack of a \$5 bid raise. Heck, it's an auction, so it's got to be a bargain, right? Besides, that other guy was willing to give \$90 for it, so it's *gotta* be worth at least that ...

Let's take a closer look.

I classify gun auctioneers into three types — local, regional, and national.

Local auctioneers are usually general auctioneers conducting weekend sales as a part-time business or running a once or twice weekly consignment sales barn. Their advertising will usually consist of a listing in the classifieds of the local paper, handbills posted at gas stations, and single sheet mailings to their regular bidders. If they have a bit of gun savvy and a good mailing list, they can do an outstanding job of selling popular sporting model firearms as part of their general auctions.

Regional auctioneers with firearms as a sub-specialty often get good gun collections for sale, and many will have special gun auctions at regular intervals. The good ones advertise in some of the national gun publications such as Gun Journal, Gun List, and Shotgun News, and usually publish a list of the items for sale, which is mailed to a list of proven bidders. They are not "national" level auctioneers simply because they do not publish an illustrated catalog with full descriptions enabling absentee bidders to bid by phone or mail, and hence tend to draw their buyers from adjoining states rather than nationally & internationally.

The full-blown **national level gun auctioneer** is usually either a gun dealer turned auctioneer or has a knowledgeable gun expert on staff. Firearms are either his main specialty or one of the house primary areas of focus. They publish an illustrated catalog with full descriptions and usually an estimated value range. The catalogs can be lavish slick full color affairs that sell for \$40 a pop, and serve as valuable references themselves, especially if the auctioneer sends out a "prices realized" report to catalog subscribers after the auction.

National level auctioneers may conduct either "**live auctions**" or "**mail auctions**". Usually an auctioneer will specialize in one type or the other — seldom both.

A **live auction** occurs with bidders in attendance placing their bids live as each item comes across the block (or, at some auction houses, is shown on a video screen). Bidders not in attendance (“**absentee bidders**”) may still participate by sending in mail bids (“**sealed bids**”), or sometimes bidding over the phone during the live auction.

Mail auctions (sometimes called “**silent auctions**”) accept mail or sometimes phone bids up to a certain date. After the deadline, the bids are tabulated by the auctioneer, and the items sold to the best bid received before the deadline.

Remember that the atmosphere of an auction can influence the bidding, and auctioneers are well aware that two very different approaches can be equally effective. The white-glove approach of deluxe presentation in a well-appointed auction gallery or first class hotel with attentive but reserved staff and hushed bidders holding up numbered paddles to bid tends to create the impression of exclusive rare and valuable merchandise. On the other hand, the full-auto rattle of a cattle-sales-barn auction chant sung at a sale-in-a-big-ol-tent with the church ladies auxiliary selling homemade pie and hyper-active ringmen in jeans and gimme caps “yippin” and “ho-in” while bidders wave, wink & nod gives the bidder the feeling that “here be bargains” and can encourage enthusiastic and even reckless bidding.

Personally, I like the latter approach. I went into auctioneering because I firmly believe that a man should have a profession where he can wear a cowboy hat and boots. I’d got out of construction and I don’t know how to drive an eighteen wheeler, so that pretty much left auctioneering. The smart bidders will look past the environment and focus on the merchandise, it’s value, and what’s *really* going on with the auction.

Auction catalogs range from simple lists to elaborate full color books.

WHEN IS AN AUCTION NOT AN AUCTION?

We all know what an auction is — an item is put up for sale, and it goes to the guy willing to bid the most, right? Well..... sometimes.

Leaving aside for the moment the small minority of unethical auctioneers, the best advice any potential bidder can heed is to READ THE TERMS & CONDITIONS published in the auction catalog or posted at the sale. If you find none, carefully check the wording of the ads and the small print on the bidders registration form. Listen to the “boring technical stuff” that the auctioneer says before he starts the sale. If you don’t understand the terms, ASK.

“**Absolute auction**” is one of the terms you want to see. This means that the sale will be conducted with no reserves, no minimum bids, and no buybacks — exactly the type of sale most folks think of when they hear the word “auction”. It means that you will be competing with other actual bidders to buy the piece, and that the item will be sold to the highest bidder, regardless of the final price. In practice, only a minority of auctions are absolute auctions.

It is not widely understood among the general public that *unless* the sale is advertised as an “absolute auction”, the item may or may not sell to the high bidder, depending on the discretion of the auctioneer and the owner of the item being sold. And in most cases, the bidders will never know whether or not the item actually sold.

If an auction is not absolute, the more credible auctioneers will often include a brief note on their sales policy in the terms & conditions. Here’s what some of those terms mean:

“**Subject to reserve**” means that the piece has a “reserve” price or minimum bid which must be met or the item will not be sold. Seldom will an auctioneer publish or announce the exact dollar amount, nor even indicate which items in the sale are subject to reserve. Those who have tried publishing reserves have often found it can cool an entire auction. An item which doesn’t reach it’s reserve is sometimes called a “no sale”.

“**Subject to confirmation**” — the auctioneer will confer with the seller, and if the seller is happy with the price reached, the item will be sold. If not, no sale. Sometimes the auctioneer will take bids until the bidding stalls, but not say “Sold”. Instead he will confer with the seller. If the seller indicates the price reached so far is sufficient, the auctioneer will re-open the bidding where he left off (often to the consternation of the current high bidder), announcing that the item will absolutely sell. Bidders who were hesitant to bid before may jump in at this point, since they know they can’t go negotiate a “private treaty” sale with the owner after the auction.

“**Buyback**” is the practice of the original owner or his agent bidding on the item he has placed in the sale until it reaches a price he’s happy with. If it never gets there, he just “buys it back”. Many reputable auctioneers will try to prohibit buybacks, insisting that such situations be handled as reserves. Those that do allow it will usually insist that any consignor who bids on & “buys back” his own items will pay the

auctioneer a fee for doing so — often the auctioneer’s commission on the item. This has the effect of somewhat leveling the playing field for the other bidders, since the owner has some incentive to “let it go” if the item comes close to bringing a fair price from the other bidders.

“**Buyer’s Premium**” is another term you must understand. It means that a certain percentage will be added on to your bid if you are the successful bidder. Many local and even regional auctioneers have no buyer’s premium. Most national level auctioneers do. Ten percent used to be the most common. If an item was knocked down “Sold” to your bid of \$1,000, you would have been charged \$1,100 when it was time to settle up. Many of the large national auctioneers have recently gone to 15% buyer’s premium. And then there’s sales tax... Oh yeah, shipping and packing — did I mention shipping & packing? It is *good* to be The Auctioneer.

“**As is, where is**”. This means that if the auctioneer calls it “most likely a Colt Walker with 91.3% original factory finish used by Billy the Kid”, and you buy it, and after the auction you discover it’s actually an Uberti spray painted black after use as a tub toy, you still own it. Period. It also means that if you got a heck of a bargain on that pawn shop size gun safe, it’s up to you to get it out of the building, down those two flights of stairs, and hauled away without damaging the premises, and by the close of the business day.

Even when items are not advertised “as is, where is” you need to closely read the Terms & Conditions to see the extent to which the auctioneer stands behind his catalog descriptions. Usually there will be language to the effect that “we did the best we could but we do not guarantee the descriptions”. A common practice is to guarantee the bold face listing of what the item physically is, but not the extended description. Consider the following listing in such a situation — “**Winchester Model 70, .30-06, pre-64 in NRA Excellent condition, retaining 98% original blue with minor scratch on the left side forend of special order fancy walnut stock.**” If you buy it, and in your opinion it’s reblued and restocked, your complaint may not get far if the auctioneer only guaranteed the boldface print.

Smart auctioneers, however, realize that their future success depends on accurate descriptions, and do their best to be as clear and correct as possible. Some of the better ones may try to offer some relief if the item varies significantly and obviously from a catalog description, even if the description was not guaranteed. None, however, want to debate the difference between 97% and 98% condition with a finicky bidder suffering buyer’s remorse.

On the sales block, it is common to hear the auctioneer praise in glowing but non-specific (and non-actionable) terms — “Hey that’s a nice one.” “Boys, it’s a WINCHESTER!” “You don’t see em like this anymore.” “Used not abused.”

What you will generally *not* hear are specific representations, such as “Guaranteed to be in working order.” “All original finish remaining.” “Made in the 16th century.”

HOW TO DO AUCTION

If you're coming to one of my sales, just leave your hand up and I'll tell you when you've bid enough. Anywhere else, here's how to do it —

Preview — Be sure to inspect all items you may bid on carefully *before* the sale. Usually there will be a preview period, sometimes the day of the sale, sometimes a day or two ahead of time. If you don't have comprehensive product knowledge on the items you're interested in, try to bring someone who does. Many dealers will inspect auction items and even bid for a customer for a fee. At a good auction, the staff will do their best to be helpful, but remember that their knowledge may be limited, and their verbal assurances are usually disclaimed by the Terms & Conditions.

Registration — You register and get a bidder number before the auction. Check the payment terms before the auction — if you plan to make substantial purchases and want to pay in any form other than cash you may be disappointed. If you want to pay by check, contact the auctioneer a couple weeks ahead of time to see if it is allowed and if it needs pre-approval. Also, many local & regional auctioneers don't take plastic.

Staff — The auction staff consists of the “auctioneer”, who is the overall manager of the auction and may or may not actually call the bids, the “bid caller” or “crier” who is doing the sales chant, “ring men” who help the auctioneer spot bids & act as cheerleaders encouraging bidders,

(Jim Supica and Eve Supica) — At a live auction, the auctioneer or crier calls the bids, the ring man holds the item being sold, and helps spot-bid, and the clerk writes down the buyer and price.

the “cashier” who takes your money when you check out, and the “clerk” who is writing down who bought what for how much during the sale. NEVER ask the clerk a question. Talking to the Clerk during bidding is grounds for justifiable homicide by the auctioneer in Kansas and Oklahoma.

Bidding — There are no hard & fast rules about how to signal your bid. There are different customs different places, but usually raising your hand gets it done. Be aware that if you raise your hand or paddle and leave it up, the auctioneer will assume that you are continuing to raise your bid against other bidders. Try to be too subtle “just like in the movies”, and the auctioneer may miss you tugging your ear lobe or assume that you merely have a severe facial tic as you wink & wiggle your eyebrows.

What’d he say? — It’s not really hard to understand most auction chants if you pay attention. In most styles, the auctioneer is saying two numbers — the amount that is currently bid on the item and the amount he wants for the next bid. Consider the example from the beginning of this chapter —

“...thuttyfibe-anna-foty-anna-foty-dollah-weeyagimme-foty-NOW-fibe-anna-fotyfibe-weeyagimme-fotyfibe-foty-dollah-bit-now-fibe...”

Here, the auctioneer has a bid of \$35, and is asking for a bid of \$40. He then receives a bid of \$40, and is asking for a raise to \$45 — “35 and 40; and \$40, will you give me 40? (bidder nods, bidding \$40) Now five, and 45, will you give me 45? \$40 bid, now five.” As you can see, the crier will often drop the prefix of the dollar amount — asking for “five” instead of saying “45”. Auction chants often include throwaway words to tie the chant together. In this example the auctioneer is adding “and a” between phrases. Listen for the numbers, and ignore the jabbering.

Settle-up & checkout — When you’re done bidding or the auction’s over, you go to the cashier & pay up. There may be a slight delay between the last item you bid on and the time that information gets to the cashier. There’s usually a long wait at the end of the auction, so if all the items you were interested in have sold, you might want to settle up before watching the rest of the sale. Usually you can still bid if an irresistible bargain comes up. Generally, the cashier will give you individual tickets for each item purchased or a printed receipt for all purchases, and you can take that to the item pick-up area to claim your items.

Of course, responsible auctioneers will comply with all firearms laws, including any applicable waiting periods on modern firearms, and in those cases they will advise you on how to complete the paperwork and when to pick up your guns. Do the auctioneer and yourself a favor, and be sure the purchase you have in mind will be legal for you *before* you start bidding.

Most large auctioneers can arrange packing and shipping at your expense and at your risk if you wish. It is not unusual for there to be as much as a six week wait for shipped items after a major auction. Everyone wants their goodies tomorrow, and it can’t physically be done.

Can you spot the 'sleeper' in this group of auction guns? I couldn't. My pre-auction catalog 'guesstimate' for the big flintlock at the top was \$400-\$800. However, several astute absentee bidders recognized its true value and chased this Potzdammag pistol to the \$2,000 mark. Proof of the value of an illustrated catalog for the more esoteric collectible guns.

BIDDER PITFALLS

Common bidder afflictions -

Not inspecting the merchandise ahead of time. If you don't inspect, don't bid.

Not setting your limits. *Never* start bidding without knowing when you plan to stop.

Rabbit in headlight syndrome. Not knowing when to start. "It was going so cheap, I thought something must be wrong." Some folks freeze up when it's time to jump in and bid, and so miss outstanding bargains.

Pitbull syndrome. Not knowing when to stop. Stick to your limits. Don't assume that the other bidder knows what he's doing. If you just bid til you've bought it, you may have just let the *second* dumbest person in the room determine your price. Think about it.

Buyer's Premium Blindness. Auctioneers rely on the fact that many bidders will ignore the buyer's premium in setting their limits. If the bidder is going to bid up to \$500, he'll go there whether the add-on is zero, 10% or 15%. If you want to spend no more than \$500 for an item at a 10% buyer's premium sale, stop at \$450.

Conversely, don't be put off by a buyer's premium. Wouldn't you pay an extra 10% or 15% to a dealer at a gun show for the best example of an item you wanted at the lowest price in the room?

Mail bid stupidity. Exactly *how* is the auctioneer going to place your absentee bid? At most *live* auctions, if they allow absentee bids in addition to live on-site bidding, an honest auctioneer will treat your absentee bid as if you were there in person, and will try to buy for you as cheaply as possible without going over your "maximum bid". If you submit an absentee bid for \$1,000, and the live bidders only go to \$700, the auctioneer will buy for you at the next increment (probably \$750).

You should be aware that in most mail-bid *only* auctions, the procedure is the exact opposite. If you send a bid for \$1,000, you will buy it for \$1,000 or not at all, even if the 2nd bid is \$35.

Understand how your absentee bid will be handled, and bid accordingly.

Not doing your homework. The world of auction prices can sometimes venture into Never-Never land. Do your groundwork *before* the auction. What would you have to pay for that type gun at a gun store or gun show? What is the asking price in the classified ad gun sales papers or gun dealers catalogs? You may do better by going home empty-handed from the auction and buying a similar item cheaper at the next gun show or at your friendly neighborhood gun shop — where you don't have to buy "as is, where is".

Sniveling — Stand by your bid. Don't try to weasel out of it, which brings us to our most assuredly fatal affliction —

Pissing off the auctioneer. Don't wave your arms in an animated conversation when you aren't bidding. Don't stand up & shout "I think that gun's been reblued". Don't say "Oh five *thousand* — I thought I was bidding five *hundred*," or "Oh, the *Ruger* — I thought I was bidding on the *Luger*". Don't try to make a \$5 raise on a thousand dollar item. The auctioneer has the gavel and he *will* get even. Most likely when your "must have" item comes up.

GAMES AUCTIONEERS PLAY

Always remember that the auctioneer is working for the seller. His job is to get the best price possible for the goods being sold. Smart auctioneers realize that their reputation for fairness to bidders is the foundation of being able to get a fair price for their sellers. Those who are more short-sighted may go for the quick buck, and should be avoided. Below are some examples of auctioneers' sleight-of-hand which you would do well to recognize. Some are fair tactics, some border on the unethical, some are illegal. Sometimes the line is fuzzy.

Jump start — An auctioneer can grow old waiting for an opening bid. Most, but not all, auctioneers will go ahead & start the bidding if necessary at some number that they think is way low for the item being sold. Generally there is little harm in this. *If* the auctioneer's right about

the value of the item *and* there are at least two interested bidders, (two pretty big “if’s”) the item will wind up selling at about the same price regardless of how it opens, and everyone benefits from the auction not dragging out interminably. Watch for auctioneers who sing like they’ve got a bidder “on” when they start, but then have to back up & ask for a lower bid. Watch for ringmen who call out a bid lower than the number the auctioneer is crying, and then get a response from the auctioneer like “No, I’ve got *real* money on this one.”

Running the bid — Sometimes an auctioneer will let a bidder bid against himself, raising his own bid, or will pretend to have a second bidder when there is only one. This technique is sometimes used as a method of protecting reserve prices. If the solo bidder hits or passes the reserve, the item is sold to him. If he doesn’t hit the reserve, the item is sold to a “house number” — a fictitious bidder number reserved for buybacks & “no sales”. This practice is also called “selling to the post”.

Absentee Bidder Abuse — The auctioneer has an ethical obligation to treat all absentee bids fairly and consistently. Unfortunately, this doesn’t always happen. Unscrupulous auctioneers may take an absentee bid at a live auction all the way up to or near to their bid limit, even if there are no other bidders past a much lower point. If you are not at the auction to see whether anyone is bidding against you, this is nearly impossible to defend against. If you are a regular absentee bidder, pay careful attention to how many of your items are purchased right at or one bid below your maximum bid. This may provide a clue.

At cataloged auctions, items usually sell in numerical order. Nice Browning at top - but did you spot the salt wood rust problem? How about the crude grip chip repair on the Luger? If the items are sold ‘AS IS, WHERE IS,’ don’t go whining to the auctioneer after the gavel falls -you own it.

There are legitimate reasons why an auctioneer may be running away with absentee bids, the most common of which is two absentee bidders, both of whom were willing to go much higher than any live bidders. If the auctioneer has absentee bids of \$10,000 and \$12,000, he is obligated to keep going even if the live bidding stalls out at \$5,000. In this case, at a fairly run live auction, the \$12,000 absentee bidder would buy at the next bid over the \$10,000 absentee bidder (probably \$11,000). Meanwhile, the live bidders are looking around the room to see who's bidding while the crier runs past the 6, 7, 8 and \$9,000 marks without missing a beat. Totally legit auction, but it can look bad.

This is also the reason that fictional "absentee bidders" can be used effectively to run a bid up to the reserve price. The observer can't tell the real absentee bids from the fakes.

Last Look — Another practice unfair to absentee bidders, which could occur at unethical mail or live auctions, consists of giving a preferred customer (or the auctioneer himself) a sneak peek at other bidders' absentee bids, so as to get a last chance to sneak in just above the legitimate absentee bidder. A totally unethical practice. Look at it this way — if an auctioneer is willing to screw an absentee bidder by giving you a hint as to what you would have to bid to beat him, he probably wouldn't be above lying to you about the existence of such a bid.

"What do you think it'll take to buy it?" is a fair pre-auction question to ask of the auctioneer, but don't be offended if he doesn't feel he can give you a straight answer. He may be doing his best to run a fair auction by not divulging absentee bids given him in confidence.

Brother-in-law buy-back — This scam is sometimes run by the owner of the property being sold without the auctioneer's knowledge or approval. If the auctioneer has prohibited buy-backs, the owner will sometimes get a shill to stand in & buy back for him if the price doesn't suit him. Watch for an unlikely bidder who seems not to know the merchandise and who is running up the bids.

The Quick Hammer — This method cheats the seller of the benefit of a full and fair auction of his merchandise. The auctioneer starts the bidding low, and then sells quickly at a low price to a friend or even a shill buying for the auctioneer himself before other bidders have come close to their limits. In fairness to the auctioneer, it is a legitimate technique to drop the gavel fast on a few small items to get the bidders moving if the bidding is sluggish. A few low-dollar items may go at bargain rates, but it will lead to crisper bidding on the biggies. However, if you have a big item being sold in an auction, insist ahead of time that all bidders to be given a full & fair opportunity to bid.

Lowball/Highball catalog estimates — Some auctioneers will publish very conservative estimates on several or most items in their catalogs. This accomplishes two things. First, it motivates bargain-seeking bidders to attend the sale. They can't help but wonder if that Single Action Army is really going to sell for the \$350 to \$500 estimate, and if so, they want to be the buyer. Secondly, it develops a bit of a feeding frenzy in the auction — if item after item is selling at 25% above the "high" estimate, then surely this next item must be a bargain if

We were concerned that this specialized Japanese Military collection might be a tough auction. When was the last time you saw 200 Arisakas sold in one day? However, targeted national advertising, an illustrated catalog and the outstanding material in the collection resulted in an auction total at the high end of the estimated value."

it's going in the middle of the estimate range. The problem is, a wily auctioneer might overestimate a somewhat weak but plausibly expensive item in the midst of a string of low-balls to try to ride the bidders' collective wave of over-confidence in the estimates. Again, to be fair to the auctioneer, it is very difficult to guesstimate what a bunch of old guns will go for at auction. If you don't believe me, try it some time. In writing. BEFORE the sale.

Feeding the Beast — Beware the local level auctioneer who has monthly gun auctions. The pressure to consistently produce a large number of guns for a regularly scheduled sale can lead to accumulative abusive auction practices. Many years ago, in one of my earliest attempts at selling guns on consignment at auction, I was real proud of my Mini-14 & told the auctioneer I needed to get "market value" for it. Well, he "sold" it at four consecutive sales before he finally found a buyer with a bid he considered adequate. Much as I appreciated his efforts on my behalf as a seller, it gave me serious pause when I thought about bidding at any of his future sales. He's no longer in the business. What's that saying about some of the people some of the time?

Looking back over this little litany, I'm afraid I may be giving the false impression that the average auctioneer's letterhead should include a Jolly Roger as part of "truth in advertising". Such is emphatically not the case. I am firmly convinced that the vast majority of auctioneers are conscientious and ethical. I believe that the ratio of ethical to unethical auctioneers is about the same as the ratio of ethical to unethical collectors. Or of good cops to bad cops. Or of honest attorneys to blood-sucking shysters. I also believe that ethical auctioneers are the ones that survive and prosper in the long run. Plus, I know for a fact that if you do a Bad Thing at an auction, the Easter Bunny won't leave you any chocolate eggs.

To balance the scales a bit, let's look at ...

BLACK BELT BIDDING

Yes, the bidders play games too. Here are my Secret Advanced Techniques for the Professional Bidder. (No, you probably won't buy any cheaper, but you'll think you did.)

Come early, stay late — It's true that bargains can often be found in the first few and last several items in an auction. The auctioneer is going to start out fast to show the bidders he's serious and there are bargains to be had. At over-long sales where the crowd thins toward the bitter end, and the last several items can sell for half-price to the last few die-hards.

Watch the dealers — It can be a bit dicey, but if a dealer is buying for inventory, and you're buying for your collection, odds are that if you can beat the dealer by one bid raise on your item, you've done all right. Always remember, however, that the dealer *may* be bidding for one of his customers who has issued him a "must have at any price" buy order.

Dealers defense — The above is one reason that some bidders want to give subtle bid signals, so other bidders won't know who's bidding. If that's your situation, pull a ring man or the auctioneer aside before the sale or during a lull and explain your bidding signals to him. You may also want to be discrete about flashing your bidder number so others can't associate a buyer number with you. Or get a friend to place your bids for you. Or run that sucker up to about double value & then leave the guy chasing you hanging out.

By comparison, we had high hopes for the nice selection of S&W .45 ACP revolvers in this sale. The accessories exceeded pre-auction estimates, but some of the revolvers had trouble reaching the low end of their estimates. Go figure.

Count the cards — In addition to keeping track of the prices paid in your catalog, keep track of the bidder numbers of the buyers. Try to identify the repeat buyers & figure out whether they're real buyers or house skills. Watch the bidding from the back of the room and see if the auctioneer is selling to live bidders or to the post you're leaning against.

Trashing the trash-talkers — Watch who is loudly badmouthing an item. Some unscrupulous bidders will do this to try to throw other bidders off a good piece so they can scarf it up at below market value. Carefully inspect the piece for yourself and make your own decision as to its value.

Auctioneer's friend — Help out the auctioneer. If an item is having trouble getting started at half its value, go ahead & start the ball rolling. The auctioneer will appreciate it, and it might help you on a close call on a future item.

Take advantage of catalog errors — Carefully preview the items & compare them to the catalog descriptions. Even the best of catalogers can miss important variations or make flatout mistakes. If the error overstates the desirability of the item in the catalog, point it out to the auctioneer and request that he announce the discrepancy from the podium when the item comes up for sale. This may throw off other bidders. If the error understates the desirability of the item, keep your mouth shut and try to pick it up as a bargain. (Yes, auctioneers hate this.)

Slow the bidding — If the bidding is rushing too quickly towards your limit, take a moment to think between bids, slowing the momentum. Offer "cut bids" (crier is at 300 asking 350, offer 325 — signal for this is usually the "cut throat" sign of finger drawn across neck). Auctioneer may or may not accept cut bids, but if you can slow the progress, the final number may come sooner & lower than otherwise. (Auctioneers hate this one, too.)

The ambush — Let the other bidders fight it out until the last two have struggled and the auctioneer is about to drop the hammer, and then jump in. The other bidder may be so frustrated that there's a new horse in the race that he throws up his hands and lets you have the item — cheaper than you might have if it had been a strong three way race all along. (Yeah, they hate this one too. Use too many of these techniques and you risk the "most assuredly fatal affliction" mentioned earlier. Better check back to "Auctioneer's Friend".)

The Stanislov Method — Act out. Be the virtuous and sincere bidder who has patiently bid up to an absurd number and now can't understand why the auctioneer won't drop the hammer. Get up & storm out of the hall when you are sold out too cheap (you needed a bathroom break anyway). Just don't get verbal. Most auctioneers are carefully reading their serious bidders and will respond to a good bidder in distress. Here's the chance to use that college Pantomime 101 class you took because of the cute redhead who was into that kinda stuff.

The Power Bidder — Start out buying all the items of your type regardless of price. Never stop bidding once you start until you have the piece. The theory is that other bidders will be cowed and will give up

trying to bid against you, and the slight overpayment on early items will be rewarded by lack of competition on later items. Now, I have never really seen this one pulled off, but it is a persistent and fond urban legend among fellow auctioneers, so I thought I'd include it to mollify them in hopes that they won't blackball me.

Plums & crumbs — I have had some luck in focusing on high end esoteric collectibles offered in local auctions where lack of national advertising has kept the sale out of the national market. It's hard to get a bargain on a Ruger 10-22 in a well-advertised local auction, but if you're the only guy in the room that recognizes or cares about the Thuer Conversion 1861 Navy described in the list as "Old pistol — modified", you stand to do very well.

At the other end of the spectrum, I've made some nice buys of low-end stuff at the fancy high-dollar auctions. The Real Players waiting to see if that engraved Henry will really break the half million mark may not much care about the medium grade lemon squeezers selling before, and the auctioneer is not going to postpone the Big Bang trying to get "full value" of \$200 instead of \$100.

Timing the money — It's a rather subtle art, but some experienced bidders claim to track the flow of money during the auction. Some say they buy in the lull before the big items come up when others bidders are hanging onto their greenbacks hoping for the brass ring. Others say they buy after the big items have sold, when the deep pockets in the room are tapped out. I've never quite figured out how to make these two theories jibe, but you can work that out for yourself. Seems all they have in common is not bidding on the big items. Not much help if that's what you're after.

Gleanings — So, what happens to those reserved items that don't sell anyway? It can be a good idea to check with the auctioneer after the sale, and let him know that you're interested in any items that may not have met the reserve, or where there was a "screw up in the bid". Sometimes that really happens. Sometimes, it just gives the auctioneer a gracious out so he doesn't get hung with a piece where he was up to monkey business.

Knowledge is power — Take your reference books. And don't lend your Blue Book to other bidders!

An example from Classic Sporting Collectibles Auction (a catalog auction):

Empty 2-piece buff box with blue and white label picturing a Red Head duck in flight. Loading: 2 3/4 Drams Equivalent 24 PEL. 3 BUCK. The box exhibits some end label damage to both ends. Bright in color and a very hard one to find!

This box sold at the Classic Sporting Collectibles Auction #4 on April, 27 1995 for \$300.00

SELLING AT AUCTION

Just as some folks can't bring themselves to bid, some don't have the stomach to sell at auction. These are folks who worry that a pet piece might go for "less than it's worth". If they're thinking about consigning a single esoteric piece, they may be right in their concern. In every legitimate absolute auction I've ever attend there have been at least a few "major bargains".

The other side of that coin is that IF the auction has been properly promoted, there are always at least a few pieces that go "way over" any reasonable pre-sale estimate.

My firm belief is that 95 percent of the time, if you are selling an entire collection at a well-advertised professional auction, you will wind up with about the same money in your pocket as if you had consigned it to a dealer to piece out at gun shows & through classified ads over a six month period. And odds are good if you try to piece it out, at the end of six months you'll wind up with the same "cats 'n dogs" of the collection unsold, which would have sold "too low" at an auction.

A situation where it may NOT be a good idea to liquidate an entire collection at a single auction is that where you have a highly specialized collection. For decades, "advanced" collectors have been advising neophytes to Specialize, although I'm damned if I can figure out why. Be that as it may, a collection that has a nice mix of Winchesters, Colts, Lugers, Pennsylvania rifles, and military bolt actions will generally do better at auction than the world's largest collection of Winchester 1887 lever action shotguns, even if both have about the same theoretical "market value". It is easy to "flood the market" at an auction of a large number of the same type item. In fact, there may not be a "good" solution to the question of how to liquidate a highly specialized collection in a relatively short period of time. I should point out, however, that a highly specialized collection of quality material will still generally do much better at auction than an accumulation of undesirable low-end guns.

There are two key elements to a good auction — good merchandise and a good auctioneer. Both are essential.

I can't give you much advice on developing a good collection. However I can suggest a checklist for selecting a good auctioneer —

1. Reputation for fairness to both consignors and bidders.
2. Product knowledge — must be familiar with guns in general
3. Experience in conducting gun auctions. AND in preparing catalogs, if your collection is the type of material that will need a catalog & absentee bidders to bring full value.
4. A good mailing list of proven bidders & gun buyers.
5. Familiarity with and record of compliance with laws concerning firearms sales.

It is vitally important to understand the terms when you consign to an auction. You should ask for a firm commitment on the exact amount and type of advertising to be done. You should have a firm commitment as to when you will receive your payout (it takes a while to wind down an auction, collect all outstanding sums, and be sure all sales “stick”).

To reserve or not to reserve? *That* is the question. I generally urge consignors who want to liquidate a collection or estate to sell at absolute auction, with no reserve or buyback. I believe this makes for more attentive and enthusiastic bidders. They are assured that the merchandise *will* sell, and the auction will not just be a test marketing device to see which will go for above market value. You may wish to seek out an auctioneer with a reputation for holding “absolute auctions”.

On the other hand, if you are putting your pride and joy (and the kids’ college fund) single piece into a consignment auction, it is reasonable to seek a reserve. Just be sure you make it a realistic number at which you would prefer to have the piece back (AND pay the auctioneer’s sometimes hefty “buyback” fee) rather than have it sold.

As to commission, there is no standard amount. I hear rates from 35% on small individual pieces being sold in general consignment auctions to 10% for a collection of national significance where a 15% buyer’s premium will also be collected. My standard rate is 20% for items selling under \$1,000 and 15% for items selling over, with a little bit of wiggle room on the 20% end if an entire collection is consigned. Plus, I collect a 10% buyer’s premium from the bidders if it’s a sale that requires an illustrated catalog. I think my rates are about average, but I could be wrong.

You should be aware that many auctioneers have add-on fees. A low commission rate may mask additional charges for such expenses as storage, insurance, photography, cataloging, pro-rata advertising, and even auction staff. Be sure you understand ALL fees and charges when negotiating a sale at auction.

THE FUTURE OF GUN AUCTIONS

You’ve heard the stories of The Good Old Days of Gun Shows, when collectors were swapping with collectors. Then came the Middle Ages, with dealers selling to and buying from collectors, and finally the Dark Ages with only dealers selling to other dealers, and you never see the Good Stuff any more. During this alleged “decline” of gun shows (which I think is vastly overstated), gun auctions began an rise in prominence and importance in the collectible gun market.

The number of specialty gun auctioneers has dramatically increased over the past decade, sometimes with dealers bowing to the new trend and becoming auctioneers and auction houses spinning off other auction houses. I have heard speculation that this growing number of auctioneers is actually seeking to serve a somewhat static number of high-end high-dollar collectors. And really, gang — How many “Very Important Auctions” are you willing to believe can actually occur in a single year?

I think that to a small extent, we are seeing a recurrence of the Gun Show Cycle — we have gone from auctioneers selling to collectors, to auctioneers selling to dealers. We are even seeing occasions of auctioneers consigning items to auctioneers who sell those items to other auctioneers to sell at their next auction.

Reminds me of when me and my brother went into the produce business. We were buying early watermelons in Texas at \$24 a dozen, and hauling them to Kansas where we sold them at \$2 apiece. After our first month of operations, we looked at our bankbook and came to the obvious conclusion — We needed to get a bigger truck so we could make it up on volume.

Am I ready to give up on auctions? Heck no! Perhaps there will be a small shakeout among auctioneers — perhaps not. I am a firm believer that the auction method is one of the finest honed marketing tools for finding the true fair market value of any given merchandise.

And perhaps we ARE seeing two dozen “Very Important Auctions” a year. It seems that a generation of Giants of Gun Collecting is passing from the stage, and either liquidating their collections or having them liquidated by their estates. Perhaps that “Good Stuff” that has been squirreled away from the Gun Show market over the past three decades is now starting to seep back in.

And when it does, it’s a good bet that it will come back in through an auction. And if so, I want to be there to bid on it.

Your questions and comments are invited!

ABOUT THE AUTHOR —

Jim Supica, President of Old Town Station, Ltd., Lenexa, Kansas, is a dealer, auctioneer, appraiser and collector of antique arms. He writes and publishes a quarterly catalog/journal of antique cartridge firearms called “Old Town Station Dispatch.” He collects serial number one guns, S&W Model 3’s, and hammerless revolvers.

Web Page and CD-ROM

by Thomas Lundin

Production and Information Systems Manager

Are you running on “Internet Time”? Internet Time is a term that the computer industry has invented to describe a highly compressed development schedule. It comes from the new time economics of the World Wide Web in which software packages are produced in a fast-paced, high-intensity environment (right on the edge of burnout) and quickly posted to a web site for mass downloading. Major software up-

grades which used to come one or two years apart now trail new package releases by mere months because of Internet Time.

On Internet Time, speed is everything. First to market wins. Bug fixes can wait until the next release. If you surf the web, chances are you do it using Netscape Navigator or Microsoft Internet Explorer, two of the more visible products that helped to define Internet Time. Software users love Internet Time, because it accelerates the pace of new program releases, and keeps software cheap. Software developers also like it because it keeps their adrenaline pumping — until they crash and burn, that is.

In trying to get this 18th edition of the Blue Book of Gun Values out to you, we at Blue Book Publications have been running on Internet Time for the last few weeks (except for Steve, who has been on Internet Time for the last couple of decades). The difference between us and the software industry is that we try to get it right *before* we send it out — it’s pretty tough to post a bug fix for a printed page! Our production schedule is interleaved with the printing schedule right up to the last possible day, which makes for an interesting relay race to the finish line (and no baton drops allowed). The one beneficial side effect (for you) is that you have the most up-to-date publication we can give you.

Our web site has been on-line for about a year now; it has been a worthwhile endeavor for us, and we’ll continue to support it. We’ve received many product orders on-line, and many of you are tuning in monthly for a look at the on-line classified ads in the Gun Journal magazine, which we also publish in print. This year, I want to fine-tune the web page a bit (without going overboard on high-download-time graphics), and add some content to the Pool Cue sections. I’ll put on my Webmaster hat as soon as I get some available time. Thanks for your comments regarding the web site over the last year.

As we printed last year's edition, we began kicking around the idea of developing a CD-ROM for the Blue Book of Gun Values. Over the past year we have received quite a few requests for it, so it is apparent that the demand is there. Now it's up to us to come up with a product. That's going to move up to the front burner this summer, with a target release date of late summer/early fall. Pricing has not been determined.

I've been noodling around some design concepts of how to structure the CD-ROM program so that you will be able to not just browse the information sequentially, as in the book, but be able to display a group of gun listings that satisfy your particular search needs. For instance, you should be able to view at one time all the .22-cal. semi-auto rifles that retail for \$200-\$300. You get the idea. This sort of look-up will require some heavy-duty database development work, since we have to distill what is essentially free-form text into a structured format for database searches. That is a complex technical challenge that needs some serious programming. We've got four months to do it.

So much to do, so little time. What's new about that? Well, keeping up with change in the computer industry demands greater mental gymnastics than just about any other endeavor known to man. Think about it: between CPU clock cycles that are timed in millionths of a second, to disk drives that hold billions of bytes of data, there are orders of magnitude to keep track of simultaneously. And on top of this, throw in new communications standards, new programming languages, new interface paradigms, object-oriented this, client/server that — it's enough to make a production guy yearn for the simpler days of hot-metal typesetting and X-Acto knife keylining...uh, but let's not go there.

Of course, we *do* have to keep up with the pace of technology, because it profoundly affects the publishing business, and it's part of what makes this an exciting business to be in. But regardless of what technological smoke and mirrors we use to produce the Blue Book of Gun Values, it's the *content* that drives its value. In the publishing business, whether electronic or in print, *content is king*. And we've got content.

Got to run. I hear the clock ticking, and it's on Internet Time.

We always welcome your feedback and suggestions. Please e-mail us at: **bluebook@bluebookinc.com**.

ATTENTION GUN OWNERS

Your Firearms Are A Valuable Asset

They may be used to fund a Charitable Remainder Trust which will provide you an income for life!

2nd NATIONAL FIREARMS MUSEUM CHARITY AUCTION

Honorary Chairman
William B. Ruger

Chairman
Albert C. Ross, NRA 2nd Vice-President

Help build the National Firearms Museum

Donor & Bidder Information

When & Where: To be announced.

Auction purpose: To raise funds to build out and endow the National Firearms Museum. Not a dime is deducted to cover expenses. All proceeds go for the museum.

Items needed: Quality or rare firearms and related items in very good or better condition.

Tax deduction: Donations at the appraised value of the item and the amount of successful bids in excess of the suggested price range will qualify for a charitable deduction for federal income tax purposes.

Matching funds: Every dollar of the bid prices up to a maximum of \$250,000 will be doubled by matching funds from The NRA Foundation and goes to the museum project.

Bids: In addition to floor bids, mail and phone bids will be taken from bidders who have made previous arrangements.

Information: For information on making a donation or to be placed on a mailing list for a bidder's package and Auction Catalog, write to the below address or call 1-800-672-0635 or 703-267-1139.

Separating the Chaff from the Staff

Tom Lundin
I turned the big 4-0 in June 1995
celebrated for a week. Now I notice that
typefaces are shrinking, as are my clothes
around the waist and collar. Thank good-
ness I still have my... my... uh, what was the
question again??

Jennifer Koski (formerly Jennifer
Haugen) 11/95
There was bright sunshine, beautiful
music, white daisies, hoards of
relatives, and my one, true love in
a tux. What could be better!?

D. J.
2-2-96
Going to Las Vegas to represent Blue Book at the
Antiques Fairs and Show. I had never been
to Vegas and was overwhelmed.
I'm ready to go again! FUN!

Five Winks - Started Sept. 1990
My most memorable experience the past
year, without a doubt would have to
be: getting engaged to the man
of my dreams and planning
our wedding! 😊

Bill Rooney, start-date: Sept. '96.
Watching my daughters, ages 5 & 11 do
an impromptu performance of Help by the Beatles.
Not only had they learned all the lyrics, but they
created a complete dance routine to go with the
music. I don't know why, really, but this was very moving.

Heather - October, 1996
Can't wait to leave the "Frozen Land"
(MN) and get to "Sunny California"
Unbelievable traffic - missed my
plane - got there eventually - went
to the "MAMM Show" - had a BALL!!!

Thomas D. HELLER 2/21/97
My most memorable experience
in the past year would be
proposing to my girlfriend down
in the Bahamas on 3/19/96
(She said YES!)

Cathryn Coburn 10-2-96. After waiting over
5 years, learning I finally get to be an
aunt has been very exciting. - But talking
with someone who actually met Janis
Joplin (and got a piece of her birthday
cake!) was pretty memorable, too. 😊

Walter H 10/97
My love goes out
to my wife Joanne
and daughter Sara
for getting me through
my illness last summer.

from the desk of
Tom Stock
This was my 1st Fall
year at Blue Book. This is
not your "normal" organization
Just coming here is HAWES!

Separating the Chaff from the Staff

Eventually, I will write my own book entitled "Steve Fjestad, working with the man over a 12-year span." I haven't decided if it will sell or not, yet.

- Michelle Schroeder

John Allen start April 1992
 My first successful bow hunt
 in central Michigan, and taking a
 nice 8 pointer with my StW M-29
 in northern Minnesota will remain
 my highlights for 1996.

Beth - 1991	Serves 2-10
July Jambalaya	
Take one Lizard Lake and one Pontoon. Add:	
1 can Repe!, 1 case Beer, 1 tube After-Bite,	
good groceries, Deep Woods OFF. Mix Well.	
Set in Sunshine near Cabin.	

S.P. Fjestad, c. early '80s. 18* Ed. Ranch final recipe:

Ingredients: 1 new Sony PCV-90 Pentium, 2 HP LaserJet 6P, 1 SEKroned editorial & Manuscript supervisor w/ 12 years of accumulated scar tissue, 1 Venture publishing program, 58 lbs. of domestic & international gun related literature, 1 enthusiastic, hunt & peck, non-scarred (or scarred) rookie, and 1 Bag of Jelly Beans. Preparation: put all ingredients into a seductive office and blend & knead for no less than 1,000 hours, make sure final mixture has been sampled by experienced taste-testers, and put in remote control Tom Lundin oven for as long as it takes, feeds 5000+

AKS (AK-47 & AKM Copies)

Select fire paramilitary design rifle originally designed in Russia (initials refer to Automat Kalashnikov, 1947). Russian mfg. select fire AK-47s have not been mfg. since the mid-50s. Semi-auto AK-47 and AKM clones are currently manufactured by several arsenals in China including Norinco and Poly Technologies, Inc. Also manufactured in other countries including Yugoslavia, Czechoslovakia, Bulgaria and Hungary. As this edition went to press, only Bulgarian (imported by K.B.I.) mfg. AK-47s are currently allowed to be imported with "sporterized" thumbhole stocks (see individual importer listings).

Previously, U.S. importation was discontinued for commercial sales in 1989 due to federal legislation (in original configuration with either fixed or folding stocks). "Sporterized" stock configurations have recently enabled this rifle to meet import regulations.

Since the Federal ban on this type of paramilitary designed rifle, demand initially surged (summer and fall of 1989). Now that the Brady and Crime bills are in effect, almost all of the interest in the "pre-ban" AK-47s has subsided, and prices continue to fall on those models/variations that were heavily imported. AK-47s are not rare - over 700 million have been manufactured in China alone since WW II.

AK-47 & AKM MODELS

Also refer to separate listings under Poly Technologies, Inc., Norinco, Federal Ordnance, B-West, K.B.I., Sentinel Arms, American Arms, Inc., and others who have imported this configuration up until now.

AK-47 (AKM) RECENT IMPORTS — 7.62mmx39mm (former Russian M43 military cal.) or .223 cal., semi-auto Kalashnikov action, typically 16½ in. barrel, 5, 10, or 30* (C/B 1994) shot mag., wood or synthetic stock and forearm except on folding stock model, recent importation mostly has newer "sporterized" fixed stocks with thumbholes, may be supplied with bayonet, sling, cleaning kit, patterned after former military production rifle of China and Russia. Values listed below are for generic mfg.

\$395 \$360 \$315 \$275 \$240 \$220 \$200

Subtract 20% for guns with "post-ban" features.

Add 10-15% for older folding stock variations.

AK-47 technically designates the original select fire (semi or full-auto), Russian made military rifle with milled receiver. Recent semi-auto "clones" normally have stamped receivers and are technically designated AKMs. Recent mfg. AK-47 clones refer to rifles with milled receivers.

Yugoslavian, Czechoslovakian, or Hungarian manufactured AK-47s will command premiums over standard Chinese arsenal mfg. Poly Technologies, Inc., Norinco, and B-West importation (see separate listings where applicable) also will command a premium.

AMAC

See Iver Johnson section in this text. AMAC stands for American Military Arms Corporation manufactured in Jacksonville, AR. AMAC ceased operations early 1993.

AMT

Manufactured by Arcadia Machine & Tool located in Irwindale, CA. Also see Irwindale Arms, Inc. and Auto-Mag for older discontinued models. Distributor and dealer sales.

PISTOLS: SEMI-AUTO

During late 1993, AMT changed from white outline Millet adj. sights to an adj. 3 dot (white) system mfg. by LPA in Italy.

LIGHTNING — .22 LR, semi-auto, stainless steel only, 5 (bull only), 6½, 8½, 10½, or 12½ (disc. 1987) in. bull or tapered barrels, adj. sights and trigger, pistol based on semi-auto Ruger action, tapered barrels. Mfg. 1984-87.

\$240 \$200 \$150

Last Mfg.'s Sug. Retail was \$289.

This model features a frame grooved for scope mounts, Clark trigger, Millett sights, and either Pachmayr rubber or Wayland wood grips as standard equipment.

▲ **Bull's Eye Regulation Target** — similar to 6½ in. Lightning with bull barrel, except has vent. rib, wooden grips, extended rear sight. Mfg. 1986 only.

\$350 \$285 \$220

Last Mfg.'s Sug. Retail was \$436.

BABY AUTOMAG — .22 LR, semi-auto, stainless steel only, 8½ in. vent. rib barrel, Millett adj. sights, smooth walnut grips, 1,000 mfg.

\$750 \$650 \$550

AUTOMAG II — .22 Mag., stainless steel only, 3¾ (Compact Model), 4½, or 6 in. barrel, gas assisted action, white outline Millett adj. sights, grooved Lexan grips, 7 (Compact) or 9 shot mag., 24-32 oz. New 1987.
Mfg.'s Sug. Retail \$406 \$310 \$235 \$195

AUTOMAG III — .30 Carbine or 9mm Win. Mag. (mfg. 1993 only) cal., stainless steel, 6¾ in. barrel, patterned after Colt Govt. Model, white outline Millett adj. sights, grooved Lexan grips, 8 shot mag., 43 oz. New 1992.
Mfg.'s Sug. Retail \$470 \$395 \$300 \$245

AUTOMAG IV — 10mm (disc. 1993) or .45 Win. Mag. cal., 6½ (.45 Win. Mag. only) or 8½ (disc. 1993) in. barrel, 7/8 shot mag., Millett adj. sights, stainless steel, 46 oz. New 1992.
Mfg.'s Sug. Retail \$700 \$570 \$465 \$360

AUTOMAG V — .50 AE cal., stainless steel, 6½ in. barrel, gas venting system reduces recoil, 5 shot mag., 46 oz. Mfg. 1993-95.

\$815 \$700 \$625

Last Mfg.'s Sug. Retail was \$900.

JAVELINA — 10mm cal., semi-auto, 7 in. barrel, 8 shot mag., Millett adj. sights, wraparound Neoprene grips, wide adj. trigger, long grip safety, 48 oz. Mfg. 1992 only.

\$560 \$460 \$360

Last Mfg.'s Sug. Retail was \$676.

BACKUP PISTOL — .22 LR (disc. 1987), .357 Sig. (new 1996), .380 ACP, .38 Super (new 1995), 9mm Para. (new 1995), .40 S&W (new 1995), .400 Cor-Bon (new 1997), or .45 ACP (new 1995) cal., semi-auto, choice of traditional double action (disc. 1992) or double action only (new 1992), 2½ (.22 LR or .380 ACP) or 3 in. barrel, stainless steel, Lexan grips, formerly TDE, 5 (.380 ACP or .40 S&W), 6, or 8 (.22 LR) shot mag., 18 (.380 ACP only) or 23 oz. Older disc. walnut grip models are worth a slight premium.

AYA (AGUIRRE Y ARANZABAL)

Manufacturer located in Eibar, Spain since 1917. Currently imported and marketed by Armas De Chasse (starting 1992) located in Herdford, NC. New England Custom Gun, Ltd., located in West Lebanon, NH, also sells the No. 2 in quantities, in addition to several other models. Previous manufacture was by Diarm (circa 1986-88) located in Eibar, Spain. Previously imported by William Larkin Moore 1969-78 (with Agoura, CA import marking) and 1978-1986 (with West Lake, CA import marking). Most AYA's imported by W. L. Moore have ejectors. Retail sales by importer and AYA select dealers.

AYA

AYA manufactured shotguns can be denoted by serialization. Serial numbers over 600,001 with barrel flats marked Arms de Chasse or Scotia Group are post-1988 AYA manufactured while specimens under 600,000 may have been manufactured by Diarm - Diarm manufacture is not covered by the AYA warranty, nor is the resale the same as values listed below.

CARBINES**MODEL B SPORTER** — 9mm Para., patterned after the original Uzi Model B Sporter, 16.1 in. barrel, closed breech, thumbhole stock with recoil pad, 10 shot mag., adj. rear sight, 8.8 lbs. Limited importation from China 1994 only.

\$545	\$475	\$435	\$385	\$335	\$295	\$275
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$595.

PISTOLS**AT-84S** — 9mm Para., selective double action design, patterned after the CZ-75, 4.8 in. barrel, 15 shot mag., originally introduced in 1985.

\$470	\$415	\$385	\$360	\$330	\$275	\$220
-------	-------	-------	-------	-------	-------	-------

The AT-84S Series was mfg. in Switzerland by Industrial Technology & Machines A.G. and was sold by Action Arms between June of 1987 and 1989. Serial number range is 01201-06000. No P or H models were ever mfg. in this series (2 or 3 prototypes only).

AT-88S — 9mm or .41 Action Express (available early 1990) cal., selective double action design patterned after CZ-75, 4.8 in. barrel, 15 shot (9mm) or 10 shot (.41 AE) mag., can be "cocked and locked", fixed sights, blued metal, walnut grips, 35.3 oz. Introduced in 1987 with limited production samples being imported in 1989.

\$500	\$450	\$395	\$360	\$330	\$275	\$220
-------	-------	-------	-------	-------	-------	-------

A very small quantity of AT-88Ss (various configurations) was made by I.T.M. of Switzerland and finishes included all blue, all chrome, or 2-tone. These pistols may exhibit both I.T.M. and A.A.L. markings. More recent manufacture was performed by Sphinx-Muller of Switzerland. These pistols are still mfg. by Sphinx-Muller, renamed the AT-2000 Series and imported by Sile Distributors.

ADIRONDACK ARMS COMPANY

Plattsburgh, NY, 1870-1874.

Magazine loaded repeating rifle, .44 cal., brass or iron frame, later model, may also be marked A.S. Babbitt, Plattsburgh, N.Y., absorbed by Winchester in 1874, then disc.

This rifle was designed in 1870 and patented by Orvill M. Robinson in Upper Jay, NY. It was available in .38 and .44 cal. rimfire rifles without a wooden forend and had a high cyclic rate of fire. Original models were made in Plattsburgh, NY, at which time A.S. Babbitt became one of several additional partners. In 1872, Robinson was granted a patent for a second model rifle. It was similar to the 1870, except a wooden forend was added and the operating mechanism was changed considerably. Following these improvements, Mr. Oliver Winchester contacted Mr. Robinson and purchased the entire Robinson company, discontinuing manufacture.

ALLEN & THURBER

Ethan Allen started many plants to keep up with expanding business after 1832. Listed below is a chronological order of the firms constituting the family dynasty founded by Ethan Allen.

E. Allen — Grafton, Mass. 1832-1837

Allen & Thurber — Grafton, Mass. 1837-1842

Allen & Thurber — Norwich, Conn. 1842-1847

Allen & Thurber — Worcester, Mass. 1847-1854

Allen, Thurber, & Co. — Worcester, Mass. 1854-1856

Allen & Wheelock — Worcester, Mass. 1856-1865

E. Allen & Co. — Worcester, Mass. 1865-1871

Forehand & Wadsworth — Worcester, Mass. 1871-1890

Forehand Arms Co. — Worcester, Mass. 1890-1902

No other 19th century American firm produced a wider variety of firearms than did Ethan Allen & subsidiaries.

ALLEN FIREARMS

Previous importer located in Santa Fe, NM importing A. Uberti Firearms until early in 1987. After Allen Firearms closed, Cimarron F.A. Mfg. Co. located in Houston, TX purchased the remaining inventory (in addition to ordering new products under their name).

Allen Firearms was formerly called Western Arms and manufactured both modern and black powder reproduction firearms and accessories patterned after famous older models. Only modern cartridge guns will be shown in this section. Black powder guns will appear under Modern Black Powder Guns.

Rather than provide a complete listing of Allen Firearms models, the following rules usually apply. Since Allen Firearms imported A. Uberti firearms, the Uberti section in this text should be referenced for current values regarding models with similar configurations. Collectibility to date has been limited on most Allen Firearms models, and as a rule, up-to-date values on this trademark are established by current importation prices of Uberti firearms. A complete listing of older Allen Firearms models can be found in Blue Book editions Eleven and Twelve. The models listed below are provided since Uberti is not currently manufacturing them.

SHARPS/GEMMER SPORTING RIFLE — .45-70 cal. only, copy of the famous Sharps rifle. Introduced 1985.

\$575 \$515 \$430 \$375 \$320 \$295 \$270

Last Mfg.'s Sug. Retail was \$599.

1979 JUSTIN CENTENNIAL COMMEMORATIVE — includes specially engraved 1866 sporting rifle and 1873 single action revolver (7½ in. barrel) with gold plated parts and inlay. Both guns are chambered for .44-40 cal. Also includes special hand signed pair of Justin boots, serial numbered belt buckle and presentation oak case. All serial numbers are matching.

Grading	100%	Issue Price	Qty. Made
MODEL 1873 1 of 1,000 — .44-40 cal, special wood, only 1,000 manufactured. Disc. 1985.	\$1,350	\$1,500	1,000

ALPHA ARMS INC.

Previous manufacturer located in Flower Mound, TX from 1983-87.

Retail price included custom hard case.

Last Mfg.'s Sug. Retail was \$1,795.						

AMERICA REMEMBERS

A

An organization that privately commissions historical, limited/special editions in conjunction with various manufacturers.

America Remembers is a private non-governmental organization dedicated to the remembrance of notable Americans and important historical American events. Along with its affiliates, the Armed Forces Commemorative Society®, American Heroes and Legends®, and the United States Society of Arms and Armour™, the company produces special issue limited edition firearms. America Remembers purchased the antique arms division of the U.S. Historical Society on April 1, 1994. Older U.S.H.S. firearms can be located in the U section of this text.

LIMITED/SPECIAL EDITIONS

Values listed below reflect America Remembers original or most recent issue prices. No other values are listed since America Remembers limited edition firearms do not appear that frequently in the secondary marketplace. This is because America Remembers typically sells to consumers directly, without involving normal gun dealers and distributors. Because of this consumer direct sales program, many gun dealers do not have a working knowledge about what America Remembers firearms are currently selling for. The publisher suggests that those people owning America Remembers Limited/Special Editions contact America Remembers (See Trade-mark Index) for current information, including secondary marketplace liquidity.

HANDGUNS

While not specifically mentioned, the handguns listed below all have various degrees of ornamentation and other embellishments (including some inscriptions).

MANUFACTURER	MODEL	QUANTITY	YEAR	MOST RECENT ISSUE PRICE

Last Mfg.'s Sug. Retail was \$1,360.

F.S. 500 — same specifications as F.S. 400. Importation disc. 1985.

\$1,175 \$950 \$860 \$795 \$730 \$660 \$595
Last Mfg.'s Sug. Retail was \$1,360.

SHOTGUNS: SIDE-BY-SIDE

American Arms is currently importing Spanish shotguns manufactured by Zabala Hermanos and Grulla. Older discontinued Diarm models will also be shown in this section.

GENTRY/YORK — 12, 16 (disc. 1990), 20, 28 ga., or .410 bore, 3 in. chambers, boxlock, ejectors (extractors after 1986), double or SST (became standard in 1992), chromed receiver features fine scroll engraving, fixed chokes, pistol grip stock with recoil pad and beavertail forearm. New 1986.

Mfg.'s Sug. Retail \$735 \$595 \$450 \$350 \$300 \$280 \$260 \$240

Add \$40 for 28 ga. or .410 bore.

Before 1988 this model was designated York (case coloring began 1988, silver finish began 1993). DTs have been supplied with 28 ga. or .410 bore since 1990.

Grading

100% 98% 95% 90% 80% 70% 60%

BRITTANY — 12 or 20 ga., boxlock action, 25 (20 ga. only, disc. 1996), 26, or 27 (12 ga. only, disc. 1996) in. barrels, SST, ejectors, matted solid rib, choke tubes, engraved case colored frame, checkered walnut straight grip stock with recoil pad and semi-beavertail forearm, 6½ or 7 lbs. New 1989.

Mfg.'s Sug. Retail **\$860 \$695 \$575 \$485 \$435 \$400 \$375 \$350**

The wood finish was changed in this model from oil to semi-gloss in 1991.

SHOGUN — 10 ga., 3½ in. chambers, boxlock, ejectors, double triggers, chromed receiver features fine scroll engraving. Imported 1986 only.

\$440 \$350 \$325 \$300 \$280 \$260 \$240
 Last Mfg.'s Sug. Retail was \$525.

DERBY — 12, 20, 28 (disc. 1991) ga., or .410 bore (disc. 1991) ga., 3 in. chambers, sidelock, ejectors, double (disc. 1989) or SNT, chromed receiver features fine scroll engraving, fixed chokes, straight grip walnut stock and forearm. Imported 1986-94.

\$880 \$750 \$625 \$500 \$425 \$385 \$350
 Last Mfg.'s Sug. Retail was \$1,039.

Add 10% for 28 ga. or .410 bore (disc. 1991).

Subtract 10% for DT.

Add approx. 50%-60% for 2-barrel set (20 and 28 ga. - approx. 300 sets mfg.) - disc. 1990.

This model featured a case-colored receiver between 1988-90 and was changed to coin finish in late 1991. At the same time, the wood finish was changed from oil to semi-gloss.

GRULLA NO. 2 — 12, 20, 28 ga., or .410 bore, hand fitted sidelock action, 26 or 28 in. barrels, DTs, ejectors, fixed chokes, concave rib, case colored receiver with elaborate engraving, deluxe English style straight stock and splinter forearm (checkered and hand rubbed), between 5¾ - 6¼ lbs. New 1989.

This model is individually handcrafted with less than 800 mfg. each year. Since each gun is built per special order, American Arms should be contacted directly for a price quotation or more information (See Trademark Index). Before going to a special order basis, this model retailed for \$3,099 (1994).

▲ **Small Gauge Set** — includes choice of 20/28 ga. or 28 ga./410 bore barrel combination (26 in. fixed choke barrels). Imported 1989-95.

\$3,600 \$3,000 \$2,375 \$2,000 \$1,650 \$1,325 \$1,150

Before going to a special order basis, this combination last retailed for \$4,219 (1994/5).

WS/SS 10 WATERFOWL SPECIAL — 10 ga. only, 3½ in. chambers, 32 in. barrels, DTs, parkerized finish, sling swivels and camouflaged sling, extractors, fixed chokes, recoil pad, 11 lbs. 3 oz. Imported 1987-1993.

\$560 \$500 \$440 \$400 \$375 \$350 \$325
 Last Mfg.'s Sug. Retail was \$639.

TS/SS 10/12 TURKEY SPECIAL — 10 (disc. 1995) or 12 ga., Mag. chambers (3½ in. 12 ga. introduced in 1989), 26 in. barrels only, double triggers, parkerized finish, dull finish stock and forearm, sling swivels, recoil pad, choke tubes, 7 lbs. 6 oz. or 10 lbs. 13 oz. (10 ga.). New 1987.

Mfg.'s Sug. Retail **\$785 \$650 \$535 \$450 \$400 \$375 \$350 \$325**

This model in 12 ga. is supplied with a SST.

COMBINATION GUNS

RS COMBO — choice of .222 Rem. or .308 rifle barrel under 12 ga. barrel, engraved boxlock frame with antique silver finish, DTs, 24 in. VR barrels with shotgun choke tubes, rifle sights, grooved for scope mounting, Monte Carlo stock, 7 lbs. 14 oz. Imported 1989 only.

\$675 \$595 \$550 \$495 \$450 \$420 \$385
 Last Mfg.'s Sug. Retail was \$749.

SHOTGUNS: SINGLE SHOT

SINGLE SHOT MODEL — 12, 20 ga., or .410 bore, 3 in. Mag., non-exposed hammer, pistol grip stock, non-reflective finish. Imported 1988-89 only.

\$90 \$80 \$70 \$60 \$55 \$50 \$45
 Last Mfg.'s Sug. Retail was \$99.

AMERICAN HISTORICAL FOUNDATION, THE

A private organization which privately commissions historical commemoratives in conjunction with leading manufacturers and craftsmen around the world. The AHF is located in Richmond, VA. Direct retail sales only.

AHF limited edition models are not necessarily all manufactured at one time. Rather, guns are fabricated as demand dictates.

COMMEMORATIVE ISSUES

Values listed below reflect AHF's original or most recent issue prices. No other values are listed since AHF limited edition firearms do not appear that frequently in the secondary marketplace. This is because the AHF has always sold to consumers directly, without involving normal gun dealers and distributors. AHF consumers include museums, veterans, and other interested parties who may keep these items for a considerable time period - with secondary marketplace considerations not the primary factor. Because of this consumer direct sales program, many gun dealers do not have a working knowledge about what AHF firearms are currently selling for. The publisher suggests that those people owning AHF Commemorative Issue firearms contact the AHF (See Trademark Index) for current information, including secondary marketplace liquidity, as it is one of the services they provide.

Mfg.'s Sug. Retail \$1,260 \$1,100 \$875 \$750 \$625 \$525 \$450 \$375

RIFLES: BOLT ACTION, DISC.

Sile Distributors located in NY acted as an import agent during the early 1960s which can be identified by Sile barrel markings. Savage imported Anschutz rifles were available from 1963-1981 and also have Savage/Anschutz barrel markings. While some of those models might not be listed below, refer to models of similar caliber and quality that are listed to ascertain values.

During the period when Savage was importing Anschutz rifles, certain models in the Anschutz line were designated "Savage-Anschutz" for sales by Savage in the U.S. Conversely, certain models manufactured by Savage were designated "Anschutz-Savage" for sale by Anschutz in Europe. Some of these models did not have any modifications but others were restocked, supplied with different sights, and had other different features from their original counterparts. In most cases, the original model numbers were used.

Some "Anschutz-Savage" rifles have made their way into the U.S. While somewhat rare, these rifles are typically based on the Savage Model 110 action. They are not as desirable as those "Savage-Anschutz" marked rifles utilizing the superior Anschutz action. Anschutz also manufac-

Grading	100%	98%	95%	90%	80%	70%	60%
tured between 1,000-2,000 rifles utilizing SAKO actions in .222 Rem. cal. in the late 50s-early 60s. These guns will approximate values shown on the discontinued centerfire models listed below.

A

ARMITAGE INTERNATIONAL, LTD.

Previous manufacturer until 1990 located in Seneca, SC.

SCARAB SKORPION — 9mm Para., paramilitary design patterned after the Czech Model 61, direct blow back action, 4.63 in. barrel, matte black finish, 12 shot (standard) or 32 shot (optional) mag., 3.5 lbs. Mfg. in U.S. 1989-90 only.

\$375 \$330 \$295 \$260 \$240 \$220 \$200
Last Mfg.'s Sug. Retail was \$400.

Add \$45 for threaded flash hider or imitation suppressor.

Only 602 Scarab Skorpions were manufactured during 1989-90.

ARMSCOR

Current trademark of firearms manufactured by Arms Corporation of the Philippines (manufacturing began 1952) starting 1995. Currently imported by K.B.I., Inc. located in Harrisburg, PA beginning 1995. Previously imported by Ruko located in Buffalo, NY until 1995 and by Armscorp Precision Inc. located in San Mateo, CA until 1991.

ARMSCOR

In 1991, the importation of Arms Corporation of the Philippines firearms was changed to Ruko Products, Inc. located in Buffalo, NY. Barrel markings on firearms imported by Ruko Products, Inc. state "Ruko-Armscor" instead of the older "Armscorp Precision" barrel markings. All Armscorp Precision, Inc. models were discontinued in 1991.

The models listed below also provide cross-referencing for older Armscorp Precision and Ruko imported models.

HANDGUNS

ARRIETA, S.L.

Manufacturer located in Elgoibar, Spain. Currently imported by several importers including Griffin & Howe, New England Arms, Orvis (see separate listing), Quality Arms, and Wingshooting Adventures.

More information can be obtained on Arrieta by either contacting the above listed importers or the factory.

RIFLES: SIDE-BY-SIDE

R-1 — 7x65R, 8x57JRS, or 9.3x74R cal., boxlock action with engraved sideplates, ejectors, quarter rib barrel with express rear sight.

Mfg.'s Sug. Retail \$9,220 \$8,625 \$7,000 \$5,950 \$5,100 \$4,600 \$4,000 \$3,450

R-2 — similar to R-1, except has more elaborate engraving, elongated tangs, and choice of English or reinforced pistol grip with metal cap, ejectors.

Mfg.'s Sug. Retail \$13,350 \$12,950 \$9,950 \$8,950 \$7,850 \$6,850 \$5,900 \$4,950

SHOTGUNS: CURRENT SxS

The models listed below are essentially custom ordered per individual specifications - delivery time is approx. 6 months.

All Arrieta shotguns have frames scaled to individual gauges. Various special options are available by custom order, and a few are listed below. On the models listed below, there are 4 qualities of action. Fourth quality is used on the Model 550. Third quality is used on Models 557-588. Second quality is used on Models 590 and 595 (designed for heavy use). First quality is used on Models 600-903, except for Model 900 (557 action). All Arrieta actions are self-opening except the Models 557, 570, and 578.

AUTO MAG

Previously manufactured by Auto Mag. Corp. and TDE Corp.

Short recoil rotary bolt system made entirely of stainless steel. Most pistols were sold in .44 AMP cal. although .357 AMP was also a popular factory option. Several other calibers and variations were marketed through Lee Jurras including exotics like the .44 Condor (16 in. barrel and scoped - one of a kind). Also, a .30 cal. Cougar with 12 in. barrel and highly polished metal was a one of a kind item. Other limited Jurras variations include The Custom 100 Series (.44 cal., custom tuned, magna ported, special serialization), The Grizzly (.41 cal.), The Backpacker (.357 cal.), in addition to the Metallic Silhouette.

A unique handgun, the Auto Mag was never a commercial success due to high manufacturing costs and initial functioning problems (mostly attributed to hand loading all the ammo - once factory ammo became available, reliability improved significantly). Initial reaction to Dirty Harry's use of this weapon in the movie "Sudden Impact" made prices escalate considerably, but most values appear to have stabilized since 1986. Be aware of fakes - especially of the XP variety (re-serialized, re-stamped, location of markings, etc.). Also, the ease of barrel swapping should be considered when deciding on a potential purchase. Auto Mags were never magna ported from the factory (only The Custom 100 Series). Non-original magna porting actually detracts from the values listed below, since it is a non-factory alteration.

Serial number ranges for the various models are as follows: Pasadena mfg. - A0000 through A03700. TDE North Hollywood - mostly A02500 through A05015 although some were marked with very low ser. no.'s. TDE El Monte mfg. - A05016 through A08300. High Standard guns were originally marked with "H" prefix serial numbers (only 132 made), after which they carried standard "A0" prefix serial numbers. The "H" prefix guns remain a collectors item and command a 25% premium over values listed below. TDE/OMC marked pistols - B00001 through B00370 are known as the "B" series or solid bolt models (only 370 manufactured). This "B" series also commands collector premiums.

AMT manufactured the last two lots of Auto Mags; the first was the "C" series and was basically the same as the "B" except that only 50 guns were fabricated. The last Auto Mags made by AMT were appropriately serial numbered LAST 1 through LAST 50. These guns

60%

had the reputation of being the poorest quality but do carry collector premiums. One interesting variation is the North Hollywood "two-line" model. Also, the first .357 cal. pistols manufactured did not have the words AUTO MAG appearing on the gun. These are also collectors items.

In addition to the above calibers, a very few non-factory .22 and .25 cal. prototypes were fabricated by Kent Lomont. These specimens will usually demand a premium over the values listed below. Also, some barrels and pistols were made in Covina, CA.

Less than 10,000 Auto Mags were produced by all manufacturers. All pistols originally had all stainless steel mags.

PISTOLS

ORIGINAL PASADENA — .44 AMP only, 6½ in. VR barrel.

\$2,500 \$2,300 \$1,995

This model is generally regarded as having the most quality, as all components were milled from Carpenter 455 stainless steel stock.

TDE NORTH HOLLYWOOD

▲ **.44 AMP** — 6½ in. VR barrel, initial guns were mfg. from existing Pasadena parts, later mfg. required new components made by TDE.

\$2,275 \$1,975 \$1,850

Quality on this model goes down in later mfg. (some small parts are not stainless). Because of this, higher serial numbered guns in this model are less desirable.

▲ **.357 AMP** — two line address.

\$2,500 \$2,300 \$1,995

There are no factory records verifying this caliber.

TDE EL MONTE

▲ **.44 AMP** — 6½ VR, 8, or 10 in. tapered barrel.

\$2,100 \$1,800 \$1,600

▲ **.357 AMP** — 6½ VR, 8, or 10 in. tapered barrel.

\$1,800 \$1,600 \$1,500

HIGH STANDARD — "H" prefixed serial numbers, mfg. by TDE with High Standard markings.

\$2,500 \$2,300 \$1,995

TDE/OMC "B" SERIES — 6½ VR or 10 in. barrel.

\$2,500 \$2,300 \$1,995

AMT "C" SERIES — 6½ VR or 10 in. barrel.

\$2,500 \$2,300 \$1,995

Add 50%+ for L.E. Jurras Custom 100 Series.

Add 10% for Jurras Lion marked models.

Lee Jurras added his Lion's head logo (from 1977 on) on TDE manufactured guns.

There were also a very limited quantity of original shoulder stocks (perhaps less than 5) - extreme rarity precludes accurate price evaluation.

Note: guns were cased (plastic attache style) with accessories. Original Auto-Mag ammo (only original mfg. by CDM in Mexico and Norma in Sweden) is currently selling for approx. \$85 a box.

AUTO-ORDNANCE CORP.

Manufacturer located in West Hurley, NY. Distributor sales only.

Auto-Ordnance Corp. manufactures an exact reproduction of the original 1927 Thompson machine gun. They are currently available in semi-auto only since production ceased on fully automatic variations (Model 1928 and M1) in 1986 (mfg. 1975-1986 including 609 M1s).

CARBINES: SEMI-AUTO

Until the Crime Bill was passed in 1994, the Auto-Ordnance Thompson replicas listed below were supplied with either 15, 20, or 30 shot mags. Beginning late 1994, Auto-Ordnance began manufacturing 10 round X-drum mags. that resemble the older 50 round L-type drums - retail is approx. \$100.

1927 A1 STANDARD — .45 ACP, 16 in. plain barrel, solid steel construction, standard military sight, walnut stock and horizontal forearm. Disc. 1986.

\$570 \$490 \$430 \$360 \$315 \$290 \$270
Last Mfg.'s Sug. Retail was \$575.

1927 A1 DELUXE — 10mm (mfg. 1991-93) or .45 ACP cal., 16 in. finned barrel, 10 (C/B 1994) shot mag., solid steel construction, adj. rear sight, walnut stock and hand grips.

Mfg.'s Sug. Retail \$795 \$650 \$530 \$445 \$370 \$320 \$295 \$275

Add \$190 for 50* shot drum mag. or \$350 for 100 shot drum mag. (mfg. 1990-93) on this model and other 1927 variations. Also add \$105 (retail) for Thompson hard case (violin type).

THOMPSON M1 CARBINE — .45 ACP, combat model, 16½ in. smooth barrel, 10 (C/B 1994) shot mag., side-cocking lever, flat black finish, walnut stock, pistol grip, and grooved forearm, 11½ lbs. New 1986.

Mfg.'s Sug. Retail \$785 \$635 \$520 \$440 \$360 \$310 \$285 \$265

1927 A1C LIGHTWEIGHT — .45 ACP, similar to 1927 A-1 Deluxe, except receiver made of a lightweight alloy. 20% weight reduction. New 1984.

Mfg.'s Sug. Retail \$795 \$650 \$530 \$445 \$370 \$320 \$295 \$275

1927 A1 COMMANDO — .45 ACP, 16½ in. finned barrel, black finished stock and forearm, parkerized metal, black nylon sling, 13 lbs. New 1997.

Mfg.'s Sug. Retail \$780 \$635 \$520 \$440 \$360 \$310 \$285 \$265

1927 A5 PISTOL/CARBINE — .45 ACP, 13 in. finned barrel, alloy construction, overall length 26 in., 10 (C/B 1994) shot mag., 7 lbs. Mfg. disc. 1994.

\$625 \$515 \$440 \$360 \$305 \$280 \$260
Last Mfg.'s Sug. Retail was \$765.

1927 A3 - .22 CAL. — .22 LR, 16 in. finned barrel, alloy frame and receiver, walnut stock, pistol grip, and forearm pistol grip, 7 lbs. Mfg. disc. 1994.

\$440 \$375 \$325 \$285 \$260 \$230 \$200
Last Mfg.'s Sug. Retail was \$510.

PISTOLS: SEMI-AUTO

Beginning 1997, Auto Ordnance discontinued all calibers on the pistols listed below, except for .45 ACP cal. However, .38 Super or 9mm slide kits are currently available for \$179. Also, conversion units (converting .45 ACP to .38 Super or 9mm Para.) are available at \$195.

1911 A1 — .38 Super (disc. 1996), 9mm Para. (disc. 1996), .40 S&W (mfg. 1991-93), 10mm (mfg. 1991-96), or .45 ACP cal., 4½ (.40 S&W cal. only) or 5 in. barrel, 7 shot mag., single action, parts interchange with the original Colt Govt. Model, blue or nickel finish, checkered plastic grips, 39 oz.

Mfg.'s Sug. Retail \$425 \$345 \$285 \$250 \$235 \$225 \$215 \$200

Add \$28 for satin nickel (mfg. 1990-96) or \$37 for duo-tone (mfg. 1992-96) finish (.45 ACP only).

▲ **1911 A1 Deluxe** — .38 Super (disc. 1996), 9mm Para. (disc. 1996), or .45 ACP cal., 5 in. barrel, 3 dot sights, wraparound grips, 39 oz. New 1991.

Mfg.'s Sug. Retail \$439 \$365 \$315 \$260 \$235 \$225 \$215 \$200

▲ **1911 A1 General** — .38 Super (mfg. 1996 only) or .45 ACP cal., 4½ in. barrel with full length recoil guide system, 7 shot mag., blued finish, 3 dot fixed Millett sights, black rubber wraparound grips, Commander styling, 37 oz. New 1992.

Mfg.'s Sug. Retail \$465 \$385 \$315 \$255 \$235 \$225 \$215 \$200

SHOTGUNS: SxS

BSA also manufactured SxS boxlock shotguns in various grades. Normally encountered in 12 ga. with DT's and extractors, these shotguns are of good quality and are typically encountered in the secondary market in the \$250-\$500 range, assuming standard grade.

B**B-WEST**

Importer/distributor located in Tucson, AZ.

B-West previously imported rifles (including AK-47 clones, the Saiga, Dragunov, etc.) in addition to an IJ series .380 ACP Makarov pistol. To obtain more information about B-West's current line-up of imports (non-firearms), please contact the company directly (refer to Trademark Index).

LES BAER CUSTOM, INC.

Please refer to the L section of this text.

BAFORD ARMS, INC.

Previously manufactured by Baford Arms, Inc. located in Bristol, TN. Previously distributed by C.L. Reedy & Associates, Inc. located in Melbourne, FL.

MODEL 35 FIRE POWER — 9mm Para., semi-auto single action, patterned after the Browning Hi-Power, total stainless steel construction, 4 $\frac{3}{4}$ in. barrel, combat hammer and safety, Pachmayr grips, removable barrel bushing, Millett Mk. II sights, 14 shot mag., 32 oz. Introduced late 1988 with limited mfg. until 1993.

\$500 \$425 \$350

Last Mfg.'s Sug. Retail was \$550.

THUNDER DERRINGER — .44 Spl./410 shotshell, single shot, tip out action, 3 in. barrel, blued steel finish, spur trigger, wood grips. Introduced late 1988 with limited mfg. until 1991, when production permanently ceased.

\$130 \$110 \$95 \$90 \$85 \$80 \$75

Last Mfg.'s Sug. Retail was \$130.

Add \$90 for interchangeable barrel kit.

Interchangeable pistol barrels are chambered in various calibers between .22 Short and 9mm Para. There are two types: one fits flush while the other facilitates a scope mounting.

BAIKAL

Manufactured in the U.S.S.R. since approx. WWII. Previously imported 1993-96 by Big Bear located in Dallas, TX. Distributor and dealer sales.

Baikal shotguns have had limited importation into the U.S. 1993 marked the first year that Baikals were officially (and legally) imported into the U.S. because of Russia's previous export restrictions domestically. In prior years, however, a few O/Us have been seen for sale and have no doubt been "imported" into this country one at a time. Quality is in the intermediate level and collector interest is not particularly great. Most older O/U shotguns fall into the \$400 - \$1,000 range if quality is at par with other more famous trademarks.

PISTOLS

IJ-70 — .380 ACP or 9x18 Makarov cal., double action semi-auto, all steel blued construction, 4 in. barrel, slide mounted safety with decocking, fully adj. target sights, choice of two 8 shot (IJ-70), two 10 (C/B 1994, Model IJ-70-HC), or two 12* shot, holster and cleaning rod, checkered plastic grips, 25 oz.

Mfg.'s Sug. Retail \$199 \$175 \$150 \$135 \$120 \$105 \$95 \$85

Add \$40 for IJ-70-HC (High Capacity).

Add \$50 for .380 ACP cal.

Add \$10 for nickel finish (disc.).

BAILONS GUNMAKERS LIMITED

Manufacturer and refurbisher located in Birmingham, England until 1993, when operations ceased. Inquiries regarding this trademark (including repairs) should be directed to Guthrie Consulting (see Trademark Index for listing).

HUNTING RIFLE — various cal., modified Mauser bolt action, barrel length to suit from 18 to 30 in., set triggers or match, Habicht Telescope sight (magnification and reticle to suit), engraving, and types of finishes are at optional cost, prices below reflect standard rifle with no options. Imported 1986-1993.

\$2,495 \$2,250 \$1,995 \$1,775 \$1,625 \$1,450 \$1,300
Last Mfg.'s Sug. Retail was \$2,750.

BAKER, W.H. & CO.

Manufacturer located in Syracuse, NY circa 1878-1883.

Originally started by William H. and Ellis L. Baker circa 1878. During this time, Leroy H. and Lyman C. Smith financed the new company, W.H. Baker & Co. Circa 1880, L.C. Smith bought the interest from the two Baker partners and continued production with markings reading "L. C. Smith and Co., Maker of the Baker Gun" on the rib, "Baker Pat." on the locks. Smith decided to drop the Baker name in 1883, but continued to manufacture this gun and a shotgun/rifle combination gun in Syracuse, NY until 1888. At this point, the company was sold to the Hunter Brothers and this new company, Baker Gun & Forging Co. began making both the New Baker shotguns (see separate listing below) in addition to the Ithaca gun. The company was sold to the Hunter Brothers circa 1888, and the Hunter Arms Company made L.C. Smith shotguns for approximately 60 years at which point the Marlin Firearms Company bought the business during the early 1940s.

Baker guns were originally 10 or 12 ga., and unusual in that the opening mechanism was operated by pressing forward on the front trigger. While relatively rare, most original Baker guns (including the shotgun/rifle) do not have a lot of original finish remaining. Most specimens are priced in the \$400-\$850 range, assuming finish is less than 10%. If condition is better than 40%, guns have to be evaluated individually for accurate pricing.

BAKER GUN & FORGING CO.

Previous manufacturer located in Batavia, NY. 1889-1933.

SHOTGUNS: SIDE BY SIDE

Note: Original damascus guns in 80% or better condition with bright case colors will approach the values of steel barrel counterparts.

THE NEW BAKER — 10 or 12 ga., exposed hammers, damascus barrels, extractors.

\$350 \$300 \$260 \$225 \$195 \$175 \$150

BEEMAN OUTDOOR SPORTS

Importer and distributor located in Santa Rosa, CA.

On April 1, 1993, Beeman Precision Arms, Inc. was split into two independent companies: Beeman Precision Airguns, division of S/R Industries (Maryland Corp.), located in Huntington Beach, CA retains worldwide distribution of Beeman airguns and accessories. Beeman Outdoor Sports, Division of Robert's Precision Arms, Inc., located in Santa Rosa, CA had distribution of Feinwerkbau firearms until 1995.

Beeman is a large importer, primarily specializing in high quality European air rifles and pistols. Trademarks previously distributed in the U.S. are manufactured by: Agner (disc. 1986), Erma (disc. 1985), FAS (disc. 1987), Fabarm (disc. 1985), Feinwerkbau, Korth

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

(disc. 1990), Krico (disc. 1988), Unique (disc. 1991), and Weihrauch (disc.). These trademarks appear under their respective alphabetical headings. Air rifles, pistols, and/or black powder firearms will appear under those headings in the back of the book.

The firearms listed below were manufactured to Beeman specifications, and are therefore listed under the Beeman heading.

PISTOLS: SEMI-AUTO

BEEMAN MP-08 — .380 ACP, Luger type toggle action, 3½ in. barrel, 6 shot mag., blue, 1.4 lbs. Mfg. 1968-1990.

\$395	\$335	\$275	\$240	\$185	\$145	\$115
Last Mfg.'s Sug. Retail was \$390.						

In 1988, Beeman took over importation of these two models (MP-08 and P-08). These revised models have new Luger style checkered walnut grips and 3½ in. barrel. Previous variations had plastic grips.

BEEMAN P-08 — .22 LR, Luger type toggle action, 8 shot mag., 3.8 in. barrel, blue, checkered walnut grips, 1.9 lbs. Mfg. 1969-1990.

\$395	\$335	\$275	\$240	\$185	\$145	\$115
Last Mfg.'s Sug. Retail was \$390.						

PISTOLS: SINGLE SHOT

MODEL SP/SPX — .22 LR cal., designed for silhouette shooting, 10 in. heavy bull barrel, blued metal parts, birchwood stocks and forearm, aperture sights, 3.9 lbs. Disc. 1994.

\$625	\$550	\$475	\$425	\$375	\$330	\$295
Last Mfg.'s Sug. Retail was \$700.						

Only a few of these models were actually delivered.

▲ **Model SPX Deluxe** — similar to Model SPX, except has matte chrome metal finish, hand stippled walnut grips, and Anschutz rear sight. Limited mfg. 1993-94.

\$800	\$725	\$650	\$575	\$500	\$425	\$350
Last Mfg.'s Sug. Retail was \$900.						

SP STANDARD — .22 LR cal., sidelever action, 8, 10, 12, or 15 in. barrel, adj. sights and walnut grips, single shot. Made in W. Germany. Imported 1985-86 only.

\$250	\$220	\$180	\$170	\$160	\$150	\$140
Last Mfg.'s Sug. Retail was \$250.						

Add \$10 or \$30 for 12 or 15 in. barrel respectively.

SP DELUXE — similar to SP Standard, except has forearm. about 3½ lbs. Made in W. Germany. Imported 1985-86 only.

\$275	\$240	\$200	\$185	\$170	\$155	\$145
Last Mfg.'s Sug. Retail was \$300.						

Add \$10 or \$30 for 12 or 15 in. barrel respectively.

BEHOLLA PISTOL

Previously manufactured by Becker & Hollander located in Suhl, Germany.

BEHOLLA POCKET AUTOMATIC — .32 ACP cal., 7 shot, 2.9 in. barrel, blue, serrated wood or rubber grips, mfg. 1915-1920, from 1920-1925 the same gun was mfg. by Stenda-Werke.

\$225	\$170	\$150	\$135	\$120	\$100	\$90
-------	-------	-------	-------	-------	-------	------

BENELLI

Manufacturer located in Urbino, Italy. Shotguns currently imported by Heckler & Koch, Inc. located in Sterling, VA (dealer sales only). Handguns currently imported by European American Armory, located in Sharpes, FL. Previously imported by Sile Distributors, Inc., located in New York, NY until 1995 and by Saco, located in Arlington, VA.

\$295 \$255 \$225 \$200 \$180 \$170 \$160
Last Mfg.'s Sug. Retail was \$385.

MODEL B-80 — .30 Luger, selective double action, all steel, 4¼ in. barrel, 8 shot mag., ¾ oz. Importation disc. 1995.

\$295 \$255 \$225 \$200 \$180 \$170 \$160
Last Mfg.'s Sug. Retail was \$385.

MODEL B-80S TARGET — similar to B-80, except has 5½ in. barrel, target grips, and adj. rear sights. Importation disc. 1995.

\$450 \$375 \$325 \$295 \$275 \$250 \$225
Last Mfg.'s Sug. Retail was \$572.

MODEL MP3S — .32 Smith & Wesson Long Wadcutter, target variation with 5½ in. barrel, high gloss bluing, target grips, and adj. rear sights. Importation disc. 1995.

\$450 \$375 \$325 \$295 \$275 \$250 \$225
Last Mfg.'s Sug. Retail was \$785.

MODEL MP90S — .22 S (disc.), .22 LR, or .32 WC cal., 4½ in. barrel, target pistol featuring forward assisted breech bolt mechanism, anatomic grips, and adj. weight, 5 shot mag., 2.4 lbs. Importation began 1992.

Mfg.'s Sug. Retail \$1,354 \$1,225 \$950 \$800 \$700 \$600 \$525 \$450

Add \$214 for .32 WC cal.

Conversion kits were previously available for this model at an extra charge. This model is imported exclusively by EAA.

MODEL MP95 — .22 LR or .32 WC cal., 4¼ in. barrel, integral Weaver style base mount, 5 or 9 shot mag., adj. trigger assembly, fully adj. sight, modular firing system, blue or chrome (.22 LR only) finish, adj. walnut grips, 2.2 lbs. New late 1994.

Mfg.'s Sug. Retail \$606 \$535 \$465 \$415 \$380 \$345 \$325 \$300

Add \$71 for chrome finish.

Add \$72 for .32 WC cal.

SHOTGUNS: SEMI-AUTO, 1985-OLDER

Benelli semi-auto 3rd generation (inertia recoil) shotguns were imported starting in the late 1960s. The receivers were mfg. of light aluminum alloy - the SL-80 Model 121 had a semi-gloss, anodized black finish, the Model 123 had an ornate photo-engraved receiver, the Model Special 80 had a brushed, white nickel-plated receiver, and the Model 121 M1 had a matte finish receiver, barrel, and stock. All SL-80 Series shotguns will accept 2¾ or 3 in. shells, and all SL-80 Series 12 ga. Models have interchangeable barrels with the 4 different model receivers (121, 121 M1, 123, or Special 80).

The SL-80 Series shotguns were disc. during 1985-86 and may have a parts availability problem if repairs are needed. Approx. 50,000 SL-80 series shotguns were mfg. before discontinuance - choke markings (located on side or underneath barrel) are as follows: * full choke, ** imp.

B

Grading**100%****98%****95%****90%****80%****70%****60%**

mod., *** mod., ***** imp. cyl. SL-80 series guns used the same action (much different than current mfg.) and all had the split receiver design. Be aware of possible wood cracking where the barrel rests on the thin area of the forend and also on the underside of the buttstock behind trigger guard. When buying or selling a SL-Series shotgun, be aware that when comparing the SL-80 Series with the newer action Benellis (post 1985), there is a big difference between the action, design changes, and actual selling prices in today's marketplace.

100% values within this section assume NIB condition.

Subtract 5% for "SACO" marked Benelli shotguns previously imported by SACO located in Arlington, VA.

SL-80 SERIES MODEL SL-121V — 12 ga., field grade, 26, or 28 in. fixed choke VR barrel, anodized and black semi-gloss finish on lower receiver. Disc. 1985.

\$360 \$295 \$260 \$245 \$215 \$190 \$175
Last Mfg.'s Sug. Retail was \$397.

SL-80 SERIES MODEL SL-121/SL-122 SLUG — 12 ga., features Monte Carlo stock and flat bottom Trap Grade beavertail forearm, 21 $\frac{1}{16}$ cyl. bore barrel, fixed open ring rear iron sights and fixed front ramp, 5 shot mag., recoil pad, 7 lbs. 3 oz. Disc. 1985.

\$425 \$395 \$325 \$275 \$225 \$185 \$165
Last Mfg.'s Sug. Retail was \$434.

SL-80 SERIES MODEL SL123V — 12 ga., stylish field grade, receiver Ergal special aluminum alloy with photo engraving, 26 or 28 in. VR barrel with various chokes, approx. 6 lbs. 13 oz. Disc. 1985.

\$425 \$370 \$320 \$275 \$225 \$200 \$175
Last Mfg.'s Sug. Retail was \$464.

Add \$20 for trap stock, \$10 for beavertail forearm and \$25 for skeet barrel.

EX-L — 12 ga., similar in appearance to the Model SL123V, except has hand-engraved receiver, very limited mfg. with unpredictable premiums over Model SL123V.

SL-80 SERIES MODEL 121 M1 POLICE/MILITARY — 12 ga. only, similar in appearance to the Super 90 M1, hardwood stock, 7 shot mag., matte metal and wood finish, most stocks had adj. lateral sling attachment inside of butt stock, 18 $\frac{3}{4}$ in. barrel. Disc. 1985.

\$460 \$395 \$365 \$310 \$250 \$225 \$175

MODEL 80 SPECIAL SKEET/TRAP — 12 ga. only, 28 in. VR with mod. choke and phosphorescent bead sight, has trap/skeet Monte Carlo grade/style wood stock with recoil pad, lower receiver is nickel plated, 7 lbs. 10 oz. Disc. 1986.

\$465 \$375 \$325 \$275 \$250 \$225 \$195
Last Mfg.'s Sug. Retail was \$531.

Trap guns should have high comb trap stock and trap grade forearm (not field grade/style wood). Trap guns should also be inspected carefully for internal wear before buying/selling.

SL-80 SERIES MODEL SL201 — 20 ga., 26 in. VR barrel bored mod., black anodized lower receiver, approx. 5 lbs. 10 oz. Disc. 1985.

\$390 \$320 \$275 \$240 \$215 \$190 \$165
Last Mfg.'s Sug. Retail was \$399.

BRI-BENELLI SL-80 123 SLUG GUN — 12 ga. only, premium slug gun featuring SL-80 Series action and drilled and tapped rifle bored barrel by E. R. Shaw Barrel Co., assembled by BRI in the U.S., Monte Carlo stock with beavertail forend, approx. 25 guns total mfg. 1986-1987.

\$1,395 \$1,175 \$995 \$850 \$725 \$600 \$495

Original issue price on this model was \$750-\$850. These specimens are marked "BRI-Benelli" on barrel. No warranties exist on this model.

Add \$110 for folding stock (mfg. 1990-disc.) - only available as a complete gun.

Add \$340 for Model 200 Laser Sight System with bracket (disc.).

B

BENSON FIREARMS LTD.

Manufactured by Aldo Uberti in Italy. Previously imported and distributed from 1987-1989 by Benson Firearms Ltd. located in Seattle, WA. Benson Firearms Ltd. combined with A. Uberti USA Inc. in early 1989 and discontinued importation.

Benson Firearms can be differentiated from other A. Uberti imports by the "Benson Firearms Seattle, WA" barrel marking.

Rather than provide a complete listing of Benson Firearms models, the following rules usually apply. Since Benson Firearms imported A. Uberti firearms, the Uberti section in this text should be referenced for current values regarding models with similar configurations. Collectibility to date has been limited on most Benson Firearms models, and as a rule, up-to-date values on this trademark are established by current importation prices of Uberti firearms. A complete listing of older Benson Firearms models can be found in Blue Book editions Eleven and Twelve.

BENTON & BROWN FIREARMS, INC.

Previous manufacturer located in Fort Worth, TX and Delhi, LA, 1993-1996.

RIFLES: BOLT ACTION

MODEL 93 — available in 15 cal. between .243 Win. and .375 H&H Mag., patterned after the Model R-84 Blaser, takedown, free floating 22 or 24 in. barrels, right or left-hand action, checkered walnut stock and forearm, 7-8¹/₂ lbs. New 1993.

Add \$90 for Tritium sights.								

B

Grading

100% 98% 95% 90% 80% 70% 60%

MODEL 92F(S) — 9mm Para., official U.S. military variation of 92 Series, 4.9 in. barrel, alloy frame, steel slide, 10 (C/B 1994) or 15* shot mag., chamber loaded indicator, matte black Bruniton finish, squared off trigger guard to facilitate two-hand shooting, extended mag. base, choice of regular or 3 dot sights (new 1991). Model 92F-P has plastic grips. Model 92F-W has wood grips. New 1984.

Mfg.'s Sug. Retail \$626 \$545 \$445 \$410 \$375 \$335 \$300 \$275

- Add \$21 for checkered wood grips.
- Add \$90 for Tritium (new 1994) sight system.
- Add 10% for Trijicon (disc.) sights.
- Add \$164 for gold engraving/accenting (Model EL-3, 92F-W only).
- Add \$395 for 9mm Competition Conversion Kit (new 1992).

The Model 92FS incorporates a slide retaining pin engineering change not included in the Model 92F.

Plastic grips are currently as desirable as wood, even though wood adds \$21 to the retail price.

Older Italian mfg. Model 92s in 98%+ condition are commanding slight premiums in some areas.

The U.S. military on January 15, 1985 announced that the Model 92F (M9) would replace the Colt Govt. Model .45 ACP as the standard government issue sidearm. Because of domestic political pressures, Congress requested that a new sidearm competition be conducted again in 1988. The result of this second trial was that the Department of the Army announced on May 22, 1989 that Beretta had won again. This military contract with Beretta U.S.A. Corp. involves over 320,000 Model M9 (military designation for the commercial Model 92F) being manufactured for U.S. military consumption in the 1990s. Actual delivery of commercial Model 92s began in January of 1986. Actual M9 delivery to U.S. Armed Forces has exceeded 430,000 units to date.

▲ **Model 92F(S) (Stainless)** — similar to Model 92F, except is mfg. from stainless steel, satin finish with plastic grips, 3 dot sights, initially released to law enforcement agencies only, a limited amount have found their way into the commercial market (usually with premiums being asked).

Mfg.'s Sug. Retail \$757 \$625 \$525 \$450

- Add \$20 for wood grips.
- Add \$90 for Trijicon (1993 only) or Tritium (new 1994) sight system.

▲ **Model 92F(S) Centurion** — similar to Model 92F, except has compact barrel slide unit with full size frame, 4.3 in. barrel, choice of plastic or wood grips, 3 dot sight system, same length as Model 92F Compact, 10 (C/B 1994) or 15* shot mag., 33.2 oz. Introduced 1992.

Mfg.'s Sug. Retail \$626 \$550 \$450 \$415 \$375 \$335 \$300 \$275

- Add \$21 for checkered walnut grips (Model 92F Wood).
- Add \$90 for Tritium sight system (new 1994).
- Add 10% for Trijicon sights (disc).

▲ **Model 92F-ELS** — deluxe variation of the Model 92F featuring stainless steel finish with gold highlights on trim, frame etchings, and small parts, special ergonomic walnut grips. Mfg. 1992-94.

\$685 \$550 \$425

Last Mfg.'s Sug. Retail was \$790.

U.S. M9 MARKED SLIDE/FRAME — 9mm Para., approx. 2,000 mfg. with special serial no. range and "BERO" prefix.

SHOTGUNS: SEMI-AUTO, RECENT MFG.

It is possible on some of the models listed below to have production variances occur including different engraving motifs, stock configurations and specifications, finishes, etc. These

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

have occurred when Beretta has changed from production of one model to another. Also, some European and English distributors have sold their excess inventory through Beretta U.S.A., creating additional variations/configurations that are not normally imported domestically. While sometimes rare, these specimens typically do not command premiums over Beretta's domestic models.

BERETTA CHOKES AND THEIR CODES (ON REAR LEFT-SIDE OF BARREL)

- * designates full choke (F).
- ** designates improved modified choke (IM).
- *** designates modified choke (M).
- **** designates improved cylinder choke (IC).
- FK designates skeet (SK).
- ***** designates cylinder bore (CYL).

MODEL 1200 FIELD — 12 ga., inertia recoil system, 28 in. VR barrels with multi-chokes, checkered European walnut stock and forearm (pre-1989), matte black polymer stock and forearm (starting 1989), recoil pad, 4 shot mag., approx. 8 lbs. Imported 1984-1989.

\$475	\$415	\$350	\$295	\$250	\$225	\$200
Last Mfg.'s Sug. Retail was \$580.						

▲ **Model 1200 Riot** — 12 ga. only, 2¾ or 3 in. chamber, 20 in. cyl. bore barrel with iron sights, extended mag. Imported 1989-90 only.

\$525	\$425	\$350	\$295	\$250	\$225	\$200
Last Mfg.'s Sug. Retail was \$660.						

MODEL 1201 FIELD MAGNUM — 12 ga., 3 in. chamber, 24, 26, or 28 in. VR barrel with multi-chokes (2), matte black polymer stock and forearm. Imported 1989-94.

\$500	\$395	\$340	\$285	\$250	\$225	\$200
Last Mfg.'s Sug. Retail was \$625.						

The Model 1201 can be differentiated from the Model 1200 by stock spacers to adjust length.

▲ **Model 1201 FP Riot** — 12 ga., riot configuration featuring 18 (new 1997) or 20 (disc. 1996) in. cylinder bore barrel, adj. rifle sights, matte finish. New 1991.

Mfg.'s Sug. Retail	\$745	\$585	\$450	\$360	\$295	\$250	\$225	\$200
Add \$85 for Tritium sights (new 1997).								
Add \$45 for pistol grip configuration (Model 1201 FPG3 - mfg. 1994 only).								

MODEL 300/301 — continuation of the AL-3 series, scroll engraved receiver. Mfg. 1977-1982.

Field grade	\$395	\$360	\$330	\$260	\$240	\$220	\$190
Magnum grade	\$425	\$385	\$330	\$275	\$250	\$230	\$210
Skeet grade	\$400	\$360	\$330	\$260	\$240	\$220	\$190
Trap grade	\$385	\$350	\$295	\$250	\$225	\$210	\$185

Beretta changed model nomenclature rapidly during the Model 300 Series. In approx. 10 months, the evolution of this model had progressed from the 300 to 303 Series. Beginning with the Model 303, all receivers were milled with a 3 in. ejection port window.

MODEL 301 SLUG GUN — 22 in. barrel, with sights. Disc.

\$395	\$360	\$330	\$305	\$265	\$230	\$190
-------	-------	-------	-------	-------	-------	-------

BERGMANN-BAYARD PISTOLS

Even though the below listed Bergmann-Bayard models were manufactured only by Anciens Etablissements Pieper of Herstal, Belgium, these pistols are listed under this heading as they are most commonly referred to by this trademark designation.

MODEL 1908 STANDARD COMMERCIAL — 9mm Bergmann/Bayard, identified by a mounted knight on the left magazine housing and is without finger cuts at base of magazine housing.

\$1,850 \$1,350 \$1,000 \$750 \$600 \$500 \$400 \$360 \$335 \$310 \$285 \$260

Add 25% if backstrap is slotted for shoulder stock.

Add \$3,000 for excellent original leather/wood shoulder stock.

MODEL 1908 SPANISH CONTRACT — 9mm Bergmann/Bayard, total contract was for 3,000 pistols, can be identified from standard commercial pistols by the Spanish military acceptance stamp struck on the receiver.

\$1,450 \$1,100 \$900 \$750 \$600 \$450 \$400 \$360 \$335 \$310 \$285 \$260

MODEL 1910 STANDARD COMMERCIAL — 9mm Bergmann/Bayard, mechanically similar to Model 1908 Standard Commercial except has finger cuts in bottom of magazine housing, circular grooves are present on each side of magazine base.

\$1,250 \$1,000 \$700 \$600 \$500 \$400 \$350 \$315 \$280 \$265 \$245 \$225

MODEL 1910 DANISH GOVERNMENT CONTRACT — 9mm Bergmann/Bayard, Trolit grips were used for the original conversion, followed later by wood replacements, total contract was for 4,840 pistols with delivery mfg. 1911-1914. This variation can be identified from the usual commercial pistols by the Danish proof mark on the left receiver side and Danish inventory number on right side of receiver.

\$1,350 \$1,100 \$900 \$750 \$600 \$450 \$400 \$360 \$335 \$310 \$285 \$260

Deduct 20% if converted and over stamped M. 1910/21.

MODEL 1910/21 TOJHUS — 9mm Bergmann/Bayard, these pistols are marked "Haerens Tojhus" and are numbered from 1-900, original grips were black Trolit, replacement grips are either all smooth or with checkered circles above and below grip screw.

\$1,650 \$1,300 \$1,000 \$750 \$600 \$500 \$400 \$360 \$335 \$310 \$285 \$260

This contract was manufactured by the Danish Royal Arsenal located in Copenhagen.

MODEL 1910/21 RUSTKAMMER — 9mm Bergmann/Bayard, pistols are marked "Haerens Rustkammer", and numbered 901-2204, grip replacements are the same as noted for Haerens Tojhus.

\$1,500 \$1,200 \$900 \$750 \$600 \$450 \$400 \$360 \$335 \$310 \$285 \$260

This contract was manufactured by the Danish Royal Arsenal located in Copenhagen.

WAYNE BERGQUIST CUSTOM PISTOLS

Custom pistolsmith located in Naples, FL. The company should be contacted directly (see Trademark Index for current information) regarding their Bullseye, IPSC/Tactical, Defense/Carry, or IPSC models.

BERNARDELLI, VINCENZO

Manufactured since 1721 in Brescia, Italy. Currently imported and distributed by Armsport, Inc. located in Miami, FL. Previously imported and distributed by Magnum Research, Inc. located in Minneapolis, MN (1989-92), Quality Arms, Inc. located in Houston, TX, Armes De Chasse located in Chadds Ford, PA, Stoeger located in New York, NY, and Action Arms, Ltd. located in Philadelphia, PA.

There is some confusion on the Bernardelli trademark as there have been three different companies (Pietro Bernardelli, Vincenzo Bernardelli, and Santini Bernardelli) that have produced firearms. During the late 1980s, there were quite a lot of Pietro Bernardellis that were "dumped" in the American marketplace - these guns do not have the quality of Vincenzo Bernardelli and are not covered within the scope of this text.

216 BERNARDELLI, VINCENZO, cont.

The only company that is currently manufacturing firearms is Vincenzo Bernardelli - only models from this company will be listed within this section.

\$2,000 \$1,500 \$1,300 \$1,100 \$1,000 \$900 \$800

MODEL 110 EXTRA — similar to Model 110, except engraved.

\$3,021 \$2,265 \$1,970 \$1,665 \$1,510 \$1,360 \$1,210

S. UBERTO 1 GAMECOCK — 12, 16, 20, or 28 ga., 25³/₄ in. imp. cyl. and mod., 27¹/₂ in. full and mod., hammerless, boxlock, extractors, two triggers, English style stock, checkered.

\$853 \$635 \$605 \$550 \$495 \$440 \$415

Add 20% for ejectors.

SHOTGUNS: SIDE-BY-SIDE, CURRENT MFG.

Bernardelli side-by-side shotguns are manufactured with straight grip, English-style stocks with pistol grip available as a special order. Importation of Bernardelli shotguns has been inconsistent in the past and current dealer inventories of older merchandise might be priced less than similar models currently imported.

A wide variety of special order options is available on these shotguns. Individual price quotations are available by contacting Armsport, Inc. located in Miami, FL.

Barrel choke markings for V. Bernardelli shotguns are as follows; Full: *, Impr. Mod: **, Mod: ***, Impr. Cyl: ****, Cylinder: CL.

BRESCIA HAMMER DOUBLE BARREL — 12, 16, or 20 ga., 25³/₄, 27¹/₂ and 29¹/₂ in. mod. and full, 12 ga., 25¹/₂ in. imp. cyl. and mod., sidelock, extractors, two triggers, straight English stock, splinter forearm, checkered. Importation temporarily disc.

\$2,050 \$795 \$600 \$450 \$425 \$395 \$350

Last Mfg.'s Sug. Retail was \$2,482.

Sudden drop in values reflects desirability factor in today's marketplace.

ITALIA HAMMER DOUBLE BARREL — similar to Brescia, except higher grade engraving and wood. Importation temporarily disc.

\$2,275 \$1,200 \$900 \$735 \$650 \$600 \$550

Last Mfg.'s Sug. Retail was \$2,844.

Sudden drop in values reflects desirability factor in today's marketplace.

B

BOSS & CO., LTD.

Manufacturer located in London, England 1812 to date. Direct sales from the manufacturer only.

Boss manufactures some of the world's finest shotguns and rifles (best quality guns only). Their shotguns and rifles have always been custom built per individual order. Approximately 10,000 have been manufactured to date. Listed below are the basic models (does not include special orders, optional engraving patterns, and other possible options) with current retail values computed at (1 pound = \$1.57) and are for standard models only.

RIFLES: SxS OR O/U

Boss Express SxS and O/U double rifles are quoted per individual request only. Older rifles must be appraised individually.

SHOTGUNS

Prices below DO NOT include English VAT.

BOSS SxS — all gauges (16 ga. is currently POR), barrel lengths and chokes to specifications, bar-action sidelock, easy-open action (not self-opening), square or round action, checkered stock, pistol grip (optional) or straight grip stock, single or double triggers, splinter or beavertail (optional) forearm, traditional English rose & scroll engraving.

Mfg.'s Sug. Retail	\$47,100	\$47,100	\$33,250	\$22,500	\$18,750	\$15,000	\$13,000	\$11,000
--------------------	----------	----------	----------	----------	----------	----------	----------	----------

- Add \$3,140 for 20 ga.
- Add \$7,850 for 28 ga. or .410 bore.
- Add \$1,490 for ST (patented "3 pull" system).
- Add 10% for opening assist.
- Add \$3,140 surcharge for ordering a pair of matched guns.

BOSS O/U — 12, 20, 28 ga., or .410 bore standard, barrel lengths and chokes to specifications, shell-framed sidelock, auto ejectors, double triggers or single non-selective, English straight stock standard to specifications, VR or pistol grip stock optional, traditional English rose & scroll fine engraving, limited availability.

Mfg.'s Sug. Retail	\$70,650	\$70,650	\$52,100	\$37,500	\$32,500	\$27,500	\$22,500	\$18,000
--------------------	----------	----------	----------	----------	----------	----------	----------	----------

- Add \$3,140 for 20 ga.
- Add \$7,850 for 28 ga.
- Individual appraisals should be secured when evaluating the .410 bore.
- Add 10% for opening assist.
- Add \$3,140 surcharge for ordering a pair of matched guns.

Note: above values represent base gun only. Any additional engraving (traditional rose and scroll) and/or special orders will add considerably to the above prices.

BOSWELL, CHARLES

Previously manufactured in London, England.

In 1988, Charles Boswell was purchased by U.S. interests and Cape Horn International (previously Cape Horn Outfitters) located in Charlotte, NC has been retained to sell and manufacture the Boswell Guns in the U.S. In addition to acquiring their entire inventory of English manufactured firearms, Charles Boswell is currently fabricating new shotguns and double rifles in the U.S. using the best materials including English lock mechanisms and will retain the Charles Boswell Co. Trademark. Every gun will be custom ordered to

BREN

Manufactured 1983-86 by Dornaus & Dixon Ent., Inc., located in Huntington Beach, CA.

Bren 10 magazines played an important part in the failure of these pistols to be accepted by consumers. Originally, Bren magazines were not shipped in some cases until a year after the customer received his gun. The complications arising around manufacturing a reliable magazine domestically lead to the downfall of this company. For this reason, original Bren 10 magazines are currently selling for \$150-\$175 if new (watch for fakes).

PISTOLS

Note: the Bren 10 shoots a Norma factory loaded 10mm auto. cartridge. Ballistically, it is very close to a .41 Mag. Bren pistols also have unique power seal rifling, with five lands and grooves. While in production, Bren pistols underwent (4) engineering changes, the most important probably being re-designing the floorplate of the magazine, thus preventing mag. shifting while undergoing recoil.

100% values in this section assume NIB condition. Subtract 10% without box/manual.

BREN 10 STANDARD MODEL — 10mm only, semi-auto selective double action design, blue slide/silver frame finish, 5 in. barrel, 11 shot, stainless steel frame, usually supplied with two mags. although early mfg. did not include a mag. because of design problems. "83SM" ser. no. prefix. Mfg. 1984-86.

\$1,550 \$1,250 \$975

Last Mfg.'s Sug. Retail was \$500.

Add \$600 for .45 conversion unit.

BREN 10 MILITARY/POLICE MODEL — 10mm only, identical to standard model, except has all black finish, "83MP" ser. no. prefix. Mfg. 1984-86.

\$1,495 \$1,195 \$950

Last Mfg.'s Sug. Retail was \$550.

BREN 10 SPECIAL FORCES MODEL — 10mm only, commercial version of the military pistol submitted to the U.S. gov't. Model D has dark finish. Model L has light finish, "SFD" ser. no. prefix on Model D, "SFL" ser. no. prefix on Model L. Disc. 1986.

Dark finish - Model D

\$1,595 \$1,275 \$975

Light finish - Model L

\$1,895 \$1,575 \$1,275

Last Mfg.'s Sug. Retail was \$600.

BREN 10 DUAL-MASTER PRESENTATION MODEL — 10mm and .45 ACP, supplied with extra slide and barrel (numbered to gun) to accommodate the .45 ACP. same mags. (two) for both calcs., extra fine finish, light scroll engraving, with wood presentation case, "83DM" ser. no. prefix, less than 50 mfg. Disc. 1986.

\$3,800 \$2,950 \$2,300

Last Mfg.'s Sug. Retail was \$800.

BREN 10 JEFF COOPER COMMEMORATIVE — 10mm only, while 2,000 were announced for mfg., sources believe less than 30 were actually made, 22Kt. gold plated detailing, laser engraved stocks, special presentation chest. Disc. 1986.

\$4,600 \$4,000 \$3,700

Last Mfg.'s Sug. Retail was \$2,000.

MARKSMAN MODEL — .45 ACP, 250 mfg. (in its own ser. range) for a retail shop in Chicago called "The Marksman", action similar to Bren 10 Standard Model. "MSM" ser. no. prefix.

\$1,200 \$895 \$695

Add \$650 for 10mm conversion unit.

Add \$100 for original nylon carrying case marked "Marksman".

BRETTON

Manufactured in Saint-Etienne, France. Imported and distributed by Mandall Shooting Supplies, Inc. located in Scottsdale, AZ.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

SHOTGUNS: OVER AND UNDER

All Bretton shotguns are extremely lightweight and well balanced because of their unique design (permitting total disassembly including barrels) and use of various composition alloys.

BABY STANDARD (SPRINT MODEL) — 12 or 20 ga. only, sliding breech action allows barrels to move straight forward, 27½ in. separated barrels, double triggers, side opening lever, blued action and barrels, recoil pad, checkered walnut stock and forearm, 4.8 lbs.

Mfg.'s Sug. Retail	\$995	\$885	\$700	\$625	\$575	\$475	\$430	\$395
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Available from Mandall Shooting Supply, Inc. only.

SPRINT DELUXE — 12, 16 (disc.), or 20 ga., action similar to Baby Standard, engraved coin finished receiver, 27½ in. separated barrels, deluxe checkered walnut stock and forearm, extremely lightweight, 4.8 lbs. Importation disc. 1994.

\$895	\$725	\$625	\$575	\$475	\$430	\$395
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$975.

Available from Quality Arms, Inc. and Mandall Shooting Supply, Inc.

FAIR PLAY MODEL — 12 or 20 ga., differs from Sprint Models in that action pivots like normal O/U, 27½ in. separated barrels, lightweight construction, 4.8 lbs.

Mfg.'s Sug. Retail	\$966	\$850	\$675	\$625	\$575	\$475	\$430	\$395
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Add \$64 for Fair Play Limited Model.

BRITARMS

Manufactured by Berdan Gunmakers Ltd. located in England. Previously imported and distributed until 1994 by Mandall Shooting Supplies, Inc. located in Scottsdale, AZ. Previously by Action Arms Ltd. (1982-83) located in Philadelphia, PA.

Britarms Target Pistols have had very limited importation to date in the U.S. While Britarms has manufactured other models, only the Model 2000 is listed since it has been formally imported through U.S. firms.

Model 2000 (MK II) — .22 LR, standard fire target semi-auto pistol, adj. trigger and rear sight, anatomical adj. grips, 5.82 in. barrel, 5 shot mag., 3 lbs., limited importation, including approx. 200 through Action Arms Ltd.

\$995	\$825	\$700	\$625	\$550	\$495	\$450
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,295.

This model features a bolt hold-open mechanism which serves as a manual safety to allow importation.

BRNO ARMS

Manufactured in Brno & Uherski Brod, Czech Republic (formerly Czechoslovakia) since 1936. Currently imported by Bohemia Arms located in Fountain Valley, CA. Brno rifles, shotguns, and combination guns produced at the Brno factory were previously imported and distributed by Magnum Research Inc. located in Minneapolis, MN (c. 1994-96). Pragotrade located in Ontario, Canada also imports this trademark for Canada currently (and exclusively). Previously imported by T.D. Arms located in New Baltimore, MI.

While little history is known about this important European trademark, the following biographical sketch will provide some information. In approximately 1916, some military personnel took over the controlling interest of the Austro-Hungarian armament shop in Brno, Czechoslovakia, renaming it The State Armament and Engineering Works. Approximately a year later, the name was changed to Czechoslovak State Armament Works. Prior to 1924, this firm was involved mainly with Mauser Model 98 type rifles (both assembly and mfg.).

In 1924, the name was again changed to Ceskoslovenska Zbrojovka A.Z. (Czechoslovakian Arms Factory Ltd.) - commonly known as the CZ firm. CZ manufactured the VZ-24 Mauser rifle for Czechoslovakia as well as other M-98 military rifles and carbines for other countries, including many which Germany used during WWII. After WWII, the name was again changed to Zbrojovka Brno (Brno Arms Works), or ZB for short.

With the iron curtain descending on Europe after WWII, communist bloc countries had little exportation to the U.S., including Czechoslovakia. In the early '50s, Brno rifles were imported by Continental Arms Corp. located in New York City. Since the sudden decline of communism in 1992, more and more products (including firearms from Czechoslovakia) will see their way into the U.S. without the 65% importation tax previously levied on goods from older communist bloc countries.

CZ PISTOLS & RIFLES

See separate listing under CZ in this text.

RIFLES: BOLT ACTION

The Brno Lightweight Sporter was introduced in the late 1930s. A small quantity was manufactured during pre-war and WWII. Most production occurred between 1946-1955. Total production of this model was approx. 40,000+ units. A design change was implemented at approximately serial number 23,000, at which time the receiver was changed to a double square bridge dovetailed to accept scope mounts.

Earlier mfg. had a rounded receiver and some had claw type scope mounts installed. These guns were referenced as Models 21 and 22 domestically, but no model designation appears on the gun. Available calcs. were 6.5x57, 7x57, 7x64, 8x57, or 8x60mm. Configuration was small ring Mauser 98 receiver with double set trigger(s), butterknife bolt, checkered walnut pistol grip stock (half or full length), with cheekpiece and sling swivels, late production incorporated four variations and two barrel lengths (20.5 or 23.6 in.).

BRNO RIFLES MAY BE DATED BY THE 2-DIGIT DATE BESIDE THEIR PROOFMARKS.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

HORNET SPORTER (MODEL ZKW 465) — miniature Mauser action, .22 Hornet, 22³/₄ in. barrel, 5 shot clip mag., 3-leaf express sight, double set trigger(s), checkered pistol grip stock, also called Z-B Mauser, serial range noted is 02,901-37,393, approx. 40,000 mfg. between 1949-1973.

\$875 \$700 \$600 \$470 \$385 \$305 \$220

There are few examples in .218 Bee and .222 Rem. cal. - premiums can be added.

This model was redesigned with a subsequent designation of ZKB 680 Fox in approx. 1975.

MODEL ZG-47 — .270 Win., .30-06, 7x57, 7x64, 8x 64S, 8x57mm, 9.3x62, or 10.75x68mm cal., large ring Mauser 98 action with 20mm dovetails on receiver ring and bridge, single trigger, hinged floorplate, rollover type safety and bolt handle designed for low scope mounting, 23¹/₂ in. barrel, checkered pistol grip walnut stock with sling swivels and Schnabel forend, approx. serial range is 0-20,000, mfg. and exported world-wide between 1956-1962 (approx.).

\$995 \$875 \$700 \$600 \$470 \$385 \$305

Early specimens of this model are marked "BRNO MADE IN CZECHOSLOVAKIA". This model is generally regarded as being one of the finest rifles that Brno has manufactured.

Last Mfg.'s Sug. Retail was \$1,395.						

BROWNING

Browning guns originally were manufactured in Ogden, UT, circa 1880. Current BAC headquarters (not manufacturing) are located in Morgan, UT. Browning firearms are manufactured by Fabrique Nationale in Herstal and Liege, Belgium. Since 1976, Browning has also contracted Miroku of Japan and A.T.I. in Salt Lake City, UT to manufacture both long arms and handguns. During 1992, Browning (including F.N.) was acquired by GIAT of France.

BROWNING

The Browning section in this text has been arranged in the following order — PISTOLS, RIFLES, SHOTGUNS: SEMI-AUTO, SHOTGUNS: O/U, OTHER SHOTGUNS, LIMITED EDITIONS-COMMEMORATIVES.

BROWNING HISTORY

The Browning firm, first known as J.M. Browning & Bro., was established in Ogden, Utah about 1880. Later known as Browning Brothers and Browning Arms Company (BAC), the firm actually manufactured only one gun — the Model 1878 Single Shot which was John M.'s first patent. Winchester bought the production and distribution rights to this gun in 1883, bringing it out as the Winchester M1885. From that time until 1900, Mr. Browning sold Winchester the exclusive rights to 31 rifles and 13 shotguns, of which Winchester produced only 7 rifles (M1885SS:

the lever actions M1886, 1892, 1894 and 1895; and the slide action .22s M1890 and 1906) and 3 shotguns (M1887, M1893 and M1897). The other models were bought from Browning simply to keep them out of the hands of other arms makers.

B John M. Browning, perhaps the greatest firearms inventor the world has ever known, was directly responsible for an estimated 80 separate firearms that evolved from his 128 patents. During his most prolific period from 1894 to 1910, Browning sold the rights to his rifles, semi-auto pistols, shotguns and machine guns to Winchester, Remington, Colt and Stevens in this country and to Fabrique Nationale for sale outside the U.S. Every Colt and FN semi-auto pistol is based on a Browning patent. In 1902, Browning broke off relations with Winchester when the company refused to negotiate a royalty arrangement for his new semi-auto shotgun(A-5). Browning took the prototype to FN where it became the most commercially successful of all his inventions. FN has produced 6 automatic pistols, 3 rifles and 2 shotguns designed by John M. Browning and is still a major producer of arms sold by Browning in the U.S. and by FN distributors worldwide.

Our American military was armed for many years with Browning designed weaponry, not the least of which is the venerable "Old Slabside" 1911 Govt. Model .45 ACP. Today, the firm that bears the Browning name still stands at the forefront with the other makers of fine sporting firearms.

BROWNING FACTS

Note: Between 1966-1971 Browning used a salt-curing process to speed the drying time needed for their walnut stock blanks. Unfortunately, the salt would be released from the wood and oxidize the metal surface(s) after a period of time. These guns, especially bolt action rifles in all grades, some BARs, Superposed shotguns, and T-bolt models should be examined carefully around the edges of the wood for signs of freckling and rust. Discount guns that show evidence of salt corrosion 15-50%, depending on how bad rusting has occurred. Check screws and wood under butt plate as well.

Since the inception and standardization of steel shot for hunting purposes, the desirability factor of shotguns has changed considerably. Any shorter barreled, open choked Belgian Browning shotgun is currently quite a bit more desirable than its 30 in., full choked barrel counterpart. Premiums do exist for this shorter barreled configuration, especially on the Belgian Superposed and A-5 Models. On newer manufacture, choke tubes have become very desirable, and specimens without choke tubes (especially guns with longer barrels) must be discounted somewhat. Browning does not recommend using steel shot in any Superposed (B-25) or older Belgian Auto-5 barrels.

BROWNING VALUES INFORMATION

Editor's Note: It is important to note the differences in values of Browning weapons manufactured in Belgium by F.N. and those made recently in Japan by Miroku. We feel that these values are somewhat higher because of collector interest in Browning guns made in Belgium and not as the result of any inferiority of the quality of Browning guns made anywhere else.

AS A FINAL NOTE: Most post-war Brownings are collectible only if in 95% or better condition as most models have relatively high mfg. and are not that old. Condition under 95% is normally very shootable, but not as collectible and values for 95% or less condition could be lower than shown in some areas.

Most 100% values in this section assume NIB condition. Subtract 10% without box/manual. Also, all add-ons or deductions in this section reflect retail pricing without any discounting. On higher grade Browning firearms that are engraved, signed specimens by FN's master engravers Funken, J. Baerten, Vrancken, and Watrin will command premiums over the values listed below.

BROWNING SERIALIZATION

In addition to the Browning serialization listed in the back of this text, the following codes will determine the year and origin of those guns made from 1975 to date. The 2 letters in the middle of the serial number are the code designations for year of manufacture. They represent the following: RV - 1975, RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982,

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NU - 1996, NR - 1997.

Since most Brownings use a 3-digit model identification code (appearing first on European or U.S. mfg. guns and last on Japanese mfg.), both where and when the specimen was made can easily be determined (i.e. Ser. No. 611RP2785 would be a Model B-2000 made in either Belgium or Portugal in 1978 with 2785 being the Ser. No.— Ser. No. 01479PX368 indicates a BSS 20 ga. mfg. in Japan in 1983).

PISTOLS: SEMI-AUTO, F.N. PRODUCTION UNLESS OTHERWISE NOTED

MODEL 1900-FN — 7.65mm cal., first Belgian Browning, 4 in. barrel. 724,500 mfg. 1899-1910.

\$350	\$295	\$240	\$200	\$160	\$130	\$100
-------	-------	-------	-------	-------	-------	-------

 Add 30% for early pistols with "pistol logo" grips.

MODEL 1903-FN — 9mm Browning Long cartridge, 5 in. barrel. 58,400 mfg. 1903-1939.

\$500	\$425	\$350	\$300	\$260	\$220	\$180
-------	-------	-------	-------	-------	-------	-------

 Add 50% if slotted to accept shoulder stock.
 This variation was also manufactured with a detachable shoulder stock — this accessory is rare and can add as much as \$2,000 to values listed above.

MODEL 1903-SWEDISH CONTRACT — 9mm cal., manufactured by Husqvarna and Swedish Arsenal (so marked), many were imported into U.S. and converted to .380 ACP from original Browning 9mm Long.

\$300	\$260	\$230	\$200	\$180	\$150	\$125
-------	-------	-------	-------	-------	-------	-------

 Deduct 25% for .380 ACP conversion.

MODEL 1905-FN (VEST POCKET) — 6.35mm (.25 ACP), dubbed "Vest Pocket" model, manufactured by Fabrique Nationale, Herstal, Belgium. 1,086,133, mfg. 1906-1959.

▲ **First Variation** — no slide lock/safety lever.

\$350	\$285	\$255	\$225	\$170	\$135	\$100
-------	-------	-------	-------	-------	-------	-------

 Add 10% for nickel finish.

▲ **Second Variation** — post 1908, with slide lock/safety lever.

\$325	\$285	\$255	\$210	\$170	\$135	\$100
-------	-------	-------	-------	-------	-------	-------

 Add 10% for nickel finish.

MODEL 1910-FN (MODEL 1955) — 7.65mm (.32 ACP) and Browning 9mm short (.380 ACP) 4 in. barrel. FN manufacture. 701,266 mfg. 1912-1980.

\$325	\$300	\$275	\$250	\$225	\$195	\$150
-------	-------	-------	-------	-------	-------	-------

 Add 20% if BAC marked and .380 ACP cal.
 Add 30% if BAC marked and 7.65mm cal.
 This model is also referred to as the Model 1955. BAC marked pistols were imported 1954-1968.

MODEL 1922 OR 10/22 FN — 7.65mm (.32 ACP) or .380 ACP cal., modified Model 1910 with 4½ in. barrel, longer grip frame and mag., made for commercial sale as well as military contracts. Several hundred thousand made by Nazis during the occupation of Liege, Belgium 1940-1944. Mfg. between 1912-1959.

\$240	\$215	\$195	\$175	\$150	\$125	\$110
-------	-------	-------	-------	-------	-------	-------

 Add 10% for Waffenampt proofing.
 Add 20% for foreign contracts.
 Add 20% if .380 ACP Waffenampt proofed.

The Model 10/22 and M1922 are the same pistol. The Model 1910 was modified by FN technicians for sale to Serbian armed forces in 1923. Also sold to France, Holland, Yugoslavia, and other countries. Also made by the German military 1940-1944.

FN "BABY" MODEL — 6.35mm (.25 ACP) cal., lighter, smaller modification of Browning Model 1905 Vest Pocket .25, without grip safety or separate slide lock lever, imported under BAC trademark from 1954-1970 in standard blue finish, lightweight nickel and engraved Renaissance models. Mfg. 1931-1983. Total production is over 510,000.

B

Grading	100%	98%	95%	90%	80%	70%	60%
▲ <i>FN Marked</i> — slide marked Fabrique Nationale, blued finish standard.	\$395	\$350	\$310	\$280	\$245	\$225	\$200
▲ <i>BAC Marked</i> — slide marked Browning Arms Co., blued finish standard.	\$300	\$265	\$225	\$195	\$180	\$165	\$150
▲ <i>Lightweight model</i> — nickel frame, with pearl grips.	\$395	\$350	\$310	\$280	\$245	\$225	\$200
▲ <i>Renaissance model</i> — engraved, satin grey finish.	\$875	\$725	\$550				

Add 20% if coin finished.

FN/BROWNING MODEL 10/71 — 4½ in. barrel, modified version of Model 1922 (10/22) in .380 ACP cal., grip safety, includes target sights and grips in addition to incorporating a magazine finger tip extension designed to comply with GCA of 1968. Sold in U.S. by BAC 1970-1974 as the "Standard .380", still mfg. by FN as Model 125.

	\$375	\$295	\$250	\$220	\$205	\$190	\$160
--	-------	-------	-------	-------	-------	-------	-------

▲ *Renaissance Model*

	\$950	\$750	\$625				
--	-------	-------	-------	--	--	--	--

MODEL 1935 HI-POWER — 9mm, 13 shot mag., 4²¹/₃₂ in. barrel, Browning's last pistol design, millions made 1927 to date in variations for commercial, military, and police use in over 68 countries, first imported under BAC trademark in 1954.

Please refer to the Fabrique Nationale section of this book for pre-1954 variations (including WWII and earlier commercial models).

HI-POWER: POST-1954 MFG. — 9mm Para. or .40 S&W (new 1995), similar to FN model 1935, has BAC slide marking, 10 (C/B 1994) or 13* shot mag., 4⁷/₈ in. barrel, polished blue finish, checkered walnut grips, fixed sights, molded grips were introduced in 1986, ambidextrous safety was added to all models in 1989, approx. 32 (9mm Para.) or 35 (.40 S&W) oz. Mfg. 1954-present.

▲ *Polished Blue Finish* — includes fixed sights.

Mfg.'s Sug. Retail	\$585	\$485	\$380	\$330	\$300	\$280	\$260	\$240
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Subtract \$30 for molded grips (disc. 1990).

Add 10% for older mfg. with rounded style ring hammer.

Major identifying factors of the Hi-Power are as follows: the "Thumb-Print" feature was mfg. from the beginning (including FN mfg.) through 1959, old style internal extractors were mfg. from the beginning (including FN mfg.) through 1956, the "T" SN prefix (start visible extractor) was mfg. 1963-1972, 69C through 77C SN prefixes were mfg. 1969-1977, rounded type Ring Hammers were mfg. from the beginning (including FN mfg.) through 1972, Spur Hammers are mfg. 1970-present, and the 245 SN prefix are mfg. 1977-present.

Older specimens in original black pouches (especially with gold metal zipper) will command slight premiums over boxed guns.

▲ *Adj. sights*

Mfg.'s Sug. Retail	\$636	\$515	\$400	\$360	\$330	\$300	\$280	\$255
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

▲ *Mark III Matte Blue Finish* — 9mm Para. or .40 S&W (new 1994) cal., non-glare matte finish, ambidextrous safety, tapered dovetail rear fixed sight, molded grips, Mark III designation became standard in 1994, 35 oz. New 1985.

Mfg.'s Sug. Retail	\$551	\$480	\$360	\$310	\$280	\$260	\$240	\$225
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Recently, Hi-Powers that appear to have a "black" finish have been noticed. These guns are painted rather than blued and some parties have been selling them as original military FNs. Do not confuse these painted specimens for original pistols and remember, original guns will be worth more than refinished pistols. Also, beware of 9mm pistols manufactured in Argentina under F.N. license.

▲ *Silver Chrome Finish* — 9mm Para. or .40 S&W (new 1995), entire gun finished in silver chrome, includes adj. sights and Pachmayr rubber grips. 36 (9mm Para.) or 39 (.40 S&W) oz. New 1991.

Mfg.'s Sug. Retail	\$651	\$525	\$415	\$360	\$330	\$300	\$280	\$255
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

▲ **Practical Model** — 9mm Para. or .40 S&W (new 1995) cal., features blued slide, silver-chromed frame finish, wraparound Pachmayr rubber grips, round style serrated hammer, and choice of adj. sights (new 1993) or removable front sight, 36 (9mm Para.) or 39 (.40 S&W) oz. New 1990.

Mfg.'s Sug. Retail	\$630	\$515	\$405	\$350	\$325	\$300	\$280	\$255
---------------------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------

Add \$52 for adj. sights.

▲ **Nickel/Silver Chrome finish** — not to be confused with stainless steel (never offered in the Hi-Power). Also, this finish is different from the silver chrome finish released in 1991. Disc. 1985.

	\$550	\$475	\$415	\$375	\$360	\$340	\$315
--	--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$525.

▲ **.30 Luger Hi-Power** — .30 Luger cal., mfg. for European sales 1986-87 (most are marked F.N. on slide), approx. 1,500 imported late 1986-89, similar specifications as 9mm model.

	\$550	\$475	\$415	\$375	\$360	\$340	\$315
--	--------------	--------------	--------------	--------------	--------------	--------------	--------------

This model was never cataloged for sale by BAC in the U.S. A few specimens have been noted with B.A.C. slide markings and are more desirable than F.N. marked pistols.

▲ **GP Competition** — 9mm, competition model with 6 in. barrel, detent adj. rear sight, rubber wraparound grips, front counterweight, improved barrel bushing, decreased trigger pull, approx. 36½ oz.

	\$650	\$550	\$475	\$425	\$395	\$350	\$325
--	--------------	--------------	--------------	--------------	--------------	--------------	--------------

The original GP Competition came in a black plastic case w/accesories and is more desirable than later imported specimens which were computer serial numbered and came in a styrofoam box. Above prices are for older models — deduct 10% if newer model (computer serial numbered).

This model was never cataloged for sale by BAC in the U.S.

▲ **Tangent Rear Sight Model** — manufactured from 1965-1978. Adj. rear sight to 500 meters. A total of approx. 7,000 were imported by Browning Arms Co. Early pistols are designated by "T" prefix and were mfg. 1964-69, later pistols had spur hammers.

	\$700	\$600	\$525	\$440	\$400	\$370	\$340
--	--------------	--------------	--------------	--------------	--------------	--------------	--------------

Add \$100 for "T" prefix.

▲ **Capitan Polished Blue Finish** — 9mm Para. cal., features 50-500 meter tangent rear sight, blued finish with walnut grips, 32 oz. New 1993.

Mfg.'s Sug. Retail	\$693	\$565	\$475	\$385	\$340	\$300	\$280	\$260
---------------------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------

▲ **Tangent Rear Sight Slotted** — variation with grip strap slotted to accommodate shoulder stock. Early pistols had "T" prefixes. Later pistols had spur hammers and are in the serial range 73CXXX-74CXXX.

	\$1,100	\$950	\$775	\$650	\$525	\$440	\$400
--	----------------	--------------	--------------	--------------	--------------	--------------	--------------

Add \$150 if with "T" prefix.

This variation will command a premium; beware of fakes, however (carefully examine slot milling).

BCA EDITION HI-POWER — limited edition made specifically for the Browning Collectors Association in 1980.

	\$600	\$495	\$400
--	--------------	--------------	--------------

GOLD LINE HI-POWER — blued finish with gold line perimeter engraving.

	\$2,750	\$2,150	\$1,750
--	----------------	----------------	----------------

RENAISSANCE HI-POWER — extensive scroll engraving on grey silver receiver, synthetic pearl grips, gold plated trigger. Disc. 1980.

Round Hammer/fixed sights	\$1,350	\$995	\$795
----------------------------------	----------------	--------------	--------------

Spur Hammer/fixed sights	\$1,195	\$895	\$695
---------------------------------	----------------	--------------	--------------

Add 5% for adj. sights.

CASED GRADE I SET — one each .25 ACP, .380 ACP, and 9mm Para. Hi-Power Grade I Models in walnut or black vinyl case, non-matching serial numbers.

	\$1,500	\$1,250	\$895
--	----------------	----------------	--------------

Grading**100%****98%****95%****90%****80%****70%****60%**

CASED RENAISSANCE SET — one each .25 ACP, .380 ACP, and 9mm Para. Hi-Power Renaissance models in walnut or black vinyl case, non-matching serial numbers. Offered 1954-1969.

\$3,500 \$2,750 \$2,100

Add 15% for coin finish.

CENTENNIAL MODEL HI-POWER — similar to fixed sight Hi-Power, chrome plated with inscription "Browning Centennial/1878-1978", engraved on side, cased; 3,500 mfg. in 1978. Original issue price was \$495.

\$695 \$550 \$425

CENTENNIAL MODEL HI-POWER 1 OF 100 — features extensive engraving, checkered walnut grips with border. 100 mfg. during 1989 - 34 were sold in U.S., 66 were sold in Europe.

\$4,250 \$3,250 \$1,475

LOUIS XVI MODEL — 9mm, chemically etched throughout in leaf scroll patterns, satin finish, checkered grips, walnut case. Disc. 1984.

\$895 \$750 \$525

Add 5% for adj. sights.

9 MM CLASSIC SERIES - PISTOL — 9mm, Hi-Power action, less than 2,500 manufactured in Classic model and under 350 manufactured in Gold Classic. Both editions feature multiple engraved scenes, and a special silver grey finish, presentation grips, cased. Mfg. 1984-86.

\$895 \$675 \$495

Last Mfg.'s Sug. Retail was \$1,000.

▲ **Gold Classic** — 5 gold inlays, select walnut grips are both checkered and carved. 500 mfg. 1984-86.

\$1,950 \$1,450 \$1,150

Last Mfg.'s Sug. Retail was \$2,000.

HI-POWER DOUBLE ACTION — this model was first listed in the Browning catalog in 1985 but was never manufactured. The proposed 1985 retail price was \$494.

BDM DOUBLE ACTION — 9mm Para., new double mode design featuring slide selector allowing choice between pistol (true double action operation) or revolver mode (full hammer decocking after each shot), available in double mode, single mode (BPM-D decocker, new 1997), or double action only (BRM-DAO, new 1997), dual purpose decocking lever/safety, 4.73 in. barrel. 10 (C/B 1994) or 15* shot mag., matte blue finish, black molded wraparound grips, unique breech block allows visible cartridge inspection, adj. rear sight, 31 oz. New 1991-mfg. in U.S.A.

Mfg.'s Sug. Retail \$551 \$465 \$395 \$365 \$330 \$300 \$280 \$260

This model features hammer block and firing pin block safeties.

▲ **BDM Practical** — similar to Standard BDM, except has matte blue slide and silver chrome frame. New 1997.

Mfg.'s Sug. Retail \$571 \$480 \$400 \$365 \$330 \$300 \$280 \$260

▲ **BDM Silver Chrome** — similar to Standard BDM, except has silver chrome finish. New 1997.

Mfg.'s Sug. Retail \$571 \$480 \$400 \$365 \$330 \$300 \$280 \$260

FN DA 9 — 9mm Para., choice of double action or double action only, 4 $\frac{7}{8}$ in. barrel, molded rubber grips, 10 shot mag., 31 oz. Mfg. by FN - importation began 1996, temporarily disc. 1997.

\$510 \$400 \$365 \$330 \$300 \$280 \$260

Last Mfg.'s Sug. Retail was \$613.

BDA-380 — .380 ACP, double action, 10 (C/B 1994) or 14* shot, 3 $\frac{13}{16}$ in. barrel, fixed sights, smooth walnut grips, 23 oz., introduced 1982-current production, mfg. by Beretta.

Mfg.'s Sug. Retail \$564 \$450 \$345 \$260 \$220 \$175 \$150 \$125

B

MODEL 1878 STANDARD — various cal., J.M. Browning's first patent, fewer than 600 made by Browning Brothers in Ogden, Utah between 1878-1883, octagon barrel marked "Browning Bros. Ogden, Utah USA" plain wood stock and forearm with and without pistol grips, crescent steel buttplate, with or without ramrod, several receiver configurations, a very few were made in the deluxe model, seldom found in better than average used condition.

\$20,000 \$18,500 \$15,000 \$13,500 \$12,000 \$11,000 \$10,000 \$9,000 \$8,000 \$7,000 \$6,000 \$5,000

- Add 50% for Deluxe Rifle (checked stock and forearm).
- Add 10% for Early Rifle with Sharps Borchardt type lever.
- Add 40% for Early Rifle stamped "Ogden, U.T."
- Add 20% for any caliber other than .40-70 SS or .45-70 Govt.
- Deduct 20% if stock and/or forearm have been replaced.
- Deduct 20% if the original sights have been removed or replaced incorrectly.
- Add 25% for Late Model with rammer rod under barrel held by two thimbles (known as "Montana Model").

Add 10% minimum for any non-standard feature, such as single or double set trigger assemblies, removable lower stock tang, round barrel, with Ballard type stock bolts, fore-end caps of silver or pewter or other metal.

Calibers in this model are listed from rarest to most commonly encountered: .50-70 Govt., .45 Sharps, .44 Rem., .40-90 Sharps, .44-77 Sharps, .45-70 Govt., and .40-70 Sharps Straight.

This model is rare since approx. only 550 were mfg. (approx. ser. range 1-550). This patent was sold to Winchester, which became their Model 1885 single shot. To date, less than 100 original Model 1878s have been encountered indicating a high mortality rate (most remaining specimens are in poor original condition). An inherent weakness of the original design was the way the stock attached to the action - Winchester later corrected this design flaw. A few remaining examples are not serial numbered. Barter guns are rifles that have Browning stamped actions and barrels of an older gunsmith's identity.

▲ **Deluxe model** — with checkered walnut stock and adj. sights on solid rib barrel.

\$750	\$650	\$550	\$525	\$470	\$440	\$415
-------	-------	-------	-------	-------	-------	-------

BAR SEMI-AUTO — .243, .270, .280 Rem. (new 1990), .308, or .30-06 cal. available in standard model. Mag. cal. include 7mm Rem., .300 Win., and .338 Win. (reintroduced 1990), gas operated, blued receiver, 22 or 24 (Mag. only) in. barrel, rotary bolt with seven lugs, folding leaf sight, walnut stock. Grades differ in engraving, finish, and grade of wood, approx. 7 lbs. 6 oz. Mfg. 1967-present. In 1993, to celebrate the 25th Anniversary of the BAR, Browning introduced the BAR MK II Safari (See model listed above).

Add 15% for FN mfg. and assembled BARs (marked "Made in Belgium").
Add 10% for .338 Win. Mag. cal. (FN mfg. only).

Note: Original .338s were limited production, mostly seen in the deluxe Grade II only. During the last year of FN .338 production, several were delivered in a Grade I by FN. Although being rarer than the Grade II, it is not as desirable. The following prices are for Portuguese assembled guns, manufactured by FN, and are so stamped on the barrel.

▲ **Grade I** — standard grade without engraving, blued finish. Ordering this model without sights became an option in 1988. Disc. 1992.

\$540	\$450	\$395	\$350	\$325	\$300	\$280
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$633.

Subtract \$16 without sights.

FN mfg. and assembled Grade I's can be denoted by light scroll engraving on the receiver.

▲ **Grade I Magnum** — standard grade without engraving, with recoil pad, 8 lbs. 6 oz. Disc. 1992.

\$575	\$495	\$425	\$375	\$350	\$330	\$310
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$680.

Subtract \$16 without sights.

Ordering this gun without sights became an option in 1988.

▲ **Grade II** — blued receiver, engraved with big game heads. Mfg. 1967-1974.

\$695	\$595	\$550	\$525	\$470	\$440	\$415
-------	-------	-------	-------	-------	-------	-------

This model was previously designated Deluxe.

▲ **Grade II Magnum** — magnum version of Grade II. Mfg. 1967-1974.

\$750	\$650	\$595	\$550	\$510	\$460	\$430
-------	-------	-------	-------	-------	-------	-------

RIFLES: CENTERFIRE A-BOLT II SERIES BOLT ACTION

The A-Bolt II Series differs from the original A-Bolt variations (disc. 1993) in that a new anti-bind bolt featuring a non-rotating bolt sleeve has been incorporated in addition to an improved trigger system. Consumers also may have their name/inscription engraved on the flat bolt-face on any A-Bolt II Series variation for an additional \$25. Browning introduced the BOSS (ballistic optimizing shooting system) in 1994 as an option on A-Bolt rifles, except Micro-Medallion models and the .375 H&H caliber.

A-BOLT HUNTER SERIES (MODEL II) — cal. similar to A-Bolt series, except not available in .257 Roberts or .284 Win. cal., 22 or 26 in. barrel, available without sights, open sights, or with BOSS, 6 lbs. 7 oz. - 7 lbs. 3 oz. New 1994.

- ▲ **Hunter Model II** — available in 12 cal. between .22-250 Rem. - .338 Win. Mag., 22 or 26 in. barrel with or w/o open sights.

Solid matte rib	\$4,150	\$3,885	\$3,450	\$3,175	\$2,700	\$2,200	\$1,800

Early models with safety mounted in front of trigger guard are not as desirable as there are potential safety problems inherent in the design.

Pre-WWII 16 ga. A-5s could be chambered for 2⁹/₁₆ in. shells. These shotguns are considerably less desirable than 16 ga. A-5s chambered for 2³/₄ in. modern shotshells. Since some guns have been modified to 2³/₄ in., careful inspection is advised before purchasing or shooting. The 2⁹/₁₆ chambered guns can be modified by the Browning Service Dept. to accept 2³/₄ in. shells if so desired.

"AMERICAN BROWNING" AUTO-5 — 12, 16, or 20 ga., Remington-produced model of the Auto-5, very similar to the Remington Model 11, except with Browning logo, mag. cut-off, and different engraving, over 38,000 mfg. in 12 ga., over 14,000 in 16 ga., and 11,000 in 20 ga., stocks have Remington style round knob pistol grips with black plastic caps. Mfg. 1940-1949 and ser. numbered approx. 229,000-346,000, 12 ga. has "B" prefix on left side of receiver, "A" denotes 16 ga., and "C" denotes 20 ga.

\$325 \$275 \$250 \$225 \$200 \$180 \$160

Add 10% for vent. rib and/or 20 ga.

An easy way to identify this configuration is to look for the "A", "B", or "C" prefix on the left side of receiver.

AUTO-5 STANDARDWEIGHT — 12, 20, or 16 ga., recoil operation, 26-32 in. barrels, standard production gun between 1952-1969, various chokes, checkered walnut stock and forearm, synthetic Browning marked butt plate, lacquer (until approx. 1966) or polyurethane finish, butt stock has either round knob pistol grip (1952-1976) or flat knob (introduced 1967), watch for cracked forearms on all A-5s (due to barrel recoil), between 7¹/₃-8 lbs.

Plain barrel	\$425	\$375	\$325	\$295	\$270	\$240	\$210
Matted rib	\$525	\$450	\$400	\$350	\$300	\$275	\$245
Vent rib	\$550	\$460	\$410	\$370	\$325	\$300	\$265

Add 10% for NIB condition.

Barrel addresses appeared as follows: 1952-1958 "St. Louis, Missouri", 1959-1968 "St. Louis, Missouri and Montreal P.Q.", 1969-1975 "Morgan, Utah and Montreal, P.Q.". Make sure barrel address date matches year of mfg. (see listings in the back of this text). Standardweight models had H or M prefixes.

SHOTGUNS: SEMI-AUTO RECENT MFG.

Miroku manufactured A-5s can be determined by year of manufacture in the following manner: RV suffix - 1975, RT - 1976, RR - 1977, RP - 1978, RN - 1979, PM - 1980, PZ - 1981, PY - 1982, PX - 1983, PW - 1984, PV - 1985, PT - 1986, PR - 1987, PP - 1988, PN - 1989, NM - 1990, NZ - 1991, NY - 1992, NX - 1993, NW - 1994, NV - 1995, NU - 1996, NR - 1997.

NOTE: Barrels are interchangeable between older Belgium A-5 models and recent Japanese A-5's mfg. by Miroku. A different barrel ring design might necessitate some minor sanding of the inner forearm on the older model, but otherwise, these barrels are fully interchangeable.

A-500R — 12 ga. only, 3 in. chamber, new design utilizing short recoil system with a four-lug rotary bolt design, capable of shooting all 12 gauge loads interchangeably, magazine cut-off, 26, 28, or 30 in. VR barrel with Invector chokes standard, 24 in. barrel on Buck Special (fixed choke), high polished blued finish with red accents on receiver sides, gold trigger, checkered semi-pistol grip walnut stock with vent. recoil pad, 7 lbs. 11 oz. - 8 lbs. 1 oz. Mfg. 1987-1993.

\$475	\$425	\$375	\$325	\$295	\$275	\$250
Last Mfg.'s Sug. Retail was \$560.						

Add \$33 for Buck Special variation (Invector chokes).

This model features fewer moving parts than many other semi-auto shotguns due to the short recoil operating system.

A-500G HUNTING — similar to A-500, except is gas operated, distinguishable by "A-500G" in gold accents on receiver, capable of shooting all 2¾ or 3 in. shells interchangeably, approx. 8 lbs. Mfg. 1990-1993.

\$555	\$425	\$375	\$325	\$295	\$275	\$250
Last Mfg.'s Sug. Retail was \$653.						

A Buck Special variation was mfg. until 1992. No premiums currently exist.

▲ **A-500G Sporting Clays** — 12 ga. only, Sporting Clays variation with 30 in. VR barrel, 8 lbs. 2 oz. Mfg. 1992-1993.

\$555	\$425	\$375	\$325	\$295	\$275	\$250
Last Mfg.'s Sug. Retail was \$653.						

GOLD HUNTER MODEL — 12 or 20 ga., 3 in. chamber, self-cleaning piston rod gas action with self-regulation, alloy receiver with non-glare black finish and "GOLD Hunter" on receiver side, 26, 28, or 30 (12 ga. only) in. VR Invector Plus (12 ga. only) or Invector (20 ga. only) choked barrel, cross-bolt safety, checkered walnut stock and forearm with recoil pad (vent on 12 ga.), 6 lbs. 12 oz. - 7 lbs. 9 oz. Parts mfg. in Belgium and final assembly in Portugal. New 1994.

Mfg.'s Sug. Retail	\$735	\$615	\$450	\$380	\$325	\$295	\$275	\$250
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

▲ **Gold Sporting Clays Model** — similar to Gold Hunter Model, except has 2¾ in. chamber, 28 or 30 in. ported barrel with Invector Plus choking, approx. 7½ lbs. New 1996.

Mfg.'s Sug. Retail	\$760	\$635	\$465	\$395	\$335	\$300	\$275	\$250
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

▲ **Gold Deer Hunter** — 12 ga. only, 22 in. barrel with choice of rifled invector choke or rifled barrel, cantilevered scope mount, sling swivels, 7¾ lbs. New 1997.

Mfg.'s Sug. Retail	\$799	\$675	\$485	\$400	\$345	\$300	\$275	\$250
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

BSA 10 — while advertised, this gun had its model nomenclature changed to the Gold 10 Ga. before mfg. started.

GOLD 10 GA. — 10 ga. Mag., 3½ in. chamber, short stroke self-cleaning gas action, 4 shot mag., steel receiver with choice of high polish (Hunting Model) or dull finish (Stalker Model) bluing, 26, 28, or 30 in. VR standard Invector choke barrel, available with either high-gloss checkered walnut (Hunting) or matte black fiberglass (Stalker) stock and forearm, vent recoil pad, approx. 10 lbs. 10 oz. Mfg. by Miroku, Japan. New 1994.

Mfg.'s Sug. Retail	\$1,008	\$875	\$715	\$600	\$500	\$425	\$375	\$325
--------------------	---------	-------	-------	-------	-------	-------	-------	-------

SHOTGUNS: O/U

SUPERPOSED SHOTGUN: 1931-1976 MANUFACTURE — 12, 20, 28 ga., or .410 bore, 26½, 28, 30, or 32 in. barrels, various chokes, boxlock, auto ejectors, SST, DT, or twin single triggers (early mfg.), checkered pistol grip stock, mfg. 1931-1940 and 1949-1976 by FN, grades differ in amount of engraving, inlay, general quality of workmanship and wood. Currently, shorter barrel (26½ in.). Superposed models are bringing a small premium over a 30 in. F & M model. Prices below assume vent. rib models, earlier matted rib guns will be 5-10% less, depending on condition.

Grading**100% 98% 95% 90% 80% 70% 60%**

NOTE: The use of steel shot is NOT recommended in any Superposed Series manufactured in Belgium (B-25 variations).

BROWNING CHOKES AND THEIR CODES (ON BARREL)

* designates full choke (F).

*- designates improved modified choke (IM).

** designates modified choke (M).

**- designates improved cylinder choke (IC).

**\$ designates skeet (SK).

*** designates cylinder bore (CYL).

SKEET MODELS were available in every ga. and grade.

TRAP MODELS were available in every grade in 12 ga. only - deduct 5%-10% from values shown below. BROADWAY TRAP MODELS with $\frac{5}{8}$ in. wide vent. rib were also available in every grade.

Add 10% for 20 ga. on all grades.

Add 70%-100% for 28 ga. on Grade I, 50% on higher grades.

These 28 ga. premiums apply only to round knob, long tang variations.

Add 30% for .410 bore on Grade I models only.

Add 10% for round knob, long tang stock variations.

Deduct 25% for early DT models.

- ▲ **Grade I Standard** — the Grade I has a blued steel frame with hand engraved scroll and rosette patterns, checkered walnut stock and forearm. Grade I Standard was disc. 1973.

\$1,395 \$1,075 \$925 \$840 \$775 \$650 \$550

- ▲ **Grade I Lightning** — similar to Grade I Standard. Disc. 1976.

\$1,650 \$1,175 \$975 \$870 \$810 \$690 \$600

Because of the mandatory use of steel shot in recent years, values for 12 ga. Magnum and Lightning models have gone down (these models are not compatible with steel shot).

- ▲ **Grade I Magnum** — 3 in. chambers with standard Browning recoil pad. Disc. 1976.

\$1,395 \$1,075 \$900 \$825 \$760 \$635 \$525

Because of the mandatory use of steel shot in recent years, values for 12 ga. Magnum and Lightning models have gone down (these models are not compatible with steel shot).

- ▲ **Pigeon Grade** — designated Grade II after WWII and renamed Pigeon in October, 1959. This grade featured a silver grey receiver with 2 flying pigeons surrounded by fine scroll engraving on each side of the frame. The receiver bottom and tangs also exhibit fine scroll work. The Pigeon Grade was disc. 1974.

\$3,250 \$2,500 \$1,950 \$1,825 \$1,650 \$1,570 \$1,485

- ▲ **Grade III** — satin finished receiver with game scene engraving featuring pheasants and fighting cocks on receiver, receiver bottom has a retriever and pheasant. Disc. October, 1959.

\$3,250 \$2,500 \$1,950 \$1,825 \$1,650 \$1,570 \$1,485

- ▲ **Pointer Grade** — also designated Grade III, manufactured post-war only until renamed Pointer in early October, 1959. Features engraved silver grey receiver with a Pointer depicted on each frame side, select walnut. Disc. 1966, except for special orders.

\$4,250 \$3,250 \$2,450 \$2,050 \$1,850 \$1,700 \$1,625

- ▲ **Grade IV** — limited manufacture between 1950-1959, engraving usually featured a dog and bird scene in deep relief.

\$4,250 \$3,250 \$2,450 \$2,050 \$1,850 \$1,700 \$1,625

- ▲ **Diana Grade** — also designated Grade V in post-war manufacture until renamed Diana in October, 1959. Pre-WWII Grade Vs featured more delicate scroll engraving with deer adorning the right side and wild boar shown on the left. Post-WWII guns exhibit deep relief engraving with duck and pheasant game scenes on each frame side, select checkered walnut stock and forearm. Disc. 1976.

\$4,950 \$4,000 \$2,850 \$2,150 \$1,900 \$1,800 \$1,700

Grading

100% 98% 95% 90% 80% 70% 60%

▲ **Midas Grade** — also designated Grade VI during post-war manufacture until renamed Midas in October, 1959. Pre-WWII Midas Grades featured an inlaid pigeon with outstretched wings on blued frame sides and bottom plus trigger guard. This earlier Midas also exhibited multiple gold escutcheons and gold lining. Post-war models feature deep relief scroll engraving with gold inlaid ducks and pheasants on frame sides and a quail on the bottom. Ejector trip rods, ejector hammers and firing pins are also 18Kt. gold plated. Finest checkered walnut. Disc. 1976.

\$6,250 \$5,400 \$3,650 \$2,950 \$2,600 \$2,250 \$1,900

▲ **Grade VI** — 12 or 20 ga. only, offered from 1955 to October, 1959 only. Elaborate deep relief scroll engraved with multiple gold inlays.

12 ga. \$5,500 \$4,500 \$4,000 \$3,500 \$3,200 \$3,000 \$2,600
 20 ga. \$8,250 \$6,950 \$5,900 \$4,950 \$4,250 \$3,500 \$2,750

SUPERPOSED WITH EXTRA BARREL(S) OR SUPER-TUBES

Could be ordered from the factory in the following combinations: 12 or 20 ga. with one extra set of barrels in same ga. 12 ga. with one extra set in 20 ga. 12 or 20 ga. with two extra barrel sets of same ga. 20 ga. with one extra set in either 28 ga. or .410 bore. 20 ga. with both 28 ga. and .410 bore barrel sets. 28 ga. with extra set of .410 bore barrels. Super-Tubes were adaptable on 12 ga. guns only; came from the factory cased with accessories, 16½ in. long, factory installation.

Grade I extra barrel set(s) — add 40-50% of the gun's value for each extra set. Add approx. \$1,500 per barrel set in higher grades.

Super-Tubes — available for 12 ga. only, single ga. — add \$250.

Super-Tube Set — 3 ga. set (20, 28 ga., and .410 bore) — add \$400.

EXPOSITION/EXHIBITION MODEL

This specially manufactured Superposed saw limited production from the mid '60s through 1976. Later models had their own serial range (usually 3 digit) with a "C" prefix. Grades A through G ranged from fairly simple scroll designs without gold inlays up to extremely ornate designs featuring multi-colored gold inlaid game figures. Most of these guns were produced by FN for display purposes, potential production models, or potential engraving standardization. Many of these Exhibition/Exposition superposed models were consigned to Browning Arms Co. during the 1970s because of the depressed market conditions of that time. Prices are determined by the embellishments and engraving per individual gun (A Grade being the lowest, F Grade with gold being the highest). Prices usually start at around \$5,000, while a F Grade with extensive gold inlays could reach 5 digits.

BICENTENNIAL SUPERPOSED SUPERLIGHT SHOTGUN — specially engraved limited edition Model, 51 mfg. — one for each state and Washington, D.C. Left side has U.S. Flag, bald eagle and state emblem inlaid in gold. Right side has gold inlaid hunter and turkey. Blued receiver, fancy checkered English stock, Schnabel forend, velvet lined wood case. Made 1976 by FN.

\$8,500 \$7,500 \$6,000

WATERFOWL SUPERPOSED SHOTGUN SERIES — 12 ga., 500 made of each issue. Gold inlays with extensive engraving, lightning action, 28 in. barrels, full-length walnut case, factory inventories were depleted on Mallard, Pintail, and Black Duck Issues in 1989.

▲ **1981 Mallard Issue**

\$4,500 \$3,500 \$2,500

Last Mfg.'s Sug. Retail was \$7,000.

This issue was sold out in 1988.

▲ **1982 Pintail Issue**

\$4,500 \$3,500 \$2,500

Last Mfg.'s Sug. Retail was \$7,000.

▲ **1983 Black Duck Issue**

\$4,500 \$3,500 \$2,500

Last Mfg.'s Sug. Retail was \$8,800.

B

Grading**100% 98% 95% 90% 80% 70% 60%**

OVER/UNDER CLASSIC SERIES SHOTGUN — 20 ga. only, 26 in. barrels, less than 2,500 manufactured in Classic model and under 350 manufactured in Gold Classic. Both editions feature multiple engraved scenes and a special silver grey finish. Select American walnut featuring oil finish. Available 1986 only.

\$1,850 \$1,500 \$1,200

Last Mfg.'s Sug. Retail was \$2,000.

▲ **Gold Classic** — 8 gold inlays, select walnut forearm and stock are both checkered and carved, many were shipped back to Belgium due to poor sales domestically. Available 1986 only.

\$5,995 \$4,150 \$3,150

Last Mfg.'s Sug. Retail was \$6,000.

SUPERPOSED SUPERLIGHT — 12 or 20 ga., 26½ in. solid or VR barrels, lightened slimmer forearm and straight grip stock. Mfg. 1967-1976 by FN.

12 ga.	\$1,795	\$1,475	\$1,225	\$1,110	\$1,025	\$925	\$800
20 ga.	\$2,400	\$1,925	\$1,575	\$1,350	\$1,250	\$1,000	\$850
28 ga.	\$4,995	\$4,500	\$4,100	\$3,600	\$3,100	\$2,600	\$2,000
.410 bore	\$2,995	\$2,625	\$2,250	\$1,875	\$1,500	\$1,325	\$1,100

For Pigeon, Diana, and Midas grade Superlight 12 or 20 ga. models use previous values on standard model high-grades and add approx. 25%-35%. The rarity of higher grade 28 ga. and .410 bore Superposed Superlights preclude accurate pricing.

There is also a Quail Unlimited limited edition in the Superlight series. Values are somewhat higher but difficult to ascertain because so few are bought and sold each year.

SUPERPOSED SHOTGUN: 1983-86 MANUFACTURE — 12 or 20 ga. In 1983, Browning announced renewed production of the famous Belgium "Superposed" O/U in Grade I only. Available in Lightning or Superlight models, 3 in. chambers in Lightning 20 ga., 26½ or 28 in. barrels. Belgium manufactured from 1983-86.

▲ **Grade I** — limited mfg., not compatible with steel shot.

\$1,895 \$1,595 \$1,395 \$1,000 \$800 \$675 \$550

Last Mfg.'s Sug. Retail was \$1,995.

SUPERPOSED PRESENTATION MODELS (P1-P4) — custom made versions of the Lightning Field, Super Light, Trap, and Skeet guns, specifications the same as Standard models, with differences in finish, engraving and inlay(s), and grade of wood and checkering. These guns were introduced by FN in 1977 and were disc. after 1984. Add \$1,775 for extra set of barrels, add \$3,600 for 2 sets of extra barrels.

P Series Trap — deduct 10% from values listed below.

P Series Broadway Trap — deduct 10-15% from values listed below.

P Series Skeet 12 and 20 ga. — deduct 10-15% from values listed below.

Since P Series Superposed were disc. 1985, collector interest has increased slightly. Interestingly, the P series models are rarer than most of the pre-1976 high grade Superposed models.

Add 20% for 20 ga.

Add 30% for 28 ga.

Add 20% for .410 bore.

▲ **Presentation 1** — silver grey or blued receiver, oak leaf and fine scroll engraved, choice of 6 different animal scenes.

\$2,850 \$2,350 \$1,995 \$1,750 \$1,500 \$1,250 \$1,000

▲ **Presentation 1 w/gold inlays** — similar to Presentation 1, only with gold inlays.

\$3,450 \$2,800 \$2,350 \$2,050 \$1,825 \$1,700 \$1,500

▲ **Presentation 2** — silver grey or blued receiver, high relief engraving, choice of 3 different sets of game scenes.

\$3,400 \$2,750 \$2,300 \$2,050 \$1,825 \$1,700 \$1,500

▲ **Presentation 2 w/gold inlays** — similar to Presentation 2, only with gold inlays.

\$3,950 \$3,250 \$2,550 \$2,150 \$1,925 \$1,750 \$1,550

▲ **Presentation 3** — silver grey or blued receiver, more elaborate high relief engraving with choice of partridges, mallards or geese depicted on frame sides in 18Kt. gold.

\$5,450 \$4,700 \$4,100 \$3,600 \$3,200 \$2,875 \$2,300

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

▲ **Presentation 4** — features engraved side plates in either silver grey or blued finish, engraved game scenes include waterfowl on right frame side, 5 pheasants on left frame side, 2 quail on receiver bottom, and a retriever's head on trigger guard. Extra figure walnut stock and forearm.

\$6,000	\$4,950	\$4,350	\$3,825	\$3,350	\$2,950	\$2,375
---------	---------	---------	---------	---------	---------	---------

▲ **Presentation 4 w/gold inlays** — similar to Presentation 4, only with game scenes inlaid in 18Kt. gold.

\$7,200	\$6,500	\$5,265	\$4,750	\$4,250	\$3,650	\$2,950
---------	---------	---------	---------	---------	---------	---------

P SERIES SUPERLIGHT — available in various configurations including multi-barrel sets. Typically, add 20-25% onto the values listed for the regular P series as shown above. Also add 20-40% for the 28 ga.

LIEGE O/U — 12 ga., 26½, 28 or 30 in. barrels, various chokes, boxlock, auto ejectors, non-selective single trigger, vent. rib, checkered pistol grip stock. Approx. 10,000 mfg. 1973-1975 by FN.

\$750	\$625	\$575	\$500	\$425	\$400	\$375
-------	-------	-------	-------	-------	-------	-------

This model is also known as the B-26.

B-26 — with BAC markings. Mfg. 1973-75.

\$750	\$625	\$575	\$500	\$425	\$400	\$375
-------	-------	-------	-------	-------	-------	-------

B-27 — F.N. manufactured modified B-26, imported into the U.S. in 1984, same action as Liege (B 26), blued or satin finished receiver with light engraving, no BAC markings and never cataloged.

▲ **Standard Game** — 28 in. barrels, ⅜ in. vent. rib, pistol grip stock, Schnabel forearm, SST, blued receiver, choking M/F only.

\$650	\$575	\$525	\$475	\$425	\$400	\$375
-------	-------	-------	-------	-------	-------	-------

Also available in Skeet model with gold "Browning" logo on blued receiver. Prices are the same.

▲ **Deluxe Game (Grade II)** — similar to Standard Grade, except has 30 in. barrels, better wood and English scroll engraved satin finished receiver, choking M/F only.

\$875	\$725	\$625	\$575	\$510	\$475	\$445
-------	-------	-------	-------	-------	-------	-------

▲ **Grand Deluxe Game** — 28 in. IC/IM & M/F choked barrels, game scene engraved, signed by the engraver, 90% receiver coverage.

\$1,100	\$850	\$775	\$700	\$640	\$580	\$520
---------	-------	-------	-------	-------	-------	-------

This model was also available in a Trap configuration — values are about the same as above.

▲ **Deluxe Skeet** — similar to Deluxe, except is designed for skeet shooting.

\$850	\$725	\$625	\$575	\$510	\$475	\$445
-------	-------	-------	-------	-------	-------	-------

International Skeet is also available at same price; hand fit pistol grip with stippling and International Type recoil pad.

▲ **Deluxe Trap** — similar to Deluxe, except is configured for trap shooting.

\$750	\$650	\$560	\$530	\$500	\$475	\$445
-------	-------	-------	-------	-------	-------	-------

▲ **City of Liege Commemorative** — limited edition of 250 units manufactured to commemorate the 1,000th anniversary of the city of Liege, cased. Only 29 imported into the U.S.

\$1,125	\$975	\$910	\$850	\$775	\$700	\$600
---------	-------	-------	-------	-------	-------	-------

ST-100 — 12 ga., Belgian mfg., O/U trap configuration with separated barrels and adj. point of impact, manufactured 1979-1983 for European sale mostly, floating VR, ST, deluxe checkered walnut stock and forearm, non-BAC model.

\$2,375	\$1,950	\$1,700	\$1,400	\$1,200	\$975	\$825
---------	---------	---------	---------	---------	-------	-------

SUPERPOSED HIGH GRADES: 1985-PRESENT

Browning, in 1985, resumed production of the Superposed in Pigeon, Pointer, Diana, and Midas grades. They are available in 12 and 20 ga. only, in either a Lightning or Superlight configuration. These higher grades are custom ordered from the factory with delivery ranging from 8 to more than 12 months. Custom options can be special ordered on each grade with corresponding prices being higher than shown below. B-25 engraving patterns on these various grades will nearly duplicate those styles manufactured before 1976. Skeet models are not available.

B

Grading**100%****98%****95%****90%****80%****70%****60%**

B-25 — 12 or 20 ga. only, original Superposed Model manufactured entirely from parts fabricated in Herstal, Belgium. Also available in Superlight configuration.

▲ **Grade I Traditional**

Mfg.'s Sug. Retail	\$6,750	\$2,750	\$1,675	\$1,100	\$900	\$775	\$650	\$575

SHOTGUNS: O/U CITORI HUNTING SERIES

All Citori shotguns which incorporate the Invector choke tube system may be used with steel shot.

Invector Plus choke tubes are designed for back bored barrels. DO NOT USE Standard Invector choke tubes in barrels marked for the Invector Plus choking system.

CITORI HUNTING MODELS — 12, 16 (mfg. 1986-89), 20, 28 ga. (disc. 1994) or .410 bore (disc. 1994), 26, 28, or 30 in. barrels, various chokes, boxlock, auto ejectors, SST, vent. rib, features checkered semi-pistol grip stock with grooved semi-beavertail forearm, grades differ in amount of engraving, finish, and wood. Invector chokes became standard in 1988, Invector Plus chokes became standard 1995 on 12 or 20 ga., 6 lbs. 9 oz. - 8 lbs. 5 oz. Mfg. 1973-present by Miroku.

--------------------	---------	---------	-------	-------	-------	-------	-------	-------

Add \$210 for adj. comb (new 1995).
 Subtract 10% if without Invector chokes.
 Earlier mfg. skeet guns had a low profile, wide VR.

► **Smaller Gauges** — 28 ga. or .410 bore.

Mfg.'s Sug. Retail	\$1,549	\$1,250	\$925	\$750	\$650	\$550	\$500	\$450
--------------------	---------	---------	-------	-------	-------	-------	-------	-------

Subtract 10% if without Invector chokes.

▲ **Grade II** — 12, 20, 28 ga., or .410 bore, high rib. Disc. 1983.

\$1,000	\$850	\$800	\$740	\$690	\$650	\$600
---------	-------	-------	-------	-------	-------	-------

▲ **Grade III** — 12, 20, 28 ga., or .410 bore, Invector chokes originally in 12 and 20 ga. and became an option on 28 ga. and .410 bore in 1994. New 1986.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

► **12 or 20 Ga.** — Invector Plus choking, high-post target rib, and ported barrels became standard in 1994.

Mfg.'s Sug. Retail	\$2,179	\$1,675	\$1,225	\$925	\$775	\$650	\$550	\$495
---------------------------	----------------	----------------	----------------	--------------	--------------	--------------	--------------	--------------

Add \$210 for adj. comb (new 1995).

► **Smaller Gauges** — 28 ga. or .410 bore.

Mfg.'s Sug. Retail	\$2,184	\$1,695	\$1,250	\$950	\$800	\$675	\$595	\$550
---------------------------	----------------	----------------	----------------	--------------	--------------	--------------	--------------	--------------

Subtract 10% if without standard Invector choking (new 1994).

▲ **Grade V** — 12, 20, 28 ga., or .410 bore, high rib. Disc. 1984.

	\$1,495	\$1,265	\$1,100	\$990	\$880	\$795	\$650
--	----------------	----------------	----------------	--------------	--------------	--------------	--------------

▲ **Grade VI** — Skeet gauges, choice of blue or grey finished receiver with multi gold inlays, deluxe walnut. Disc. 1995.

► **12 Ga.** — Invector Plus choking, high-post target rib, and ported barrels became standard in 1994.

	\$2,025	\$1,600	\$1,325	\$1,100	\$960	\$875	\$825
--	----------------	----------------	----------------	----------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$2,555.

► **Smaller Gauges** — 20, 28 ga., or .410 bore, 20 ga. available with standard Invector choking, 28 ga. and .410 bore are choked SK/SK.

	\$2,000	\$1,600	\$1,325	\$1,100	\$960	\$875	\$825
--	----------------	----------------	----------------	----------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$2,518.

▲ **Skeet Golden Clays (GC)** — 12, 20, 28 ga., or .410 bore, 26 or 28 in. ported VR barrels, Invector Plus choking, Skeet features, satin grey receiver with Grade VI level of engraving and gold inlays depicting a transitional hunting to clay pigeon scene. New 1993.

► **12 or 20 Ga.** — Invector (disc. 1995) or Invector Plus choking, high-post target rib, and ported barrels (12 ga. only).

Mfg.'s Sug. Retail	\$3,239	\$2,650	\$1,925	\$1,575	\$1,225	\$1,000	\$900	\$825
---------------------------	----------------	----------------	----------------	----------------	----------------	----------------	--------------	--------------

Add \$210 for adj. comb (new 1995).

Subtract approx. 10% if without Invector Plus choking.

► **Smaller Gauges** — 28 ga. or .410 bore, standard Invector or fixed SK/SK choking.

Mfg.'s Sug. Retail	\$3,166	\$2,575	\$1,950	\$1,600	\$1,250	\$1,025	\$925	\$850
---------------------------	----------------	----------------	----------------	----------------	----------------	----------------	--------------	--------------

Subtract approx. 10% with fixed choking.

CITORI 3 GAUGE SKEET SETS — supplied with one 20 ga. frame, 1 removable forearm, and 3 barrels consisting of 20, 28 ga. and .410 bore, cased. Mfg. 1987-96.

▲ **Grade I** — with high post target rib, standard Invector choking became standard 1994.

	\$2,525	\$2,075	\$1,675	\$1,450	\$1,275	\$1,050	\$975
--	----------------	----------------	----------------	----------------	----------------	----------------	--------------

Last Mfg.'s Sug. Retail was \$3,100.

▲ **Grade III** — with high post target rib, available with standard Invector choking (new 1994) or fixed SK/SK chokes.

	\$3,100	\$2,350	\$1,875	\$1,550	\$1,395	\$1,250	\$1,125
--	----------------	----------------	----------------	----------------	----------------	----------------	----------------

Last Mfg.'s Sug. Retail was \$3,900.

Subtract 10% for fixed SK/SK chokes.

▲ **Grade VI** — with high post target rib, fixed SK/SK chokes only. Disc. 1994.

	\$3,250	\$2,500	\$2,000	\$1,775	\$1,600	\$1,400	\$1,275
--	----------------	----------------	----------------	----------------	----------------	----------------	----------------

Last Mfg.'s Sug. Retail was \$3,990.

▲ **Golden Clays** — features Golden Clays accents and engraving, standard Invector choking. Mfg. 1994-95 only.

	\$4,250	\$3,075	\$2,600	\$2,100	\$1,900	\$1,750	\$1,600
--	----------------	----------------	----------------	----------------	----------------	----------------	----------------

Last Mfg.'s Sug. Retail was \$5,100.

CITORI 4 GAUGE SKEET SETS — supplied with one 12 ga. frame, 1 removable forearm, and 4 barrels consisting of 12, 20, 28 ga. and .410 bore, cased. Imported 1985 only.

▲ **Grade I** — with high post target rib, choice of standard Invector (new 1994) or fixed SK/SK choking.

	\$3,750	\$2,850	\$2,400	\$1,975	\$1,800	\$1,775	\$1,600
--	----------------	----------------	----------------	----------------	----------------	----------------	----------------

Last Mfg.'s Sug. Retail was \$4,450.

Subtract 10% for fixed SK/SK choking.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

- ▲ **Grade III** — with high post target rib, choice of standard Invector (new 1994) or fixed SK/SK choking.

\$4,575	\$3,250	\$2,700	\$2,250	\$1,950	\$1,800	\$1,700
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$5,450.
 Subtract: 10% for fixed SK/SK choking.
- ▲ **Grade VI** — with high post target rib, fixed SK/SK choking only. Disc. 1994.

\$4,600	\$3,350	\$2,775	\$2,300	\$2,100	\$2,000	\$1,900
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$5,225.
- ▲ **Golden Clays** — features Golden Clays accents and engraving, standard Invector choking, Mfg. 1994 only.

\$5,650	\$4,100	\$3,300	\$2,600	\$2,350	\$2,100	\$1,975
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$6,750.

SHOTGUNS: O/U CITORI TRAP

CITORI TRAP MODELS — similar to Standard Citori, with 12 ga., 30 or 32 in. barrels, trap chokes, Monte Carlo stock, recoil pad. Invector chokes became standard in 1988, Invector Plus chokes with ported barrels became an option in 1992, and were made standard in 1993, new Special Trap models were introduced during 1995 with decreased weight (1/4 lb. lighter) and better swing/balance characteristics.

Mfg.'s Sug. Retail	\$1,586	\$1,275	\$925	\$750	\$625	\$525	\$495	\$450
--------------------	---------	---------	-------	-------	-------	-------	-------	-------

Add \$210 for adj. comb (new 1995).
 Subtract 10% without Invector chokes or high rib.

- ▲ **Trap Combination Set** — Grade I only, 32 in. O/U and 34 in. single barrel, cased. Disc.

\$1,395	\$1,100	\$975	\$900	\$825	\$775	\$725
---------	---------	-------	-------	-------	-------	-------
- ▲ **Grade I Plus Trap** — features adj. rib and stock, back-bored barrels, Invector Plus choke system. Mfg. 1990-94.

\$1,560	\$1,200	\$940	\$800	\$700	\$600	\$500
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$2,005.

Add 5% for ported barrels.
 In 1991 this model included a travel vault gun case at no extra charge. Subtract \$50 for older mfg. without travel case.

- ▲ **Grade I Plus Trap Combo** — includes ported barrels with Invector Plus choking and extra standard single ported barrel, luggage case. Mfg. 1992-94.

\$2,850	\$2,425	\$2,100	\$1,900	\$1,700	\$1,500	\$1,250
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$3,435.
- ▲ **Plus Trap Golden Clays** — 12 ga. only, 30 or 32 in. ported VR barrels, Invector Plus choking, Trap features, satin grey receiver with Grade VI level of engraving and gold inlays depicting a transitional hunting to clay birds scene. Mfg. 1993-94.

\$2,850	\$2,275	\$1,900	\$1,600	\$1,400	\$1,200	\$995
---------	---------	---------	---------	---------	---------	-------

Last Mfg.'s Sug. Retail was \$3,435.
- ▲ **Plus Trap Golden Clays Combo** — includes O/U ported barrels with Invector Plus choking and extra standard single ported barrel, luggage case. Mfg. 1993-94.

\$4,425	\$3,300	\$2,775	\$2,250	\$1,925	\$1,800	\$1,700
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$5,200.
- ▲ **Pigeon Grade** — 12 ga. only, features extra deluxe walnut, Invector Plus ported barrels, and receiver gold accents. Mfg. 1993-94.

\$1,715	\$1,250	\$950	\$800	\$700	\$600	\$500
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$2,225.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

GRADE I BT-99 PLUS — similar to BT-99, except has adj. rib to control point of impact and new recoil reduction system that reduces felt recoil by 50%, stock has adj. comb and butt plate (recoil pad), back-bored barrel, Invector chokes, 8¾ lbs. Mfg. 1989-94.

\$1,200	\$1,000	\$875	\$775	\$675	\$595	\$550
Last Mfg.'s Sug. Retail was \$1,835.						

Add 5% for ported barrel.

In 1990, the Grade I designation was added to this model. Changes include back-bored barrels with Invector plus choke tubes. In 1991, this model was supplied with a travel vault gun case as standard equipment. Older mfg. will not have these cases as an original accessory.

Beginning 1991, a Micro Plus Model was introduced that incorporates smaller dimensions (shorter stock and choice of shorter barrel). Values are the same as listed above.

▲ **BT-99 Plus Stainless** — features all stainless construction with Invector Plus ported 32 or 34 in. black VR barrel. Mfg. 1993-94.

Beginning 1991, a Micro Plus Model was introduced that incorporates smaller dimensions (shorter stock and choice of shorter barrel). Values are the same as listed above.

\$1,710	\$1,245	\$975	\$800	\$700	\$600	\$500
Last Mfg.'s Sug. Retail was \$2,240.						

▲ **BT-99 Plus Pigeon Grade** — features higher grade walnut and gold receiver accents, Invector chokes and ported barrels. Mfg. 1993-disc.

\$1,595	\$1,200	\$925	\$800	\$700	\$600	\$500
Last Mfg.'s Sug. Retail was \$2,065.						

Beginning 1991, a Micro Plus Model was introduced that incorporates smaller dimensions (shorter stock and choice of shorter barrel). Values are the same as listed above.

▲ **BT-99 Plus Signature Painted** — features painted red/black stock with Browning logos on stock and forearm, Invector Plus ported barrels. Mfg. 1993-94.

\$1,500	\$1,150	\$915	\$800	\$700	\$600	\$500
Last Mfg.'s Sug. Retail was \$1,890.						

Beginning 1991, a Micro Plus Model was introduced that incorporates smaller dimensions (shorter stock and choice of shorter barrel). Values are the same as listed above.

▲ **BT-99 Plus Golden Clays** — features high-grade wood and gold outline receiver and inlays depicting a transitional hunting to clay pigeon scene. Mfg. 1994 only.

\$2,700	\$2,350	\$2,050	\$1,850	\$1,700	\$1,550	\$1,395
Last Mfg.'s Sug. Retail was \$3,205.						

Beginning 1991, a Micro Plus Model was introduced that incorporates smaller dimensions (shorter stock and choice of shorter barrel). Values are the same as listed above.

BT-99 MAX — 12 ga. only, choice of blued steel with engraving or stainless steel barrel, receiver, and trigger guard, 32 or 34 in. high post VR ported barrel, thin forearm with finger grooves, select walnut pistol grip stock (regular or Monte Carlo) with high gloss finish, ejector/extractor selector, no safety, approx. 8 lbs. 10 oz. Mfg. 1995-96.

\$1,250	\$925	\$725	\$600	\$525	\$495	\$450
* Last Mfg.'s Sug. Retail was \$1,496.						

Add \$400 for stainless steel.

BT-100 STANDARD TRAP GUN — 12 ga. only, 32 or 34 in. steel high-post ported Invector Plus or fixed choked (F) barrel, without safety, choice of blue or stainless steel receiver, removable trigger assembly, ejector selector (either ejects or extracts) adj. comb and thumbhole stock are optional, approx. 8 lbs. 10 oz. New 1995.

Mfg.'s Sug. Retail	\$1,995	\$1,650	\$1,100	\$925	\$750	\$575	\$495	\$450
---------------------------	---------	---------	---------	-------	-------	-------	-------	-------

Subtract \$47 for fixed choke.

Add \$210 for adj. comb.

Add \$275 for thumbhole stock (new 1995).

Add \$525 for replacement trigger assembly (blue or stainless).

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

▲ **Stainless BT-100** — features stainless steel barrel, receiver, trigger guard and top lever.

Mfg.'s Sug. Retail \$2,415 \$2,075 \$1,350 \$1,050

Subtract \$47 for fixed choke.

Add \$210 for adj. comb.

Add \$275 for thumbhole stock (new 1995).

Add \$525 for replacement trigger assembly (blue or stainless).

SHOTGUNS: RECOILLESS SINGLE BARREL TRAP

RECOILLESS SINGLE BARREL TRAP — 12 ga., special bolt action design that eliminates 72% of felt recoil, 27 (also available in Micro Model) or 30 in. high-post vent. rib Invector Plus choked back-bored barrel, rib adjusts for 3 points of impact (3, 6 or 9 in.), stock has adj. pull (2 sizes) and comb height, anodized receiver, no safety, approx. 8½ lbs. Mfg. 1994-96.

\$1,650 \$1,100 \$925 \$750 \$575 \$495 \$450
 Last Mfg.'s Sug. Retail was \$1,995.

The Micro Model features a 27 in. barrel and shorter length of pull.

▲ **Signature Painted** — features painted red/black stock with Browning logos on stock and forearm, Invector Plus ported barrels. Mfg. 1994 only.

\$1,580 \$1,050 \$895 \$725 \$575 \$495 \$450
 Last Mfg.'s Sug. Retail was \$1,900.

SHOTGUNS: A-BOLT SERIES BOLT ACTION

A-BOLT MODEL — 12 ga. only, 3 in. chamber, 2 shot mag., same bolt system as A-Bolt II Rifle, 22 or 23 in. barrel (rifled or Invector with rifled tube), available in Stalker Model with graphite fiberglass composite stock or Hunter Model with select satin finished walnut stock, dull matte finished barrel and receiver, top tang safety, choice of no sights (new 1996) or adj. rear sight, drilled and tapped receiver, approx. 7 lbs. New 1995.

▲ **Stalker Model**

Mfg.'s Sug. Retail \$720 \$600 \$500 \$425 \$375 \$340 \$310 \$290

Add \$25 for open sights.

Add \$53 for rifled barrel.

▲ **Hunter Model**

Mfg.'s Sug. Retail \$805 \$665 \$525 \$450 \$400 \$350 \$315 \$290

Add \$24 for open sights.

Add \$77 for rifled barrel.

SHOTGUNS: SxS, DISC.

BSS MODEL — 12 or 20 ga., 26, 28, or 30 in. barrels, various chokes, boxlock, auto ejectors, checkered pistol grip stock, beavertail forearm, selective single trigger. Mfg. 1971-1988 by Miroku.

\$695 \$595 \$450 \$400 \$365 \$330 \$300
 Last Mfg.'s Sug. Retail was \$775.

Add 10%-15% for 20 ga.

Early guns had a single non-selective trigger (silver plated) — subtract 10%.

▲ **Grade II** — satin greyed steel receiver featuring an engraved pheasant, duck, quail and dogs. Disc. 1983.

\$1,100 \$950 \$800 \$700 \$600 \$525 \$450

▲ **Sporter Model** — has straight grip stock and slim forearm, oil finish, 26 or 28 in. barrels. Disc. 1988.

\$795 \$695 \$550 \$500 \$445 \$410 \$370

Last Mfg.'s Sug. Retail was \$775.

Add 10%-15% for 20 ga.

BSS SIDELOCK — 12 or 20 ga., engraved sidelock action in satin grey finish, ST, 26 or 28 in. barrels, English select walnut stock, splinter forend. Mfg. 1983-1988 in Miroku in Japan.

12 ga. \$1,995 \$1,450 \$1,125 \$975 \$825 \$750 \$675

20 ga. \$2,400 \$1,750 \$1,375 \$1,100 \$900 \$800 \$700

Last Mfg.'s Sug. Retail was \$2,000.

JONATHAN BROWNING MOUNTAIN RIFLE — 50 cal., percussion, 30 in. octagon barrel, single set trigger, engraved lock plate, select walnut stock, cased with medallion and powder horn, 1,000 mfg. in 1978. Issue price — \$650.

\$750 \$595 \$400

MOUNTAIN RIFLE — similar to Jonathan Browning Mountain Rifle, without Centennial embellishments, not cased. Also in .45 or .54 cal.

\$450 \$375 \$275 \$200 \$150 \$135 \$125

CENTENNIAL O/U RIFLE/SHOTGUN — 20 ga. O/U shotgun w/extra set of .30-06 O/U rifle barrels. Shotgun barrels are 26½ in., rifle barrels are 24 in., SST, ejectors, elaborate scroll engraved receiver with 2 gold inlays, special oil finish walnut, deluxe walnut full-length case. 500 mfg. 1978 only.

\$3,500 \$3,000 \$2,600 \$2,300 \$2,000 \$1,850 \$1,650
Last Mfg.'s Sug. Retail was \$7,000.

CENTENNIAL SET — complete Browning set mfg. in 1978, includes the Centennial O/U Rifle/Shotgun, 9mm Hi-Power, B92 .44 Mag., Mountain Rifle, and a set of three knives.

\$6,250 \$5,000 \$3,950

1 OF 50 BICENTENNIAL RIFLE — .30-06 cal., Model 78 single shot with 26 in. octagon barrel, includes special engraving by Neil Hartliep (non-factory), extra fine walnut, 4X wide angle scope, special luggage case. 50 mfg. (one for each state) during 1976 only and sold by silent mail order bidding (minimum bid was \$3,100 in 1976).

As very few specimens are bought or sold each year, pricing is rather unpredictable. A few specimens have been sold in the \$5,000 range recently. Remember, the work on this gun was subcontracted by Centennial Guns (division of Frigon Guns located in Clay Center, KS).

BRUCHET

Manufacturer located in Saint Etienne. Distributed exclusively from 1982-1989 by Wes Gilpin located in Dallas, TX. In 1989, Bruchet was able to get permission to use the older Darne trademark and all new manufacture will be entered under the Darne listing.

Paul Bruchet has been manufacturing his shotguns patterned after the Darne action since 1981, following his tenure at Darne as line foreman until 1979 (at which time the Darne plant closed). These new Bruchet Models were designated "A" or "B". All shotguns were totally hand made with approx. 50 guns being mfg. each year.

Since Paul Bruchet was able to retain the Darne trademark in 1989, please refer to the Darne section in this text for current manufacture.

MODEL A — 12, 16, 20, 28 ga., or .410 bore, small key opening, ejectors, double triggers only, basically 4 variations (1, 1A, 2, and 2A), wide assortment of customer specified special orders.

Retail values are as follows: Model 1A starts at under \$2,000, the Model 2 starts at \$3,000, and the Model 2A starts at \$3,500. Each additional grade represents more embellishments and better grade of walnut. Magnum chambers can be ordered at a small surcharge. Importation began 1982, values represent the last published retail prices from 1989.

MODEL B — 12, 16, 20, 28 ga., or .410 bore, large key opening, self-opening (assisted) action, ejectors, double triggers only, basically special ordered to individual customer specifications.

Retail values are as follows: Model B starts at \$5,800 and includes deluxe carrying case. Each additional upgrade represents more embellishments and a better grade of walnut. Magnum chambers can be ordered at a small surcharge. Importation began 1982, values represent the last published retail prices from 1989.

C Z (CESKA ZBROJOVKA)

Current manufacturer located in Uhersky Brod, Czechoslovakia, 1921-current. Previous mfg. was in Strakonice, Czechoslovakia. Newly manufactured CZ firearms are currently imported exclusively by CZ USA located in Oakhurst, CA beginning late 1996 and on a limited basis (certain models only) by Century International Arms, Inc. located in St. Albans, VT. Previously imported by Magnum Research, Inc. located in Minneapolis, MN beginning July 1, 1994. Previously imported before 1994 by Action Arms Ltd. located in Philadelphia, PA.

While little history is known about this important European trademark, the following biographical sketch will provide some information. In approximately 1916, some military personnel took over the controlling interest of the Austro-Hungarian armament shop in Brno, Czechoslovakia, renaming it The State Armament and Engineering Works. Approximately a year later, the name was changed to Czechoslovak State Armament Works. Prior to 1924, this firm was involved mainly with Mauser Model 98 type rifles (both assembly and mfg.).

In 1924, the name was again changed to Ceskoslovenska Zbrojovka A.Z. (Czechoslovakian Arms Factory Ltd.) - commonly known as the CZ firm. CZ manufactured the VZ-24 Mauser rifle for Czechoslovakia as well as other M-98 military rifles and carbines for other countries, including many which Germany used during WWII. After WWII, the name was again changed to Zbrojovka Brno (Brno Arms Works), or ZB for short.

With the Iron Curtain descending on Europe after WWII, communist bloc countries including Czechoslovakia had little exportation to the U.S. Currently, CZ handguns are made at the plant in Uhersky Brod and Brno long arms are made in both Uhersky Brod and Brno. With the sudden decline in communism during the past years, more and more products (including firearms from Czechoslovakia) will see their way into the U.S. without the 65% importation tax previously levied on goods from older communist bloc countries.

PISTOLS: SEMI-AUTO, DISC.

"DUO" POCKET AUTOMATIC — .25 auto, 6 shot, 2 $\frac{1}{8}$ in. barrel, fixed sights, blue or nickel, plastic grips. Mfg. 1926-present (current Z pistol by Brno).

\$200	\$185	\$170	\$150	\$125	\$100	\$75
-------	-------	-------	-------	-------	-------	------

Add 40% for WWII years.

This model was manufactured by Dushek and is similar to the Z pistol equivalent by Brno.

CZ 22 — .380 cal., derived from Mauser Nickl Pistol and manufactured under license from Mauser. Mfg. 1923 only.

\$400	\$350	\$320	\$300	\$275	\$235	\$200

CARTRIDGE FIREARMS

Unknown maker.

Many models of pistols, rifles, and shotguns — antique and modern. Many poor quality copies in addition to a few high quality, nicely engraved guns. Most of these firearms that are average quality, trade in the \$100-\$300 area. Engraved models can add as much as 150%. Many produced.

CASARTELLI, CARLO

Manufactured in Brescia, Italy. Imported and distributed by New England Arms Co. located in Kittery Point, ME.

Casartelli rifles and shotguns are available through special order only. Virtually any custom gun can be constructed to the customer's exact specifications and requirements. More information can be obtained by writing the above importer/distributor.

CENTURY INTERNATIONAL ARMS, INC.

Importer and distributor located in St. Albans, VT.

Century International Arms, Inc. imports a variety of used military rifles and pistols, including various Mauser rifle contract models, French Lebel and MAS models, Mannlichers, F.N. Model 49s, Lee Enfields, Hakims, Mosin-Nagants, Egyptian Rashids, Swedish Ljungman Model 42Bs, Chinese and Russian SKSs, M-1 carbines/Garands and various WWI and WWII used military pistols

**CENTURY
INTERNATIONAL
ARMS INC.**

(including Mauser Broomhandles, Lugers, P.38s, Argentine mfg. M1911s, and French PA 35s). Because most of these items range in the \$125-\$550 price range, individual listings are not listed in this text. Most of these models are in good to new condition overall. In addition, surplus and currently manufactured ammunition is available at very competitive prices. Generally, these models offer good values to the shooter and some may be collectible. Because importation of Eastern Bloc military rifles has changed so dramatically over the past several years, Century International Arms, Inc. should be contacted directly (see Trademark Index) for a complete catalog of their currently available merchandise.

and began manufacturing the Heritage I, with an investment-cast steel frame, and without the Century's novel cross-bolt safety. Keller's Century Manufacturing, Inc. continued to produce the original Century, with some design refinements, and in 1985 the company was purchased by Dr. Paul Majors.

The current Century revolver features a manganese bronze frame and other components in addition to having a cross-bolt safety. They are produced in .45-70 and various other cal., in Greenfield, IN. Earl Keller died in 1986. The second series is being made in Greenfield, IN with limited production resuming in 1986. Earlier handmade "Evansville" Model 100s (disc.) are currently selling for between \$2,500-\$3,500, depending on the region.

REVOLVERS

Less than 1,300 Model 100s have been manufactured since 1976. Values below are for .45-70 cal. Other calibers are priced from \$2,000 on up.

MODEL 100 — .30-30 (new 1987), .375 Win. (new 1986), .444 Marlin (new 1986), .45-70, .50-70 Govt. (new 1987), or .50-110 cal., single action 6 shot, manganese bronze frame, steel cylinder, 6½, 8, 10, or 12 (disc.) in. round or octagon barrel, unique crossbolt safety that locks the hammer, adj. sights, walnut grips, 5 lbs. 14 oz.

---------------------------	----------------	----------------	--------------	--------------	--------------	--------------	--------------	--------------

- Add \$400 for .50-70 cal.
- Add \$110 for normal octagon barrel.
- Add \$150 for stainless steel fabrication.

CHAMPLIN FIREARMS, INC.

Custom manufacturer/gunsmith located in Enid, OK. Champlin Firearms was established in 1966. Direct sales only.

Champlin Firearms, Inc. manufactures handcrafted rifles built around a patented bolt action of their own design and manufacture. Most guns are built per individual customer order and specifications. Values will vary greatly depending on the configuration, desirability, and special order specifications. All Champlin rifles are built along classic lines with best quality wood and exemplary workmanship. They have been used successfully on safaris and have shot dangerous game throughout the world.

Champlin Firearms, Inc. also inventories a wide selection of high grade, top quality shotguns and rifles (especially top trademark doubles and bolt actions). Contact George Caswell (owner) directly for a current listing (please refer to Trademark Index). Additional services include a complete gunsmithing service for all grades of English double rifles and shotguns. Custom stocks are also built to individual customer specifications. All double rifles are test fired and checked thoroughly upon completion of manufacture or repair. Again, Champlin Firearms should be contacted for consultation and quotation regarding this additional work.

BOLT ACTION RIFLE — standard, all calibers, round or octagon barrel, adj. trigger, each rifle is built to customer specifications. Values below represent base gun with standard wood, no options, and no engraving.

CHARLIN ARMS

Previously manufactured in France.

Charlin Arms previously made shotguns which were patterned after Darne firearms. Typically, they are very high quality and values seem to approximate the Darne guns. Once you have determined the comparable model in Darne, please refer to the Darne section in this book.

CHARTER ARMS

Previously manufactured by Charco, Inc. located in Ansonia, CT beginning 1992-96. Also previously manufactured by Charter Arms located in Stratford, CT 1991-earlier.

REVOLVERS: DOUBLE ACTION

All Charter Arms revolvers have a hammer block safety system, 8 groove rifling, unbreakable beryllium copper firing pin, triple safety features, no sideplate, steel frames, and lifetime warranty to the original owner.

CHURCHILL, E.J., (GUNMAKERS) LTD.

Previously manufactured in London, England. The company underwent various trading forms until Churchill, Atkin, Grant & Lang Ltd. closed in 1981. Currently, E.J. Churchill SxS shotguns are manufactured in Surrey, England and while they are not imported into the U.S., these models are shown with U.S. prices if purchased in England. Prices are subject to fluctuating U.S. dollar.

Churchill Guns are among the world's finest with many custom features. We will list both discontinued and current models and approximate values, but strongly urge competent appraisal if purchase or sale is contemplated.

RIFLES

"ONE OF ONE THOUSAND RIFLE" — Mauser type bolt action, .270, 7mm Rem. Mag., .308, .30-06, .300 Win. Mag., .375 H&H Mag., or .458 Win. Mag. cal., 5 shot standard, 3 shot mag. Magnum, 24 in. barrel, classic French walnut stock, swivel recoil pad with trap, trap pistol grip cap. Mfg. 1973 for Interarms 20th Anniversary, only 100 mfg.

\$1,400 \$1,250 \$1,000 \$900 \$750 \$700 \$600

SHOTGUNS

All below models were built or finished to customer specifications pertaining to choking, chambers, barrel lengths, stock measurements, weight, engraving patterns. Standardized patterns did exist, however, for each model. The "XXV" designation referred to the 25 in. barrel length, which was a Churchill specialty and was also a registered trademark.

PREMIER QUALITY SxS — most ga.'s, best quality, easy opening or standard opening, 25, 28, 30, or 32 in. barrels, any choke, sidelock, auto ejectors, standard with double triggers, engraved, checkered, straight or pistol grip stock. Also mfg. in some double rifles. Disc.

REVOLVERS & CARBINES: SINGLE ACTION REPRODUCTIONS

The Cimarron Arms reproduction of the 1873 Colt Peacemaker is available in two configurations listed below. These pistols are extremely accurate reproductions of the original Colt pre-war Peacemaker and are marked (and machined) the same as the originals including serial numbers on frames, backstrap, trigger guard, and cylinder. Barrels are radiused and cylinders are beveled. Frames are color case hardened, stocks are walnut - choice of 4¾, 5½, or 7½ in. barrel. All Cimarron SAAs are currently barrel marked "- CIMARRON F.A. MFG. Co. FREDERICKSBURG, TX. U.S.A. -".

The "Old Model" configuration has the older style black powder frame, screw in cylinder pin retainer, and circular "bullseye" ejector head. The Standard Model includes the post-1890 style frame with spring loaded cross-pin cylinder retainer and "half-moon" ejector head.

Only the Old Model is available in the authentic old style "charcoal blue" finish (sometimes referred to as fire-bluing).

- Add \$40 for charcoal blue finish.
- Add \$120 for custom nickel finish.
- Add \$45 for hand checkered walnut grips.
- Add \$600 for "A" style engraving (30% coverage) on SAAs listed below.
- Add \$700 for "B" style engraving (50% coverage) on SAAs listed below.
- Add \$1,000 for "C" style engraving (100% coverage) on SAAs listed below.
- Add \$1,125 for "Texas Cattle Brands" engraving pattern.

FRONTIER SIX SHOOTER — available in .22 LR (disc. 1995), .22 Mag. (disc.), .357 Mag., .38 Spl. (disc.), .38-40 WCF, .44-40, or .45 LC cal., 4¾, 5½, and 7½ in. barrel lengths, steel backstraps and trigger guard.

LAW ENFORCEMENT COMPANION (LEC) — 9mm, .40 S&W, or .45 ACP cal., 16¼ button rifled barrel, black graphite composition buttstock and foregrip, buttstock also provides space for an extra mag., available in either aluminum or stainless steel frame, matte black finish, available with full integral laser sighting system. Limited mfg. 1992-93.

\$650 \$575 \$495 \$425 \$375 \$325 \$295
 Last Mfg.'s Sug. Retail was \$749.

Add \$400 for integral laser sighting system.

CLARK CUSTOM GUNS, INC.

Clark Custom Guns, Inc. has been customizing various configurations of both handguns and rifles since 1950. It would be impossible to list within the confines of this text the many conversions this company has performed. It is recommended to contact this company directly (see Trademark Index) for an up-to-date price sheet and catalog on their extensive line-up of high quality competition pistols that range in price from \$625 - \$2,285. Custom rifles are also available in addition to various competition parts, related gunsmithing services, and a firearms training facility called The Shootout.

CLASSIC DOUBLES

Previously manufactured in Tochigi City, Japan. Previously imported and distributed by Classic Doubles International, Inc. located in St. Louis, MO.

The factory closed in 1987, and all Classic Doubles remaining in inventory were sold to GU Wholesalers located in Omaha, NE in 1990. While a few models are still available through GU Wholesalers (call for availability), all values listed below reflect discontinuance of mfg. To date, there has been little collectibility in the Classic Doubles trademark. As a result, values are determined by the shooting value each model has to offer against other competing models in the same configuration. Also, in some regions of the country, 98% condition or less specimens may be priced lower than values shown in this section.

In late 1987, Winchester/Olin discontinued importation of their Japanese shotgun models (Models 101 and 23). At that point, Classic Doubles International, Inc. became the sole importer of these shotguns. There were very few changes made during this changeover of importation. The late manufacture Classic Double shotguns (Models 101 and 201) do not have the Winchester trademark or definitive Winchester proofmark stamped on the barrels. The Model 201 was a new model designation.

SHOTGUNS: O/U - MODEL 101

The late manufacture Classic Doubles have an interchangeable choke tube system compatible with the older Winchester manufactured models. Prices listed include a luggage style carrying case.

Values listed below for the Classic Doubles Shotguns assume NIB condition - subtract 10%-15% if without box, warranty card, and original shipping container (with packing materials).

CLASSIC FIELD GRADE I — 12 or 20 ga., 3 in. chambers, vent. rib, 25½ or 28 in. vent. barrels with choke tubes, blued receiver with moderate scroll engraving, ejectors, checkered pistol grip or English stock and forearm, 6¼ - 7 lbs.

\$1,400 \$1,250 \$1,100 \$1,000 \$900 \$825 \$750
 Last Mfg.'s Sug. Retail was \$1,905.

Grading

100% 98% 95% 90% 80% 70% 60%

WATERFOWL MODEL — 12 ga. only, 3 in. chambers, 30 in. barrels with vent. rib and choke tubes, matte blued receiver with moderate engraving, low gloss walnut stock with vent. recoil pad, 7³/₄ lbs.

\$1,150 \$995 \$895 \$800 \$700 \$600 \$500
Last Mfg.'s Sug. Retail was \$1,520.

CLASSIC SPORTER — 12 ga. only, made for Sporting Clays competition, 28 or 30 in. vent. barrels and rib with choke tubes, quick detachable stock system, border engraved coin finished receiver with non-reflective matte surface on top frame and lever, checkered walnut stock and forearm, 7³/₄ lbs.

\$1,995 \$1,500 \$1,295 \$1,150 \$1,000 \$900 \$775
Last Mfg.'s Sug. Retail was \$1,980.

Add \$965 for extra barrel.

CLASSIC FIELD GRADE II — 12, 20, 28 ga., or .410 bore, 28 in. VR barrels with choke tubes, deluxe walnut with round knob pistol grip stock and forearm with fine fleur-de-lis checkering, coin finished receiver (different sizes) with game scene engraving featuring hunting motifs on receiver sides and bottom, .410 bore bored M/F only, 6¹/₄ - 7 lbs.

\$1,795 \$1,475 \$1,275 \$1,100 \$1,000 \$900 \$795
Last Mfg.'s Sug. Retail was \$2,190.

Add 15% for .410 bore (baby frame).

Add 50% for 28 ga. (baby frame).

The lack of supply of the Winchester/Olin Model 101 28 ga. small frame has caused a significant in demand for the .410 bore or 28 ga. The Grade II .410 bore is the only round knob pistol grip produced in both Winchester and Classic Doubles manufacture.

CLASSIC FIELD GRADE II TWO BARREL SET — 12 and 20 ga. barrels, both with Winchokes, 26 in. barrels - 20 ga., 28 in. barrels - 12 ga., coin finished receiver with game scene engraving and borders, 6¹/₂ (20 ga.) or 7 (12 ga.) lbs.

\$2,695 \$2,175 \$1,825 \$1,550 \$1,375 \$1,200 \$1,075
Last Mfg.'s Sug. Retail was \$3,420.

TARGET GUNS

CLASSIC TRAP SINGLE — 12 ga. only, over single 32 or 34 in. VR barrel with choke tubes, blued receiver with light engraving, choice of Monte Carlo or regular stock, recoil pad, 8¹/₂ lbs.

\$1,425 \$1,250 \$1,100 \$1,000 \$900 \$825 \$750
Last Mfg.'s Sug. Retail was \$2,070.

CLASSIC TRAP O/U — 12 ga. only, 30 or 32 in. vent. barrels and rib with choke tubes, finish and engraving similar to Classic Trap Single, choice of Monte Carlo or standard stock with recoil pad, 8³/₄ or 9 lbs.

\$1,300 \$1,125 \$1,000 \$900 \$825 \$750 \$675
Last Mfg.'s Sug. Retail was \$1,905.

CLASSIC TRAP COMBO — includes one set of O/U barrels (30 or 32 in.) and one over single barrel (32 or 34 in.), choke tubes, choice of Monte Carlo or standard stock, 8³/₄ or 9 lbs.

\$2,125 \$1,875 \$1,600 \$1,475 \$1,300 \$1,175 \$995
Last Mfg.'s Sug. Retail was \$2,825.

CLASSIC SKEET — 12 or 20 ga., 27¹/₂ in. vent. barrels and rib, choke tubes on 12 ga. only, smaller ga.'s are bored SK/SK, similar metal finish to Classic Trap models, 7¹/₄ or 7³/₄ lbs.

\$1,695 \$1,375 \$1,175 \$1,025 \$900 \$825 \$750
Last Mfg.'s Sug. Retail was \$1,905.

▲ **Classic Skeet 4 ga. Set** — similar to Classic Skeet, except has 4 barrels (12, 20, 28 ga., or .410 bore), 12 ga. has choke tubes, smaller ga.'s are bored SK/SK.

\$3,900 \$3,500 \$3,100 \$2,875 \$2,600 \$2,300 \$1,995
Last Mfg.'s Sug. Retail was \$4,765.

SHOTGUNS: SIDE BY SIDE

MODEL 201 CLASSIC — 12 or 20 ga., 3 in. chambers, forged steel monobloc with improved lug design, 26 in. choke tube barrels with vent. rib, high lustre bluing, no engraving, SST, ejectors, premium walnut stock and beavertail forearm with fancy checkering pattern, solid red rubber recoil pad, 6³/₄ - 7 lbs.

\$1,400 \$1,200 \$995 \$775 \$650 \$575 \$495

Last Mfg.'s Sug. Retail was \$2,190.

Add \$120 for 20 ga.

The 12 ga. could be ordered with choke tubes at no extra charge. Only 63 were mfg. with choke tubes and slight premiums are being asked.

▲ **Model 201 Classic Small Bore Set** — 28 ga. and .410 bore two barrel set, similar to Model 201 Classic except has smaller frame and overall dimensions, 28 in. VR barrels only bored IC/M on 28 ga. and M/F on .410 bore, very limited importation, 6 or 6¹/₂ lbs.

\$4,250 \$3,650 \$3,250 \$2,800 \$2,400 \$1,950 \$1,475

Last Mfg.'s Sug. Retail was \$3,675.

CLERKE PRODUCTS

Previous manufacturer located in Santa Monica, CA.

DOUBLE ACTION REVOLVER — .22 RF or .32 S&W Long cal., inexpensive double action revolvers that sold to dealers for \$15 in 1971.

HI-WALL — single shot rifle, falling block replica of Winchester 1885 High Wall, lever operated, case hardened receiver, 26 in. barrel, available in most modern calibers, no sights, checkered walnut pistol grip stock, Schnabel forearm. Mfg. 1972-1974.

\$250 \$225 \$185 \$175 \$150 \$140 \$125

DELUXE HI-WALL — similar to Hi-Wall, except half octagon barrel, select wood and recoil pad.

\$300 \$275 \$235 \$210 \$180 \$160 \$145

CLIFTON ARMS

Manufacturer and retailer of custom rifles located in Medina, TX. Clifton Arms mostly specializes in composite stocks (with or without integral, retractable bipod). Manufacturer direct sales only.

Clifton Arms mostly manufactures composite, hand laminated stocks that are patterned after the Dakota 76 stock configuration. However, custom rifles can be ordered by contacting the company and specifying the type of action, caliber, barrel, stock configuration, color. Price quotations vary per individual, special order rifle.

RIFLES: BOLT ACTION

CLIFTON SCOUT RIFLE — .243 Win. (disc. 1993), .30-06, .308 Win., .350 Rem. Mag., .35 Whelen, 7mm-08 Rem. (disc. 1993), or .416 Rem. Mag. cal., choice of Dakota 76, pre-64 Winchester Model 70, or Ruger 77 MK II (standard) stainless action with bolt face altered to controlled round feeding, Shilen stainless premium match grade barrel, Clifton synthetic stock with bipod, many other special orders are available, mfg. began 1992.

Mfg.'s Sug. Retail \$3,100 \$3,000 \$2,350 \$1,650

This model is available as a Standard Scout (.308 Win. cal. with 19 in. barrel), Pseudo Scout (.30-06 cal. with 19¹/₂ in. barrel), Super Scout (.35 Whelen or .350 Rem. Mag. with 20 in. barrel), or African Scout (.416 Rem. Mag. with 22 in. barrel).

COLT'S MANUFACTURING COMPANY, INC.

Manufacturer located in W. Hartford, CT.

Manufactured from 1836-1841 in Paterson, NJ; 1847 to 1848 in Whitneyville, CT; 1854 to 1864 in London, England; and from 1848 to date in Hartford, CT. Colt Firearms became a division of Colt Industries in 1964. In March, 1990, the Colt Firearms Division was sold to C.F. Holding Corp. located in Hartford, CT. The new company is called Colt's Manufacturing Company, Inc. The original Hartford plant was closed during 1994.

PERCUSSION REVOLVERS

Prices shown for percussion Colt's are for guns only. Original cased guns with accessories will bring a healthy premium over non-cased models (200-350% over a gun only is common). Be very careful when buying an "original" cased gun, as many fake cases have shown up in recent years.

If possible, it is advisable to procure a factory letter (available only within the following ser. no. ranges) before buying, selling, or trading Models 1851 Navy (ser. range 98,000-132,000), 1860 Army (ser. range 2,000-130,000), or 1861 Navy (ser. range 1-10,000). These water marked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$100 per serial number (if they can research it). Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. Box 1868, Hartford, CT 06144. Please allow 4-6 weeks for a response.

Prices shown on the following pages for extremely rare Colt's firearms might not include values in the 90%, 95%, 98%, and 100% condition columns. Prices are very hard to establish since these excellent to mint specimens are seldomly seen or sold.

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%
------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

POCKET MODEL PATERSON NO. 1 — also known as "Baby Paterson", .28 cal., 5 shot, 2½ in. to 4¾ in. octagon barrels, blued metal, varnished walnut grips. Serial range 1 to approx. 500. Standard bbl. marking "Patent Arms M'g Co. Paterson N.J.-Colt's Pt.". Centaur scene with four horse head trademark and "COLT" on 1½ in. cylinder of round or square type. Mfg. 1837-1838.

This and all other Paterson models have 5 shot cylinders and serial numbers are not commonly in evidence externally. Disassembly of the arm is usually necessary to determine the serial number.

The Pocket Model Paterson No. 1 (Baby Paterson) is the first production made handgun in its Paterson, N.J. facility. It is very small in size, almost appearing as a toy or miniature.

▲ **Standard Production Model** — without attached loading lever.

N/A	N/A	\$34,000	\$27,000	\$21,000	\$18,500	\$15,000	\$13,250	\$11,750	\$10,250	\$9,000	\$8,000
-----	-----	----------	----------	----------	----------	----------	----------	----------	----------	---------	---------

▲ **Late Production Ehlers Model** — with attached loading lever, 3¼ round back cylinder and recoil shield milled for ease of capping. Barrel marked "Patent Arms Paterson N.J.-Colt's Pt.". Approx. 500 mfg. including the Ehlers Model under Belt Model No. 2 Mfg. 1840-1843.

N/A	N/A	\$37,750	\$30,000	\$23,000	\$19,000	\$15,500	\$13,750	\$12,250	\$10,750	\$9,500	\$8,500
-----	-----	----------	----------	----------	----------	----------	----------	----------	----------	---------	---------

BELT MODEL PATERSON NO. 2 — .31 or .34 cal., 5 shot, 2½ in. to 5½ in. octagon barrels, blued metal, varnished walnut grips. Serial range 1- approx. 850 which includes the Belt Model No. 3. All standard production Belt Models No. 2 have straight bottom style grips. Standard bbl. markings "Patent Arms M'g Co. Paterson N.J. Colt's Pt.". Centaur scene with four horse head trademark and "COLT" on cylinder of round or square backed type. Mfg. 1837-1840. Somewhat heavier than the Pocket No. 1 revolver.

▲ **Standard Production Model** — without attached loading lever.

N/A	N/A	\$34,000	\$27,000	\$21,000	\$18,500	\$15,000	\$13,250	\$11,750	\$10,250	\$9,000	\$8,000
-----	-----	----------	----------	----------	----------	----------	----------	----------	----------	---------	---------

▲ **Ehlers Model** — with attached loading lever, 1½ in. round back cylinder, recoil shield milled for ease of capping. Barrel marked "Patent Arms Paterson N.J. Colt's Pt.". Approx. 500 mfg. including the Ehlers Model under Pocket Model No. 1. Mfg. 1840-1843.

N/A	N/A	\$41,500	\$33,000	\$26,000	\$22,500	\$19,000	\$15,500	\$13,500	\$12,000	\$10,600	\$9,500
-----	-----	----------	----------	----------	----------	----------	----------	----------	----------	----------	---------

BELT MODEL PATERSON NO. 3 — .31 or .34 cal., 5 shot, 3½ in. to 5½ in. octagon barrels, blued metal, a few having case hardened hammers. Varnished walnut grips. Serial range 1- approx. 850 which includes the Belt Model No. 2. All standard production Belt Models No. 3 have the flared bottom style grips. Standard barrel markings "Patent Arms M'g Co. Paterson N.J. Colt's Pt." The square backed cylinder is seen less often than the more common round back, both bearing the Centaur scene with four horse head trademark and "COLT". With both Belt Models, revolvers exhibiting attached loading levers are less common than those without a lever. Mfg. 1837-1840.

▲ **Standard Model W/O Lever** — without attached loading lever.

N/A	N/A	\$34,000	\$28,750	\$23,000	\$19,500	\$17,000	\$15,000	\$13,500	\$11,750	\$10,500	\$9,250

------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

- ▲ **Standard Model With Lever** — with attached loading lever and recoil shield milled for ease of capping (scarce).

N/A N/A \$37,400 \$31,000 \$25,500 \$22,500 \$19,750 \$17,500 \$15,250 \$13,500 \$12,000 \$10,750

HOLSTER MODEL NO. 5 — also known as "Texas Paterson" - .36 cal., 5 shot, 4 in. to 12 in. octagon barrels, blued metal with case hardened frame and hammer. All cylinders bear the stage coach hold-up scene. Varnished walnut grips of flared bottom style. Serial range 1 to approx. 1,000. As with all models of Patersons, the serial number usually cannot be seen without disassembly of the revolver. Very large and heavy compared to the other Paterson models. Enjoys more popularity with collectors because of its military and frontier use. Mfg. 1838-1840.

Many specimens encountered in this variation show extreme use. Consequently, fine to mint specimens are quite rare and highly prized by collectors. Values are given for non-military marked specimens. Any specimen bearing an authenticated martial marking is truly a rarity and should be appraised individually. NOTE: Watch for fakes here. There are now many times more faked martial markings, often times on non-original Patersons, than there are originals.

- ▲ **Standard Production Model W/O Lever** — without attached loading lever, round or square backed cylinder.

N/A N/A \$140,000 \$105,000 \$82,500 \$66,500 \$57,000 \$49,000 \$42,000 \$37,000 \$32,500 \$28,000

- ▲ **Standard Production Model With Lever** — with attached loading lever, round backed cylinder and recoil shield milled for ease of capping.

N/A N/A \$152,000 \$110,500 \$87,500 \$73,500 \$63,500 \$55,000 \$47,500 \$41,500 \$37,000 \$32,500

WALKER MODEL REVOLVER — .44 cal., 6 shot, 9 in. part round, part octagon barrel, blued metal with case hardened frame, lever and hammer. Cylinder left without finish, brass trigger guard. One piece walnut grips. Mfg. 1847; total production approx. 1,100. Ser. numbers beginning with no. 1 were applied for each of five different military companies (A,B,C,D, & E). The total for the military issue Walkers was approx. 1,000 revolvers; the remaining approx. 100 revolvers were produced for civilian distribution. Barrels marked "Address Saml Colt New-York City". Found on right side of barrel lug is "US" over "1847". Cylinder bears Texas Ranger/Indian fight scene. Various metal parts and walnut grips stamped with Govt. Inspectors' marks.

Because of these arms being subjected to great extremes of use, they will exhibit high degrees of wear, often to the extent that most or all markings will be worn off. Replaced parts are common and many badly worn and damaged specimens have been extensively rebuilt and restored. NOTE: Use great caution when contemplating the purchase of a Walker. A multitude of out-and-out fakes and "antiqued" reproduction Walkers have been fed into the market over the past few decades. Some of these are old enough (and have aged enough naturally) to almost resemble an authentic specimen. Enlist the services of a qualified expert before your dollars are spent. Only 10-12% of the original production of approx. 1,100 specimens have been accounted for. The acquisition of an authenticated Walker revolver is the ultimate goal of serious Colt collectors.

- ▲ **Standard Military Issue Model**

N/A N/A \$250,000 \$180,000 \$150,000 \$130,000 \$87,500 \$77,500 \$67,500 \$57,500 \$52,500

- ▲ **Limited Civilian Issue Model** — serial range 1001 to approx. 1100. Similar to military model except Govt. inspectors' marks were not applied. Pricing is difficult on the civilian issue arms. They tend to be in considerably better condition than the much more common military specimens. The factors of scarcity and condition will often bring higher prices from the advanced collector of means, especially in the finer grades of condition. On the other hand, the collector appreciating military usage will pay more for military marked examples. This publication tries to reflect the latest trends on purchase of civilian models.

N/A N/A \$245,000 \$180,000 \$145,000 \$125,000 \$90,000 \$75,000 \$65,000 \$55,000 \$50,000

WHITNEYVILLE HARTFORD DRAGOON — .44 cal., 6 shot, 7½ in. part octagon, part round barrel, some of the left-over Walker parts were used in Dragoons, blued metal with casehardened frame, lever, hammer, brass trigger guard and steel cylinder bears Texas Ranger and Indian battle scene. Mfg. 1847. Total production approx. 240. Serial range approx. 1,100 to 1,340 in sequence following civilian Walkers.

-----	-----	----------	----------	---------	---------	---------	---------	---------	---------	---------	---------

1862 POLICE MODEL — .36 cal., 5 shot half fluted and rebated cylinder, 4½, 5½, and 6½ in. round barrels (also 3½ in. bbl. but quite rare) and loading lever. Mfg. 1861 to 1873. Serial numbered with Model 1862 Pocket Navy, approx. 28,000 1862 Police Models were produced. Blued with case hardened frame, lever and hammer, grip straps silver plated, one piece walnut grips. Serial range 1 through approx. 47,000. Standard barrel marking "ADDRESS COL. SAML COLT NEW-YORK U.S. AMERICA". "COLTS/PATENT" on left side of frame, "PAT SEPT. 10TH 1850" stamped in cyl. flute.

Many models 1862 Police and 1862 Pocket Navy revolvers were converted to cartridge with the advent of the metallic cartridge. Consequently these models in their original cap and ball chambering are quite desirable to collectors.

▲ **Early Model** — "ADDRESS SAM COLT/HARTFORD CT" barrel address, silvered iron grip straps.

N/A	N/A	\$9,700	\$6,500	\$5,100	\$4,250	\$3,450	\$2,750	\$2,200	\$1,750	\$1,375	\$1,075

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%
------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

1862 POCKET MODEL NAVY — .36 cal., 5 shot rebated cylinder, 4½ in., 5½ in., and 6½ in. octagonal barrels with loading lever. Mfg. 1861 to 1873. Serial numbered with Model 1862 Police Model. approx. 19,000 Model 1862 Pocket Navy Revolvers produced. Blued with case hardened frame, lever and hammer, grip straps silver plated brass, one piece walnut grips. Serial range 1 through approx. 47,000. Standard barrel markings "ADDRESS COL. SAML COLT NEW-YORK U.S. AMERICA". "COLTS/ PATENT" on left side of frame, stage coach hold-up scene on cylinder.

Known to collectors for many years as the Model 1853, this model has finally been correctly identified through diligent combing of factory ledgers.

Because of being produced during the advent of the metallic cartridge, the number remaining in the original cap and ball state is rather few; scarce with any serial number, but particularly so in numbers over approx. 19,800.

▲ **Standard Model** — 4½, 5½ and 6½ barrel lengths.

N/A N/A \$8,500 \$6,175 \$4,775 \$3,850 \$3,000 \$2,300 \$1,875 \$1,535 \$1,235 \$1,000

▲ **Export Production Model** — with "L" below serial numbers (for export to England), steel grip straps. Often found with British proofs.

N/A N/A \$9,000 \$7,500 \$6,000 \$4,750 \$3,775 \$3,025 \$2,475 \$2,000 \$1,650 \$1,375

▲ **London Marked Model** — similar to above but "ADDRESS COL. COLT/LONDON" address on barrel.

N/A N/A \$14,175 \$10,650 \$8,250 \$6,550 \$5,500 \$4,650 \$3,950 \$3,350 \$2,850 \$2,375

2ND GENERATION BLACK POWDER SERIES

Please refer to this heading under Colt's Firearms in the Modern Black Powder section in the back of this book for current information and values on this 2nd Generation Colt Black Powder Series (including serialization).

DERRINGERS

FIRST MODEL DERRINGER — .41 rimfire, single shot, 2½ in. barrel, scroll engraving standard, blued, nickel, or silver plated barrel, downward pivoting barrel, no grips, serial numbered 1-6,500. Mfg. approx. 1870-1890.

\$3,100 \$2,350 \$2,050 \$1,825 \$1,625 \$1,425 \$1,250 \$1,075 \$875 \$750 \$675 \$650

SECOND MODEL DERRINGER — .41 rimfire or centerfire, single shot, 2½ in. barrel, scroll engraving standard, blued, nickel, or silver plated barrel, downward pivoting barrel, checkered and varnished walnut grips. "No 2" marked on top of barrel, serial numbered 1-9,000. Mfg. approx. 1870-1890.

\$1,650 \$1,400 \$1,200 \$1,060 \$935 \$835 \$730 \$630 \$585 \$535 \$500 \$475

.41 Centerfire — add 100%.

THIRD MODEL DERRINGER (THUER MODEL) — .41 rimfire or centerfire (rare), single shot, side pivoting 2½ in. barrel, varnished walnut grips, blued barrels, bronze frames were either nickel or silver plated, engraving optional, Colt-barrel address, spur trigger, serial numbered approx. 1-45,000. Mfg. approx. 1875-1910.

\$1,400 \$1,200 \$890 \$790 \$700 \$620 \$550 \$495 \$450 \$415 \$385 \$360

.41 centerfire is worth an additional 30-50% and early models are worth considerably more.

Grading

100% 98% 95%

FOURTH MODEL DERRINGER (FIRING) — .22 Short, single shot similar in appearance to the 3rd Model, 2½ in. barrel, approx. 112,000 mfg. between 1959-1963 with either D or N suffix. A few were put in books (sometimes as pairs), picture frames, penholders, bookends, etc. (these will command premiums).

Gun only	\$100	\$85	\$65
Gun w/accessories	\$375	\$275	\$175

Grading

100%

98%

95%

- ▲ **Fourth Model Derringer (non-firing)** — this variation was normally used for decoration and is normally encountered in books, picture frames, penholders, bookends, etc. Values below assume all factory materials intact - if not, prices are reduced to \$50-\$75 for gun only.

\$375	\$250	\$150
-------	-------	-------

Non-firing guns usually do not have the barrel notch, thus preventing the hammer from striking the cartridge.

- LORD DERRINGER** — .22 Short only, side pivoting Thuer action, gold plated with black chrome barrel and walnut grips. Mfg. approx. 1959-1963 by Colt, cased.

\$175	\$140	\$100
-------	-------	-------

- LADY DERRINGER** — .22 Short only, side pivoting Thuer action, full gold plated finish with pearlite grips. Mfg. approx. 1959-1963 by Colt, cased.

\$175	\$140	\$100
-------	-------	-------

- LORD & LADY CASSED SET** — one each of the Lord & Lady derringers or combinations, consecutive serial numbers.

\$350	\$275	\$200
-------	-------	-------

- LADY CASSED SET** — cased pair of Lady Derringers.

\$350	\$275	\$200
-------	-------	-------

- LORD CASSED SET** — cased pair of Lord Derringers.

\$350	\$275	\$200
-------	-------	-------

- BOOKCASE DERRINGER PAIR** — .22 Short cal., consecutively numbered derringers with synthetic ivory grips and nickel finish, cased inside unique hard cover "Colt Derringers" labeled book with red velvet lining, limited mfg. in early '60s.

\$350	\$275	\$200

POCKET PISTOLS

If possible, it is advisable to procure a factory letter before buying/selling this variation (open top only). These water marked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$100 per serial number (if they can research it). Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. Box 1868, Hartford, CT 06101. Please allow 4-6 weeks for a response.

NEW LINE REVOLVER AND VARIATIONS

If possible, it is advisable to procure a factory letter before buying/selling New Line Revolvers. These water marked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$100 per serial number (if they can research it). Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. Box 1868, Hartford, CT 06101. Please allow 4-6 weeks for a response.

Add 30% for blue finish on models listed below.

1ST MODEL — .22, .30, .32, .38, or .41 cal. rim and centerfire, mfg. 1873-1876, 7 (.22 cal. only) or 5 shot, short cylinder flutes, cylinder stop slots cut on exterior of cylinder, 1 $\frac{3}{4}$, 2 $\frac{1}{4}$, or 4 in. barrel, full nickel or blue/case hardened finish, spur trigger, many thousands mfg. 1873-1884.

\$1,150 \$990 \$875 \$810 \$740 \$685 \$580 \$540 \$425 \$355 \$300 \$250

2ND MODEL — similar to 1st Model, except has longer cylinder flutes and cylinder stop slots are on the back of cylinder, may or may not have loading gate. Mfg. 1876-1884.

\$1,050 \$935 \$845 \$775 \$705 \$645 \$540 \$500 \$390 \$320 \$270 \$235

Caliber rarity on both models from highest mfg. to lowest is: .22, .32, .30, .41, and .38.

NEW HOUSE MODEL — .38 or .41 cal. centerfire, 5 shot, 2 $\frac{1}{4}$ in. barrel, spur trigger, checkered hard rubber grips. Approx. 4,000 mfg. 1880-1886 starting at ser. no. 10,300.

\$1,375 \$1,075 \$950 \$850 \$760 \$675 \$600 \$485 \$425 \$360 \$325 \$310

NEW POLICE MODEL — .32, .38, or .41 cal. centerfire, 5 shot, 2 $\frac{1}{4}$, 4 $\frac{1}{2}$, 5, or 6 in. barrel, spur trigger, with or without ejector, stamped or etched "NEW POLICE" on barrel. Approx. 4,000 mfg. 1882-1886.

\$1,675 \$1,425 \$1,225 \$1,050 \$900 \$785 \$700 \$635 \$585 \$550 \$520 \$495

PERCUSSION CONVERSIONS

The author wishes to express thanks to Fred Sweeney for making the following information available for the 18th Edition.

Colt Thuer Conversions

COLT THUER CONVERSIONS (c. 1868-1872) — less than 5,000 produced in all models. This was Colt's first commercial attempt at converting percussion revolvers to fire fixed ammo. Standard features: usually threaded inside rammer for a Thuer loading tool, a hardened flat face on hammer, deepened loading cutout on right side of lug, Thuer ring and back of cylinder have matching assembly numbers. Beware of fakes! Only non-experimental Colt models are listed. Rarity by barrel length will not be considered here. Serial numbers are often missing on cylinder. .31, .36 and .44 CF.

Prices for Colt Conversions reflect values for blue and case hardened examples. Nickel plated specimens will sell for 20%-40% less.

Any defects, excessive wear, or dulled blue will affect value. Nicked conversions that have lost their translucence (become cloudy) should be discounted more than usual 20%-40% from blue and case hardened examples - especially on near mint to mint specimens.

Richards Conversions: All Variations

RICHARDS CONVERSION, COLT 1860 ARMY REVOLVER — .44 CF, produced c. 1870s, special machining to barrel and breech of cylinder for conversion to a cartridge weapon. Produced in two serial ranges: one numbered under 10,000 and a separate group generally in the 190,000 to 200,000 range.

▲ **1860 Army First Model Richards** — quick ID: integral rear sight on breech plate. Floating firing pin in breechplate. Front edge of barrel lug is same as 1860 percussion Army. Breechplate extends over rear edge of cylinder.

\$24,000	\$20,000	\$16,000	\$13,000	\$9,000	\$7,000	\$6,000	\$5,250	\$4,500	\$4,000	\$3,500	\$3,000
----------	----------	----------	----------	---------	---------	---------	---------	---------	---------	---------	---------

▲ **1860 Army Second Model Richards** — quick ID: standard Richards type barrel. A space between face of conversion ring and rear of cylinder when viewed from the side. No integral sight on breechplate, cut away at top allowing hammer to directly strike the cartridge.

\$24,000	\$22,000	\$17,000	\$14,500	\$9,500	\$7,500	\$6,500	\$6,000	\$5,250	\$4,500	\$4,000	\$3,500
----------	----------	----------	----------	---------	---------	---------	---------	---------	---------	---------	---------

▲ **1860 Army Twelve Stop Cylinder Variation Richards** — quick ID: generally the same as standard model Richards except cylinder has extra "safety" notches between the locking notches. This variation was usually produced in the 100-300, 1000-1700 and 200,000 serial ranges. Cylinder locking notches over chambers often broken through. Watch for alterations.

\$27,500	\$24,000	\$19,000	\$15,000	\$12,500	\$8,500	\$7,000	\$6,500	\$6,000	\$5,500	\$5,000	\$4,500
----------	----------	----------	----------	----------	---------	---------	---------	---------	---------	---------	---------

▲ **1860 Army U.S. Marked Richards** — quick ID: generally the same as 1st Model Richards (many minor differences). Has "U.S." stamped on left barrel lug and "A" (Ainsworth) inspectors marked in several places. They are converted 1860 percussion Armys, so original numbers are typically in 23,000-144,000 range plus a second set of assembly numbers. Oiled grips, military soft blue finish.

\$30,000	\$27,000	\$22,500	\$17,500	\$13,000	\$9,500	\$7,750	\$7,000	\$6,500	\$6,000	\$5,500	\$4,500
----------	----------	----------	----------	----------	---------	---------	---------	---------	---------	---------	---------

Richards-Mason Conversions: All Variations

1860 ARMY RICHARDS-MASON — .44 CF, overall, much rarer than Richards Army Conversions. c. 1870s, approximately 2100 produced. A rare variation has an 1860 Army rebated cylinder and a barrel with a lug shaped similar to 1861 Navy Conversion.

▲ **1860 Army Richards-Mason** — quick ID: breechplate without integral rear sight. cutout at top so hammer can strike primer directly. A space can be seen between breechplate and rear of cylinder. Rear of lug is a vertical line instead of the bullet shape cutout seen on Richards models.

\$25,000	\$20,000	\$15,000	\$12,500	\$9,000	\$8,000	\$7,500	\$7,000	\$6,250	\$5,500	\$4,500	\$3,750
----------	----------	----------	----------	---------	---------	---------	---------	---------	---------	---------	---------

▲ **1851 Navy Richards-Mason** — .38 CF and RF. C. 1870s. Produced in two different serial ranges. Has improved Richards-Mason breechplate that is flush with diameter of recoil shield. Difficult to locate in prime condition.

▲ **1851 Navy Civilian Model Richards-Mason** — quick ID: Richards-Mason breechplate which is same diameter as recoil shield, octagon barrel, mirrored civilian blue. Nickel finish commonly seen.

\$11,000	\$10,000	\$7,500	\$6,500	\$5,500	\$4,500	\$4,000	\$3,500	\$3,000	\$2,500	\$2,000	\$1,500
----------	----------	---------	---------	---------	---------	---------	---------	---------	---------	---------	---------

▲ **1851 U.S. Navy Richards-Mason** — quick ID: Richards-Mason breechplate, oiled grips, soft blue military finish, produced in US. percussion range of 40,000-90,000 ranges. Inconsistent "U.S.N." and other inspector markings. Iron straps, "U.S." on frame.

\$15,000	\$13,000	\$10,000	\$7,500	\$6,000	\$5,000	\$4,500	\$4,000	\$3,500	\$3,000	\$2,250	\$1,750
----------	----------	----------	---------	---------	---------	---------	---------	---------	---------	---------	---------

1861 NAVY RICHARDS-MASON — produced in civilian and military versions. C. 1870s, made in RF and CF in two serial ranges. Round 7½ in. barrel.

▲ **1861 Navy Civilian Model Richards-Mason** — quick ID: Richards-Mason breechplate, round 7½ in. barrel with attached ejector housing, unrebated cylinder. When blued, has a commercial high gloss finish.

\$13,000	\$11,000	\$8,500	\$6,500	\$4,750	\$4,250	\$3,750	\$3,400	\$3,000	\$2,400	\$2,000	\$1,500
----------	----------	---------	---------	---------	---------	---------	---------	---------	---------	---------	---------

▲ **1861 Navy U.S. Navy Richards-Mason** — soft military blue finish, oiled grips, converted from percussion U.S. Navy revolvers, inconsistent military markings, centerfire, set of extra serial numbers often seen on cylinder.

\$17,500	\$15,000	\$11,000	\$8,500	\$5,500	\$5,000	\$4,500	\$4,000	\$3,500	\$3,000	\$2,500	\$2,000
----------	----------	----------	---------	---------	---------	---------	---------	---------	---------	---------	---------

100% 98% 95% 90% 80% 70% 60% 50% 40% 30% 20% 10%

COLT 1862 POLICE & POCKET NAVY RICHARDS-MASON CONVERSIONS (c. 1870s) — .38 RF and CF, parts for 1862 Police, 1862 Pocket Navy, as well as 1849 Pockets are often intermixed. As parts bins were depleted, Colt used whatever components that would fit, resulting in a tremendous amount of minor variations. Some barrels were converted from percussion models while others were newly made as cartridge barrels without rammer plugs and loading slots in the lug. There are three different serial ranges (1849, 1862 Police/Pocket Navy, Conversion). 3½ to 6½ in. barrels, again not all features available on all models.

Nickel plated conversions will bring 20% - 40% less than blue and case hardened specimens.

▲ **4½ in. Octagon Barrel Model** — quick ID: 4½ in. octagon barrel without ejector. Rebated Pocket Navy Cylinder. \$7,000 \$6,000 \$5,000 \$4,000 \$3,000 \$2,500 \$1,750 \$1,350 \$1,150 \$950 \$750 \$650

▲ **Round (Percussion) Barrel Pocket Navy with Ejector** — quick ID: plug in rammer slot; ejector housing, loading cutout in right side of lug, barrel remachined from Pocket Navy percussion barrel, Pocket Navy rebated cylinder. Similar appearance to cartridge barrel variation.

\$7,250 \$6,250 \$5,250 \$4,250 \$3,000 \$2,500 \$2,000 \$1,750 \$1,500 \$1,200 \$1,000 \$850

1862 POLICE AND POCKET NAVY CONVERSION — 4½, 5½, or 6½ in. barrels with 1862 Police percussion profile and added ejector housing. Has rebated Pocket Navy cylinder or rarer half fluted 1862 Police cylinder. 6½ in. barrel will bring a premium.

▲ **1862 Police/Pocket Navy with Rebated Pocket Navy Cylinder** — quick ID: 1862 Police profile barrel with ejector housing and rebated 1862 Pocket Navy cylinder.

\$7,500 \$6,500 \$4,500 \$4,000 \$2,750 \$2,250 \$1,750 \$1,400 \$1,100 \$900 \$650 \$550

▲ **1862 Police/Pocket Navy with Half Fluted Cylinder** — quick ID: 1862 Police profile barrel with ejector housing and ½ fluted Police cylinder.

\$9,000 \$7,500 \$5,000 \$4,500 \$3,250 \$2,750 \$2,000 \$1,600 \$1,300 \$1,100 \$850 \$700

Conversions with Round Cartridge Barrel

ROUND CARTRIDGE BARREL WITH EJECTOR — .38 RF and CF. 4½, 5½, or 6½ in. barrels produced as a cartridge component without rammer slots and lug cutouts inherent to a percussion barrel.

▲ **1862 Pocket Navy Round Cartridge Barrel** — quick ID: much shorter lug area than similar model converted from percussion barrel. No slots or loading cutouts on barrel. With ejector housing and Pocket Navy rebated cylinder. Often called the "Baby Open Top". Very scarce.

\$9,500 \$7,250 \$5,750 \$5,000 \$4,250 \$3,250 \$2,800 \$2,500 \$2,000 \$1,750 \$1,450 \$1,250

3½ ROUND CARTRIDGE BARREL CONVERSION — .38 RF or CF, sometimes seen with serial numbers that are from 1849 Pocket Model (300,000 range). Barrel newly made for cartridges, not converted from a percussion barrel.

▲ **3½ Round Cartridge Barrel** — quick ID: only type conversion with 3½ in. barrel. No ejector, no loading lever slot or loading cutout in lug area. Pocket Navy rebated cylinder.

\$5,000 \$4,000 \$2,400 \$1,800 \$1,400 \$1,100 \$975 \$875 \$800 \$700 \$600 \$500

"OPEN TOP" REVOLVERS

If possible, it is advisable to procure a factory letter before buying/selling this Open Top Revolver. These water marked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$100 per serial number (if they can research it). Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. Box 1868, Hartford, CT 06101. Please allow 4-6 weeks for a response.

1871-72 OPEN TOP MODEL RIMFIRE — .44 cal. rimfire, 6 shot, 7½ in. barrel, without frame topstrap. blued metal with casehardened hammer, serial range 1-approx. 7000, barrel address (ADDRESS COLT SAM COLT, NEW YORK, U.S. AMERICA), forerunner of the single action Army, quite desirable. Mfg 1871-1872.

Add 20% for blue finish on models listed below.

Add 40% for models with 8 in. barrel or COLTS/PATENT frame markings.

REVOLVERS: SAA - 1873-1940 MFG. (SER. NO.'S 1 - 357,000)

Note: The Colt SAA (Single Action Army) was produced in 36 calibers with just about any special order feature or combination of special orders available directly from the factory. All of these special orders act independently and interdependently to determine a correct value for a particular Colt SAA. Single action Colt's rank at the top for revolver collectors. When contemplating a purchase in the 5 digit plus price range, several professional opinions should be secured. Caliber rarities make a major difference in pricing single actions.

It is advisable to procure a factory letter when buying or selling older or recently manufactured Colt Single Actions (hence guaranteeing original configuration and value credibility). These watermarked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$55 per serial number - if Colt cannot provide you with proper documentation after conducting research, they will refund you \$10. The charge is \$100 per custom engraved gun - see the Trademark Index for the address. Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. BOX 1868, HARTFORD, CT 06144. Please allow 12-15 weeks for proper response. In addition, phone service SAA configuration validation is also provided on a premium basis on first generation SAAs ONLY through serial number 343,000 to assist in possible purchases of a critical nature. Fees for this phone service are \$75 per gun for 1st Generation SAA pistols and \$100 per gun for 2nd Generation SAA pistols, payable by Visa or MasterCard - letter is included for this price. The phone number is 860-244-1450 and ask for the Historical Dept. between the hours of 1-4 P.M. EST.

Values shown below are for guns without special order features. Factory engraving, ivory grips, very rare special order barrel lengths, and special finishes would add considerably to the values shown below. One final word on single action Colts: Black Powder Colts (pre 165,000 serial range) should be scrutinized carefully for restamped serial numbers on various parts. This makes a major difference in pricing the SAA, as a true, original collector's gun differs greatly in value from a restamped "parts gun". .44-40 and .45 cal. in the pre 165,000 serial range will bring premiums over other calibers, especially in shorter barrel lengths. The .44-40 caliber is very collectible since this ammunition at inception was interchangeable with the most popular rifle/carbine of its era - the Winchester Model 1873.

EARLY MODEL SAA (PINCH FRAME) — serial range 1 - approx. 160, with frame pinched to make rear sight,

.45 cal., 7½ in. barrel. Mfg. 1873.

N/A	N/A	\$67,500	\$62,500	\$55,000	\$47,750	\$39,000	\$30,000	\$25,000	\$20,000	\$17,500	\$15,500
-----	-----	----------	----------	----------	----------	----------	----------	----------	----------	----------	----------

Watch for fakes! In this variation there are more counterfeits than original specimens.

MARTIALLY MARKED "U.S." SINGLE ACTION — The primary sidearm of US military forces between 1873

and 1892. Carried by all commissioned officers and mounted soldiers. Sometimes called "Cavalry Model," but issued to all branches of service. A total of 37,063 were purchased by the government at an average cost of \$12.50. Specifications called for 7½ in. barrel, .45 LC cal., blue and color case hardened finish, one-piece, oil finished walnut grips. Each gun was stamped with the initials of a government inspector and with the letters "US" at the Colt plant before being approved for delivery to the National Armory at Springfield, MA.

N/A	\$25,000	\$20,000	\$18,000	\$15,000	\$12,000	\$9,000	\$7,000	\$5,750	\$5,000	\$4,250	\$3,500
-----	----------	----------	----------	----------	----------	---------	---------	---------	---------	---------	---------

Early examples with low serial numbers and desirable inspector markings will command premiums over prices listed above. Specimens found within the "prime" Custer serial range 4,507-6,559 command high premiums - watch for fakes! Also, beware of restorations,

100% 98% 95% 90% 80% 70% 60% 50% 40% 30% 20% 10%

many done in the last twenty years, in all inspector serial ranges, some of which have been skillfully "aged" to look more original. In many cases, only the serial number itself is original, the entire gun being newly fabricated. Letters of authentication (not factory configuration) are now available for this model from a few reliable outside sources - it is advisable to procure one of these before becoming a "victim" of circumstances. Ask for guarantee of authentication in writing, not just factory historical information. No factory information is available on U.S. Cavalry revolvers under ser. no. 30,600.

.22 RIMFIRE SAA — .22 LR cal.

▲ *Conversion (converted from .44 cal.)*

N/A N/A \$16,500 \$12,000 \$9,000 \$8,000 \$7,000 \$6,500 \$5,500 \$4,500 \$4,000 \$3,500

▲ *Original Mfg.*

N/A N/A \$18,000 \$15,250 \$13,350 \$10,750 \$8,725 \$7,175 \$6,025 \$5,150 \$4,475 \$3,950

.44 RIMFIRE SAA — mostly in .44 Henry rimfire, 7½ in. barrel, serial numbered in own range 1-1863, mfg. 1875-1880, most specimens were shipped to Mexico and saw hard use, rare in any original condition.

N/A N/A \$30,000 \$25,000 \$20,000 \$17,500 \$14,000 \$12,000 \$10,000 \$8,500 \$7,000 \$6,000

This variation is one of the most frequently faked Colt revolvers. Most often encountered with shortened barrels, be wary, and watch for "non-original stretched barrels". Be careful (and get a receipt and a letter of authentication).

A Colt factory letter of configuration is \$100 for this model.

SINGLE ACTION ARMY (SAA) — standard commercial mfg. 1873-1940, single action, 6 shot revolver, over 30 cal., 4¾, 5½, or 7½ in. standard barrel lengths, blue with color case hardened frame or full nickel finish standard, one-piece walnut grip standard until 1884, when gutta percha (hard rubber) grips were introduced with eagle motif. Eagle-less grips standard after 1892. One-piece wood available upon request until approximately 1903.

▲ *Early Civilian Mfg.* — blue and case hardened finish, italic (i.e. script) barrel address, serial range 1 to approx. 22,000 shared with early martial production 1873-1876 mfg.

N/A \$28,000 \$24,000 \$21,000 \$16,500 \$14,000 \$12,000 \$9,500 \$7,000 \$5,250 \$4,000 \$3,250

Subtract 30% for nickel finish.

Be wary of fake barrel addresses.

▲ *Later Civilian Mfg.* — blue and case hardened finish, black powder frames with vertical screw holding cylinder pin, serial range 22,000 - approx. 165,000, mfg. 1876-1896.

N/A \$23,500 \$20,500 \$17,000 \$14,500 \$12,000 \$10,000 \$8,500 \$7,000 \$5,000 \$3,500 \$2,500

Add 10% for one-piece varnished wood grips.

Add 35% for original box.

Subtract 30% for nickel finish.

Subtract 10% for plain rubber grips w/o eagle, approx. beginning serial range 143,000 in 1892.

▲ *Smokeless Powder Model* — transverse or horizontal cylinder pin latch, serial range 165,000 - 358,000, mfg. 1896-1940.

\$8,750 \$7,600 \$6,500 \$5,500 \$4,500 \$3,600 \$2,850 \$2,500 \$2,250 \$1,850 \$1,550 \$1,250

Add 30% for pre-1900 mfg.

Subtract 25% for post-1920 mfg.

Add 15% for .44-40 cal.

Subtract 25% for .32-20 cal.

Add 10% for nickel finish after 1920.

Add 25-30% for long flute cylinder (ser. no. range 330,000).

Add 30% for original box before 1920, add 20% after 1920.

It is interesting to note that while Colt began advertising their improved smokeless powder Single Action in 1896, they did not add the "VP" (verified proof) mark to the triggerguard, which is their guarantee against smokeless powder, until 1904, and that they continued to use black powder rifling (wide grooves and narrow lands) and black powder front sights (small and low) until approximately 1910. And while they produced and sold more Single

100% 98% 95% 90% 80% 70% 60% 50% 40% 30% 20% 10%

Actions in the ten years between 1899 and 1909 (serial range 200,000 - 300,000) than in any other ten year period of production, quality did not suffer.

The workmanship evident during this time was at least equal to, if not better, than before. Many collectors feel that the polish and finish work performed during the first part of the twentieth century was superior to any other period.

The date 1920 is significant to Single Action Colt collectors since that was the year the company completed changing the location of the serial numbers. Numbers on the triggerguard and backstrap were moved under the grips beginning in the 339,000 serial range (late 1919), leaving only the serial number on the frame visible, and bringing to a close the original numbering procedure which began with the percussion revolvers. Many collectors regard this as the end of the "Cowboy" period.

FACTORY ENGRAVED 1ST GENERATION SAAs — the sky is the limit here - the price range is approx. \$2,500 on the low end with \$250,000+ the high end (with a lot of price points between \$7,500 - \$25,000). The Colt Historical Department may be able to document factory engraving with a company letter.

NON-FACTORY ENGRAVED 1ST GENERATION SAAs — values of non-factory engraved SAAs are generally based upon the cost of duplication. In other words, the asking price should approximate the price of the SAA configuration (i.e., caliber, barrel length, finish, special order features, etc.), in addition to the cost of having it engraved and finished. Recognized quality by contemporary engravers may command a premium over this formula.

ARTILLERY MODEL SAA — .45 Colt, 5½ in. barrel, marked U.S. on left lower frame. With one piece walnut grips, and possibly a military cartouche. These guns are the original artillery model Colts returned to the factory or Springfield Armory. Barrels were shortened to 5½ in. and the guns were refinished and reissued to the military. Very seldom do the serial numbered parts on these guns match. Not all factory letters will indicate refurbishing as Colt did not do all of them. Mixed ser. numbers - 185-140,346.

\$9,750 \$8,150 \$7,100 \$6,200 \$5,100 \$4,250 \$3,500 \$3,000 \$2,625 \$2,300 \$2,000 \$1,725

Letters of authentication (not factory configuration) are now available for this model from a few reliable outside sources - it is advisable to procure one of these before becoming a "victim" of circumstances.

NEW YORK STATE MILITIA SAA — in 1895, before work began on the artillery models, Colt refurbished 800 single action revolvers supplied by Springfield Armory to honor a request by the state of New York. These guns retained their 7½ in. barrels and all original parts where possible, and were stamped on the bottom of the grip with the initials of Rinaldo A. Carr (RAC). They were given a bright, civilian finish and blued hammers. Since most cavalry models in the government's possession were cut to 5½ in. shortly thereafter, these 800 are quite possibly the only quantity of 7½ in. guns remaining that could have actually seen service on the frontier. All others extant today were most likely originally issued at the time of manufacture to state militias rather than the United States Government military forces. These 800 revolvers, therefore, occupy a very significant position in the history of Colt firearms.

\$16,500 \$14,750 \$13,250 \$11,000 \$9,500 \$8,400 \$7,350 \$6,250 \$5,200 \$4,150 \$3,100 \$2,100

ETCHED BARREL .44-40 SAA — Colt Frontier, "Colt Frontier Six Shooter" acid etched into barrel instead of stamped, 45,000-128,000 ser. no. range.

N/A \$22,000 \$20,000 \$12,500 \$9,500 \$7,500 \$6,500 \$6,000 \$5,500 \$5,000 \$4,000 \$3,500

This variation was only mfg. from 1878-1890. Watch for fake, replaced, or re-etched barrels.

SHERIFF'S MODEL SAA — 2½ (rare), 3, 4, 4¾ (rare), or 7½ (rare) in. barrel, without ejector housing, this model's most distinguishable feature is the lack of an ejector housing. Mfg. stopped 1927. Watch For Fakes.

N/A \$22,750 \$18,950 \$16,150 \$14,000 \$12,000 \$10,400 \$8,900 \$7,400 \$6,000 \$4,950 \$4,250

Add 50% for black powder frame.

Fakes can be detected on this model by re-welded frames. While 2½, 4¾, or 7½ in. barrels in this variation do exist, be careful, get a second opinion, and ask for a receipt.

FLAT-TOP TARGET SAA — various calibers from .22 to .476 Eley, approx. 925 mfg., 1888-1896.

N/A \$15,000 \$13,625 \$11,900 \$10,450 \$9,000 \$7,750 \$6,500 \$5,400 \$4,550 \$4,000 \$3,800

Note: Different calibers make a substantial difference in pricing for this model.

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%
------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

BISLEY MODEL SAA — differs from single action Army by hump backed grip frame and raked hammer, approx. 44,350 mfg., 1894-1915.

A Colt factory letter of configuration is \$100 for the Bisley variations listed below.

▲ **.455 Eley** — mfg. for the International Revolver contests held in Bisley, England.

\$5,500 \$5,000 \$4,750 \$4,150 \$3,700 \$3,300 \$2,900 \$2,525 \$2,200 \$1,925 \$1,675 \$1,450

▲ **.45 cal.**

\$4,500 \$4,025 \$3,675 \$3,325 \$3,000 \$2,675 \$2,350 \$2,025 \$1,725 \$1,500 \$1,425 \$1,200

▲ **.44-40 cal.**

\$5,350 \$4,650 \$4,200 \$3,750 \$3,300 \$2,850 \$2,450 \$2,125 \$1,850 \$1,625 \$1,425 \$1,250

▲ **.41 cal.**

\$4,250 \$3,750 \$3,350 \$3,000 \$2,675 \$2,375 \$2,075 \$1,800 \$1,550 \$1,325 \$1,125 \$975

▲ **.38-40 cal.**

\$4,150 \$3,650 \$3,300 \$2,950 \$2,625 \$2,350 \$2,050 \$1,775 \$1,525 \$1,300 \$1,100 \$950

▲ **.32-20 cal.**

\$3,950 \$3,450 \$3,125 \$2,800 \$2,500 \$2,225 \$1,975 \$1,750 \$1,475 \$1,250 \$1,050 \$900

BISLEY TARGET FLAT-TOP — flat top frame, removable target sights, 976 mfg., 1894-1913.

Values are 200% greater than respective Standard Bisley Models.

POST-WAR 1ST GENERATION SAA — approx. 860 manufactured in various configurations after 1945.

These specimens in 98%+ condition will approximate values on the pre-war models. Ser. no. range 357,000-357,860. Prices may vary, but a NIB specimen would currently be in the \$4,000 range.

2ND GENERATION SINGLE ACTION ARMY: 1956-1975 MFG.

Popular demand brought back the Single Action Army in 1956 with minor modifications, most not noticeable except to experts. Serial numbers began at 0001SA and continue to 73,000SA before the "New Model" was introduced in 1976 (ser. no. 80000 SA). Premiums are paid for rare production variances if NIB condition. It should be noted that many "premium niches" exist in this model as collectors are establishing premiums paid for rarer production variances (the inter-relation of barrel length, caliber, frame type, finish quality, year of manufacture, and other special features).

The order of desirability on standard 2nd generation SAAs is as follows: 4¾ in. barrels are the most desirable, followed by 7½ in., and then 5½ in. Caliber desirability is as follows: .45 LC has the most demand followed by .44 Spl., .38 Spl., and then .357 Mag. It follows that desirable calibers found with desirable barrel lengths will command healthy premiums — especially if production was unusually low in a particular combination. Reference books specifically on the post-war SAA are a must when determining the rarity factors (or if they exist) on these multiple production combinations. Buntlines, Sheriff's models, and special orders through the Custom Gun Shop are in a class by themselves and have to be evaluated one at a time.

It is advisable to procure a factory letter when buying or selling older or recently manufactured Colt Single Actions (hence guaranteeing authenticity and value credibility). These water-marked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$55 per serial number - if Colt cannot provide you with proper documentation after conducting research, they will refund you \$10. Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. BOX 1868, HARTFORD, CT 06144. Please allow adequate time for proper response.

SINGLE ACTION ARMY — .357 Mag., .38 Special, .44 Special., or .45 LC cal., denoted by SA suffix, 3 (Sheriff's Model), 4¾, 5½, 7½, or 12 in. (Buntline) barrel lengths, all blue, blue/case hardened, or nickel finishes, hard rubber stocks (standard until 1970).

Because SAAs are a complex field in themselves, values below have been separated by calibers first, barrel lengths second, and finishes third (CH designates color case hardening). Blued frame variations of this model are rare - less than 35 were produced in all calibers.

▲ .357 Mag. cal.

7½ in. CH frame	\$1,850	\$1,550	\$1,300	\$1,050	\$875	\$750	\$625
4¾ in. Nickel	\$2,250	\$1,850	\$1,575	\$1,250	\$950	\$825	\$695
5½ in. Nickel	\$1,850	\$1,550	\$1,300	\$1,050	\$875	\$750	\$625
7½ in. Nickel	\$1,850	\$1,550	\$1,300	\$1,050	\$875	\$750	\$625

Add \$500+ for original factory ivory grips (rare in 2nd Generation).

Add \$300 for those pistols with original "black box".

100% assumes NIB condition for this model.

Earlier 2nd generations with the Rampant Colt grips (serial numbered under 52,000 approx.) are a little more desirable than those SAAs with Eagle grips (serial numbered over 52,000 approx.).

Early 2nd generation SAAs in 98%+ original condition with the black box (pre-1965) will command a premium over values listed above. "Stagecoach" boxes were used approx. 1965-1973 and are not quite as desirable as the one piece black box. Original "Stagecoach" boxes in excellent condition are currently selling for approx. \$75-\$100.

▲ **Sheriff's Model (1961 Model)** — .45 cal., denoted by SM suffix, 3 in. barrel without ejector rod housing, casehardened finish, many custom options were ordered in this variation. Approx. 500 mfg. 1961 for Centennial Arms (475 blue finish, 25 nickel finish).

\$2,450 \$2,100 \$1,600 \$995 \$800 \$750 \$695

Add 100% for nickel finish.

▲ **Buntline Special** — .45 Colt only, 12 in. barrel, case hardened frame, hard rubber (rarer) or walnut grips. Over 3,900 mfg. between 1957-1975.

\$1,375 \$1,175 \$875 \$700 \$600 \$575 \$550

Add 100% for nickel finish (rare).

Add \$200 for black box.

100% 98% 95% 90% 80% 70% 60%

NEW FRONTIER — .357 Mag., .38 Spl. (rare), .44 Spl., or .45 cal., denoted by "NF" suffix, flat-top frame, adj. rear sight, 4¾ (rare), 5½ (rare) or 7½ (common) in. barrel, uncheckered walnut grips, case-hardened frame, over 4,200 mfg. 1961-1975.

\$1,050 \$925 \$700 \$600 \$550 \$500 \$475

Nickel or full-blue finish is very rare in this model as well as .38 Spl. in 5½ or 7½ in. barrel.

▲ **New Frontier Buntline Special** — .45 Colt only, 12 in. barrel, flat-top frame, adj. rear sight. Approx. 70 mfg. 1962-1967.

\$1,950 \$1,650 \$1,200 \$850 \$725 \$600 \$500

FACTORY ENGRAVED 2ND GENERATION SAAs — since approx. only 350 SAAs were factory engraved (with almost 90% being in .45 LC cal.), accurate pricing with this degree of rarity factor is difficult to ascertain with any degree of certainty. Prices overall will be at least 50% higher than their 3rd generation engraved counterparts. Post-war collectors and investors are picky on engraved SAAs. The rarity of the configuration in addition to the notoriety of the engraver (Albert Herbert and A.A. White are probably at the top) will make the difference on the premium(s) commanded. The Colt Historical Department may be able to document factory engraving with a company letter. The charge is \$100 per engraved gun (\$55 for non-engraved SAAs) - see the Trademark Index for the address.

Factory engraved 2nd generation SAAs are at least 10 times rarer than 3rd generation engraved pistols.

3RD GENERATION SINGLE ACTION ARMY: 1976-1996 MFG.

3rd model production began in 1976 with ser. no. 80000SA and reached no. 99999SA in 1978. At this point the SA suffix changed to a prefix (beginning with SA01001). Serialization reached SA99999 during 1993, and was changed to S02001A. Currently, SA serialization is over S12000A.

For a listing of Colt's "P-Codes" (referring to the factory's model number designations specifying caliber, finish, and barrel length), please refer to the "COLT SINGLE-ACTION MODEL NUMBERS" section in the back of this text.

The order of desirability on standard 3rd generation SAAs is as follows: 4¾ barrels are the most desirable, followed by 7½ in., and then 5½ in. Caliber desirability is as follows: .44-40 and .45 LC have the most demand followed by .44 Spl., .38 Spl., and then .357 Mag. It follows that desirable calibers found with desirable barrel lengths will command healthy premiums — especially if production was unusually low in a particular combination.

Reference books specifically on the post-war SAA are a must when determining the rarity factors (or if they exist) on these multiple production combinations. Buntlines, Sheriff's models, and special orders through the Custom Gun Shop are in a class by themselves and have to be evaluated one at a time.

SINGLE ACTION ARMY — .357 Mag., .44 Spl., .44-40, or .45 LC cal., 3 (Sheriff's Model), 4¾, 5½, 7½, or 12 in. (Buntline) barrel lengths, all blue, blue/case hardened, or nickel finishes, walnut or rubber stocks.

It is advisable to procure a factory letter when buying or selling older or recently manufactured Colt Single Actions (hence guaranteeing authenticity and value credibility). These water-marked letters are available by writing Colt Firearms in Hartford, CT, with a charge of \$55 per serial number - if Colt cannot provide you with proper documentation after conducting research, they will refund you \$10. Include your name and address, Colt model name, serial number, and check to: COLT HISTORIAN, P.O. BOX 1868, HARTFORD, CT 06144. Please allow adequate time for proper response.

Because SAAs are a complex field in themselves, values below have been separated by calibers first, barrel lengths second, and finishes third (CH designates color case hardening).

Add 10% for extra convertible cylinder.

Add 10% for nickel finish.

Add \$450 for factory ivory grips.

This model was also available with two cylinders (.45 LC & .45 ACP or .44 Spl. & .44-40) — add \$200. The .45 LC/.45 ACP is perhaps more desirable.

▲ **Storekeepers Model** — .45 LC cal. only, black powder frame, 4 in. barrel, without ejector rod, case hardened, royal blue, or nickel finish, approx. 280 mfg. 1984-85.

\$1,195	\$900	\$795	\$700	\$650	\$575	\$535
---------	-------	-------	-------	-------	-------	-------

Add \$100 for nickel finish.

FACTORY ENGRAVED 3RD GENERATION SAAs — the rarity of the SAA configuration in addition to the notoriety of the engraver will make the difference on the premium(s) commanded. Third generation factory engraved SAAs were produced in much greater numbers than their 2nd generation counterparts. As a result, pricing is also more predictable - especially on .45 LC cal. Since over 80% of all engraved 3rd generation SAAs are in .45 LC, values listed below represent this caliber. Engraved specimens encountered in other calibers (especially .44-40, approx. 2% of engraved production) will be considerably more expensive. Most specimens encountered are in 7½ in. barrel length. Pistols with 4¾ (most desirable) or 5½ in. barrels will add additional premiums (15%-30%).

Add \$500 for factory ivory grips.

Add \$250 for non-factory ivory grips.

▲ **SAA Class A Engraved** — with class A engraving (25% coverage on gun).

\$1,495	\$1,000	\$875	\$800	\$725	\$650	\$575
---------	---------	-------	-------	-------	-------	-------

STANDARD SINGLE ACTION ARMY — .38-40 (disc. 1996), .44-40, or .45 LC cal., 4 (disc. 1988), 4 $\frac{3}{4}$, 5 (disc. 1987), 5 $\frac{1}{2}$, or 7 $\frac{1}{2}$ in. barrel, blue (disc. 1993), royal blue (disc. 1993), color case hardened/blue (reintroduced 1989), or nickel finish, black powder frame, 3 line patent date, custom order only.

Mfg.'s Sug. Retail **\$1,213** **\$1,050** **\$895** **\$695**

Various custom order barrel lengths have been available on this model for some time.

▲ **Popular SAA Special Order Options:**

Add \$185 for nickel finish.

Add \$160 for royal blue finish.

Add \$185 for color case hardening.

Add \$383 for birdshead backstrap.

Add \$129 for beveled cylinder.

Add \$200 for mirror brite finish (disc.).

Add \$421 for gold or silver plating.

Add \$332 for stag grips.

Add \$759 for plain ivory grips or \$1,143 with checkering.

Add \$115 for consecutive serial numbers (pair).

Add \$307 for individual unique serial number.

Add \$230 for custom barrel shortening.

Add \$143 to modify ejector housing.

Add \$100 (per set) for heat blued small parts (add \$25 for screws).

Many other options are available from the Colt Custom Shop - simply contact them for availability and a price quotation.

CUSTOM ENGRAVED MODELS

▲ **European Model** — 9mm Para., nickel finish only, 4 $\frac{3}{4}$, 5 $\frac{1}{2}$, or 7 $\frac{1}{2}$ in. barrel, rosewood grips with silver medallions, 40-43 oz. Mfg. 1991-92 only.

\$1,395 **\$1,195** **\$995**

Last Mfg.'s Sug. Retail was \$1,990.

▲ **U.S. Model** — .45 ACP, royal blue finish only, 4 $\frac{3}{4}$, 5 $\frac{1}{2}$, or 7 $\frac{1}{2}$ in. barrel, walnut grips, 40-43 oz. Mfg. 1991-92 only.

\$1,295 **\$1,095** **\$875**

Last Mfg.'s Sug. Retail was \$1,960.

▲ **Old World Engravers Sampler** — .45 LC, 5 $\frac{1}{2}$ in. barrel, nickel finish, buffalo horn grips, includes four unique styles of engraving. New 1997.

Mfg.'s Sug. Retail **\$3,100** **\$2,750** **\$2,400** **\$2,000**

SAA CUSTOM SHOP ENGRAVING - PRE-1996 — Values below reflect published 1995 Custom Shop, Master Engraver (and signed) engraving options. SAA values are determined by the optional Master Engraving (Standard and Expert level engraving are also available) price scheduling shown below in addition to adding the base price of the gun (including any other special order features).

Add \$1,163 for Class "A" engraving (1/4 metal coverage).

Add \$2,324 for Class "B" engraving (1/2 metal coverage).

Add \$3,487 for Class "C" engraving (3/4 metal coverage).

Add \$4,647 for Class "D" engraving (full metal coverage).

Add an additional 13% (approx.) for buntline engraving.

Standard Engraving is performed by mostly non-recognized factory engravers and options generally include A-D style coverage but will not do gold work and the specimens are unsigned.

Expert Engravers execute classic American style scroll, no gold, and may be signed.

▲ **Additional SAA Custom Order Options** — the Colt Custom Shop will perform additional work (special orders including engraving, custom stocks, non-standard barrel lengths, gold or silver plating, and other custom features) if the individual work order totals over \$1,213 retail. Quotations are supplied at \$25/each for these special order guns. Please contact the Colt Custom Gun Shop for this written estimate regarding these custom built SAAs. Their address is: Colt Manufacturing Company, Inc. P.O. Box 1868, Hartford, CT 06101, ATTN: Custom Shop.

COLT CUSTOM SHOP ENGRAVING - 1997

Beginning 1997, Colt changed the way they charge for engraving options. The chart below indicates frame sizes, amount of engraving coverage, and the three levels of engraving execution (i.e., standard, expert, and master levels). SAA's are considered large frame, revolvers and full-size Government Models are considered medium frame, and Government Model 380's are considered small frame.

LARGE FRAME SIZE

ENGRAVING COVERAGE	STANDARD LEVEL	EXPERT LEVEL	MASTER LEVEL
A	\$600	\$900	\$1,200
B	\$800	\$1,600	\$2,400
C	\$1,000	\$2,300	\$2,400
D	\$1,300	\$3,000	\$4,700

MEDIUM FRAME SIZE

A	\$500	\$800	\$1,000
B	\$700	\$1,100	\$1,300
C	\$900	\$1,400	\$1,800
D	\$1,300	\$2,200	\$2,500

SMALL FRAME SIZE

A	\$400	\$600	\$800
B	\$600	\$800	\$1,000
C	\$800	\$1,100	\$1,500
D	\$1,100	\$1,300	\$1,900

Add 20% to large frame pricing for Buntline Models.
 Subtract 20% from small frame pricing for Mustang Models.
 Other Custom Shop options are priced on request.

Add 20% for 4¾ in. barrel.
 Subtract 10% if without extra cylinder.
 This model can be denoted by a "G" or "L" prefix.

Grading

100% 98% 95% 90% 80% 70% 60%

NEW FRONTIER — similar features as Peacemaker Model, except with flat top frame, ramp front and adj. rear sight, mfg. 1970-1977. Reintroduced in 1982 without convertible .22 Mag. cylinder and added cross bolt safety, available in Coltguard finish, all blue finish became standard in 1985, mfg. disc. 1986.

\$325 \$275 \$215 \$185 \$155 \$140 \$130
 Last Mfg.'s Sug. Retail was \$181.

Add 15% for Buntline model or 4¾ in. barrel.

This model can be denoted by a "G" or "L" prefix.

PISTOLS: SEMI-AUTO

Until several years ago, the Single Action Army revolver commanded the most attention among Colt handgun collectors. Since 1987, Colt Semi-Autos have been in tremendous demand and have out-accelerated many other areas of Colt collecting. Because condition and originality play such a key role in determining Colt Semi-Auto prices, many variations have had their values pushed upward to the point where it is difficult to accurately determine a realistic price - especially on those models in 98% original condition or better. As a result, some of the rarer models seldomly encountered in true 100% original condition have had their values deleted since extreme rarity precludes accurate price evaluation in this 100% condition category. As always, the hardest prices to ascertain when firearms market conditions are bullish are the 98-100% values.

MODEL 1900 — .38 ACP, 6 in. barrel, blue, plain walnut grips - checkered hard rubber grips after S/N 2,450, high spur hammer, sight safety. Mfg. 1900-1903.

N/A \$6,150 \$4,300 \$3,150 \$1,850 \$1,550 \$1,250

Add 60%+ for USN marked.

Add 50% for US marked with inspector initials.

Deduct 30%-50% for sight safety altered (factory refinished).

This model is serial numbered approx. between 1-4,274.

MODEL 1902 SPORTING — .38 ACP, 6 in. barrel, blue, fixed sights, checkered hard rubber grips, no safety, high spur hammer and round hammer. Mfg. 1902-1908.

N/A \$2,750 \$1,850 \$1,250 \$850 \$725 \$600

This model is serial numbered approx. 4,275-11,000 and 30,000-30,190.

MODEL 1902 MILITARY — .38 ACP, 6 in. barrel, blue, similar to 1902 Sporting, hammer changed to spur type in 1908, checkered black hard rubber grips, lanyard swivel on bottom rear of left grip. Mfg. 1902-1929.

N/A \$2,300 \$1,550 \$950 \$750 \$625 \$500

Add 30% for front slide checkering.

Add 20% with original box and instructions.

This model is serial numbered approx. 11,000-16,000 and 30,200-43,266.

MODEL 1902 MILITARY-U.S. ARMY MARKED — similar specifications to 1902 Military, only serial number range 15,001-15,200.

N/A \$7,500 \$5,750 \$4,750 \$3,700 \$2,900 \$2,250

MODEL 1903 POCKET (38 ACP) — .38 ACP, 4½ in. barrel, blue finish standard, checkered black hard rubber grips, similar to 1902 Sporting, but 4½ in. barrel, 7½ in. overall. Mfg. 1903-1929.

\$1,450 \$1,150 \$850 \$700 \$525 \$475 \$425

Add 10% for early round hammer.

Add 20% with original box and instructions.

This model is serial numbered approx. 16,000-47,226.

Grading

100% 98% 95% 90% 80% 70% 60%

MODEL 1903 POCKET (MODEL M 32 ACP) — .32 ACP, 4 in. barrel, charcoal blue, checkered hard rubber grips, hammerless, slide lock and grip safety, barrel lock bushing. Mfg. 1903-1940.

\$550 \$425 \$350 \$300 \$275 \$250 \$200

Add 20% for nickel finish (mostly w/pearl grips).
 Add 60% for first model (Type I) mfg. 1903-1911 if in 100%-98% condition. If lower than 98%, add 20%.
 Add 30% for Type II if in 100%-98% condition.
 Add 10% with original box and instructions.

Type I - 32 ACPs have a 4 in. barrel, barrel bushing, no magazine safety, and are serial numbered 1-71,999.

Type II - 32 ACPs still retain their barrel bushing but have a 3³/₄ in. barrel and were mfg. from 1908-1910. They are serial numbered 72,000-105,050.

Type III - 32 ACPs do not have a barrel bushing and were mfg. from 1910-1926. They are serial numbered 105,051-468,096.

Type IV - 32 ACPs have the added magazine safety (of which there are both the commercial and "U.S. Property" variations). They are serial numbered 468,097-554,446.

▲ **Model 1903 Parkerized** — U.S. property, 3¹/₄ in. barrel, no barrel bushing, magazine safety, serial numbered 554,447-572,214.

\$950 \$775 \$625 \$475 \$375 \$320 \$275

Add 50% for blue U.S. Property S/N 554,447 - approx. 562,000.
 Add 20% with original box and instructions.
 Add 20% for General Officer Issue.

The 100% value on this model assumes NIB condition.

MODEL 1905 — .45 ACP, 5 in. barrel, blue, fixed sights, checkered walnut stocks, similar to 1902 .38 ACP. Mfg. 1905-1911.

N/A \$4,475 \$2,750 \$1,650 \$1,250 \$950 \$775

Add 50% for factory slotted specimens (500 manufactured).
 Add 150% for 1907 U.S. Military Contract variation (205 manufactured).

The shoulder stock option for this pistol is exceedingly rare. Depending on the condition, this accessory can add \$7,500-\$10,000 to the price of the gun.

MODEL 1908 POCKET (MODEL M 380 ACP) — .380 ACP, first issue, 3³/₄ in. barrel only, similar to Pocket Model .32 ACP (32 ACP), except chambered for .380 ACP. Mfg. 1908-1940.

\$795 \$625 \$425 \$350 \$300 \$250 \$225

Add 15% for Type II (see explanation below).
 Add \$50 for nickel finish (mostly w/pearl grips).
 100% values assume NIB condition. Deduct 15% if without cardboard box. Pearl grips are normally encountered with nickel finish on this model.

Type II - 380 ACPs with barrel bushing and were mfg. 1908-1910 (6,251 mfg.). They are serial numbered 1-6,251.

Type III - 380 ACPs do not have a barrel bushing and were mfg. 1910-1926. They are serial numbered 6,252-92,893.

Type IV - 380 ACPs have the added magazine safety (of which there are both the commercial and "U.S. Property" variations). They are serial numbered 92,894-134,499.

▲ **Model 1908 "U.S. Property"** — blue finish only, U.S. property. Serial numbered 134,500-138,000.

\$2,000 \$1,400 \$925 \$750 \$650 \$500 \$350

VEST POCKET MODEL 1908-HAMMERLESS — .25 ACP, 2 in. barrel, fixed sights, checkered hard rubber grips on early models, walnut on later, magazine disconnect added on guns made after 1916. Mfg. 1908-1946.

Blue finish	\$550	\$425	\$325	\$275	\$225	\$200	\$155
Nickel finish	\$650	\$475	\$335	\$285	\$240	\$215	\$175

100% values assume NIB condition. Deduct 15% if without cardboard box. Pearl grips are normally encountered with nickel finish on this model.
 Add 100% if "U.S. Property" marked.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MODEL 1909 — .45 ACP, straight handle design, 5 in. barrel, checkered walnut grips, approx. 22 mfg., ultra rare.

Extreme rarity factor precludes accurate price evaluation by individual condition factors. Specimens that are original and over 90% have sold for over \$35,000 recently.

MODEL 1910 — .45 ACP, while not a production model, this gun is probably the most desirable semi-auto Colt pistol. A nice specimen at a recent auction was gavelled down at \$195,000.

GENERAL OFFICER'S PISTOL — issued not only to Generals, but also, many were issued to the OSS, U.S. Navy, and other government agencies, .32 cal. U.S. Properties were blued until 1942, after which the parkerized finish became standard (most went to England and exhibit British proofmarks), .380 cal. U.S. Properties were always blued, 1911A1 WWII specimens have standard military finish, and the Rock Island Arsenal .45s were all issued to Generals.

.32 cal. parkerized	\$1,800	\$1,550	\$1,275	\$1,100	\$975	\$875	\$775
.32 cal. blue	\$2,500	\$2,250	\$1,975	\$1,725	\$1,500	\$1,300	\$1,100
.380 ACP cal.	\$2,700	\$2,400	\$2,100	\$1,850	\$1,600	\$1,400	\$1,200
.45 ACP cal. (WWII mfg.)	\$1,500	\$1,250	\$1,050	\$875	\$775	\$675	\$595
M15 (RIA mfg.)	\$4,350	\$3,750	\$3,150	\$2,650	\$2,250	\$1,850	\$1,500

Values above assume issue to a General (i.e., except for the Rock Island Arsenal .45 ACP variation, there must be paperwork to link up the gun to the recipient).

GOVT. MODEL 1911 COMMERCIAL VARIATIONS

MODEL 1911 — .45 ACP, 5 in. barrel, fixed sights, 7 shot mag., flat main spring housing, polished blue finish only (commercial and original military), checkered walnut grips. Colt licensed other companies to manufacture under government contracts, 39 oz. Mfg. 1912-1925.

Most M1911 variations listed below are not as collectible if under 60% original condition. However, they are still very desirable as shooters and values (if in original condition) will approximate the 60% prices if in good mechanical condition.

Add 20% for 4-digit ser. no., 40% for 3-digit, 60%+ for 2-digit.

Colt Model 1911s continue to enjoy high demand as of this writing and prices continue to be strong in the 95%-100% condition factors. Be careful on the 98%+ condition specimens, especially the rarer variations. Some collectors are now requiring a potential high-dollar Model 1911 to pass a metallurgical X-ray examination before purchasing.

▲ **Model 1911 Commercial** — denoted by "C" preceding serial number, approx. ser. number range C1-C138,532. Watch for fakes.

1912-1914 mfg.	\$2,900	\$1,950	\$1,250	\$875	\$695	\$550	\$425
1914-1925 mfg.	\$2,650	\$1,675	\$1,150	\$850	\$650	\$525	\$400

Deduct 15% if without cardboard box in 100% condition only.

Approx. 138,532 were mfg. between 1912-1925.

100% values assume NIB condition.

GOVT. MODEL 1911 .45 ACP MILITARY VARIATIONS

COLT MFG. MODEL 1911 MILITARY — right side of slide marked "MODEL OF 1911 U.S. ARMY", blue finish only (NOT parkerized unless reworked).

1912-1913 mfg.	\$2,900	\$1,995	\$1,325	\$925	\$550	\$475	\$400
1914-1925 mfg.	\$2,300	\$1,600	\$975	\$625	\$525	\$425	\$375

Add 100% for the first 114 pistols with oversize "United States Property" marking.

Over 2,550,000 M1911 pistols were ordered for WWI and WWII by U.S. Government but approx. 650,000 were mfg. between 1911-1925. Those pistols with a parkerized finish will indicate post-WWI reworking, usually marked with an arsenal code (ie. AA-AUGUSTA ARSENAL, SA-SPRINGFIELD ARSENAL, etc.). These reworks do not have the same values as original, unaltered specimens and prices generally are in the \$295-\$475 range.

Grading

100% 90% 95% 90% 80% 70% 60%

NORTH AMERICAN ARMS COMPANY — less than 100 mfg. in Quebec, Ontario during 1918 only, blued finish. Be very wary of fakes, as this variation is perhaps the most desirable Colt WWI Govt. semi-auto.

N/A \$20,000 \$16,500 \$13,250 \$10,000 \$8,500 \$7,000

Most mint/100% specimens encountered in this model have been refinished - be careful.

REMINGTON - UMC — over 21,500 mfg. (ser. numbered 1-21,676) in 1918-1919 only, blued finish.

N/A \$2,500 \$1,675 \$950 \$700 \$575 \$525

Most mint/100% specimens encountered in this model have been refinished - be careful.

SPRINGFIELD ARMORY — approx. 30,000 mfg. between 1914-1915, blued finish.

N/A \$2,325 \$1,425 \$900 \$675 \$575 \$525

Serialization is 72,751-83,855, 102,597-107,596, 113,497-120,566, and 125,567-133,186.

Most mint/100% specimens encountered in this model have been refinished - be careful.

U.S. NAVY — over 31,000 mfg. for U.S. Navy contract between 1911-1914 in defined serial ranges, blued finish. Marked "MODEL OF 1911 U.S. NAVY" on right slide side.

\$4,450 \$2,800 \$1,950 \$1,700 \$1,375 \$995 \$750

Add 50% for specimens under serial no. 3,500.

U.S. Navy specimens are seldomly found in over 80% original condition because of the corrosive factor encountered while at sea.

U.S. MARINE CORPS. — approx. 13,500 mfg. between 1911-1913 and 1916-1918 in defined serial ranges, blued finish, right side of slide marked "MODEL OF 1911 U.S. ARMY".

\$3,200 \$2,675 \$2,025 \$1,725 \$1,275 \$1,050 \$750

WWI BRITISH SERIES — .455 cal., serialized W10001-W21000, marked "CALIBRE 455", blued finish, proofed with broad arrow British Ordnance punch. Mfg. 1915-1916.

\$2,350 \$1,750 \$1,100 \$825 \$675 \$550 \$475

Add 25% for variations with either Navy or Marine markings. Many WWI British-series M1911s were exported back to the U.S. following WWI and were converted to .45 ACP. Usually, a "5" has been crossed-out of the original cal. designation. These reworks are not as collectible and prices range from \$350-\$500.

BRITISH RAF REWORK — this variation is the WWI British series re-issued to RAF officers in the early 1920s, blued finish, differentiated by hand-stamped "RAF" or "R.A.F." on left side of frame.

\$1,250 \$1,050 \$825 \$675 \$575 \$495 \$460

A.J. SAVAGE MUNITIONS CO. — mfg. slides only, blued finish, marked in middle on left side of slide with flaming ordnance bomb with "S" in center.

\$1,350 \$1,075 \$850 \$695 \$600 \$525 \$475

NORWEGIAN TRIAL MODEL 1911 COLT — 11.25mm cal., approx. 300 mfg. with "C" prefix in 1913-14 only, usually encountered in 90% or less condition.

\$1,750 \$1,250 \$975 \$850 \$750 \$595 \$495

These guns were ordered for Norwegian service evaluation and were mfg. by Colt in Hartford, CT.

NORWEGIAN MODEL 1912 11.25MM — 11.25mm cal., mfg. under license from Colt's between 1917-1919, "M1912" slide designation, approx. 500 mfg.

\$1,650 \$1,300 \$975 \$850 \$750 \$595 \$495

NORWEGIAN 1914 11.25MM — This model has a distinctive extended slide release, all parts should be serial numbered and have matching numbers, approx. 20,000 mfg. between 1919-1932.

\$1,175 \$850 \$695 \$525 \$475 \$425 \$375

Add 150% for Waffenamt Nazi mfg. (mfg. 1945 only).

Nazi production of the M1914 began in 1941, with serialization beginning where 1932 mfg. left off (approx. 21,000 range). Between 1941-42, approx. 7,000 pistols were mfg. without Waffenamt stampings. Nazi stamped guns (all 1945 dated) began in the mid-29,000 serial range and existing specimens indicate that approx. 1,000 were mfg. with the Nazi Eagle.

	\$995	\$850	\$625	\$550	\$495	\$425	\$375
--	-------	-------	-------	-------	-------	-------	-------

.45 ACP TO .22 LR CONVERSION UNIT — consists of slide assembly, barrel, bushing, floating chamber, ejector, recoil spring and guide, fitted with Stevens adj. rear sight, mfg. 1938 to 1947. Colt Master adj. sight 1947-54.

	\$395	\$350	\$285	\$195	\$175	\$150	\$125
--	-------	-------	-------	-------	-------	-------	-------

Add 100% for prewar mfg. (u-prefix S/N on top of slide).

.22 LR TO .45 ACP CONVERSION UNIT — converted service Ace .22 to .45 ACP. Mfg. 1938-1942. Very rare — 112 mfg.

	\$3,500	\$2,500	\$1,750	\$1,000	\$800	\$700	\$600
--	---------	---------	---------	---------	-------	-------	-------

These units are serial numbered on top of slide.

GOVT. MODEL 1911A1 MILITARY VARIATIONS

COLT MFG. MODEL 1911A1 MILITARY — approx. 1,643,068 mfg. between 1924-1945, ser. nos. 700,000 - on up, right side of frame marked "M1911A1 U.S. ARMY".

	\$1,150	\$895	\$625	\$485	\$385	\$350	\$325
--	---------	-------	-------	-------	-------	-------	-------

Add 20% for 1937-38 mfg.

Add 50% for 1939 Navy variation (S/N 713,646 - 717,281).

On early 1911A1 military models with bright blue finish — add 150% if condition is 98% or better.

A large grouping of over 7,000 Commercial 1911A1s was transferred to the U.S. government - these pistols had their commercial serial numbers crudely removed (in ser. range 860,000 - 866,000) and renumbered with a new military serial number. Some of these guns are unusual as the frames and slides have been cut for the Schwartz safety. This variation is rare, and a 20%-30% premium exists depending on the condition.

DRAKE NATIONAL MATCH — Drake made slides only for use by U.S. Army Marksmanship Unit to allow assembly of match guns.

	\$1,150	\$995	\$850	\$700	\$585	\$510	\$450
--	---------	-------	-------	-------	-------	-------	-------

GOVERNMENT NATIONAL MATCH REWORKS — assembled by government armorers, all parts marked "NM", parkerized finish. Most will be S.A. marked.

	\$1,275	\$1,075	\$850	\$675	\$585	\$510	\$450
--	---------	---------	-------	-------	-------	-------	-------

These pistols were made specifically for the U.S. shooting team at Camp Perry.

ITHACA — approx. 369,129 mfg. 1943-1945 in Ithaca, NY, ser. no. ranges 856,101 - 916,404, 1,208,674 - 1,279,673, 1,441,431 - 1,471,430, 1,816,642 - 1,890,503, and 2,619,014 - 2,693,613. Parkerized finish.

	\$800	\$600	\$500	\$450	\$375	\$350	\$325
--	-------	-------	-------	-------	-------	-------	-------

Add 20% with original shipping carton.

UNION SWITCH AND SIGNAL — approx. 55,000 mfg. 1943 only in Swissvale, PA, ser. no. range 1,041,405 - 1,096,404. Sandblast and blue finish.

	\$1,495	\$1,150	\$900	\$600	\$500	\$450	\$425

SINGER MFG. CO. — 500 mfg. 1942 in Elizabeth, NJ, ser. no. range S800,001 - S800,500. Blued finish with plastic grips.

N/A	\$20,000	\$16,500	\$13,250	\$10,000	\$8,500	\$7,000
-----	----------	----------	----------	----------	---------	---------

The Singer 1911A1 variation is one of the most sought after Colt models. In recent years, values have increased significantly and as a result, many fakes have emerged. Most specimens are now recognized by ser. no. and be very cautious when contemplating a purchase. Some collectors unsure of authenticity are now requiring X-ray testing to determine originality (slide restampings, ser. no. changes, etc.).

MEXICAN CONTRACT — mfg. approx. 1921-1927 with "C" prefix ser. nos., frames marked "EJERCITO MEXICANO", most surviving examples show much use.

\$2,300	\$1,775	\$1,375	\$1,125	\$850	\$750	\$575
---------	---------	---------	---------	-------	-------	-------

BRAZILIAN CONTRACT

\$2,250	\$1,875	\$1,500	\$1,250	\$975	\$775	\$575
---------	---------	---------	---------	-------	-------	-------

ARGENTINE CONTRACT MODEL 1927 — .45 ACP cal., serial numbered 1-10,000 under the mainspring housing and on the top of slide (should be matching), must have Argentine crest and "Model 1927" on right side of slide, external serial number applied to the outside of frame by the Argentine Arsenal, most have been Arsenal refinished.

\$1,200	\$995	\$825	\$700	\$625	\$550	\$495
---------	-------	-------	-------	-------	-------	-------

ARGENTINE MFG. — in 1927, the Argentina Arsenal "DGF-M-FMAP" began manufacturing the Model 1911A1. The slide marking is two lines and reads "EJERCITO ARGENTINO SIST. COLT. CAL. 11.25mm MOD. 1927".

\$750	\$650	\$500	\$450	\$400	\$350	\$325
-------	-------	-------	-------	-------	-------	-------

Add 20% for Argentine Navy "ARMADA NACIONAL" (small shipments between 1912-1948). Markings vary on different types.

This variation is not to be confused with the Ballestar Molina/Rigaud Models (sold by Hispano Argentino Fabrica de Automoviles SA, Buenos Aires, Brazil - also known as the HAFDASA). Please refer to the Hispano Argentino Fabrica de Automovilas SA section of this text.

ACE MODELS: PRE-WWII

COMMERCIAL ACE — .22 LR, similar to Government .45 ACP, but in .22LR cal., 4¾ in. barrel, blue, adj. sights, checkered walnut grips, almost 11,000 mfg. (ser. no. range 1-10,935) 1931-1941 and 1947.

\$2,125	\$1,825	\$1,275	\$975	\$775	\$600	\$500
---------	---------	---------	-------	-------	-------	-------

Add 20% with original box and instructions.

SERVICE MODEL ACE — .22 LR, 5 in. barrel, blue or parkerized finish, similar to .45 ACP National Match except for caliber, has floating chamber to simulate .45 ACP recoil, limited mfg. 1935-1945.

\$2,600	\$2,100	\$1,800	\$1,225	\$875	\$675	\$575
---------	---------	---------	---------	-------	-------	-------

Add 20% with original box and instructions.

This variation is marked "SERVICE MODEL" on left frame, serial numbers have "SM" prefix and have ranges to approx. 13,800. Parkerized finish is less desirable - subtract 10%.

PRE-WWII NATIONAL MATCH MODELS

NATIONAL MATCH — .45 ACP, similar to Government Model, except has hand honed action, match grade barrel, blue. Mfg. 1933-1941 within ser. no. range C164,800 - C215,000.

Add 10% with original box and instructions.

▲ **Stainless Gold Cup Trophy** — similar to Gold Cup Trophy, only manufactured from stainless steel, matte finish, 39 oz. New 1997.

Mfg.'s Sug. Retail	\$1,116	\$895	\$650	\$525
--------------------	---------	-------	-------	-------

PISTOLS: SEMI-AUTO - SINGLE ACTION, RECENT MFG.

SEMI-AUTO CUSTOM SHOP ENGRAVING PRICING - PRE-1991

The values listed below are the last published factory engraving prices - factory specified "Class A - Class D" pricing was discontinued late 1990. Beginning in 1991, factory engraving on the models listed below is done per individual price quotation. Quotations from Colt are available at \$25 each (deductible from work order). These prices (disc. 1990) should be added to the cost of each engraved production gun (NIB condition only) to determine an approximate value. It should also be understood that, in most cases, the quality of the engraving and notoriety of the engraver can be as important as the amount of coverage.

SMALL FRAME ENGRAVING OPTIONS (INCLUDES MUSTANG, .380 ACP GOVERNMENT, DETECTIVE SPECIAL, AND DIAMONDBACK)

- CLASS "A" ENGRAVING (1/4 METAL COVERAGE) — ADD \$776.
- CLASS "B" ENGRAVING (1/2 METAL COVERAGE) — ADD \$959.
- CLASS "C" ENGRAVING (3/4 METAL COVERAGE) — ADD \$1,426.
- CLASS "D" ENGRAVING (FULL METAL COVERAGE) — ADD \$1,814.

MEDIUM FRAME ENGRAVING OPTIONS (INCLUDES .45 ACP GOLD CUP, GOVERNMENT MODEL, OFFICER'S ACP, PYTHON, COMBAT COMMANDER, KING COBRA, TROOPER MKV, LAW-MAN MKV, AND DELTA ELITE)

- CLASS "A" ENGRAVING (1/4 METAL COVERAGE) — ADD \$969.
 - CLASS "B" ENGRAVING (1/2 METAL COVERAGE) — ADD \$1,199.
 - CLASS "C" ENGRAVING (3/4 METAL COVERAGE) — ADD \$1,783.
 - CLASS "D" ENGRAVING (FULL METAL COVERAGE) — ADD \$2,289.
- Add 7% for 6 in. barrel, 14% for 8 in. barrel, or 25% for stainless steel construction.

Special engraving/options include inlays, seals, custom grips, lettering, prices quoted on request. Smooth ivory grips are \$215 extra (1990 retail).

Beginning in 1991, Colt began shipping all models in a distinctive blue plastic carrying case/shipping container.

SEMI-AUTO CURRENT CUSTOM SHOP ENGRAVING PRICING

Please refer to the "Colt Custom Shop Engraving - 1997" section earlier in this section for current semi-auto engraving options and pricing.

JUNIOR POCKET MODEL — 2 1/4 in. barrel, blue, checkered walnut grips, made by Astra in Spain from 1958-1968.

.22 Short	\$350	\$300	\$240	\$210	\$180	\$160	\$140
.25 ACP	\$300	\$275	\$200	\$180	\$150	\$140	\$130

Add 10% for nickel finish.

A very few conversion kits were offered for this model. They are rare and asking prices are \$250-\$325 if in mint condition.

COLT AUTOMATIC CALIBER .25 — .25 ACP cal., mfg. by Firearms International for Colt between 1970-1973.

\$300	\$275	\$225	\$185	\$150	\$140	\$130
-------	-------	-------	-------	-------	-------	-------

COMMANDER (PRE-70 SERIES) — 9mm Para, .38 Super, or .45 ACP cal., 4 1/4 in. barrel, full size grips, steel or alloy (Lightweight Model) variations. Mfg. 1950-1976.

9mm	\$650	\$550	\$475	\$395	\$365	\$325	\$295
.38 Super/.45 ACP	\$750	\$650	\$550	\$450	\$395	\$350	\$300

Add 50% for Springfield Armory test pistols.

This model has a "LW" suffix.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MKIV/SERIES 70 GOVERNMENT MODEL — .45 ACP, .38 Super, 9mm, or 9mm Steyr, 5 in. barrel, checkered walnut grips/medallion. A slight premium might be asked for the Series 70 models if NIB. Series 70 models were mfg. 1970-1983 and were serial numbered with "SM" prefixes (approx. 3,000 mfg.), "70G" prefixes 1970-1976, "70L" and "70S" prefixes also (see Serialization section for more information). "G70" suffixes 1976-1980, "B70" suffixes 1979-1981, and "70B" prefixes 1981-1983.

Blue finish	\$695	\$575	\$475	\$400	\$350	\$315	\$285
Nickel finish	\$750	\$595	\$495	\$415	\$365	\$320	\$290

9mm Steyr was made for European exportation only. However, a few specimens have found their way into the United States. Prices for NIB specimens usually start in the \$595+ range.

▲ **Series 70 Combat Govt.** — .45 ACP cal., bluish-black metal finish, features modifications for combat shooting, forerunner to the Combat Elite.

	\$750	\$650	\$550	\$550	\$365	\$325	\$285
--	-------	-------	-------	-------	-------	-------	-------

▲ **Series 70 Lightweight Commander** — 9mm Para, .38 Super, or .45 ACP cal., 4¼ in. barrel, full size grips, this model is denoted by a "CLW" prefix. Mfg. 1970-1983.

9mm	\$525	\$465	\$415	\$350	\$325	\$300	\$275
.38 Super/.45 ACP	\$575	\$525	\$465	\$425	\$375	\$325	\$295

▲ **Series 70 Combat Commander**

	\$575	\$500	\$425	\$395	\$365	\$325	\$285
--	-------	-------	-------	-------	-------	-------	-------

This model was also available in satin nickel finish (scarce).

▲ **Conversion Unit** — converts .45 ACP to .22 LR, mfg. 1954-84 with either Accro adj. rear sight or fixed sight.

Adj. Sight	\$395	\$325	\$275	\$220	\$195	\$165	\$140
Fixed Sight	\$450	\$350	\$275	\$225	\$190	\$165	\$140

Conversion units were also available in satin nickel finish and are scarce.

POST-WAR ACE SERVICE MODEL — .22 LR, similar specifications to previous Pre-WWII manufacture, blue (most common) or bright nickel finish, "SM" prefix (most common) or "B 70" suffix, approx. 30,000 mfg. between 1978-1982.

	\$775	\$675	\$575	\$525	\$450	\$425	\$395
--	-------	-------	-------	-------	-------	-------	-------

This model is serial numbered approx. SM14,001-SM43,830.

MKIV/SERIES 80 GOVERNMENT MODEL — .38 Super, 9mm Para. (disc. 1992), or .45 ACP (disc. 1996) cal., single action, 5 in. barrel, 7 or 8 (new 1992) shot mag. in .45 ACP, approx. 38 oz., action has firing pin safety, checkered walnut (pre-1991 mfg.) or rubber combat style grips with medallion (new 1991). Production started in 1983 with ser. no. FG01000.

▲ **Blue Finish**

Mfg.'s Sug. Retail	\$735	\$575	\$475	\$385	\$340	\$315	\$295	\$275
---------------------------	-------	-------	-------	-------	-------	-------	-------	-------

Add \$20 for 9mm Para. (disc. 1992) cal.

▲ **Nickel Finish** — .45 ACP (disc. 1986) or .38 Super (disc. in 1987) cal.

	\$525	\$465	\$380	\$350	\$315	\$285	\$260
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$600.

▲ **Satin Nickel/Blue** — is supplied with Colt-Pachmayr grips. Disc. 1986.

	\$510	\$445	\$370	\$345	\$310	\$280	\$255
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$557.

▲ **Stainless Steel** — 9mm Para. (mfg. 1991-92), .38 Super (new 1990), .40 S&W (new 1992) or .45 ACP cal.

Mfg.'s Sug. Retail	\$813	\$640	\$520	\$430
---------------------------	-------	-------	-------	-------

Add \$20 for 9mm Para. (disc. 1992) cal.

▲ **"Ultimate" Bright Stainless Steel** — .38 Super (new 1991) or .45 ACP cal., high polish stainless finish Mfg. 1986-96.

	\$675	\$520	\$455
--	-------	-------	-------

Last Mfg.'s Sug. Retail was \$863.

This model could also be converted to a shorter version using a 3¾ in. barrel/bushing kit (no tools or other components were needed - \$75 retail during 1993 only).

▲ **Model 2000 - Aluminum Frame** — similar to polymer Model 2000, except frame is aluminum, serial numbered RK00001-RK03000 to commemorate the designer (Reed Knight), mfg. 1993.

	\$475	\$400	\$340	\$285	\$250	\$225	\$200
							Last Mfg.'s Sug. Retail was \$575.

PISTOLS: SEMI-AUTO .22 CAL. (WOODSMAN SERIES)

The publisher wishes to express his thanks to Major Robert J. Rayburn for his generous contributions of information regarding the Colt Woodsman Series, some of which have appeared in this publication for the first time.

The Colt Woodsman was made for 62 years, and included a multitude of variations/options in models, sights, barrels, grips, markings, etc. Many of the variations are quite scarce and desirable, but generally known only to specialized collectors. The following price guidelines are for standard production models, and only for those specimens in unmodified, factory original condition.

Note: All 100% condition Woodsmans with the original serial numbered box, test target, instruction folder, hang tag, and screw driver command a 10-25% premium, depending on the model's age and rarity.

Over 690,000 Woodsmans with variations were mfg. between 1915-1977.

PRE-WOODSMAN — .22 LR, 6⅞ in. barrel. 10 shot mag., blue only, bottom mag. release, checkered wood grips, adj. front and rear sights. Mfg. 1915-1927, production totaled about 54,000, this model was officially named "Colt Automatic Pistol, Caliber .22 Target Model", magazine base has 2-line legend "CAL .22" "COLT". Standard velocity ammo. only.

	\$1,100	\$825	\$575	\$475	\$375	\$300	\$275
--	---------	-------	-------	-------	-------	-------	-------

This model was manufactured to use standard velocity ammunition only (not high speed). Colt did offer a conversion kit for high velocity ammo. after the transition to high velocity in 1931.

Woodsmans mfg. between 1915-1922 had a lightweight pencil barrel (approx. serial range 1-31,000). The medium barrel was introduced in 1922 and was retained until the 90,000 serial range (approx. mfg. 1922-1934).

Grading

100%

98%

95%

90%

80%

70%

60%

WOODSMAN 1ST SERIES — .22 LR, 10 shot mag., blue only, bottom mag. release, checkered wood grips, marked "The Woodsman" on receiver, adj. sights, mfg. from 1927-1947, total production was approx. 112,000.

Note: Guns made prior to 1931 were designed for standard velocity .22 LR ammunition only. The new style main spring housing, designed for high velocity ammunition, began appearing at approx. ser. no. 80,000 and was completely phased in by approx. ser. no. 85,000. Later guns, INCLUDING ALL PISTOLS MADE AFTER WWII, were designed for high velocity ammunition.

Between 1934 and 1947 a tapered barrel was standard production (approx. ser. range 90,000-187,423).

▲ **Sport Model** — 4½ in. barrel, this model was introduced in 1933.

\$1,050 \$850 \$595 \$495 \$450 \$395 \$350

Add 10% for "half-moon" front sight.

Approx. serial range on this variation is 86,105 - 187,423 from 1933 to 1947.

▲ **Target Model** — 6½ in. barrel.

\$895 \$695 \$475 \$400 \$325 \$275 \$250

Note: Colt discontinued the 1st series in 1947. These guns are quite different from the 2nd series started later in 1947.

WOODSMAN 1ST SERIES MATCH TARGET — .22 LR only, 6⅝ in. heavy barrel, commonly called "Bullseye" Match Target, mfg. 1938-1944, production totaled around 16,000. Difficult to find in mint condition. Values listed assume original one-piece extended walnut grips.

\$2,000 \$1,500 \$995 \$750 \$575 \$475 \$400

The correct magazine on this model has a 3-line legend "COLT WOODSMAN", "CAL. 22 L.R.", and "MATCH TARGET MOD."

▲ **"U.S. Property" Marked** — approx. 4,000 Match Target Woodsman were sold to the U.S. Army and U.S. Navy during WWII. Most have serial numbers above MT12500, although some were shipped out of sequence with lower numbers. The wartime guns had elongated plastic stocks and standard blue finish, although some of them are now parkerized as the result of arsenal refinishing or other non-factory modifications. They are marked with either "US PROPERTY" or the ordnance wheel with crossed cannon, as well as the initials of the govt. inspector. Some also have additional markings.

\$2,225 \$1,775 \$1,425 \$1,150 \$925 \$750 \$575

Check parkerized finish carefully for originality on this variation, as some "recent parkerizing" has been observed.

WOODSMAN 2ND SERIES — .22 LR only, slide stop and hold open, push button mag. release on this model is located on the left side of frame, Coltwood plastic grips (mfg. 1947-1950) or brown plastic grips (mfg. 1950-1955), total production on all 2nd Series was (not including the Challenger) approx. 146,000 mfg. 1947-1955.

▲ **Sport Model** — 4½ in. barrel.

\$750 \$595 \$495* \$395 \$350 \$295 \$250

▲ **Target Model** — 6 in. barrel.

\$650 \$550 \$450 \$350 \$325 \$275 \$225

▲ **Match Target Model** — 4½ in. heavy barrel. This variation will command a premium over the 6 in. barrel.

\$895 \$795 \$595 \$450 \$425 \$400 \$375

▲ **Match Target Model** — 6 in. heavy barrel.

\$795 \$695 \$500 \$400 \$350 \$325 \$300

WOODSMAN 3RD SERIES — .22 LR only, slide stop and hold open, mfg. between 1955-1977, black plastic grips (mfg. 1955-1960) or walnut grips (1960-1977), 3rd Models can be differentiated from 2nd Models by their bottom mag. release. Total production of all 3rd series Woodsman models (not including the Huntsman or Targetsman) exceeded 100,000.

C

Grading	100%	98%	95%	90%	80%	70%	60%
▲ <i>Sport Model</i> — 4½ in. barrel.	\$595	\$495	\$395	\$325	\$300	\$275	\$250
▲ <i>Target Model</i> — 6 in. barrel.	\$550	\$450	\$350	\$275	\$250	\$235	\$225

▲ <i>Match Target Model</i> — 6 in. heavy barrel.	\$695	\$595	\$495	\$400	\$350	\$325	\$295

CHALLENGER MODEL — similar to Woodsman 2rd Series, only with fixed sights, without hold open, and bottom mag. release, 4½ and 6 in. barrels, mfg. between 1950-1955 with total production reaching approx. 77,000. Plastic grips.

	\$450	\$350	\$275	\$250	\$225	\$210	\$180
--	-------	-------	-------	-------	-------	-------	-------

HUNTSMAN MODEL — .22 LR only, fixed sights and no hold open, 4½ and 6 in. barrels, black plastic grips to serial number 141094-C - walnut grips after that cutoff, mfg. between 1955-1977 with total production reaching over 100,000.

	\$350	\$295	\$250	\$225	\$200	\$180	\$160
--	-------	-------	-------	-------	-------	-------	-------

The Huntsman is very similar to the Challenger Model, except is built on a 3rd series frame.

▲ *Huntsman Model S Master Series* — approx. 400 Model S Masters were sold in 1983. This was a parts clean up by Colt, using Huntsman frames left over from the last days of production. They were equipped with automatic slide stop and Elliason rear sight, gold etching on the slide, and a French fitted walnut case marked "1 of 400". Approx. 285 had straight, non-tapered Huntsman barrel, while the remainder had the tapered Woodsman Sport barrel with pinned front sight.

Huntsman barrel	\$895	\$600	\$500	\$425	\$350	\$325	\$295
Woodsman barrel	\$995	\$700	\$600	\$500	\$425	\$350	\$325

Above values assume original walnut case included. Values for this model in 98%-60% original condition are hard to compute, as most are mint or new.

TARGETSMAN MODEL — similar to the Huntsman, except has adj. rear sight and thumbrest on left grip, 6 in. barrel only, approx. 65,000 mfg. 1959-1977.

	\$450	\$350	\$280	\$260	\$240	\$220	\$200
--	-------	-------	-------	-------	-------	-------	-------

CADET — .22 LR, 4½ in. barrel, stainless steel, 10 shot mag., predecessor to the Colt 22 Model, originally introduced in 1994, fixed sights, this model was disc. by 1995 because of litigation involving the trademarked model name. 33½ oz.

	\$235	\$195	\$170
--	-------	-------	-------

COLT 22 — .22 LR cal., 4½ in. VR barrel, stainless steel, fixed sights, 10 shot mag., one-piece black Pachmayr rubber grips, 33½ oz. New 1994.

Mfg.'s Sug. Retail \$468 \$390 \$335 \$265

▲ **King Cobra "Ultimate" Bright Stainless** — similar to King Cobra, except for bright stainless steel, 2½ (new 1990), 4, 6, or 8 (new 1991) in. barrel. Mfg. 1988-92.

\$400 \$340 \$280

Last Mfg.'s Sug. Retail was \$470.

PYTHON — .357 Mag., 2½ (disc. 1994), 3 (disc., very scarce), 4, 6, or 8 in. barrel with vent rib, royal blue finish, full shrouded ejector rod, adj. rear sight, checkered walnut grips (prior to 1991), rubber Hogue monogrips (2½ or 4 in. barrel), or rubber target (6 or 8 in. barrel) grips, 38-48 oz. Mfg. 1955-1996.

▲ **Blue or royal blue finish**

\$575 \$450 \$375 \$325 \$300 \$275 \$250

Last Mfg.'s Sug. Retail was \$815.

The standard Python was disc. during 1996. Current mfg. is through the Colt Custom Shop (see listings below), and must be special ordered.

Early 2½, 4 or 6 in. Pythons without letter prefix before ser. no. will bring a small premium if in 100% condition or NIB, as well as the disc. 3 in. barrel. There were also a few Pythons mfg. in .256 cal., .38 Spl., .41 Mag., and .44 Spl. While the .22 LR and the .22 WMR (.22 Mag.) were advertised in earlier factory catalogs, they were never manufactured - only a few prototypes exist. The amount of premium on these calcs. depends on how serious (and deep-pocketed) the Python collector is.

A California distributor special ordered a quantity of 3 in. barreled Pythons, which at the time were not available. Colt probably utilized made-up 8 in. guns and either had them modified or re-barreled, with the distributors name part of the barrel marking. These guns are an unusual variant (sometimes referred to as a Combat Python), and are priced similarly to factory 3 in. barrel Pythons.

▲ **Nickel finish** — available in polished or satin nickel, disc. 1985.

\$550 \$460 \$415 \$365 \$325 \$300 \$275

\$2,295 \$1,950 \$1,650 \$1,200 \$1,000 \$800 \$650

RIFLES: AR-15(S) AND VARIATIONS

Prices of currently manufactured models listed below automatically refer to post-ban (if any) configurations.

Rifling twists on the Colt AR-15 have changed throughout the years. They started with a 1:12 in. twist, changed to a 1:7 in. twist (to match with the new, longer .223/5.56mm SS109-type bullet), and finally changed to a 1:9 in. twist in combination with 1:7 in. twist models as a compromise for bullets in the 50-68 grain range. Current mfg. AR-15s/Match Targets have rifling twists/turns incorporated into the model descriptions.

Currently, older mfg. with green boxes will command a premium.

SP-1 — .223 Rem. cal., original Colt paramilitary configuration without forward bolt assist, finishes included parkerizing and electroless nickel. Mfg. 1963-84.

\$995 \$850 \$750 \$650 \$600 \$550 \$495

SPORTER II (R6500) — .223 Rem. cal., various configurations, disc.

\$1,150 \$995 \$875 \$750 \$675 \$595 \$525

Grading	100%	98%	95%	90%	80%	70%	60%

COLT COMMEMORATIVES, SPECIAL EDITIONS, & LIMITED MFG.

During the course of a year, I receive many phone calls and letters on special editions and limited editions that do not appear in this section. It should be noted that a factory commemorative issue is a gun that has been manufactured, marketed, and sold through the auspices of the specific trademark (in this case Colt). There have literally been hundreds of special and limited editions which, although mostly made by Colt (some were subcontracted), were not marketed or retailed by Colt. These guns are NOT Colt commemoratives and, for the most part, do not have the desirability factor that the factory commemoratives have.

Typically, special and limited editions are made for distributors (these sub-contracts are the most common), an organization, state, special event, personality, etc. and are typically sold and marketed through a distributor to dealers, or a company/individual to those people who want to purchase them. These special editions may or may not have a retail price and often times, since demand is regional, values decrease rapidly in other areas of the country. Desirability is the key to determining values on these editions. More information on these special and limited editions not listed in the following pages can be obtained by contacting Cherry's located in Greensboro, NC (see Trademark Index).

Until recently, the over-production of many factory commemoratives had created a "softness" in the commemorative marketplace. Approximately 3-5 years ago, Colt, Winchester, and others decided to cut down on commemorative manufacture after perhaps too many years of over-production. Many commemorative consumers were starting to think that these "limited manufacture" guns had become more of a company marketing tool and sales gimmick rather than a legitimate vehicle for investment potential and collector support. During this 4-6 year period, both distributors and retailers saw their commemorative inventory levels gradually reach near zero - perhaps the first time in over two decades that they sold out of factory commemoratives. In other words, the commemorative "blow-out" sales were over. As this transition from distributor/dealer inventory to consumer purchases occurred, the commemorative marketplace became stronger and prices began to rise.

Because the commemorative consumer is now more in charge (consumers now own most of the guns since distributor/dealer inventories are depleted) than during the 1980s, commemorative firearms are possibly as strong as they have ever been. When the supply side of commemorative economics has to be purchased from knowledgeable collectors or savvy dealers and demand stays the same or increases slightly, prices have no choice but to go up. If and when the manufacturers crank up the commemorative production runs again (and it won't be like the good old days), the old marketplace characteristics may reappear. Until then, however, the commemorative marketplace remains strong, with values becoming more predictable.

As a reminder on commemoratives, I would like to repeat a few facts, especially for the beginning collector, but applicable to all manufacturers of commemoratives. Commemoratives are current production guns designed as a reproduction of an historically famous gun model, or as a tie-in with historically famous persons or events. They are generally of very excellent quality and often embellished with select woods and finishes such as silver, nickel, or gold plating. Obviously,

they are manufactured to be instant collectibles and to be pleasing to the eye. As with firearms in general, not all commemorative models have achieved collector status, although most enjoy an active market - especially during the past three years. Consecutive-numbered pairs as well as collections based on the same serial number will bring a premium. Remember that handguns usually are in some type of wood presentation case, and that rifles may be cased or in packaging with graphics styled to the particular theme of the collectible. The original factory packaging and papers should always accompany the firearm, as they are necessary to realize full value at the time of sale.

All commemorative firearms should be absolutely new, unfired, and as issued, since any obvious use or wear removes it from collector status and lowers its value significantly. Many owners have allowed their commemoratives to sit in their boxes for years without inspecting them for corrosion or oxidation damage. Periodic inspection should be implemented to ensure no damage occurs - this is important, since even light "freckling" created from touching the metal surfaces can reduce values significantly. A fired gun with obvious wear or without its original packaging can lose as much as 50% of its normal value - many used commemoratives get sold as "fancy shooters" with little, if any, premiums being asked.

A final note on commemoratives: One of the characteristics of commemoratives/special editions is that over the years of ownership, most of the original amount manufactured stays in the same NIB condition. Thus, if supply always is constant and in one condition, demand has to increase before price appreciation can occur. Many commemorative dealers have told me that recent changes in overseas currency rates have made domestic guns less expensive to own - for Europeans especially. For this reason, many commemoratives are being sold overseas, resulting in less supply for the domestic market. This secondary demand factor has also strengthened commemorative prices. After 29 years of special edition production, many models' performance records can be accurately analyzed and the appreciation (or depreciation) can be compared against other purchases of equal vintage. You be the judge.

1976 BICENTENNIAL SAA FREEDOM COLTS — consisted of A, B, and C sets, set As were engraved, Bs had gold work and accessories, Cs were similar to Bs, but had shoulder stock. Set A prices averaged \$1,500-\$3,000 in 1976, set B prices varied between \$3,500-\$20,000, and set C prices started at \$5,000. Total mfg. was 4 set As, 6 set Bs, and 1 set C. These sets in today's marketplace are too rare to accurately evaluate and pricing is literally "what the market will bear".			
These guns were all manufactured by Dwain Wright located in Applegate, OR.

CONTINENTAL ARMS CORPORATION

Continental Arms imported high quality shotguns and rifles (usually Belgian) between the mid '50s and mid '70s.

RIFLES

BOLT ACTION — mostly large cal., typically custom Mauser action, makers include Defourney and Dumoulin.

Specimens should be evaluated individually due to the many configurations and embellishments encountered.

DOUBLE RIFLE — .270, .303, .30-40, .348, .30-06, .375 H&H, .400 Jeffreys, .470, .475, .500, or .600, Nitro Express cal., 24 or 26 in. barrels, Anson & Deeley boxlock system, although some sidelocks were mfg., double triggers, checkered stock.

\$5,500 \$4,620 \$3,850 \$3,300 \$2,970 \$2,750 \$2,420

Add 10% for boxlock with sideplates.
 Add 15% for ejectors.
 Add 25% for .375 H&H Magnum and larger cal.

SHOTGUNS: SxS

Add 10% for .410 bore.
 Add 20% for 28 ga.
 Add 10% for Defourney mfg.

CENTAURE — all gauges, basic boxlock action with double triggers and extractors.

\$950 \$895 \$850 \$700 \$500 \$400 \$300

Add 35% for ejectors.

C

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

CENTAURE ROYAL CROWN GRADE — all gauges, single trigger, ejectors, checkered stock and forearm, game scene engraving, can be identified by silver crown inlaid on top lever.

\$2,950	\$2,700	\$2,500	\$2,300	\$2,100	\$1,950	\$1,750
---------	---------	---------	---------	---------	---------	---------

CENTAURE IMPERIAL CROWN GRADE — similar to Royal Crown, except gold inlay on top lever, extensive game scene engraving on receiver and barrels.

---------	---------	---------	---------	---------	---------	---------

COOEY MACHINE & ARMS CO. LTD.

Previous manufacturer located in Cobourg, Ontario - Canada 1903-1961. During 1961, Coeey was sold to the Olin Corporation and placed under the supervision of the Winchester Western Division. At that point, the manufacture of Winchesters (primarily for Winchester Canada) began and continued through the mid-'70s.

Models manufactured by Coeey pre-1961 include various repeating .22 rifles, single shot shotguns (Models 84 and 840), and maybe a few others. There is limited information available on the variety of shotguns and rifles manufactured by this company (most distribution occurred in Canada). To date, there is limited collector demand for most models in this trademark and values should be based on the shooting utility rather than collector premiums due to rarity. Most values will range between \$75-\$150.

COOEY .22 RIFLE — .22 LR, post-WWI mfg., bolt action, open sights.

PISTOLS

COONAN .357 MAG. MODEL B — .357 Mag. only, stainless steel and alloy construction, single action, semi-auto, design based on the Colt Model 1911, 7 shot mag., 5 or 6 (new 1989) in. barrel, smooth or checkered (new 1996) walnut grips, Teflon finish options new 1996, 42 oz. New 1983.

Mfg.'s Sug. Retail **\$735** **\$685** **\$535** **\$425**

Add \$40 for checkered walnut grips.
Add \$33 for 6 in. barrel (new 1989).
Add \$140 for Millett adj. rear sight.
Add \$165 for BoMar sight.
Add \$45 for .38 Spl. conversion kit (new 1986).

This model can be differentiated from the Model A in that it has an extended grip safety lever, linkless barrel system, trigger bar slot is enclosed, and recontoured rear grip strap. This model became standard in 1985.

▲ **Coonan .357 Cadet Model** — similar to .357 Mag. Model B, except is compact variation with 3.9 in. barrel and 6 shot mag., 39 oz. New 1993.

Mfg.'s Sug. Retail **\$855** **\$785** **\$630** **\$500**

Options are similar to those listed above for the Model B.

▲ **Coonan .357 Cadet II** — features standard grip with 7/8 shot mag. New 1996.

Mfg.'s Sug. Retail **\$855** **\$785** **\$630** **\$500**

Options are similar to those listed above for the Model B.

▲ **Model B Compensated** — 6 in. barrel with compensator, new 1990.

Mfg.'s Sug. Retail **\$1,015** **\$900** **\$795** **\$650**

Options are similar to those listed above for the Model B.

▲ **Model Classic Compensated** — features 5 in. barrel with integral compensator, Millett white/orange outline sights, checkered black walnut grips, Teflon black and matte stainless two-tone finish, 42 oz. New 1996.

Mfg.'s Sug. Retail **\$1,400** **\$1,275** **\$1,025** **\$825** **\$675** **\$595** **\$525** **\$450**

COONAN .357 MAG. MODEL A — original model without above listed improvements, special order only, inventory depleted in 1991. Serialization is under 2,000 for this model (less than 1,200 were mfg.). While discontinued, the factory has a few guns remaining in inventory.

\$1,150 **\$775** **\$550**

Last Mfg.'s Sug. Retail was \$625.

Add approx. \$350 for early variations with engraved slide.

This variation will also shoot .38+P loads. The first 25 Model A's were engraved on both sides of slide.

COONAN .41 MAGNUM — .41 Mag. cal., 5 in. barrel, smooth or checkered walnut grips. New 1997.

Mfg.'s Sug. Retail **\$825** **\$760** **\$625** **\$500**

Options are similar to those listed above for the .357 Mag.

COOPER ARMS

Manufacturer located in Stevensville, MT since 1991. Dealer direct sales only.

RIFLES: BOLT ACTION

Approx. 6,000 rifles have been manufactured in over 50 calibers to date.

MODEL 21 VARMINT EXTREME SINGLE SHOT — .17 Rem., .17 Mach IV, .20 Vartarg (new 1997), .221 Fireball, .22 PPC (new 1995), .222 Rem., .222 Rem. Mag. (new 1995), .223 Rem., 6x45mm (disc. 1994), or 6x47mm (disc. 1994) cal., features heavy Varmint stainless barrel, checkered stock. New 1994.

Mfg.'s Sug. Retail **\$1,675** **\$1,475** **\$1,150** **\$875** **\$700** **\$600** **\$525** **\$450**

Add \$465 for Benchrest Model with Jewell trigger (mfg. 1995-96).

COSMI, AMERICO & FIGLIO

Manufactured in Torrette, Italy since 1930. Please contact either the factory directly or New England Arms Co. for pricing and model availability (see Trademark Index).

Approximately 6,950 Cosmi shotguns have been manufactured since 1930.

SEMI-AUTO SHOTGUN MODEL — 12 or 20 ga., 2¾ or 3 in. chamber, semi-auto, unique pivoting break open action loads cartridges into stock chamber from inside of receiver, 8 shot mag. with 3 shot option reducer, Boehler Antinit steel barrel (moves when shooting) available with or without choke tubes, all internal parts are mfg. from special chrome-nickel steel or titanium (new 1990), custom order gun only with dimensions specified by individual customer (approx. 6 month delivery time).

- ▲ **Standard Grade** — barrel and attached receiver assembly are blued, frame is chromed-nickel steel. In 1991, Cosmi introduced a new variation with solid titanium frame - more information can be obtained by contacting New England Arms Co.

Mfg.'s Sug. Retail	\$6,750	\$6,750	\$6,000	\$5,000	\$4,500	\$4,000	\$3,500	\$2,900
--------------------	---------	---------	---------	---------	---------	---------	---------	---------

Add \$2,000 for titanium fabrication (new 1990).

Cosmi also manufactures an Extra Lusso Series with more elaborate engraving. Series C specimens start at \$17,000, Series B start at \$15,000, and Series A (top-of-the-line) start at \$23,000.

- ▲ **Titanium Model** — 12 or 20 ga., receiver made out of machined titanium, approx. 6.8 lbs. in 12 ga., approx. 5.7 lbs. in 20 ga. New 1990.

Mfg.'s Sug. Retail	\$8,750	\$8,750	\$7,500	\$6,250	\$5,250	\$4,300	\$3,800	\$3,200
--------------------	---------	---------	---------	---------	---------	---------	---------	---------

- ▲ **Extra Lusso Models** — available with various styles and amounts of engraving. Prices are quoted individually and can be obtained by contacting New England Arms Co.

CRESCENT FIRE ARMS CO. & CRESCENT-DAVIS ARMS

CO.

Manufactured 1888-1893 in Norwich, CT. Merged with N.R. Davis in the 1900s by H&D Folsom to form Crescent-Davis. In early 1930, Savage Arms Corp. bought Davis-Warner from Folsom. In late 1930, Savage bought Crescent Firearms Co., Norwich, CT, and formed a new company, "Crescent-Davis Arms Corp., Norwich, CT". C-D operated independently of J. Stevens Arms Co. Later, circa 1933, the company moved C-D assets to Chikopee Falls, MA and let Connecticut take buildings in Norwich in lieu of taxes.

Crescent Firearms Company remains best known as a manufacturer of "house brand" shotguns (i.e., Crescent private labeled guns for retailers, distributors, mail-order houses, etc.). Over 100 different trademarks have been observed to date, manufactured by Crescent - almost all the remaining specimens today are priced as shooters, and have no collector value.

SxS SHOTGUN — values below assume standard models with double triggers, extractors, original finish, and 100% working order. Sidelock actions were also available and will command premiums from prices listed below. Shotguns with exposed hammers can equal their hammerless counterparts if condition is 80% or better.

12 ga.	\$195	\$175	\$150	\$125	\$100	\$85	\$65

Grading 100% 98% 95% 90% 80% 70% 60%

KNICKERBOCKER — 14 in. hammerless double-barreled 20 ga., smooth bore pistol mfg. by Crescent Firearms Co. sometime during the early 1900s, only known specimen bears ser. no. 200114, guns not currently registered with ATF cannot be legally owned and are subject to seizure.
Extreme rarity factor precludes accurate pricing information.

NEW EMPIRE — hammerless .410 or 20 ga., smooth bore pistol with 12¼ in. double barrels, approx. mfg. 1925-30, left and right sides of receiver are stamped "Crescent Fire Arms Co./Norwich, Conn. U.S.A." and "NEW EMPIRE", respectively, the only documented specimen, a .410 bore, has ser. no. S1, guns not currently registered with ATF cannot be legally owned and are subject to seizure.
Extreme rarity factor precludes accurate pricing information.

VICTOR EJECTOR — single hammer .410 smooth bore, 12 in. barrel, mfg. approx. sometime before 1930 (number unknown), left receiver side is stamped "Victor Ejector/Crescent Fire Arms Co., Norwich, CT, U.S.A.", a possible predecessor or prototype of the Crescent Certified Shotgun, the single known example bears ser. no. 755004, guns not currently registered with ATF cannot be legally owned and are subject to seizure.
Extreme rarity factor precludes accurate pricing information.

AUTO & BURGLAR GUN (NFA) — hammerless .410 smooth bore or 20 ga., 12¼ in. double barrels, extremely rare firearm whose total production and years of manufacture are unknown at this time (only known documentation is its mention in an advertisement by "Saul Ruben, The Gun Store, 68 E. Long St., Columbus, OH" of the October 1932 issue of **Hunter-Trader-Trapper**, which lists a \$14.75 retail price. One known specimen, a .410 bore, bears ser. no. 9, and its receiver is marked **New Empire**. Establishing a reliable value may be difficult, but could be logically expected to approximate those for a nonstandard or special-order Ithaca Auto & Burglar Gun. The Crescent Auto & Burglar Gun may have been distributed by the H.&D. Folsom Arms Co. of New York City through its manufacturing division, the Crescent Firearms Co., Norwich, CT. Crescent's sellers included the Belknap Hardware Co., Louisville, KY and Hibbard-Spencer-Bartlett Co., Chicago, IL.

CRESCENT CERTIFIED SHOTGUN — .410 smooth bore, 12½ in. barrel, approx. 4,000 mfg. from approx. 1930-32 by the Crescent-Davis Arms Corp., and possibly thereafter until 1934 by the J. Stevens Arms Co., left receiver side is stamped "Crescent Certified Shotgun/Crescent-Davis Arms Corp./Norwich, Conn. U.S.A.", also termed the "Ever-Ready" Model 200 and advertised with a blued frame, but specimens with "tiger stripe" and regular case coloring have been observed, guns not currently registered with ATF cannot be legally owned and are subject to seizure.

\$1,200 \$1,000 \$900 \$800 \$700 \$600 \$500

Add \$100-\$300 for original cardboard box.

DAISY

Manufacturer located in Rogers, AR. Also see Daisy section under Modern Airguns. Distributor sales only.

RIFLES: DISC.

In addition to the models listed below, in 1987, Daisy assembled approximately 30,000 guns using left-over Iver Johnson parts. This model carried the Daisy trademark and was designated the Model 8 - it was an inexpensive bolt action single shot private labeled for Walmart. Secondary values on these rifles range from \$25-\$65.

V/L STANDARD RIFLE — 22 V/L, single shot, .a caseless air ignited cartridge, 1,100 FPS, 18 in. barrel, plastic stock, 19,000 mfg., 1968-1969.

\$110	\$90	\$75	\$65	\$55	\$45	\$30
-------	------	------	------	------	------	------

V/L PRESENTATION — similar to Collector's Kit, except does not have owner's name inscribed on butt plate, walnut stock, 4,000 mfg. for dealers.

\$165	\$130	\$110	\$90	\$70	\$55	\$45
-------	-------	-------	------	------	------	------

Last Mfg.'s Sug. Retail was \$125.

V/L COLLECTOR'S KIT — comes with case, gun cradles, 300 rounds of ammo, and a gold plated brass butt plate with owner's name and serial number of gun, approx. 4,000 mfg., available only by direct factory order.

\$275	\$165	\$130	\$110	\$90	\$70	\$55
-------	-------	-------	-------	------	------	------

Last Mfg.'s Sug. Retail was \$125.

Note: The Daisy .22 V/L has been the only commercial caseless ammo system mfg. to date. It was discontinued because the BATF ruled that the gun constituted a firearm, and since Daisy is federally licensed to manufacture air weapons only, the factory decided to discontinue manufacture.

RIFLES: RECENT MFG.

All Legacy models have a removable trigger, slings and swivels, takedown barrel, dovetail receiver for scope mounting, rifled inner steel barrel with 12 lands and grooves, and an adj. rear sight. Weight is between 6½ - 7 lbs.

MODEL 8 — .22 S or LR cal., single shot, 16 in. barrel, black synthetic stock, 30,000 mfg. for Walmart only 1987-88.

\$100	\$80	\$70	\$60	\$50	\$40	\$35
-------	------	------	------	------	------	------

LEGACY MODELS 2201/2211 — .22 LR cal., single shot, bolt action, plastic (2201) or walnut finished hardwood (2211) stock, models vary in features, prices range from \$80-\$130. Mfg. 1988-91.

LEGACY MODELS 2202/2212 — .22 LR cal., bolt action repeater, 10 shot rotary mag., plastic (2202) or walnut finished hardwood (2212) stock, models vary in features, prices range from \$90-\$135. Mfg. 1988-91.

Model 2202 has copolymer stock with adj. butt plate.

LEGACY MODELS 2203/2213 — .22 LR cal., semi-auto, 7 shot clip mag., models vary in features, prices range from \$95-\$140. Mfg. 1988-91.

Model 2203 has copolymer stock with adj. butt plate. Model 2213 has American hardwood stock.

				Last Mfg.'s Sug. Retail was \$570.			
	Add \$100 for nickel finish.						

DALY, CHARLES: PRUSSIAN MFG.

Charles Daly was an importer whose goal was to give the U.S. shotgun consumer a European manufactured gun of similar quality to the premier American shotguns of the same era. In that behalf, he had various European firms fabricate shotguns with American shooting features and preferences. Many "Prussian" Dalys were built by various firms in Suhl, Germany. Importation ceased prior to WWII. These Prussian Charles Dalys utilized the finest materials and best workmanship of their time.

SHOTGUNS

In the higher grade Prussian Daly variations, there is quite a bit of difference in their manufacture, including engraving options, levels of wood embellishment, and other extra cost features at the time. H. A. Linder produced approx. 2,500 guns (ser. numbered accordingly), and many of the higher grades show a noticeable difference in the amount of engraving (from minimal to considerable game scene engraving), can be either case colored only or have gold inlaid birds and animals (the number of which can also vary), barrels can have various levels of engraving on both the breech and muzzle ends - all of these factors have considerable impact on the overall

Grading	100%	98%	95%	90%	80%	70%	60%
value of a particular specimen. It is estimated that it took three craftsmen one year to produce a single Diamond Regent gun.							
EMPIRE O&U — 12, 16, or 20 ga., various barrel lengths, Anson & Deeley boxlock, ejectors and double triggers, fine engraving, deluxe walnut. Disc. 1933.	\$4,000	\$3,400	\$2,750	\$2,375	\$2,000	\$1,825	\$1,625
DIAMOND O&U — similar to Empire model, only finer workmanship and materials.	\$5,000	\$4,300	\$3,475	\$3,000	\$2,600	\$2,300	\$2,000
SUPERIOR SxS — 10, 12, 20, 28 ga., or .410 bore, Anson & Deeley boxlock, various barrel lengths, ejectors (except superior model). Disc. 1933.	\$1,050	\$790	\$690	\$580	\$525	\$475	\$420
EMPIRE SxS — similar to Superior, only more engraving and better wood.							
Linder mfg.	\$5,000	\$4,400	\$3,900	\$3,500	\$2,800	\$2,200	\$1,500
Sauer mfg.	\$4,200	\$3,500	\$3,100	\$2,800	\$2,200	\$1,800	\$1,400
DIAMOND SxS — similar to Empire model, only more elaborate and with gold inlays.							
Linder mfg.	\$10,000	\$9,000	\$8,500	\$8,000	\$7,000	\$6,000	\$4,500
Sauer mfg.	\$7,000	\$6,200	\$5,500	\$5,000	\$4,000	\$3,000	\$2,000
Deduct 20%-25% if without gold inlays.							
DIAMOND REGENT SxS — top-of-the-line Prussian side-by-side and with gold inlays.							
Linder mfg.	\$16,000	\$13,500	\$12,000	\$11,000	\$8,500	\$7,000	\$5,000
Sauer mfg.	\$8,500	\$7,700	\$7,000	\$6,500	\$5,000	\$4,000	\$3,000
EMPIRE SINGLE BARREL TRAP — 12 ga., 30-34 in. barrel, Anson & Deeley boxlock, ejector, vent. rib, finely engraved with select walnut, chopper lump extension, top quality. Disc. 1933.							
Linder mfg.	\$3,995	\$3,500	\$3,100	\$2,800	\$2,200	\$1,800	\$1,400
Sauer mfg.	\$2,150	\$1,675	\$1,475	\$1,100	\$960	\$850	\$750
SEXTUPLE SINGLE BARREL TRAP — 12 ga., 30-34 in. barrel, six locking bolts, ejector, vent. rib, elaborately engraved and checkered. Regent Diamond Model has better engraving and wood.							
▲ <i>Empire Quality</i>							
Linder mfg.	\$4,600	\$4,150	\$3,650	\$3,100	\$2,800	\$2,200	\$1,800
Sauer mfg.	\$2,600	\$2,100	\$1,700	\$1,400	\$1,100	\$900	\$750
▲ <i>Regent Diamond Quality</i>							
Linder mfg.	\$5,000	\$4,400	\$3,900	\$3,500	\$2,800	\$2,200	\$1,500
Sauer mfg.	\$3,300	\$2,850	\$2,400	\$1,950	\$1,650	\$1,350	\$995
DRILLING MODEL — 12, 16, or 20 ga.'s and .25-20, .25-35, or .30-30 cal., 3 barrel combination gun, extractors, double triggers, engraved action, select walnut, mfg. by both Linder and Sauer. Linder mfg. guns are extremely rare - very few specimens are to be found domestically. Sauer guns were not marked for grade, but rather had three levels of engraving which determined the grade. Most Sauer guns had a tang mounted aperture rear sight and a separate rifle cock and were sidelocks. Disc. 1933.							
▲ <i>Superior Quality</i> — borderline engraving only.							
Sauer mfg.	\$3,000	\$2,600	\$2,300	\$2,000	\$1,700	\$1,500	\$1,200
▲ <i>Diamond Quality</i> — full scroll engraving.							
Sauer mfg.	\$5,500	\$4,800	\$4,400	\$4,000	\$3,500	\$3,000	\$2,200
▲ <i>Regent Diamond Quality</i> — top-of-the-line model featuring full game scene coverage.							
Linder mfg.	\$12,000	\$11,000	\$10,000	\$9,000	\$7,000	\$6,000	\$5,000
Sauer mfg.	\$8,000	\$7,000	\$6,700	\$6,000	\$5,000	\$4,000	\$3,000
COMMANIDER O&U — 12, 16, 20, 28 ga., or .410 bore, Anson & Deeley boxlock action, single or double triggers, ejectors. Mfg. in Belgium circa 1939.

DALY, CHARLES: JAPANESE MFG.

Previously manufactured by B.C. Miroku, Japan until 1976.

SHOTGUNS: O/U

In the early sixties, C. Daly guns were manufactured by the firm of B.C. Miroku in Tokyo, Japan. This Japanese gun manufacturing company has produced guns for many companies, Browning being the biggest current customer. Miroku guns are high quality with excellent fit and finish. Many of them are highly engraved and are fine examples of the gunmaker's art. Charles Daly Miroku Guns are becoming quite collectible in some areas (smaller gauges with open chokes). Their production ceased in 1976.

O/U SHOTGUN — 12, 20, 28 ga., or .410 bore, 26, 28, or 30 in. vent. rib barrels, various chokes, boxlock, auto ejectors, SST, select walnut checkered pistol grip stock. Superior and Diamond Grade Trap have Monte Carlo stocks, the grades differ in amount of engraving and wood. Mfg. 1963-1976 by Miroku.

Approx. 1,000 28 ga. Lightweight guns were manufactured. All 28 ga. Lightweights (approx. ser. range 230,185-230,998) have barrel spacing 3/4 in. center to center, while the normal 28 ga. has a measurement of 7/8 in. After the Charles Daly line of O/Us were mechanically redesigned, both the 28 ga. and .410 bore were made on only the new 20 ga. frame. To date, no one has observed a .410 bore Lightweight Charles Daly.

Add 10% for 20 ga. on models listed below.

Add 30% for 28 ga. on models listed below.

Add 40% for .410 bore on models listed below.

Add 30%-40% for original 28 ga. Lightweight models.

▲ **Field Grade** — 12 or 20 ga., field gun.

DAVID MILLER CO.

Custom rifle manufacturer located in Tucson, AZ since 1973.

The David Miller Co. is a custom rifle maker fabricating best quality bolt action rifles only. All guns are essentially built per individual custom order and the company should be

contacted directly for more information and price quotations. Currently manufactured D. Miller rifles feature the new Winchester Model 70 Super Grade action. Used rifles have to be appraised one-at-a-time to ascertain up-to-date values. Several of Mr. Miller's rifles have sold for over \$100,000, and almost any feature(s) can be special ordered to produce a truly one-of-a-kind firearm.

DE FORNEY

Long gun manufacturer located in Belgium.

De Forney has specialized in both quality sidelock and boxlock (with or w/o sideplates) shotguns. Prices range from \$750-\$3,250 for boxlock shotguns and start in the \$2,500 range for sidelock models, assuming 80% or better original condition.

DEMRO

Previous manufacturer located in Manchester, CT.

RIFLES: SEMI-AUTO

T.A.C. MODEL 1 RIFLE — .45 ACP or 9mm Luger, blow back operation, 16⁷/₈ in. barrel, open bolt fire combination, lock-in receiver must be set to fire, also available in carbine model and fully auto.

\$595 \$525 \$475 \$425 \$395 \$360 \$330

XF-7 WASP CARBINE — .45 ACP or 9mm Luger, blow back operation, 16⁷/₈ in. barrel, also available in fully auto.

\$595 \$525 \$475 \$425 \$395 \$360 \$330

Add \$45 for case.

DESERT INDUSTRIES, INC.

Manufacturer located in Las Vegas, NV beginning 1991. Distributor and dealer direct sales. See listing under Steel City Arms, Inc. for older models.

In 1990, Desert Industries, Inc. was created - this new company took over Steel City Arms, Inc. More recently manufactured guns will have the Las Vegas slide address. As this edition went to press, Desert Industries, Inc. anticipated using the Steel City Arms, Inc. nomenclature again.

PISTOLS

THE DOUBLE DEUCE — .22 LR, double action, 2¹/₂ in. barrel, matte stainless steel construction, 6 shot mag., rosewood grips, 15 oz. New 1991.

Mfg.'s Sug. Retail \$400 \$350 \$295 \$275 \$250 \$225 \$200 \$175

TWO BIT SPECIAL — .25 ACP, double action, 2¹/₂ in. barrel, similar to Double Deuce, except has 5 shot mag., 15 oz. New 1991.

Mfg.'s Sug. Retail \$400 \$350 \$295 \$275 \$250 \$225 \$200 \$175

DETONICS FIREARMS INDUSTRIES

Previous manufacturer located in Bellevue, WA 1976-1988. Detonics was sold in early 1988 to the New Detonics Manufacturing Corporation, a wholly owned subsidiary of "1045 Investors Group Limited".

Please refer to the New Detonics Manufacturing Corporation in the "N" section of this text for complete model listings of both companies.

DIARM S.A.

Previous manufacturing conglomerate (25 companies) located in Deba, Spain 1986-1989. Previously imported and distributed by American Arms, Inc. located in North Kansas City, MO. Older Diarm models can be found under the American Arms, Inc. heading in this publication.

\$275 \$200 \$165 \$130 \$100 \$75 \$50

DRILLINGS

A Drilling is a three-barrel combination gun (two shotgun barrels and a rifle barrel, vice versa, or three shotgun barrels). Normally, two triggers fire the shotgun barrels and one of them activates the rifle barrel when the barrel selector is moved forward (usually located on the upper tang). Most

D

well made Drillings in above average condition are surprisingly accurate when using the rifle barrel(s).

Please refer to illustrations below depicting the most commonly encountered Drilling configurations.

ILLUSTRATION EXPLANATIONS

Illustration No. 1 - Normal Drilling configuration with 2 shotgun barrels over a rimmed, centerfire rifle (most are 16 ga. x 16 ga. by either 9.3x72R or 8x57JR cal.).

Illustration No. 2 - Two rifle barrels over a shotgun. This configuration will normally command twice the price as No. 1. German designation is "Doppelbüchsdrilling".

Illustration No. 3 - Three barrels with no two being the same gauge or caliber. This configuration is very collectible, especially if the smallest caliber is .22 LR. Again, price will be double of No. 1.

Illustration No. 4 - Sometimes called a Bock Drilling with one shotgun and two rifle barrels. This variation brings a good premium over No. 1.

Illustration No. 5 - Rib Drilling with rifle caliber generally small (.22LR or .22 Hornet). German designation is "Schienendrilling".

Illustration No. 6 - Three shotgun barrels with the same gauge. This configuration is quite rare and healthy premiums are charged over No. 1.

Illustration No. 7 - A variation of No. 3, this configuration features shotgun O/U barrels with a rifle barrel on the side. German designation is "Bock-Doppelflinte mit seitlichem Kleinkaliberlauf".

Illustration No. 8 - Very unusual - a 3-barrel drilling in vertical design - 2 rifle barrels under a shotgun barrel. This configuration is seldomly encountered.

The following German nomenclatures apply as follows: single barrel rifle = Büchse; SxS double rifle = Doppelbüchse; O/U double rifle = Bock-Doppelbüchse; SxS double shotgun =

Doppelflinte; O/U double shotgun = Bock-Doppelflinte; SxS double shotgun, rifle bbl. under = Drilling; SxS double shotgun, rifle bbl. on top = Schienendrilling; single shotgun, rifle bbl. under = Bock-Büchsfinte; single shotgun, rifle bbl. at side = Büchsfinte; single shotgun, rifle bbl. under and at side = Bock-Drilling; double rifle, shot bbl. under = Doppelbüchsdilling; O/U double shotgun, rifle bbl. at side = Bock-Doppelflinte mit seitlichem Kleinkaliberlauf; SxS double shotgun, plus two rifle bbls. = Vierling.

DRILLING HISTORY

For over 140 years Drillings have been the classic hunting gun of many European countries, especially Germany and Austria. Because a single hunting trip may require shooting both wildfowl and animals (often times within several hours), Europeans have long favored a single long-arm that could afford both rifle and shotgun shooting, be reliable, and not wear the hunter out while transporting it in the field. Americans, on the other hand, have not placed as much emphasis on this combination gun principle, and more often than not have chosen to buy both a rifle and shotgun for each specific hunting application. Since Drillings are becoming more popular, collectibility has improved in this country for those collectors who see the utility and functionality of these mostly hand assembled weapons. Very few Drillings manufactured before WWII are alike today in configuration and condition.

DRILLING CALIBERS

Some people may be confused as to how the European metric calibers compare to domestic cartridges in terms of overall performance. This comparison has been added to assist you when contemplating what type of field performance, velocity, and killing power you can expect in these European calibers: 9.3x74 is similar to .375 Win. Mag., 9.3x72 is similar to .44 Mag. or .44-40, 8x57 JRS is similar to .30-06, .30-30 Win. is 7.62x51 R, 8x57JR is similar to .30-06, 7x65 R is similar to .280 Rem., 7x57R is similar to .257 Roberts, 6.5x57R is similar to .243 Win., 5.6x52R is a .22 Savage Hi-Power, 5.6x34R is similar to .22 Hornet.

DRILLING VALUES

Rather than list the various manufacturers of Drillings (there are hundreds), it should be noted that guns with major trademarks and established provenances (i.e. Charles Daly, Colt Sauer, Ferlach addressed, Heym, Krieghoff, J.P. Sauer, Suhl addressed, etc.) will usually be more collectible than other lesser known brands - even if the quality of workmanship is similar. Some Drillings were assembled from manufactured parts by skilled and crafted gunsmiths and are sometimes better quality than factory specimens. Pre-war specimens are generally more desirable to collectors (even though less expensive than post-war variations) and to date, have outperformed post-war specimens in price appreciation. Many older pre-war specimens were designed for rimmed cartridges with lower breech pressures and should not be re-bored or reloaded for the "hotter" cartridges/loads available today. It should be noted that since Drillings are more complex than a typical shotgun, most of the manufacture has been done by hand - some guns have taken individual craftsmen over a year to fabricate! Ordering a new Drilling today would be a very expensive proposition, and buying a good used specimen will save you thousands of dollars (and maybe a year wait). For these reasons, many collectors feel Drillings today are under-priced since they can be purchased at a fraction of the cost for a new one (and may well be better quality also).

FEATURES THAT ADD VALUE TO DRILLINGS

Drillings with American calibers and smaller gauges will sometimes be more desirable (and expensive) than the European metric calibers (i.e. a gun configured 20 ga. x 20 ga. by .243 Win. will sell for more than a similar gun in 16 ga. x 16 ga. by 9.3 x 72R cal.). The most commonly encountered gauges and calibers are 16 ga. (most pre-war guns are chambered for 2⁹/₁₆ in.). In addition, a sidelock action will be more desirable than a boxlock, and a lot more expensive if the locks are also detachable.

Drilling aficionados will mention there are four main things to look for when contemplating a drilling purchase - beauty, condition, quality, and features. Features and embellishments become very critical in ascertaining Drilling values also - a gun with deep relief engraving, carved stock, claw mounts w/scope, buffalo horn trigger guard and butt plate, cocking indicators, two position front

sight (i.e. night sight), middle set of express sights, adj. trigger, concealed upper tang peep sight, a non-Greener safety system, lightweight (under 6½ lbs.), separate rifle cocking, shotgun barrel inserts in .22LR or .22 Mag. cal. (approx. 8 or 11 in. long), cartridge trap, etc. is going to be A LOT more collectible than a plain-Jane hammer model with a loose action.

FEATURES THAT DETRACT VALUE FROM DRILLINGS

If it isn't beautiful, it probably won't sell. Beauty sells.

OBSERVATIONS ON DRILLING COLLECTIBILITY

Condition determines whether Nitro-proofed Drillings' worth is comparable to their counterparts in black powder or damascus barrel specimens.

Drillings with original claw-mounted scopes (rail-mount or swing-off) are worth 30-40% premiums.

Many post-war variations are valued for their hunting use only, and do not have the collectibility of the pre-war guns.

CONDITION FACTORS

Condition is another major consideration - a gun that shows much use and is not operationally intact/correct may bring several thousand dollars less than another similar specimen showing little wear and excellent original finish (including the case colors). Most good boxlock Drillings in the above mentioned trademarks start in the \$1,750 range and can go to \$8,000 and higher if the configuration, features, and condition are all desirable. Average Drillings usually sell in the \$1,000 - \$2,000 range assuming worn condition, metric calibers and few features. For these reasons, Drillings have to be evaluated one at a time and a COMPETENT appraisal/evaluation should be procured before buying or selling a specimen.

DUBIEL ARMS COMPANY

Previous manufacturer located in Sherman, TX. Dubiel Arms made custom bolt action rifles from 1973-approx. 1990.

DUMOULIN, ERNEST

Manufacturer located in Herstal, Belgium. Imported until 1990 and retailed on a very limited basis by Midwest Gun Sport located in Zebulon, NC (formerly from Ellisville, MO.). Older importation was by Abercrombie & Fitch located in New York, NY.

Most Ernest Dumoulin rifles and shotguns are essentially custom ordered firearms with a long list of options available which, in some cases, can easily double the values of models shown below. Because of this, these options are not listed individually. To determine the exact price on a specific model with certain options, Ernest Dumoulin (see Trademark Index) should be contacted directly to obtain a firm price (dependent on the fluctuation of the U.S. dollar and other domestic and foreign regulations). Written correspondence should include a SASE (a FAX will be faster).

Manufacturer located in Herstal, Belgium. Imported and distributed by New England Arms, Co. located in Kittery Point, ME.

H. Dumoulin has manufactured quality firearms in Liege/Herstal, Belgium since 1947. They have specialized in big-bore, high quality bolt action rifles, generally built on Mauser 98 or commercial Mauser actions, which have been used successfully on countless safaris. The improved Imperial Magnum action was developed and introduced in 1987.

RIFLES**GRAND LUXE BOLT ACTION** — .300 Wby., .338 Win. Mag., .375 H&H, .378 Wby., .404 Jeffrey, .416 Rigby, .460 Wby., or .505 Gibbs cal., 24, 25.6, or 26 in. barrel, European walnut stock with ebony forend tip and pistol grip cap, folding leaf sights with hooded front, custom made on the Dumoulin Imperial Magnum double square bridge action. Many engraving options available.**Mfg.'s Sug. Retail \$7,000 \$6,850 \$6,200 \$5,500 \$4,950 \$4,300 \$3,600 \$3,200**

Add \$500 for left hand action.

Add \$850 for extended top and bottom tang.

Add \$800 for claw mounts.

Add \$700 for .505 Gibbs cal.

SOVEREIGN — available in same cal. as Grand Luxe Bolt Action, except with a higher quality finish, knurled bolt handles, gold inlaid lettering. Many engraving options available.

Pricing on this model depends on engraving, wood and other options. Imperial Magnum is also available in various stages of completion, barreled actions, actions in the white, etc. Please contact New England Arms, Co. directly for quotation.

SxS BOXLOCK RIFLE — boxlock action, best quality double rifle, highly figured European walnut, finely hand checkered with standard scroll engraving. Custom ordered to customer's dimensions. Prices start at \$12,000.

SxS SIDELOCK RIFLE — sidelock action, best quality hand detachable locks, top quality European walnut, finely hand checkered with standard scroll engraving. Additional engraving or deluxe wood quoted on request. Prices start at \$15,000.

F. DARNE FILS AINE

Previous manufacturer located in St. Etienne, France.

Francisque Darne was the eldest son of Regis Darne, who developed the sliding breech gun. In the year 1910, Francisque left his father's company to form his own, "F. Darne Fils AinÉ", producing high quality versions of the original 1894 patent "R" model Darne. Regis Darne updated most of his designs in 1909 and allowed the older patents to become public domain.

Francisque Darne died in 1917, but his company remained in production until 1955 under at least four different owners. As is usually the case, the earlier production guns are by far the highest quality. Wide variations in quality exist in this marque, depending on the financial health of the owners at the time of production.

PRE-WAR MODELS

CLASSIC MODEL — an exact copy of the first Darne patent of 1894. Available in four grades.

▲ **Type A** — standard French proof barrels, very light engraving, color case hardened, no quality stamps on barrels.

	\$1,200	\$1,000	\$800	\$700	\$600	\$500	\$450
--	---------	---------	-------	-------	-------	-------	-------

▲ **Type B** — French gray hardened or color case hardened, somewhat more engraving, 1 quality stamp on barrel flats.

	\$1,700	\$1,400	\$1,200	\$900	\$700	\$600	\$500
--	---------	---------	---------	-------	-------	-------	-------

▲ **Type C** — French gray hardening over modern or old English engraving, double proofed barrels with two quality stamps on flats.

	\$2,000	\$1,650	\$1,350	\$1,000	\$800	\$650	\$550
--	---------	---------	---------	---------	-------	-------	-------

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

- ▲ **Type E** — French gray hardening over elaborate engraving. Better quality wood in either English or semi-pistol grip. Double proof barrels with four quality stamps on flats.

\$2,400	\$2,000	\$1,600	\$1,300	\$1,000	\$900	\$800
---------	---------	---------	---------	---------	-------	-------

MODEL T — stylistic improvements to the 1894 patent R model. Two-piece stock, barrels removed by holding a button on forend, 4 grades, all were originally color case hardened, never blued.

- ▲ **Type T 32** — lightly engraved, 3 quality stamps on barrel flats.
 Both the T 32 and T 34 were available in 10 ga. with 70mm or 75mm chambers and 72cm or 76cm barrels on special order. The barrels would carry triple proof in 10 ga.

\$1,950	\$1,700	\$1,250	\$950	\$700	\$600	\$500
---------	---------	---------	-------	-------	-------	-------

 Add 30% for 10 ga.

- ▲ **Model T 34** — better engraving and wood, 5 quality stamps on barrel flats.

\$2,100	\$1,800	\$1,500	\$1,100	\$850	\$675	\$575
---------	---------	---------	---------	-------	-------	-------

 Add 30% for 10 ga.

- ▲ **Model T 35** — mono bloc barrels of superior French proof steel, better engraving and wood, 6 quality stamps on barrel flats.

\$2,500	\$2,200	\$1,800	\$1,400	\$1,200	\$1,000	\$800
---------	---------	---------	---------	---------	---------	-------

- ▲ **Model T 36** — mono bloc barrels of superior French proof steel, top-of-the-line T model, 7 quality stamps on flats of barrels.

\$2,800	\$2,500	\$2,100	\$1,700	\$1,400	\$1,200	\$850
---------	---------	---------	---------	---------	---------	-------

MODEL FIXED — further tinkering with the 1894 R model, these located the barrels in a rectangular block cut near the flats. Two grades.

- ▲ **Type No. 3** — color case hardened or French gray hardened. Good quality engraved and wood. For pricing, see Type T 34.
- ▲ **Type No. 4** — better wood and engraving. For pricing, see Type T 35.

MODEL PLATINUM — based on the model Fixed, these were top-of-the-line sliding breech guns. Four grades.

- ▲ **Type No. 5** — mono bloc barrels, English or art nouveau style engraving, chisled fences.

\$3,100	\$2,800	\$2,500	\$2,200	\$1,700	\$1,400	\$1,100
---------	---------	---------	---------	---------	---------	---------
- ▲ **Type No. 6** — mono bloc barrels, English rose and scroll engraving or gamescene or art nouveau style, high grade wood.

\$3,400	\$2,900	\$2,600	\$2,350	\$1,900	\$1,600	\$1,200
---------	---------	---------	---------	---------	---------	---------
- ▲ **Type No. 7** — mono bloc barrels of top quality French proof steel, engraved in English rose and scroll or deep chisled art nouveau style, superior wood. Pigeon model.

\$3,800	\$3,500	\$3,000	\$2,800	\$2,200	\$1,900	\$1,500
---------	---------	---------	---------	---------	---------	---------
- ▲ **Type No. 8** — mono bloc barrels of top quality French proof steel. Top-of-the-line model with all details to customer's wishes. Very rare in any condition. Rarity precludes accurate pricing.

POST-WAR MODELS

Note: the model name of the following post-war guns is usually engraved on the side of the gun in front of the safety lever.

CLASSIC MODEL — 12 or 16 ga. with modified and full choke on 70 cm barrels, simple case colored gun with no engraving and plain wood in semi-pistol grip or straight stock, 2 quality stamps.

\$1,250	\$1,000	\$850	\$700	\$600	\$525	\$400
---------	---------	-------	-------	-------	-------	-------

BARONNET-BROUSSARD — 12, 16, or 20 ga. with 70 cm barrels (two-piece stock on 12 and 16 ga.), lightly engraved with satin chrome receiver finish, Broussard model featured 80 cm barrels but was essentially the same, 3 Q. stamps.

\$1,400	\$1,200	\$1,000	\$800	\$675	\$550	\$475
---------	---------	---------	-------	-------	-------	-------

 Add 20% for Broussard model.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

GOVERNEUR MODEL — better engraving and one-piece stock of select walnut, French gray receiver, 12, 16, or 20 ga. Choice of barrel lengths in 12 ga. (70 cm, 72 cm, or 74 cm.) Classic or modern style engraving, 5 quality stamps.

\$1,800	\$1,650	\$1,200	\$1,000	\$750	\$600	\$550
---------	---------	---------	---------	-------	-------	-------

GOVERNEUR PLUME AND PLUME MAGNUM — same as above, but with plume (swamped rib) on Plume Model, plume rib and 76mm chambers included on Plume Magnum Model. Prices about 10% higher than above models due to these having six quality stamps on flats of barrels in spite of being the same basic gun.

RAMBOUILLET MODEL — 12 or 16 ga., double sears in a large key action somewhat similar to the Darne V models stylistically, one-piece stock of select walnut, in semi-pistol grip or straight style, light engraving on color case hardening, choice of rib, 8 quality stamps.

\$1,500	\$1,300	\$1,100	\$900	\$700	\$650	\$575
---------	---------	---------	-------	-------	-------	-------

AMBASSADEUR MODEL — 12 or 16 ga., large key model with double sears. French gray finish on breech with excellent engraving, one-piece stock of good quality walnut, top-of-the-line production model, 10 quality stamps.

\$2,700	\$2,400	\$2,200	\$1,800	\$1,500	\$1,100	\$850
---------	---------	---------	---------	---------	---------	-------

PRESTIGE MODEL — top-of-the-line custom gun, mono bloc barrels of Jacob Holtzer steel with plume rib. Large key action with silent operation and double sears, one-piece stock of best quality walnut, in straight style only, 72 cm barrels, excellent full coverage engraving, eight month minimum wait, 12 quality stamps.

\$3,500	\$3,100	\$2,900	\$2,600	\$2,200	\$1,700	\$1,200
---------	---------	---------	---------	---------	---------	---------

F

FEG

Manufacturer located in Hungary (FEG stands for Fegyver es Gepyar) since the turn of the century. Currently imported and distributed by Interarms located in Alexandria, VA, K.B.I., Inc. located in Harrisburg, PA, and Century International Arms located in St. Albans, VT (see additional listings under the Century International Arms in this text).

PISTOLS: SEMI-AUTO, INTERARMS IMPORTED

All FEG pistols are supplied with two mags.

MARK II AP22 — .22 LR cal., semi-auto double action, 3.4 in. barrel, 8 shot mag., blue finish, black plastic grips, 23 oz. Importation began 1997.

Mfg.'s Sug. Retail	\$269	\$235	\$200	\$175	\$160	\$145	\$130	\$115
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

MARK II AP — .380 ACP cal., semi-auto double action, patterned after the Walther PP, 3.9 in. barrel, 7 shot mag., blue finish, black plastic grips, 27 oz. Importation began 1997.

Mfg.'s Sug. Retail	\$269	\$235	\$200	\$175	\$160	\$145	\$130	\$115
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

MARK II APK — .380 ACP cal., similar to Mark II AP, except is patterned after the Walther PPK/S, 3.4 in. barrel, 7 shot mag., blue finish, black plastic grips, 25 oz. Importation began 1997.

Mfg.'s Sug. Retail	\$269	\$235	\$200	\$175	\$160	\$145	\$130	\$115
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

PISTOLS: SEMI-AUTO, KBI/CENTURY IMPORTED

MODEL PMK-380 — .380 ACP cal., patterned after Walther PP, alloy frame, double action, 4 in. barrel, plastic grips with thumbrest, blued finish, 21 oz. Importation began 1992.

Mfg.'s Sug. Retail	\$235	\$210	\$195	\$180	\$165	\$150	\$135	\$115

ARMINIUS REVOLVERS: DOUBLE ACTION

All pistols under this heading were manufactured in W. Germany under the trademark Arminius. .22 cal. is 8 shot, .32 S&W is 7 shot, all others 6 shot.

MODEL 522TB — .22 LR, blue finish, 4 in. barrel, 8 shot.
 \$130 \$100 \$85 \$75 \$70 \$65 \$60
 Last Mfg.'s Sug. Retail was \$174.

Add \$23 for walnut grips.

722 SERIES — .22 LR, blue (standard) or chrome finish (disc. 1985), 6 in. barrel, 8 shot.
 \$125 \$100 \$90 \$80 \$70 \$65 \$60
 Last Mfg.'s Sug. Retail was \$161.

Add \$23 for walnut grips.
 Add \$49 for .22 LR/.22 Mag. combo.
 Add \$15 for chrome finish.

STANDARD REVOLVER — .22 LR, .22 Mag., .32 Mag. or .38 Spl., 2 or 4 in. barrel, blued finish, fixed sights, without ejector assembly. U.S. mfg. 1989-90.
 \$80 \$70 \$65 \$60 \$55 \$50 \$45
 Last Mfg.'s Sug. Retail was \$101.

Add \$19 for chrome finish (2 in. barrel only).
 Add \$38 for gold plated finish (2 in. barrel only).
 Add \$23 for .22 Combo package (2 cylinders - 4 in. barrel only).
 Models with 4 in. barrels were available in blued finish only.

MODEL 532TB — .32 S&W, blue (standard) or chrome finish (disc. 1985), adj. sights, 4 in. barrel, 7 shot.
 \$145 \$120 \$100 \$80 \$75 \$70 \$65
 Last Mfg.'s Sug. Retail was \$183.

Add \$23 for walnut grips.
 Add \$15 for chrome finish.

MODEL 732B — similar to Model 532TB, except has 6 in. barrel and fixed sights. Imported 1988 only.
 \$120 \$100 \$90 \$80 \$70 \$65 \$60
 Last Mfg.'s Sug. Retail was \$140.

MODEL N-38 (TITAN TIGER) — .38 Spl., blue (standard) or chrome finish (disc. 1985), 2 or 4 in. barrel, fixed sights. Disc. 1990.
 \$130 \$110 \$95 \$80 \$75 \$65 \$60
 Last Mfg.'s Sug. Retail was \$176.

Add \$23 for walnut grips.
 Add \$15 for chrome finish.

ZEPHYR — .38 Spl., 5 shot, aluminum construction, 2 in. barrel, blue finish, checkered grips, 14 oz. Mfg. 1990 only.
 \$145 \$120 \$100 \$80 \$75 \$70 \$65
 Last Mfg.'s Sug. Retail was \$189.

▲ **Lady Zephyr** — similar to Zephyr, except has gold trimmed parts, scrimshawed red rose on ivory polymer grips, and gold case. Mfg. 1990 only.

\$250 \$210 \$180 \$155 \$135 \$115 \$95
 Last Mfg.'s Sug. Retail was \$295.

MODEL 384TB — .38 Spl., blue (standard) or chrome finish (disc. 1985), 6 shot, 4 in. barrel.
 \$150 \$125 \$105 \$85 \$80 \$70 \$65
 Last Mfg.'s Sug. Retail was \$195.

Add \$23 for walnut grips.
 Add \$13 for chrome finish.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

\$495	\$425	\$360	\$300	\$275	\$250	\$225
Last Mfg.'s Sug. Retail was \$587.						

SHOTGUNS: SIDE X SIDE

The models listed below have boxlock actions with added sideplates.

BETA MODEL — 12 ga. only, 2¾ in. chambers, standard model with checkered walnut stock and forearm, ST, ejectors. Imported 1989 only.

\$695	\$625	\$550	\$450	\$375	\$300	\$250
Last Mfg.'s Sug. Retail was \$920.						

This model was replaced by the Beta Lux in 1990.

BETA LUX — 12 ga. only, 3 in. chambers, SST, ejectors, boxlock action, 24, 26, 28, or 30 in. barrels bored F/M, 6.6 lbs. Imported 1990-95.

\$1,100	\$875	\$725	\$625	\$550	\$475	\$400
Last Mfg.'s Sug. Retail was \$1,270.						

Add \$30 for 5 Innerchokes.
Add \$114 for competition trap/pigeon model (disc.)

BETA EUROPE — 12 ga. only, deluxe model with coin finished game scene engraved sideplates, 26½ or 27½ in. barrels with fixed chokes, ejectors, DT or SST, checkered English stock and splinter forearm, 6 lbs. 6 oz. Imported 1989-1990.

\$1,400	\$1,100	\$850	\$700	\$575	\$495	\$450
Last Mfg.'s Sug. Retail was \$1,711.						

Add \$33 for semi-beavertail forend.
Add \$130 for competition trap/pigeon model.

SHOTGUNS: SLIDE ACTION

The models listed below are variations of the same action based on a twin bar slide system, alloy receiver with anti-glare finish (including barrel), rear triggerguard safety, and 2¾ or 3 in. shell interchangeability.

Add \$25 for camouflage wood finish on the models listed below.

MODEL S.D.A.S.S. — 12 ga. only, 3 in. chamber, originally designed for police and self defense use, 8 shot tube mag., 20 or 24½ in. barrel threaded for external choke tubes, approx. 6 lbs. 6 oz. Imported 1989-1990.

\$325	\$285	\$260	\$230	\$195	\$160	\$140
Last Mfg.'s Sug. Retail was \$415.						

This model with 24½ in. barrel is threaded for external multi-chokes which can add up to 6 in. to the barrel length - available for a \$17 extra charge.

▲ **Special Police** — similar to Model S.D.A.S.S. except has special heavy 20 in. cylinder bored barrel VR, cooling jacket, 6 shot mag., rubber recoil pad. Imported 1989-1990.

\$340	\$295	\$265	\$230	\$195	\$160	\$140
Last Mfg.'s Sug. Retail was \$440.						

▲ **Martial** — 12 ga. only, 18, 20, 28, 30, or 35½ (disc. 1989) in. barrel, fixed sights and choke, approx. 6¼ lbs. Imported 1989-1990.

\$330	\$290	\$260	\$225	\$190	\$160	\$140
Last Mfg.'s Sug. Retail was \$424.						

Add \$41 for VR.
Add \$20 for 35½ (disc. 1989) in. barrel.
Add \$33 for multi-choke (plain rib with 1 choke and wrench).
Add \$65 for innerchoke (includes 1 choke and wrench - VR barrel only).

SHOTGUNS: SINGLE BARREL

The models listed below have receivers made out of aluminum alloy, rear triggerguard safety, and matte black finish metal surfaces.

Grading	100%	98%	95%	90%	80%	70%	60%
OMEGA STANDARD — 12, 20 ga., or .410 bore, 3 in. chamber, 26 or 28 (12 ga. only) in. barrel, checkered beech stock and forearm, approx. 5 lbs. 5 oz. Imported 1989-1990.	\$120	\$95	\$80	\$70	\$60	\$55	\$50
	Last Mfg.'s Sug. Retail was \$139.						
▲ Goose Gun — 12 ga. only, similar to Omega Standard, except has a 35½ in. barrel, 6 lbs. Imported 1989-1990.	\$135	\$115	\$90	\$80	\$70	\$60	\$55
	Last Mfg.'s Sug. Retail was \$156.						

FABRI s.n.c.

Manufacturer located in Concesio, Italy (previously located in Brescia). No current importer - the factory should be contacted directly (see Trademark Index) for more information regarding current information and prices on the models listed below.

This Company relocated from Brescia to Concesio during 1969 and underwent a name change from Armi Fabbri to Fabbri s.n.c. during 1989. Currently, Fabbri s.n.c. engravers include Creative Art, Pedersoli, Torcoli, and Francassi. Fabbri manufactures approx. 20-30 guns annually.

SHOTGUNS

SIDE-BY-SIDE SHOTGUN — 12 or 20 ga., one of the world's best current production guns, highest-quality sidelock, ejectors, full engraving. Disc.

Currently, Fabbri SxS shotguns manufactured within the last decade and in mint condition are priced in the \$35,000-\$38,000 range. Deduct \$15,000 for scroll engraving.

O/U SHOTGUN — 12 or 20 ga., top-of-the-line quality with any combination of engraving, wood, and other options. Current retail starts at approx. \$65,000 FOB Italy.

Mint guns mfg. 1967-1983 are currently priced in the \$35,000-\$38,500 range, guns mfg. between 1983-1989 are priced in the \$45,000 range, and mfg. within the last 7 years is currently priced in the \$50,000-\$55,000 range.

FABRIQUE NATIONALE

Manufacturer located in Herstal and Liege, Belgium. Established a contract with John M. Browning in 1900 for exclusive manufacture of various Browning Patent Firearms. In 1992, FN was acquired by GIAT of France.

Also See: Browning Arms under Rifles, Shotguns, and Pistols.

PISTOLS: SEMI-AUTO

For FN models 1900, 1903, 1905, 1910, 1922 (10/22), Baby Model, and the Model 10/71, please refer to the Browning Pistol section in this text.

PISTOLS: HI-POWERS

The F.N. Hi-Power (also known as P-35) was Browning's last pistol design. A single action semi-auto 9mm pistol, it was the first to incorporate a staggered high capacity magazine. It has a 4²/₃₂ in. barrel, 13 shot mag., hammer and mag. safeties, a wide variety of finishes and sight options. It's probably the most widely used military pistol in the world.

PRE-WAR COMMERCIAL HP — 9mm Para., semi-auto pistol, blue, wood grips, tangent rear sight, slotted (original) for stock with tangent rear sight, 13 shot mag.

Tangent sight	\$1,750	\$1,000	\$995	\$750	\$500	\$400	\$375
----------------------	---------	---------	-------	-------	-------	-------	-------

Add \$700 for original flat board stock with attached holster in 98%+ condition.
Add \$350 for "ODIN" reproduction stock.

PRE-WAR MILITARY CONTRACT — mfg. under military contract for various European countries.

Lithuanian Crest	N/A	\$1,750	\$1,400	\$995	\$700	\$600	\$500
Estonian Contract ("E.V." or "K.L.")	N/A	\$1,750	\$1,400	\$995	\$700	\$600	\$500

Since so many variations have been manufactured for military contract, the listing above represents the more interesting (and collectable) models.

WWII Production: Waffenamt Proofed

There is a range of finishes during Nazi production that varies from the excellent pre-war commercial finish on early guns assembled from captured parts to the roughly milled, poorly finished specimens mfg. late in the war. Values below assume all major parts (slide, barrel, and frame) are matching.

In recent years, many Nazi production Hi-Powers have had the rear grip strap milled out and slotted to accept a shoulder stock. Careful observation is advised before purchasing a "rare" (and expensive) slotted and tangent sight specimen.

- ▲ **Type I: Tangent sights — slotted** — taken from existing pre-war Belgian army pistols, quality is excellent, correct ser. range is quite limited, approx. 40,000-47,000. Ser. range for production under German occupation is 50,001-53,000. All are proofed WaA 613.

\$2,950	\$2,300	\$1,600	\$1,200	\$1,000	\$750	\$500
---------	---------	---------	---------	---------	-------	-------

- ▲ **Type II** — tangent rear sight only, approx. 90,000 mfg. with generally good quality finish.

\$1,650	\$1,150	\$900	\$750	\$500	\$400	\$325
---------	---------	-------	-------	-------	-------	-------

- ▲ **Type III Standard Fixed Sights**

\$875	\$700	\$550	\$400	\$300	\$275	\$240
-------	-------	-------	-------	-------	-------	-------

POST-OCCUPATION PRODUCTION — commercial mfg. began 1944, first imported with BAC markings in 1954 (see Browning HP section). Military mfg. from 1944-present, early (1944) models are identifiable by an "A" serial number prefix and are not fitted with a magazine safety. In 1947, the rear slide bushing became hardened by a new heat treatment process. Other design modifications were added in 1950. Many thousands manufactured under various government contracts.

Add \$50 if round hammer.

Add \$200-\$1,000 for military pistols with crests, depending on condition and variation.

- ▲ **Tangent sight only**

\$800	\$700	\$500	\$400	\$350	\$300	\$250
-------	-------	-------	-------	-------	-------	-------

Add \$100 for "T" prefix.

- ▲ **Tangent sight** — slotted for stock.

\$1,400	\$1,200	\$995	\$775	\$500	\$450	\$300
---------	---------	-------	-------	-------	-------	-------

Add \$150 for "T" prefix.

- ▲ **Fixed sight** — ring hammer, most ring hammers have "T" prefix.

\$695	\$595	\$495	\$395	\$325	\$300	\$275
-------	-------	-------	-------	-------	-------	-------

MUSCAT AND OMAN CONTRACT

- ▲ **First Model** — 9 guns.

\$6,000	\$5,000	\$3,000
---------	---------	---------

- ▲ **Second Model** — 27 guns.

INGLIS MANUFACTURED HI-POWERS — SEE INGLIS SECTION.**RIFLES****MODEL 1949** — 7mm, 7.65mm, 7.92mm, or .30-06 cal., semi-auto, gas operated 10 shot mag., 23 in. barrel, military rifle, tangent rear sight, military stock. Mfg. 160,000.

\$425	\$350	\$275	\$250	\$225	\$185	\$155
-------	-------	-------	-------	-------	-------	-------

Add 10% for .30-06 cal.

Add 100% for sniper variation.

Grading 100% 98% 95% 90% 80% 70% 60%

FN SNIPER RIFLE (MODEL 30 - BOLT ACTION) — .308 cal., this model was a Mauser actioned Sniper Rifle equipped with 20 in. extra heavy barrel, flash hider, diopter sights, Hensoldt 4X scope, hard case, bipod, and sling. 51 were imported into the U.S. with the last retail price (1988) being \$2,950. When encountered today, values will range from \$3,500 and higher (depending on condition).

RIFLES: FAL/LAR/FNC SERIES

After tremendous price increases between 1985-1988, Fabrique Nationale decided in 1988 to discontinue this series completely. Not only are these rifles not exported to the U.S. any longer, but all production has ceased in Belgium as well. The only way FN will produce these models again is if they are given a large military contract - in which case a "side-order" of commercial guns may be built. 1989 Federal legislation regarding this type of paramilitary design also helped push up prices to their current level. FAL rifles were also mfg. in Israel by I.M.I.

F.N. FAL — semi-auto, French designation for the FN L.A.R. (light automatic rifle), otherwise similar to LAR. See values for LAR model listed below.

F.N. L.A.R. COMPETITION (LIGHT AUTOMATIC RIFLE) — .308 Win. (7.62x51), semi-auto, competition rifle with match flash hider, 21 in. barrel, adj. 4 position fire selector on automatic models, wood stock, aperture rear sight adj. from 100-600 meters, 9.4 lbs. Mfg. 1981-83.

\$2,000 \$1,750 \$1,600 \$1,450 \$1,300 \$1,175 \$1,000

This model was designated by the factory as the 50.00 Model.

Mid-1987 retail on this model was \$1,258. The last Mfg.'s Sug. Retail was \$3,179 (this price reflected the last exchange rate and special order status of this model).

▲ **Heavy barrel rifle** — barrel is twice as heavy as standard L.A.R., includes wood or synthetic stock, short wood forearm, and bi-pod, 12.2 lbs. Importation disc. 1988.

\$2,500 \$2,150 \$1,850 \$1,500 \$1,350 \$1,200 \$1,050

Add \$400 for walnut stock.

There were 2 variations of this model. The Model 50.41 had a synthetic butt stock while the Model 50.42 had a wood butt stock with steel butt plate incorporating a top extension used for either shoulder resting or inverted grenade launching.

Mid-1987 retail on this model was \$1,497 (Model 50.41) or \$1,654 (Model 50.42). The last Mfg.'s Sug. Retail was \$3,776 (this price reflected the last exchange rate and special order status of this model).

▲ **Paratrooper rifle** — similar to L.A.R. model, except has folding stock, 8.3 lbs. Mfg. 1950-1988.

\$1,200 \$1,000 \$850 \$750 \$650 \$575 \$500

There were 2 variations of the Paratrooper L.A.R. Model. The Model 50.63 had a stationary aperture rear sight and 18 in. barrel. The Model 50.64 was supplied with a 21 in. barrel and had a rear sight calibrated for either 150 or 200 meters. Both models retailed for the same price.

Mid-1987 retail on this model was \$1,310 (both the Model 50.63 and 50.64). The last Mfg.'s Sug. Retail was \$3,239 (this price reflected the last exchange rate and special order status of this model).

FNC MODEL — .223 Rem. (5.56mm), lightweight combat carbine, 18½ in. barrel, NATO approved, 30 shot mag., 8.4 lbs. Disc. 1987.

\$1,100 \$975 \$825 \$725 \$625 \$550 \$500

Add \$50 for Paratrooper model (16 or 18½ in. barrel).

While rarer, the 16 in. barrel model incorporated a flash hider that did not perform as well as the flash hider used on the standard 18½ in. barrel.

Mid-1987 retail on this model was \$749 (Standard Model) and \$782 (Paratrooper Model). The last Mfg.'s Sug. Retail was \$2,204 (Standard Model) and \$2,322 (Paratrooper Model) - these prices reflected the last exchange rate and special order status of these models.

F.N. MAUSER SPORTER DELUXE — available in popular American and European calibers, 24 in. barrel, adj. sight, checkered pistol grip stock. Mfg. 1947-1963.

\$650 \$550 \$495 \$460 \$300 \$275 \$250

FEDERAL ORDNANCE, INC.

Previous manufacturer/importer/distributor located in South El Monte, CA from 1966-1992. Brickley Trading Co. bought the remaining assets of Federal Ordnance, Inc. in late 1992, and is currently importing various firearms from overseas.

Federal Ordnance imported and distributed both foreign and domestic military handguns and rifles until 1992. In addition, they also fabricated firearms using mostly newer parts. Listed below are those models which were recently manufactured or remanufactured.

In addition to the models listed below, Fed. Ord. also distributed used M-1 Carbines, AK-47s, SKSs, Finnish 39s, Lee Enfields, Baby Carbines, P-14s, M-1 Garands, Hakims, Mauser 98s, and other rifles. Most of these, if they are in good to excellent overall condition, typically sell in the \$165-\$400 range (except the M-1 Garand), depending on the model and quality.

PISTOLS

In addition to the Broomhandle models listed below, Federal Ordnance also manufactured other special editions. These models include the British Model, Cut-Away, Cartridge Counter, Para La Guerra, and others. Prices are in the \$800-\$950 range (retail).

MODEL 714 BROOMHANDLE — 7.63 Mauser or 9mm Para. cal., 5½ in. barrel, new frame, exterior completely refinished, 10 shot detachable mag., “fair” bore, adj. rear sight. Mfg. 1986-1991.

\$550	\$500	\$450	\$400	\$350	\$325	\$300
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$820.

Add \$100 for new barrel.

▲ **Model 714 Para La Guerra** — 7.63 Mauser or 9mm Para., remanufactured to duplicate Spanish Civil War configuration Broomhandle, includes 10 in. barrel with “Para La Guerra” engraved on side. Mfg. 1990-91 only.

\$575	\$525	\$450	\$400	\$350	\$325	\$300
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$890.

▲ **Model 714 Bolo** — similar to Model 714 Broomhandle, except has smaller grips, 3.9 in. barrel, 10 shot mag. standard. Mfg. 1988 only.

\$550	\$500	\$450	\$400	\$350	\$325	\$300
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$890.

STANDARD BROOMHANDLE — 7.63 Mauser or 9mm Para. cal., refurbished (new barrels, completely refinished, etc.) C-96 pistols, replaced springs, includes original Chinese shoulder/holster stock. Disc. 1991.

\$525	\$485	\$450	\$420	\$390	\$380	\$360
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$735.

Subtract \$150 without shoulder/holster stock.

▲ **Standard Bolo** — similar to Standard Broomhandle, except Bolo configuration (3.9 in. barrel and smaller grips). Includes original Chinese shoulder/holster stock. Mfg. 1990-91 only.

\$480	\$450	\$420	\$390	\$380	\$370	\$360
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$530.

RANGER 1911A1 GI — .45 ACP, 5 in. barrel, 7 shot mag., steel construction throughout, checkered walnut grips, 40 oz. Mfg. 1988-92.

\$385	\$350	\$310	\$280	\$260	\$240	\$200
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$440.

Add \$20 for Ranger Extended Model (40 oz. - new 1990).

Add \$40 for Ranger Ambo (ambidextrous safety, 40 oz. - new 1990).

Add \$15 for lightweight Ranger Lite Model (32 oz. - new 1990).

These pistols are patterned after the Colt 1911A1 Govt. Model.

▲ **Ranger Ten** — 10mm cal., otherwise similar to regular Ranger 1911A1. Mfg. 1990-91 only.

\$675	\$525	\$475	\$450	\$420	\$395	\$370
-------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$780.

RANGER SUPERCOMP — .45 ACP or 10mm cal., compensated variation of the Ranger 1911A1 with 6 in. compensated barrel, slide, tuned trigger, and other competition features, 42 oz. Mfg. 1990-91 only.

\$1,250	\$875	\$775	\$675	\$600	\$550	\$495
---------	-------	-------	-------	-------	-------	-------

Last Mfg.’s Sug. Retail was \$1,390.

Add \$10 for 10mm cal.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

THE RANGER ALPHA — .38 Super, 10mm, or .45 ACP cal., 5 or 6 in. barrel, patterned after the Colt Govt. Model. Mfg. 1990-91 only.

\$895	\$775	\$675	\$575	\$475	\$425	\$380

-------	-------	-------	-------	-------	------	------

FERLACH GUNS

Includes those firearms manufactured in Ferlach, Austria from 1558 to present. Currently imported and sold by Adler Arms located in Pittsburgh, PA (a complete Ferlach catalog is available for \$10 - see Adler Arms listing in the Trademark Index).

Many people are confused that Ferlach is a trademark - it is not. Rather, it is a small village in Austria where a gun guild was started as early as 1558. At that time, it was absolutely necessary that all the people involved in fabricating a firearm were located together in close proximity. This enabled the barrel maker, the stock maker, and the lock mechanism maker to work together closely to ensure that everyone was performing their task(s) correctly, effectively and efficiently. As the individual skills became better and more refined, more and more firearms were manufactured. Eventually, individual gunsmiths began to put their name on the barrel or frame of those guns which they had either manufactured solely or with the help of their fellow Ferlach craftsmen. Since all Ferlach firearms are essentially hand made per individual special order, very few are exactly alike. In the past, the gunsmiths of Ferlach have produced almost every type of shoulder arm imaginable, including such modern weapons as superposed and juxtaposed rifles and shotguns, hammerless drillings, repeating rifles, 3 barrel rifles, combination guns, 4 barrel rifles/shotguns/combo guns (called Vierlings), hammer guns of every type, etc. Some of these specimens represent the highest refinement in the gunmakers trade. Because of the almost unlimited variety of Ferlach variations, it is recommended that a COMPETENT appraisal is procured before buying or selling a specimen.

As is the case with many other European weapons, those models with desirable American features will generally outperform those with European specifications (i.e. a Ferlach sidelock combination gun that is 20 ga. x .243 Win. will be more valuable than a similar specimen chambered for 16 ga. x 5.6 by 50Rmm with sling swivels). Original condition and overall beauty are the primary factors to consider when contemplating buying or selling a Ferlach longarm. Other considerations include: type of action, difficulty of fabrication (Vierlings are very complicated to construct), caliber/gauge desirability, notoriety of gunsmith on barrel legend, elaborateness of embellishments, condition, rarity, accessories, and any provenance a specimen might have.

Today's master gunsmiths of Ferlach carry on the old world tradition of quality in every respect. Most guns manufactured today are by individual special order with a wide range of calibers/gauges and other special features and options. As of this writing, these gunsmiths in alphabetical order are: LUDWIG BOROVIK, JOHANN FANZOJ, WILFRIED GLANZNIK, JOSEF HAMBRUSCH, KARL HAUPTMANN, GOTTFRIED JUCH, JOSEF JUST, JAKOB KOSCHAT, JOHANN MICHELITSCH, WALTER OUTSCHAR, HERBERT SCHEIRING, BENEDIKT WINKLER, AND JOSEF WINKLER. Anyone wishing to contact these master gunmakers should either write to the guild or address them individually at: Ferlach, Waagplatz, 6, A-9170 Ferlach, AUSTRIA. Please allow at least 4-6 weeks for a response.

FERLIB

Manufacturer located in Gardone V.T., Italy. Exclusively imported by Hi-Grade Imports, located in Gilroy CA. Currently distributed by New England Arms Co. located in Kittery Point, ME, and Hi-Grade Imports located in Gilroy, CA.

Add \$150 for original case.

Add \$250 for stock.

Add \$300 for canvas holster stock.

FIAS

Shotgun manufacturer located in Brescia, Italy. Please contact FIAS directly (see listing in Trademark Index) to obtain current information on their models and prices.

FINNISH LION

Manufactured by Valmet (now Tikka) located in Sweden. Limited importation into the U.S. by Mandall's Shooting Supplies, Inc. in Scottsdale, AZ.

RIFLES

MATCH RIFLE — .22 LR, bolt action, single shot, 29 in. barrel, extended aperture sight, globe front sight, thumbhole stock, adj. hook butt. Mfg. 1937-1972.

\$495 \$415 \$360 \$305 \$250 \$210 \$195

CHAMPION FREE RIFLE — .22 LR, bolt action, single shot, 29 in. barrel, double set trigger, full target stock and accessories. Mfg. 1965-1972.

\$580 \$495 \$440 \$385 \$330 \$290 \$265

STANDARD ISU TARGET RIFLE — .22 LR, bolt action, single shot, 27 in. barrel, full target stock and accessories. Mfg. 1966-1977.

\$330 \$275 \$250 \$205 \$180 \$165 \$150

TARGET RIFLE — .22 LR, target rifle with adj. stock and trigger, bolt action, single shot, aperture sights.

Mfg.'s Sug. Retail \$795 \$725 \$595 \$495 \$440 \$385 \$340 \$295

FIOCCHI OF AMERICA, INC.

Importer and distributor located in Ozark, MO.

Fiocchi of America previously imported Pardini target pistols until 1990, and continues to manufacture a wide variety of ammunition domestically. Fiocchi also imported Antonio Zoli shotguns until 1988. These trademarks can be found in their respective sections of this text.

FIREARMS INTERNATIONAL (F I)

Previous importer/ assembler located in Washington, D.C.

F.I. imported various shotguns and pistols including the Star D and Iver Johnson Pony handguns. F.I. sold less than 100 .380 ACPs that were marked Colt before the Mustang was introduced - these are rare. While some models are relatively rare, collectability to date has been minimal and most models sell in the \$125-\$250 range.

FORT WORTH FIREARMS

Manufacturer located in Fort Worth, TX beginning 1995.

PISTOLS: SEMI-AUTO, .22 CAL.

MATCH MASTER STANDARD — .22 LR cal., 3⁷/₈, 4¹/₂, 5¹/₂, 7¹/₂, or 10 in. bull barrel, double extractors, includes upper push button and standard mag. release, beveled mag. well, angled grip, flared slide, low profile frame. New 1995.

FOX, A. H.

Originally manufactured in Philadelphia, PA 1903-1930, and in Utica, NY from 1930-approx. 1946. Manufactured by Savage 1930-1988. The A. H. Fox trademark was brought to life once again during 1993 when the Connecticut Shotgun Manufacturing Company located in New Britain, CT began producing a 20 gauge in 5 different grades.

Depending on the remaining A.H. Fox factory data, a factory letter authenticating the configuration of a particular Fox shotgun may be obtained by contacting John T. Callahan (see Trademark Index for listings and address). The charge for this service is \$20.00/shotgun - please allow 2-4 weeks for an adequate response.

Mr. Ansley H. Fox first started manufacturing shotguns in circa 1896. This first company was called the Fox Gun Co. located in Baltimore, MD. Relatively few guns were made and surviving specimens today are very rare. After this venture, he was employed by the Baltimore Gun Co. for several years (circa 1900-1903). Following this period, he formed the Philadelphia Gun Co. where the predecessors to the A.H. Fox Gun Co. models were manufactured. These Philadelphia Gun Co. models (circa 1904) were the same as the newer Fox shotguns except that the hinge pin was removed. Sources indicate that the lowest grade was an "A" with the highest being an "E" (fully engraved and ultra rare). Following this tenure, Mr. Fox went on to form the A.H. Fox Gun Co. that was started approx. 1905. In addition to being an entrepreneur and trend setter, Mr. Fox also had the reputation of being an expert shot in his own right, winning more than a few events on the East Coast around the turn of the century.

The A.H. Fox Gun Company of Philadelphia, Pennsylvania, began production in 1905 and produced high quality double barrel shotguns until 1930. The Savage Arms Company, then of Utica, New York, acquired the Fox Company and produced these guns until 1942, when all but the utilitarian model B series guns were discontinued.

A.H. Fox guns are rapidly being considered an American classic comparable to L.C. Smith, Parker, and others. Collector interest is high and will undoubtedly grow. The guns do not command quite as high a price as the Smith and Parker guns, but represent a fine investment collectible value.

The Savage made guns from 1930-1942 usually are valued at about 25% less than the early A.H. Fox guns. The recent production B series are just not in the same class and are obviously not intended to be. They are lower priced by today's standards and are designed as a utility grade hunting gun.

FOX COMPANY CHRONOLOGY

1906 - Company formed January 1906, A, B & C Grades introduced in 12 ga. only. D and F Grades introduced in 12 ga. in 1907. Ejector guns introduced in 1908. 1910 saw the introduction of the 12 ga. Sterlingworth - William H. Gough takes over as Chief of Engraving. Ansley Fox resigns in 1911 - first catalog showing Sterlingworth Model (called Model 1911). A-F Grades released in 16 and 20 ga. during 1912, as well as the addition of a 20 ga. Sterlingworth. 16 ga. Sterlingworth introduced in 1913. Fox/Kautsky single trigger introduced in 1914 - engineering transition complete. During 1915, the XE Grade was introduced. The B Grade was dropped in 1918. Single barrel trap guns (J, K, and L Grades) were introduced in 1919. 1920 saw the introduction of the M Grade single barrel trap. In 1922, both the G and HE Grades were released. Beavertail forend and vent. rib

were introduced in 1927. 1929 was the Savage buy-out (November), GE Grade dropped. Company moved from Philadelphia, PA to Utica, NY in 1930. Skeeter Grade introduced in 1931 while the 20 ga. HE Grade was disc. 1932 saw the introduction of both the Trap Grade Double and SP Grade. Wildfowl Grade was introduced in 1934. 1935 was the last year of the K and L single barrel trap guns. 1937 was the last year for the J Grade single barrel trap gun. The last 16 and 12 ga. Sterlingworths were built in 1939. The outbreak of the war in 1940 saw the last FE Grade shipped, the Wildfowler Grade dropped, and the introduction of the Model B. 1942 was the last retail catalog. Factory records indicate that the last 12 ga. was shipped in 1945 and the last 20 ga. was shipped during 1946 (SP Grade shipped in December, 1946). However, guns continued to be assembled from left-over parts and were shipped to customers as late as the 1960s.

FOX SERIAL NUMBER ASSIGNMENTS

The publisher wishes to express his thanks to Mr. Gurney Brown for providing the model serialization and years of mfg. in this section.

- Ser. # range 50,000-200,000 — 12 ga. Sterlingworth — 111,556 mfg.
- Ser. # range 350,000-400,000 — 16 ga. Sterlingworth — 28,481 mfg.
- Ser. # range 250,000-300,000 — 20 ga. Sterlingworth — 21,304 mfg.
- Ser. # range 1-50,000 — 12 ga. A-F Grades — 35,280 mfg.
- Ser. # range 300,000-350,000 — 16 ga. A-F Grades — 3,875 mfg.
- Ser. # range 200,000-250,000 — 20 ga. A-F Grades — 3,974 mfg.
- Ser. # range 400,000-400,568 — 12 ga. Single Barrel Traps — 568 mfg.

FOX MODELS BY YEARS IN MFG.

SHOTGUNS: SxS - CURRENT MFG.

Delivery time for custom orders is currently 10-14 months, depending on gauge and grade.

The models below are manufactured by the Connecticut Manufacturing Co. located in New Britain, CT. These finely made shotguns have the following standard features: automatic safety, auto ejectors, DTs, Chromox 26, 28, or 30 in. barrels, individual barrel chokings, 2¾ in. chambers, scalloped receiver, Turkish Circassian walnut with hand-rubbed oil finish, choice of straight, semi-pistol or full-pistol grip stock with custom dimensions, splinter forearm, ivory bead sights. Special order options are as follows: Krupp steel barrels (\$200), Fox SST (\$1,000), walnut upgrades, custom initials (\$200-\$250), personalized gold inlays on barrel (\$500), skeleton steel buttplate (\$650), beavertail forearm (\$650), and traditional leather trunk case with accessories (\$750). Multi-barrel sets available.

Add \$1,000 for 28 ga. and .410 bore guns listed below (except Exhibition Grade).

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

CE GRADE — 16 (new 1995), 20, 28 ga. (new 1995), or .410 bore (new 1995), engraved with fine scroll and game scenes, Grade I Turkish Circassian walnut. New 1993.

Mfg.'s Sug. Retail	\$9,500	\$9,500	\$7,500	\$5,650	\$5,050	\$4,300	\$3,350	\$2,700
--------------------	---------	---------	---------	---------	---------	---------	---------	---------

Grading	100%	98%	95%	90%	80%	70%	60%					
XE GRADE — ga.'s similar to CE Grade, scroll work and engraved game scenes, Grade II Turkish Circassian walnut. New 1993. Mfg.'s Sug. Retail	\$11,000	\$11,000	\$9,000	\$7,300	\$6,000	\$4,850	\$3,700	\$3,000				
DE GRADE — ga.'s similar to CE Grade, intricate and extensive engraving, Grade III highly figured Turkish Circassian walnut. New 1993. Mfg.'s Sug. Retail	\$13,500	\$13,500	\$10,350	\$8,600	\$7,300	\$6,000	\$4,850	\$3,500				
FE GRADE — ga.'s similar to CE Grade, gold inlays surrounded by different types of scroll work, Grade IV highly figured Turkish Circassian walnut with finest checkering. New 1993. Mfg.'s Sug. Retail	\$18,500	\$18,500	\$15,000	\$11,750	\$9,250	\$7,750	\$6,000	\$4,250				
EXHIBITION GRADE — ga.'s similar to CE Grade, individually built per customer specifications on a "cost-no-object" basis, includes best-quality leather trunk case with full accessories, Exhibition Grade Turkish Circassian walnut. New 1993. Mfg.'s Sug. Retail	\$26,000	\$26,000	\$21,000	\$16,750	\$13,500	\$10,250	\$8,000	\$6,250

F **SHOTGUNS: SxS - DISC.**

STERLINGWORTH SxS — 12, 16, or 20 ga., 26, 28, or 30 in. barrels, various chokes, boxlock, extractors, double trigger, checkered pistol grip stock. Mfg. 1905-1930.

\$1,495	\$1,250	\$1,050	\$875	\$750	\$650	\$500	\$450	\$400	\$365	\$325	\$275
---------	---------	---------	-------	-------	-------	-------	-------	-------	-------	-------	-------

Add 33% for auto ejectors.
Add 50% for 20 ga.

A single trigger is a very desirable option on this model.

Ser. no. range on 12 ga. Sterlingworths is 50,000-200,000, 16 ga. is 350,000-400,000, and 20 ga. is 250,000-300,000.

STERLINGWORTH DELUXE — similar to Sterlingworth, with recoil pad and ivory bead, 32 in. barrel available.

\$1,875	\$1,500	\$1,200	\$995	\$900	\$825	\$725	\$650	\$550	\$475	\$425	\$395
---------	---------	---------	-------	-------	-------	-------	-------	-------	-------	-------	-------

Add \$200 for auto ejectors.
Add 50% for 20 ga.

A single trigger was not an option on this model.

STERLINGWORTH SKEET — similar to Sterlingworth, with 26 or 28 in. skeet boring, straight grip stock.

This model is very scarce (only several are known) and the extreme rarity factor precludes accurate price evaluation.

SUPER HE GRADE — 12 ga., 2¾ (very rare) or 3 in. chambered long range gun, 30 and 32 in. full choke, auto ejectors, otherwise similar to Sterlingworth.

\$4,500	\$4,000	\$3,500	\$3,000	\$2,500	\$2,100	\$1,750	\$1,600	\$1,500	\$1,350	\$1,150	\$1,000
---------	---------	---------	---------	---------	---------	---------	---------	---------	---------	---------	---------

Add \$300 for SST.

Original 3 in. chambered HE grades are marked "not warranted, see instruction tag" on barrel flats. The HE grade was also manufactured in 20 ga. but is extremely rare. 2¾ in. chambers are rarer than 3 in. guns in this model.

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%
------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

HIGHER GRADE MODELS (A-F) — the following higher grade Fox shotguns are similar to the Sterlingworth in configuration. The grades differ in engraving and inlays, grade of wood and general workmanship. The E designation means auto ejectors.

Early A and B grades have very little engraving and are much less desirable than later models. Values below are for later guns.

VALUES BELOW ARE FOR 12 GA.

Add 30% for 16 ga. (made on same frame as 20 ga.).

Add 60% for 20 ga.

Add \$200-\$1,000 for vent. rib, depending on grade.

Add \$200-\$1,000 for SST, depending on grade.

Add \$200-\$1,000 for beavertail forearm, depending on grade.

Note: These guns were disc. in 1942 by Savage Arms after they mfg. them for 12 years.

Pre-1930 guns were made by A.H. Fox Company.

▲ **A Grade**

▲ **FE Grade (ejectors)** — top-of-the-line model, only infrequently encountered.

\$25,000	\$20,000	\$15,000	\$12,000	\$11,000	\$10,000	\$9,500	\$9,000	\$8,500	\$8,000	\$7,500	\$7,000
----------	----------	----------	----------	----------	----------	---------	---------	---------	---------	---------	---------

SINGLE BARREL TRAP — 12 ga., 30 or 32 in. vent. rib barrel, full choke, boxlock, auto ejector, checkered trap style stock and recoil pad. The grades differ in wood, engraving, and overall quality. ME grade is custom built and extremely high quality with gold inlays. These models were disc. 1942. 568 single barrel trap guns were mfg. between 1932-1942 and have a ser. range of 400,000-400,568, with Monte Carlo stock.

Even though trap guns may be rarer than their SxS counterparts, to date their desirability is less since there are simply fewer collectors.

Grading	100%	98%	95%	90%	80%	70%	60%
MODEL B-DL — similar to model B-ST, with satin chrome receiver, select wood. Mfg. 1962-1965.	\$315	\$275	\$240	\$220	\$195	\$165	\$140
MODEL B-DE — similar to B-DL, with less checkering. Mfg. 1965-1966.	\$295	\$255	\$230	\$210	\$180	\$155	\$125
MODEL B-SE — 12, 20 ga., or .410 bore, single trigger, selective ejectors, vent. rib, beavertail forend, select walnut. Mfg. 1966-88.	\$415	\$370	\$325	\$280	\$240	\$210	\$180

Last Mfg.'s Sug. Retail was \$525.

Add 20% for .410 bore.

Even though there were multiple series designations assigned to this model, there seems to be little difference in desirability. For that reason, other designations will be priced similarly to values shown above.

FRANCHI, LUIGI

Manufacturer located in Brescia, Italy since mid-1860s. This trademark has been imported for approx. the past 30 years. Currently imported exclusively by American Arms, Inc. located in North Kansas City, MO. Some models were previously imported by FIE firearms located in Hialeah, FL.

Also see Sauer/Franchi heading in the S section.

RIFLES

CENTENNIAL SEMI-AUTO — .22 LR, 21 in. barrel, open sight to commemorate Franchi's 100th anniversary. Mfg. 1968 only.

	\$330	\$250	\$220	\$195	\$165	\$150	\$140

STANDARD MODEL (48/AL) — 12, 20, or 28 (new 1996) ga., 24, 26, 28, or 30 (disc. in 1990) in. VR barrel, recoil operated, alloy frame, checkered pistol grip stock, VR standard, Franchokes became available in 1989, 12 ga., 6 lbs. 9 oz. and 20 ga., 5 lbs. 6 oz. Mfg. 1950-present.

Mfg.'s Sug. Retail	\$649	\$500	\$385	\$300	\$270	\$250	\$230	\$210
---------------------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------

Add \$76 for 28 ga.

Add \$30 for 12 ga. 24 in. slug barrel (disc. 1994).

Subtract \$50 if without Franchokes.

Starting in 1990, black receiver, gold accents, and Franchokes became standard.

STANDARD MAGNUM (48/AL) — similar to Standard, except 28 in. (disc. 1988) or 32 in. VR barrel, Mag. chamber, recoil pad, Mfg. 1954-1990.

\$415	\$360	\$300	\$270	\$250	\$230	\$210
--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$482.

This model was slated to be replaced with the Combo S/T - however, while advertised, the Combo S/T was never mfg.

HUNTER MODEL (48/AL) — similar to Standard, except etched receiver, better wood, VR standard, Franchokes became available in 1989. Mfg. 1950-1990.

\$415	\$360	\$300	\$270	\$250	\$230	\$210
--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$482.

Add \$35 for internal Franchokes (3).

This model was imported exclusively by FIE Firearms located in Hialeah, FL.

HUNTER MAGNUM — mfg. 1954-1973.

\$430	\$380	\$370	\$340	\$315	\$290	\$275
--------------	--------------	--------------	--------------	--------------	--------------	--------------

PRESTIGE MODEL — 12 ga. only, gas operated, vent. rib, various barrel lengths, alloy receiver, Franchokes became available in 1989. Imported 1985-1989.

\$575	\$475	\$395	\$325	\$310	\$295	\$275
--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$720.

Add \$40 for internal Franchokes (3).

This model was imported exclusively by FIE Firearms located in Hialeah, FL.

▲ **Turkey Model** — similar to Prestige Model except has dull matte black finish, Franchokes standard. Imported 1989 only.

\$615	\$515	\$425	\$350	\$320	\$300	\$280
--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$760.

This model was imported exclusively by FIE Firearms located in Hialeah, FL.

ELITE MODEL — same general specifications as the Prestige Model, only etched receiver, Franchokes became available in 1989. Imported 1985-1989.

\$595	\$500	\$425	\$350	\$320	\$300	\$280
--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$740.

Add \$45 for internal Franchokes (3).

This model was imported exclusively by FIE Firearms located in Hialeah, FL.

610 VS — 12 ga., incorporates gas-operated Variopress System, adjusts for both 2¾ and 3 in. shells, 4 lug rotating breech bolt, alloy frame, non-glare finish, 26 or 28 in. VR barrels with Franchokes, checkered walnut stock and forearm. Importation began 1997.

Mfg.'s Sug. Retail	\$750	\$650	\$550	\$425	\$325	\$275	\$250	\$225
---------------------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------

Add \$45 for engraved receiver and bolt (Model 610 VSL).

SPAS-12 — 12 ga., 2¾ in. chamber, combat shotgun that offers pump or semi-auto operation, 5 (new 1991) or 8 (disc.) shot tube mag., alloy receiver, synthetic stock with built-in pistol grip (limited quantities were also mfg. with a folding stock or metal fixed stock), one-button switch to change from semi-auto to slide action operation, 21½ in. barrel, 8¾ lbs. Importation disc. 1994.

\$595	\$495	\$410	\$360	\$320	\$300	\$280
--------------	--------------	--------------	--------------	--------------	--------------	--------------

Last Mfg.'s Sug. Retail was \$769.

This model was imported exclusively by FIE Firearms located in Hialeah, FL until 1990.

F

Grading**100% 98% 95% 90% 80% 70% 60%**

SPAS-15 — 12 ga. only, 2 $\frac{3}{4}$ in. chamber, operates as either semi-auto or slide action that is convertible with a one-button switch, 6 shot detachable box mag., 21 $\frac{1}{2}$ in. barrel, lateral folding skeleton stock, carrying handle, 10 lbs. Limited importation 1989 only.

This model had very limited importation (less than 200) as the BATF disallowed further importation almost immediately. Even though the retail was in the \$700 range, demand and rarity has pushed prices past the \$2,000 level already.

SAS-12 — 12 ga. only, 3 in. chamber, slide action only, synthetic stock with built-in pistol grip, 8 shot tube mag., 21 $\frac{1}{2}$ in. barrel, 6.8 lbs. Imported 1988-90 only.

Note: Imperial Monte Carlo Extra is currently being mfg. on special order only; the other models are disc.

FRANCOTTE, AUGUSTE & CIE. S.A.

Manufacturer located in Leige, Belgium since 1805. Currently imported by Armes De Chasse located in Hertford, NC. Previously imported by VL&O between 1900-1930s, Abercrombie & Fitch until approx. 1962.

It is important to note that original A. Francotte SxS rifles and shotguns should exhibit the definitive "crown over AF" proofmark on water table.

REVOLVERS

Francotte manufactured Pryse-type revolvers at the end of the previous century, and these revolvers bore the name of the well-known British retailer. Encountered only infrequently domestically, these specimens found overseas are usually priced in the \$150-\$650 range.

RIFLES

All newly mfg. rifles in this section are custom made to the purchaser's individual specifications.

SHOTGUNS

All newly manufactured shotguns in this section are custom made to purchaser's individual specifications. Basic types listed below are also available in 24 or 32 ga. upon special order. Auguste Francotte does not manufacture guns by model - all guns are custom order.

Original A. Francotte SxS shotguns must have the "Francotte Choke Bore" on the water table. Be wary of fake barrel and frame markings, as some guns have recently surfaced that are not Francotte, but have the Francotte name.

BOXLOCK SxS — 12, 16, 20, 28 ga., or .410 bore, premium grade Belgium side-by-side, double triggers standard, auto ejectors, English scroll engraving, Anson & Deeley boxlock action.

MINI-REVOLVERS: STAINLESS STEEL

Because Freedom Arms' manufacturing capacity has been maximized due to the success of the .454 Casull revolver, the mini-revolver series was discontinued beginning 1989. As a result, prices have escalated on these models due to no production and normal demand.

FA-S-22LR (PATRIOT) — .22 LR cal., 5 shot, 1, 1 $\frac{3}{4}$ (disc. 1988), or 3 (disc. 1988) in. barrel, Hi-Gloss finish.
\$245 \$200 \$150

Last Mfg.'s Sug. Retail was \$153.

Add \$15 for 3 in. barrel model (FA-BG-22LR, Minute-Man, disc. 1988).

FA-S-22M (IRONSIDES) — .22 Mag. cal., 4 shot, 1, 1 $\frac{3}{4}$ (disc. 1988), or 3 in. barrel, Hi Gloss finish.
\$295 \$225 \$185

Last Mfg.'s Sug. Retail was \$177.

Add \$43 for 3 in. barrel model (Bostonian).

FA-S-22-LR BUCKLE/REVOLVER COMBINATION — .22 LR, 1 in. barrel, pistol is housed in belt buckle.
\$275 \$225 \$185

Last Mfg.'s Sug. Retail was \$193.

▲ .22 Mag. cal.

\$325 \$265 \$215

Last Mfg.'s Sug. Retail was \$216.

CASULL SA REVOLVERS: STAINLESS STEEL

Freedom Arms also offers a complete line of accessories and factory installed options. The factory should be contacted directly for an up-to-date listing and prices.

MODEL 252 VARMINT — .22 LR cal., 5 shot, unique two point firing pin, choice of 7 $\frac{1}{2}$ (Varmint Class Model with express sights, black/green laminated hardwood grips) or 10 in. (Silhouette Class Model with competition sights and black micarta grips), approx. 3 $\frac{3}{4}$ lbs. New 1991.

Mfg.'s Sug. Retail \$1,454 \$1,195 \$895 \$725

Add \$264 for extra .22 Mag. cylinder.

▲ **Model 252 Silhouette** — silhouette shooting features, 10 in. barrel only, black micarta grips.**Mfg.'s Sug. Retail \$1,509 \$1,275 \$940 \$850**

Add \$23 for front sight hood.

MODEL 353 FIELD GRADE — .357 Mag., 4 $\frac{3}{4}$, 6, 7 $\frac{1}{2}$, or 9 in. barrel on non-glare field grade finish, Pachmayr grips, adj. sights, 3 $\frac{3}{4}$ lbs. New 1992.

Mfg.'s Sug. Retail \$1,269 \$1,090 \$885 \$695▲ **Model 353 Premier Grade** — similar to Field Grade, except has premier grade finish and laminated hardwood grips. New 1992.**Mfg.'s Sug. Retail \$1,673 \$1,395 \$995 \$750**▲ **Model 353 Silhouette** — includes silhouette competition sights, 9 in. barrel, field grade finish, Pachmayr grips and trigger overtravel screw. New 1992.**Mfg.'s Sug. Retail \$1,377 \$1,150 \$895 \$675**

PREMIER MID FRAME REVOLVER — .357 Mag., mid-size frame (Model 353 has large frame), 5 $\frac{1}{2}$ or 7 $\frac{1}{2}$ in. barrel, satin stainless finish, smooth wood grips, 6 shot, choice of fixed or adj. rear sight. New 1997.

As this edition went to press, prices had yet to be established on this model.

.44 REM. MAG. FIELD GRADE — .44 Rem. Mag., 4 $\frac{3}{4}$, 6, 7 $\frac{1}{2}$, or 10 in. barrel.

Mfg.'s Sug. Retail \$1,269 \$1,090 \$885 \$695▲ **.44 Rem. Mag. Premier Grade** — adj. sight, 4 $\frac{3}{4}$, 6, 7 $\frac{1}{2}$, or 10 in. barrel.**Mfg.'s Sug. Retail \$1,673 \$1,395 \$995 \$750**

Subtract \$106 fixed sight.

GALIL

Manufactured by Israel Military Industries (IMI). Beginning late 1996, Galil rifles and pistols are available in selective fire mode only (law enforcement, military only) and are imported by UZI America, Inc., subsidiary of O.F. Mossberg & Sons, Inc. Previously imported by Action Arms, Ltd. located in Philadelphia, PA until 1994. Previously imported by Springfield Armory located in Geneseo, IL and Magnum Research, Inc., located in Minneapolis, MN.

The Models AR, ARM, Galil Sporter (disc. 1993), and Sniper Outfit have not been imported since the federal ban on this semi-auto configuration was implemented. Magnum Research importation can be denoted by a serial number prefix "MR", while Action Arms imported rifles have either "AA" or "AAL" prefixes.

RIFLES: SEMI-AUTO

Models 329, 330 (Hadar II), 331, 332, 339 (sniper system with 6/40 mounted Nimrod scope), 361, 372, 386, and 392 all refer to various configurations of the Galil rifle.

MODEL AR — .223 cal. or .308 cal., semi-auto paramilitary design rifle, gas operated - rotating bolt, 16.1 in. (.223 only) or 19 in. (.308 only) barrel, parkerized, folding stock, Flip-up Tritium night sights. 8.6 lbs.	\$1,795	\$1,500	\$1,250	\$1,100	\$900	\$775	\$650

	Last Mfg.'s Sug. Retail was \$3,995.						

GAMBA, RENATO

Manufacturer located in Gardone V.T., Italy. Gamba of America, a subsidiary of Firing Line, is the exclusive importer and distributor for Renato Gamba long guns beginning late 1996. Pistols were previously imported and distributed (until 1990) by Armscorp of America, Inc. located in Baltimore, MD. Shotguns were previously (until 1992) imported by Heckler & Koch, Inc. located in Sterling, VA.

RENATO GAMBA

Filli Gamba (Gamba Brothers) was founded in 1946. G. Gamba sold his tooling to his brother, Renato, in 1967 when Renato Gamba left his brothers and S.A.B. was formed. Filli Gamba closed in 1989 and the Zanotti firm was also purchased the same year.

Renato Gamba firearms have had limited importation since 1986. In 1989, several smaller European firearms companies were purchased by R. Gamba and are now part of the Renato Gamba Group. The importation of R. Gamba guns changed in 1990 to reflect their long term interest in exporting firearms to America. Earlier imported models may be rare but have not enjoyed much collectability to date.

PISTOLS

R. Gamba pistols information listed below reflects 1996 model year information as pricing/availability had yet to be determined as this edition went to press. Please call Firing Line (see Trademark Index) for availability and pricing.

GATLING GUN COMPANY

Manufactured and distributed since 1961 by Furr Arms located in Orem, UT.

The Furr Arms-Gatling Gun Company manufactures high quality 1/6, 1/3, 1/2, 3/4, and full scale brass reproductions of famous, antique Gatling guns and cannons. Model Gatling guns include various models and scales from 1874 to 1893. Model cannons include the British Naval Cannon and the James Six Pounder. Prices vary according to the complexity of each model and are available by contacting Furr Arms.

Except for Models 1876 Carriage Gatling (1/2 scale) and 1876 Camel Tripod (1/2 scale), all the models listed below may be purchased on a special order basis from the factory. 100% values represent the current manufacturer's suggested retail.

Grading	100%	98%	95%	90%	80%	70%	60%

GAUCHER

Manufacturer located in St. Etienne, France. No current importer. Previously imported and distributed by Mandall Shooting Supplies located in Scottsdale, AZ.

Gaucher  Armes

Gaucher during 1997 has released four new shooting rifles with unique sound suppression (approx. 71 dBA) in 9mm, 12mm cal., or .410 bore - prices are in the \$311-\$372 range. Also new is the "Excellence 813" 20 ga. shotgun (\$1,728, boxlock, DTs) and double express rifle "Cougar" (\$1,810, O/U, boxlock, ST). Please contact Gaucher directly (see Trade-mark Index) for more information regarding these firearms, in addition to older Gaucher weapons.

PISTOLS: TARGET

MODEL GN1 — .22 LR cal., single shot silhouette pistol featuring 10 in. barrel, adj. sights, anatomically shaped grips, monobloc lever cocking, 2.42 lbs. Limited importation.

\$360	\$325	\$290	\$260	\$230	\$200	\$185
Last Mfg.'s Sug. Retail was \$380.						

MODEL GP — similar to Model GN1, except has forearm integrated into grip. Limited importation.

\$300	\$275	\$250	\$225	\$200	\$185	\$160
Last Mfg.'s Sug. Retail was \$323.						

GAVAGE

Previous manufacturer located in Liege, Belgium between 1936-1943 approximately.

GAVAGE PISTOL — 7.65mm, patterned after the "Clement", fixed barrel, limited mfg.

\$375	\$325	\$250	\$200	\$175	\$150	\$125
-------	-------	-------	-------	-------	-------	-------

This pistol is very rare if encountered with Waffenamt proofmarks - healthy premiums are being asked.

GENTRY, DAVID - CUSTOM GUNMAKER

Custom rifle gunmaker located in Belgrade, MT.

David Gentry is a current custom rifle builder who usually fabricates rifles to individual custom order requests. Current models include Gentry's Black Beauty, Mountain "70", Gray Ghost, and the Outfitter's Rifle. The Rough Rider Model was disc. 1994. David Gentry also manufactures top quality muzzle brakes, stainless steel Featherlight scope rings (1 in. and 30mm), and performs custom metal-work. Mr. Gentry should be contacted directly (see Trademark Index) for more information on options/prices.

GERMAN WWII MILITARY PISTOLS

Also See: Fabrique Nationale, Luger, Mauser, and Walther for other military pistols.

P.38 — double action, 9mm, 5 in. barrel, 8 shot mag., fixed sights, brown or black composite grips, blued finish. Many variations exhibiting a variety of metal finishes and codings, 34 oz. Over 1,000,000 manufactured during WW II.

Note: This model was adopted as the standard service pistol of the German Military in 1938. The P.38 was manufactured by Walther - code "ac" (mfg. 1939-1945), Mauser - code "byf" (mfg. Nov. of 1942-1945), and Spreewerke - code "cyq" (mfg. 1943-1945). The finish on most WWII 1942 and later P.38s is not of the same quality as the pre and early war Walther guns with the Spreewerke (cyq) models being the poorest. Pre-war Walther commercial manufactured P.38s (Models AP and Walther Banner HPs) are comparable to Zero Series - 3rd Issue values listed below.

HP "Heeres Pistole" — early Walther commercial production, high polish, hand-made, approx. 24,000 mfg. from 1938-1944.

▲ **"Swedish" HP** — experimental first production for Swedish trials, ser. range H1,001-H2,065, H prefix, rectangular firing pin and crown/N proofs.

\$3,000 \$2,500 \$2,000 \$1,700 \$1,400 \$1,100 \$900

▲ **Standard HP Production** — ser. range 2,080-approx. 24,000, high gloss finish until approx. ser. no. 20,000 - then changed to military blue (1944).

\$1,850 \$1,450 \$1,100 \$900 \$700 \$600 \$500

Add 10% for Nazi "359" military proof (scarce).

Add 10% for matching mag.

▲ **Late War HP Production** — marked "MOD P38" on left slide, rough military blue finish, some frames show heavy tool marks, ser. range 24,000-25,990, w/o matching mags.

\$1,500 \$1,100 \$900 \$700 \$600 \$500 \$450

ZERO-SERIES — with Mauser banner, high polish finish, 5-digit number w/o suffix. Mfg. 1940.

Add 10% for matching mag.

▲ **Zero Series - 1st Issue** — internal extractor, square firing pin, ser. range 01-01,000.

\$5,000 \$4,000 \$3,000 \$2,100 \$1,500 \$1,200 \$1,000

▲ **Zero Series - 2nd Issue** — external extractor, square firing pin, ser. range 01,001-03,445, more difficult to find than 1st Issue.

\$5,000 \$4,400 \$3,400 \$2,500 \$1,900 \$1,300 \$1,000

▲ **Zero Series - 3rd Issue** — external extractor, round firing pin, 03,446-013,725, after ser. no. 10,000, some models had brown military style grips.

\$2,500 \$1,625 \$1,150 \$850 \$750 \$600 \$500

G

Grading	100%	98%	95%	90%	80%	70%	60%
▲ 480 code — “480” appears on slide, first military contract P.38, approx. 7,200 mfg. with ser. range 1-7,665, rare in any condition above 90%.	\$4,500	\$3,250	\$1,650	\$1,150	\$850	\$700	\$575
ac-NO DATE (UNDATED) — ac (Walther code) appears on slide without date, “ac” on triggerguard, 2,800 mfg. with ser. range 7,356-9,691, rarest military coded P.38, rarely encountered in 90% or better original condition.	\$3,400	\$2,750	\$2,200	\$1,900	\$1,500	\$1,200	\$950
Add 20% for matching mag.							
▲ ac-40 Surcharge — hand-stamped “40” before regular ac-40 production, ser. range 9,691-9,978 A, 10,000 mfg., high polish, rare in any condition above 90%.	\$2,000	\$1,700	\$1,400	\$1,050	\$900	\$750	\$650
Add 20% for matching mag.							
ac-40 CODE — indicates 1940 mfg., the 480 code was dropped in October of 1940, and the “ac” code was started, approx. 10,000 mfg. with ser. range 1B-9,900B.	\$1,775	\$1,200	\$850	\$600	\$500	\$450	\$400
Add 20% for matching mag.							
▲ ac-41 1st and 2nd Variation — last military high polish guns, only 1st var. (ser. range 1-4,833 B) has “ac” on left triggerguard, 2nd var. continues to ser. no. 4,527 I.	\$900	\$800	\$550	\$475	\$400	\$370	\$340
Add 20% for matching mag.							
ac-41 3RD VAR. or ac-42 CODE — dull military finish, ser. range (approx.) ac-41, 4,500 I to ac-42, 9,200 K. Matching magazines stop at approx. ac-42, 2,000 B.	\$850	\$725	\$625	\$500	\$425	\$375	\$325
Add 20% for matching mag.							
“ac” or “byf” CODED 42-45 — letters are followed by two digit code corresponding to year of mfg. 1943-1945. Two line codes are more desirable than single line models. Highest P.38 production occurred in 1943 and 1944.	\$495	\$425	\$375	\$325	\$300	\$260	\$225
Add 10% for high polish finish (early 1942 mfg.).							
Add 10% for single-line code in ac-43 code.							
Add 20% for “dual tone” (phosphate finish — byf-44 date).							
“cyq” CODE AND “ac-45” MISMATCH — cyq variation typically exhibits rough machining with visible circular milling marks, mismatched slide and frame on ac-45 model.	\$425	\$375	\$300	\$270	\$250	\$230	\$210
LATE WAR (1945) — Zero Series with rough milled finish, ser. range 025,960-027,659.	\$1,100	\$925	\$795	\$650	\$500	\$425	\$350
1945 “svw” CODE — Nazi proofed only, most dual tone finish, some all blue or all gray.	\$1,000	\$850	\$700	\$600	\$500	\$450	\$400
Add 20% for all blue or all gray.							
Deduct 50% for French production (Star proof).							
1946 “svw” CODE — Mauser mfg. 1946 with French controlling production.	\$425	\$365	\$285	\$250	\$210	\$190	\$165

GEVARM

Previous manufacturer located in Saint Etienne, France.

E-1 AUTOLOADING RIFLE — .22 LR, 19 in. barrel, open sights, walnut pistol grip stock.	\$165	\$130	\$110	\$100	\$85	\$65	\$55
--	-------	-------	-------	-------	------	------	------

Last Mfg.'s Sug. Retail was \$110.

GLOCK

Manufactured by Glock GmbH in Austria since 1983. Exclusively imported and distributed by Glock, Inc., located in Smyrna, GA.

All Glock pistols have a "safe action" safety system (double action only) which includes trigger safety, firing pin safety, and drop safety. Glock pistols have only 35 parts for reliability and simplicity of operation.

PISTOLS: SEMI-AUTO

Most of the models below are available in a cutaway configuration for sale to law enforcement agencies.

MODEL 17 SPORT/SERVICE — 9mm, double action, polymer frame, mag., trigger and other pistol parts. Steel barrel, slide, and springs, 10 (C/B 1994), 17*, or 19* shot mag., 4.49 in. barrel with hexagonal rifling, adj. (Sport Model) or fixed (Service Model) rear sight, hammerless, includes extra mag., case, and spare rear sight, 24 oz. empty. Importation began late 1985.

Mfg.'s Sug. Retail	\$611	\$475	\$415	\$335
---------------------------	--------------	--------------	--------------	--------------

Add \$28 for adj. rear sight.
 Add \$72 for fixed Meprolight sight.
 Add \$90 for fixed Trijicon sight.

▲ **Model 17L Competition Model** — competition version of the Model 17, includes internally compensated 6.02 in. barrel, recalibrated trigger pull (3½ lb. pull), adj. rear sight, 25.4 oz. New 1988.

Mfg.'s Sug. Retail	\$795	\$650	\$545	\$425
---------------------------	--------------	--------------	--------------	--------------

Add \$28 for adj. sight.
 Early models with matching barrel ports will command a small premium.

▲ **Glock 17 Desert Storm Commemorative** — 9mm Para., features coalition forces listing on top of barrel, inscription on side of slide "NEW WORLD ORDER", 1,000 mfg. in 1991 only.

	\$995	\$825	\$600
--	--------------	--------------	--------------

GOLDEN STATE ARMS

Previous importer located in Pasadena, CA. Golden State Arms imported and subcontracted various firearms constructed by European and Japanese manufacturers - achieving private label status on some guns. Most firearms previously imported by Golden State Arms (including private labels) are not that collectible. In many cases, the shooting value will determine the price of a specimen. In some models or configurations which are currently desirable, however, premiums may exist.

GONCZ ARMAMENT, INC.

Previous owner/manufacture located in North Hollywood, CA 1984-1990.

While advertised, records indicate very few Goncz pistols or carbines were actually produced. All of these guns were prototypes or individually hand-built and none were ever mass produced through normal fabrication techniques.

In 1990, Claridge Hi-Tec, Inc. purchased Goncz Armament, Inc.

GRANGER, G.

Manufacturer located in Saint Etienne, France since 1902. Currently imported and distributed by Champlin Firearms, Inc. located in Enid, OK.

G. Granger manufactured high quality, limited production side-by-side boxlock and sidelock shotguns in 12, 16, or 20 ga. All guns were made on a custom order basis with prices ranging between \$20,000 - \$40,000. Prices will vary per older customer specifications and appointments.

GRANT, STEPHEN

Previous manufacturer located in London, England.

Manufacturer specializing in custom order only SxS rifles and shotguns. Shotguns (12, 16, or 20 ga.) can be top or side lever and are equipped with sidelocks and a self-opening mechanism. Very limited production making values hard to establish. Prices are at par with similar quality H&H firearms.

GREAT WESTERN ARMS COMPANY

Previous importer located at 9001-9007 Miner Street, Los Angeles, CA. Founded through the efforts of Mr. Hy Hunter, with William R. Wilson as President.

Originated probably in early 1953. When Colt Firearms Company ceased production of what is known today as "First Generation Single Action Army Revolvers", Mr. Hunter could see the public's continued demand for such a revolver. After several trips to the Colt factory to ascertain Colt's intent of reviving their production of the S.A. Army, and being assured it would never be revived, he founded the G.W. Arms Co. The main change between the Colt S.A. and the G.W. Frontier was removing the firing pin from the hammer and the design of a rebounding firing pin inserted in the revolver frame. This firm also redesigned the Remington 2 shot derringer and produced a derringer in 2 cal., .38 S&W and .38 S&W Special. Approx. 2,000 of these were mfg. Production of the Frontier probably did not exceed 23,000. When the Colt Company resumed production of their 2nd Generation S.A.

1873 Revolver, it rang the death knell of Great Western Arms Co. products, and the G.W. Arms Co. soon disappeared with its last sales of their "Frontier" being sold as unassembled "Kit Guns" to be assembled by the purchaser.

Grendel previously manufactured the SRT-16F, SRT-20L, and SRT-24 - all were disc. 1988. Values are approx. the same as the SRT-20F.

GRIFFIN & HOWE

Custom gunsmith/manufacturer located in New York, **Griffin & Howe** NY and Bernardsville, NJ.

Founded in 1923 by Seymour Griffin and James Howe, Griffin & Howe continues to build its custom rifles as well as providing the full spectrum of gunsmithing services and importation of fine English guns.

Griffin & Howe has been building custom rifles since 1923. They also perform a variety of custom gunsmithing services. Prices may vary greatly depending on configuration, desirability, condition and special features. Most used Griffin & Howe Custom Rifles in average condition and without special engraving start at \$3,150+ and rise according to condition and nature of the individual gun. Since 1923, fewer than 2,800 have been made. In 1930, Griffin & Howe became a subsidiary of Abercrombie & Fitch and remained with them until 1976, when it became a privately held company. Because all Griffin & Howe rifles are essentially special ordered, accurate pricing can be ascertained only by examining each individual gun. Elaborate specimens by this maker trademark will command over \$10,000. Engraving by Joseph Fugger, Winston Churchill, Bob Swartley or Kornbrath will add considerably to the value.

Pricing on new custom rifles, with a wide selection of options, is available directly from Griffin & Howe.

RIFLES

Values below represent a base gun with customer supplied action, normal wood and no options.

G&H CLASSIC FRENCH WALNUT STOCK — custom honed action with lapped lugs, Douglas premium barrel, hand engraving, French walnut sporter stock with ebony forend tip, G&H pistol grip cap, "Griffin & Howe, New York" barrel address, custom order.

HARRINGTON & RICHARDSON, INC.

Previous manufacturer located in Gardner, MA - formerly from Worcester, MA. Successors to Wesson & Harrington, manufactured from 1871 until January 24, 1986. In 1991, H & R 1871, Inc. was formed (see their listing in the front of this section) and several new Topper shotgun models and the Sportsman 999 revolver were reintroduced. H & R 1871, Inc. is not responsible for the warranties or safety of older pre-1986 H & R firearms.

A manufacturer of utilitarian firearms for over 115 years, H & R ceased operation on January 24, 1986. Even though new manufacture (under H & R 1871, Inc.) is utilizing the H & R trademark, the discontinuance of older models in either NIB or mint condition may command slight asking premiums, but probably will not affect values on those handguns only recently discontinued. Most H & R firearms are still purchased for their shooting value rather than collecting potential.

Please refer to H & R listing in the Serialization section for alphabetical suffix information on how to determine year of manufacture for most H & R firearms between 1940-82.

.22 SPECIAL — .22 LR cal., .22 WRF cal., 7 shot, double action, 6 in. barrel, break open, large frame, blue only, gold plated front sight, walnut grips.	\$165	\$140	\$120	\$100	\$85	\$70	\$60
EXPERT — double action, similar to .22 Special, except 10 in. barrel.	\$150	\$140	\$120	\$100	\$85	\$70	\$60
SPORTSMAN NO. 199 — .22 LR cal., 9 shot, single action, 6 in. barrel, adj. target sights, break open, blue only, checkered walnut grips.	\$195	\$165	\$140	\$110	\$90	\$75	\$65
DEFENDER — .38 S&W cal., double action, 4 or 6 in. barrel, fixed sights, blue, break open, black plastic grips, made during WWII for police reserves and major corporation guards.	\$140	\$120	\$110	\$100	\$85	\$65	\$55
ULTRA SPORTSMAN — .22 LR cal., 9 shot, single action, 6 in. barrel, blue, break open, adj. sights, walnut grips, short cylinder action, wide hammer spur.	\$220	\$200	\$180	\$150	\$120	\$100	\$85
NEW DEFENDER — .22 LR cal., 9 shot, double action, 2 in. barrel, break open, adj. sights, blue, round butt, checkered walnut grip.	\$220	\$200	\$180	\$150	\$120	\$100	\$85
USRA SINGLE SHOT TARGET — .22 LR cal., 7, 8, or 10 in. barrel, blue, hinged break open, adj. sights, walnut grips. Mfg. 1928-1941.	\$440	\$415	\$385	\$330	\$290	\$250	\$195
Add 10% for nickel finish.							
.25 CAL. SELF LOADING PISTOL — .25 ACP cal., 6 shot, 2 in. barrel, blue, black rubber grips.	\$330	\$305	\$250	\$195	\$165	\$140	\$110
.32 CAL. SELF LOADING PISTOL — .32 ACP cal., 8 shot, 3½ in. barrel, fixed sights, black rubber grips.	\$330	\$305	\$250	\$195	\$165	\$140	\$110
Add 20% for type I models if in 90%+ original condition.							
Type I models with 12 slide pull grooves are serialized 1-3,025. Type II (more common) are serialized 3,026 - 35,000.							
HANDY-GUN — smooth bore (mfg. 1921-1934) or rifled-barrel(mfg. 1931-1934) pistol, available in either 8 or 12¼ in. choked or unchoked barrel in either .410 bore or 28 ga., case hardened (Tiger stripe colors resulting from hot cyanide method) or blued frame. Rifled barrel (.22 LR in blued frame or .32-20 in case colored frame, 12¼ in. barrel) is rare. Early smooth bore guns bear only manufacturer's name, later blued and case-colored guns are stamped H. & R. "Handy-Gun" on left side and manufacturer's name on right side, as are all rifled barrel models. Ser. nos. on barrel lug and frame should match. Smooth bore Handy-Guns (more than 50 variations have been documented) not currently registered with ATF cannot be legally owned and are subject to seizure.							
▲ Smooth bore — ser. no. range is 1 - approx. 54,000.	\$495	\$450	\$400	\$350	\$295	\$250	\$200

H

Grading	100%	98%	95%	90%	80%	70%	60%
▲ .22 R.F. — ser. no. range is 1 - approx. 223.	\$900	\$750	\$650	\$550	\$500	\$450	\$350
▲ .32-20 W.C.F. — ser. no. range is approx. 43,851-43,937.	\$1,200	\$1,000	\$800	\$650	\$550	\$500	\$450

Add \$50-\$250 for original box, and \$75-\$200 for original H&R holster.

Values for smooth bore are for the most common variation (.410 with 12¼ in. choked barrel), premiums of 25%-200% or more for rare variations (8 in. barrel, 28 ga., hooked trigger guard, optional detachable shoulder stock), rarest (just a few were made) is a .410 bore with 18 in. choked barrel mfg. in 1934.

A detachable wire stock was available on the rifles and optional on the shotguns. Most shotgun models were not drilled for a shoulder stock.

REVOLVERS: RECENT PRODUCTION

MODEL 504 SQUARE BUTT — .32 H&R Mag., 5 shot, 4 or 6 in. bull barrels, adj. rear sight, swing out cylinder, blue, black plastic and walnut grips. Mfg. 1984 and 1985.

HAWES FIREARMS

Previously manufactured by J.P. Sauer & Sohn in Eckernforde, Germany. Previously imported by Hawes Firearms in Van Nuys, CA.

Rather than give an individual listing of the various single action and double action (including Medallion models) revolvers that have been imported, a generalized price range is as follows: centerfire single actions usually are in the \$130 - \$250 range, centerfire double actions are \$175-\$295, while .22 rimfire models are typically valued between \$60 - \$140.

HECKLER & KOCH

Manufacturer located in Oberndorf/Neckar, Germany. Imported and distributed by Heckler & Koch, Inc. (U.S. headquarters) located in Sterling, VA (previously located in Chantilly, VA). In early 1991, H & K was absorbed by Royal Ordnance, a division of British Aerospace located in England.

PISTOLS: SEMI-AUTO, RECENT MFG.

This model was also mfg. in a French model in .22 LR and/or .32 ACP (about 500 imported).

P9S — .45 ACP or 9mm Para., double action combat model, 4 in. barrel, phosphate finish, sculptured plastic grips, fixed sights. Although production ceased in 1984, limited quantities were available until 1989.

\$650	\$525	\$400	\$360	\$320	\$290	\$265
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,299.

P9S TARGET — .45 ACP or 9mm Para., 4 in. barrel, phosphate finish, adj. sights and trigger. Although production ceased in 1984, limited quantities were available until 1989.

\$1,100	\$850	\$600	\$540	\$500	\$465	\$430
---------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,382.

P9S COMPETITION KIT — 9mm Para only, similar to P9S Target, except extra 5½ in. barrel and weight, competition walnut grip, 2 slides. Disc. 1984.

\$1,150	\$950	\$875	\$800	\$720	\$640	\$550
---------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$2,250.

P7 PSP — 9mm Para., older variation of the P7 M8, without extended triggerguard, ambidextrous mag. release (European style), or heat shield. Standard production ceased 1986. A re-issue of this model was mfg. in 1990 with approx. 150 mfg.

\$865	\$650	\$525	\$460	\$410	\$390	\$370
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,135.

P7 M8 — 9mm Para., unique squeeze cocking single action, extended square combat type triggerguard with heat shield, 4.13 in. fixed barrel with polygonal rifling, 8 shot mag., ambidextrous mag. release, fixed 3-dot sighting system, stippled black plastic grips, black phosphate or nickel (new 1992) finish, includes 2 mags., 28 oz.

Mfg.'s Sug. Retail	\$1,187	\$900	\$745	\$650	\$550	\$450	\$410	\$390
--------------------	---------	-------	-------	-------	-------	-------	-------	-------

Add \$94 for Tritium sights (various colors, new 1993).

Add \$566 for .22 LR conversion kit (barrel, slide, and two mags.).

P7 M13 — similar to P7 M8, only with staggered 13 shot mag., 30 oz. Disc. 1994.

\$975	\$785	\$700	\$630	\$580	\$530	\$480
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,330.

Add \$85 for Tritium sights (various colors, new 1993).

P7 M10 — .40 S&W cal., similar specifications as P7 M13, except has 10 shot mag., 39 oz. Mfg. 1991-94.

\$975	\$800	\$725	\$650	\$600	\$550	\$495
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,315.

Add \$85 for Tritium sights (various colors, new 1993).

P7 K3 — .22 LR or .380 ACP cal., uses unique oil-filled buffer to decrease recoil, 3.8 in. barrel, matte black or nickel (less common) finish, 8 shot mag. (includes 2), 26½ oz. Mfg. 1988-94.

\$840	\$715	\$600	\$525	\$450	\$410	\$390
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,100.

Add \$525 for .22 LR conversion kit.

Add \$228 for .32 ACP conversion kit.

Add \$85 for Tritium sights (various colors, new 1993).

USP 9 — 9mm Para., semi-auto, available in regular DA/SA mode or DA only (9 variants), 4.13 in. barrel with polygonal rifling, Browning-type action with H&K recoil reduction system, polymer frame, all metal surfaces specially treated, can be carried cocked and locked, stippled synthetic grips, bobbed hammer, 3-dot sighting system, multiple safeties, 10 (C/B 1994) or 16* shot polymer mag., 26½ oz. New 1993.

Mfg.'s Sug. Retail	\$636	\$565	\$475	\$425	\$385	\$350	\$325	\$295
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Add \$20 for control lever (safety/decocking lever on right side).

Add \$94 for Tritium sights (various colors, new 1993).

▲ **USP 9 Stainless** — similar to USP 9, except has satin finished stainless steel slide. New 1996.

Mfg.'s Sug. Retail	\$681	\$595	\$485	\$430
--------------------	-------	-------	-------	-------

Add \$20 for control lever (safety/decocking lever on right side).

Grading	100%	98%	95%	90%	80%	70%	60%	
USP 9 COMPACT — 9mm Para., compact variation of the USP 9 featuring 3.58 in. barrel, 25½ oz. New 1997.								
Mfg.'s Sug. Retail	\$665	\$585	\$490	\$435	\$395	\$365	\$330	\$300
Add \$20 for control lever (safety/decocking lever on right side).

Mfg.'s Sug. Retail	\$710	\$615	\$500	\$440				
USP 45 — .45 ACP cal., similar to USP 9, 9 variants of DA/SA/DAO, 10 (C/B 1994) or 13* shot mag., 27¾ oz. New 1995.								
Mfg.'s Sug. Retail	\$696	\$615	\$500	\$440	\$385	\$350	\$325	\$295
Add \$20 for control lever (safety/decocking lever on right side).								
Add \$94 for Tritium sights (various colors, new 1993).								
▲ USP 45 Stainless — similar to USP 45, except has satin finished stainless steel slide. New 1996.								
Mfg.'s Sug. Retail	\$741	\$660	\$535	\$475				
Add \$20 for control lever (safety/decocking lever on right side).								
▲ USP 45 Match Pistol — .45 ACP cal., features 6.02 in. compensated barrel with polygonal rifling, micrometer adj. rear sight, barrel weight, and ambidextrous safety, choice of matte black or stainless steel slide, 38 oz. New 1997.								
Mfg.'s Sug. Retail	\$1,329	\$1,250	\$1,000	\$825	\$750	\$675	\$550	\$500
Add \$70 for stainless steel slide model.								
MARK 23 — .45 ACP cal., 5.87 in. barrel, polymer frame and integral grips, 3-dot sighting, 10 shot mag., squared off triggerguard, 2.6 lbs., limited availability. New 1996.								
Mfg.'s Sug. Retail	\$1,995	\$1,775	\$1,575	\$1,325	\$1,075	\$900	\$775	\$650
SP 89 — 9mm Para., semi-auto, recoil operated delayed roller-locked bolt system, 4.5 in. barrel, 15 shot mag., rotated aperture adj. rear sight (accepts HK claw-lock scope mounts), 4.4 lbs. Mfg. 1990-1993.								
	\$2,495	\$2,150	\$1,800	\$1,300	\$1,100	\$975	\$875	\$775
Last Mfg.'s Sug. Retail was \$1,325.								
Add \$129 for adj. target grip.								
VP 70Z — 9mm, 18 shot, double action only, 4½ in. barrel, parkerized finish, plastic receiver/grip assembly. Disc. 1984.								
	\$425	\$375	\$325	\$275	\$250	\$230	\$210	
Add 100% if frame cut for shoulder stock (Model VP 70M).								

RIFLES: SEMI-AUTO

The models listed below, being of a paramilitary design, were disc. 1989 due to Federal legislation as a result of the controversy with this type of firearms configuration.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

In 1991, the HK-91, HK-93, and HK-94 were discontinued. Last published retail prices (1991) were \$999 for fixed stock models and \$1,199 for retractable stock models.

In the early '70s, S.A.C.O. importers located in Virginia sold the Models 41 and 43 which were the predecessors to the Model 91 and 93, respectively. Values for these earlier variations will be higher than values listed below.

SR-9 — .308 cal. (7.62mm), semi-auto sporting rifle, 19.7 in. barrel, Kevlar reinforced fiberglass thumbhole stock and forearm, 5 shot mag., diopter adj. rear sight, accepts HK claw-lock scope mounts. Mfg. 1990-1993.

\$1,775	\$1,450	\$1,150	\$995	\$850	\$725	\$650
---------	---------	---------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,369.

SR-9T — .308 cal., precision target rifle with adj. MSG 90 buttstock and PSG-1 trigger group, 5 shot mag. Mfg. 1992-1993.

\$2,495	\$2,100	\$1,800	\$1,550	\$1,150	\$995	\$850
---------	---------	---------	---------	---------	-------	-------

Last Mfg.'s Sug. Retail was \$1,799.

SR-9TC — .308 cal., similar to SR-9T, except has PSG-1 adj. buttstock. Mfg. 1993 only.

\$2,995	\$2,600	\$2,300	\$2,000	\$1,675	\$1,250	\$1,050
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$1,946.

PSG-1 — .308 cal. only, high precision marksman's rifle, 5 shot mag., adj. buttstock, includes accessories and case (Hensholdt illuminated 6 x 42 power scope), 17.8 lbs.

Mfg.'s Sug. Retail	\$10,811	\$9,500	\$8,275	\$7,100	\$6,000	\$5,100	\$4,500	\$3,850
--------------------	----------	---------	---------	---------	---------	---------	---------	---------

MODEL 41 — 7.62mm cal., predecessor to the Model 91 A-2, originally imported by Golden State Arms.

\$1,200	\$1,050	\$950	\$850	\$750	\$650	\$550
---------	---------	-------	-------	-------	-------	-------

MODEL 91 A-2 — .308 cal. (7.62mm), semi-auto paramilitary design rifle, delayed roller lock bolt system, antenuated recoil, black cyclac stock, 17.7 in. barrel, 20 shot mag., 9.7 lbs. Importation disc. 1989.

▲ **Fixed stock model**

\$1,695	\$1,375	\$1,150	\$995	\$895	\$795	\$695
---------	---------	---------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$999.

Add \$200 for desert camo finish.
Add \$275 for NATO black finish.

▲ **Model 91 A-3** — with retractable metal stock.

\$2,150	\$1,825	\$1,500	\$1,275	\$1,075	\$950	\$850
---------	---------	---------	---------	---------	-------	-------

Last Mfg.'s Sug. Retail was \$1,114.

Add \$775 for .22 LR conversion kit.

▲ **Model 91 A-2 Package** --- includes A.R.M.S. mount, B-Square rings, Leupold 3x9 compact scope with matte finish. Importation disc. 1988.

\$2,450	\$2,150	\$1,750	\$1,395	\$1,175	\$995	\$875
---------	---------	---------	---------	---------	-------	-------

Last Mfg.'s Sug. Retail was \$1,285.

Add \$300 for retractable stock.

MODEL 93 A-2 — .223 cal. (5.56mm), smaller version of the H&K 91, 25 shot mag., 16.14 in. barrel, 8 lbs.

▲ **Fixed stock model**

\$1,575	\$1,425	\$1,200	\$1,050	\$925	\$825	\$750
---------	---------	---------	---------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$946.

Add \$200 for desert camo finish.
Add \$275 for NATO black finish.

▲ **Model 93 A-3** — with retractable metal stock.

\$1,850	\$1,675	\$1,450	\$1,250	\$1,075	\$975	\$850
---------	---------	---------	---------	---------	-------	-------

Last Mfg.'s Sug. Retail was \$1,114.

▲ **Model 93 A-2 Package** — includes A.R.M.S. mount, B-Square rings, Leupold 3x9 compact scope with matte finish. Importation disc. 1988.

\$2,450	\$2,150	\$1,700	\$1,400	\$1,200	\$1,050	\$950
---------	---------	---------	---------	---------	---------	-------

Last Mfg.'s Sug. Retail was \$1,285.

Add \$300 for retractable stock.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MODEL 94 CARBINE A-2 — 9mm, semi-auto carbine, 16.54 in. barrel, aperture rear sight, 15 shot mag. New 1983.

▲ **Fixed stock model**

\$2,450	\$2,150	\$1,700	\$1,400	\$1,200	\$1,050	\$950
Last Mfg.'s Sug. Retail was \$946.						

▲ **Model 94 Carbine A-3** — retractable metal stock.

\$2,750	\$2,400	\$2,000	\$1,700	\$1,475	\$1,275	\$1,000
Last Mfg.'s Sug. Retail was \$1,114.						

▲ **Model 94 A-2 Package** — includes A.R.M.S. mount, B-Square rings, Leupold 3x9 compact scope with matte finish. Importation disc. 1988.

\$3,000	\$2,625	\$2,150	\$1,900	\$1,675	\$1,350	\$1,100
Last Mfg.'s Sug. Retail was \$1,285.						

Add \$300 for retractable stock.

▲ **Model 94 SGI** — 9mm, semi-auto, target rifle, aluminum alloy bi-pod, Leupold 6X scope, 15 or 30 shot mag. Imported 1986 only.

\$2,595	\$2,250	\$1,900	\$1,675	\$1,475	\$1,275	\$1,000
Last Mfg.'s Sug. Retail was \$1,340.						

MODEL 270 — .22 LR cal. semi-auto, sporting rifle, 19.7 in. barrel with standard or polygonal rifling, 5 or 20 shot mag., high luster blue, plain walnut stock, approx. 5.7 lbs. Disc. 1985.

\$475	\$400	\$350	\$300	\$275	\$250	\$225
Last Mfg.'s Sug. Retail was \$200.						

MODEL 300 — .22 Mag. cal., semi-auto, 5 or 15 shot, polygonal rifling standard, otherwise similar to H&K 270 with checkered walnut stock. Importation disc. 1989.

\$675	\$575	\$525	\$450	\$400	\$375	\$350
Last Mfg.'s Sug. Retail was \$608.						

Add \$175-\$225 for factory H&K scope mount system.

▲ **Model 300 Package** — includes A.R.M.S. mount, B-Square rings, Leupold 3x9 compact scope with matte finish. Importation disc. 1988.

\$895	\$785	\$700	\$650	\$600	\$550	\$500
Last Mfg.'s Sug. Retail was \$689.						

MODEL 630 — .223 cal., semi-auto, delayed roller lock bolt system, 17.7 in. barrel, reduced recoil, checkered walnut, 4 or 10 shot mag., 7.04 lbs. Importation disc. 1986.

\$795	\$725	\$650	\$550	\$495	\$460	\$430
Last Mfg.'s Sug. Retail was \$784.						

Add \$175-\$225 for factory H&K scope mount system.

The .222 Rem. cal. was also available in this model. Most were French contracts.

MODEL 770 — .308 cal., 3 or 10 shot mag., 19.7 in. barrel, 7.92 lbs., otherwise similar to model 630. Importation disc. 1986.

\$775	\$695	\$625	\$530	\$485	\$450	\$420
Last Mfg.'s Sug. Retail was \$797.						

Add \$175-\$225 for factory H&K scope mount system.

Significant price increases stopped the importation of this model.

Approx. 6 Model 770s were imported in .243 Win. cal. during 1984. Values for the .243 cal. will be considerably higher than listed above for the .308 cal.

MODEL 940 — .30-06 cal., 21.6 in. barrel, 8.62 lbs., otherwise same as Model 770. Importation disc. 1986.

\$895	\$825	\$725	\$625	\$565	\$500	\$465
Last Mfg.'s Sug. Retail was \$917.						

Add \$175-\$225 for factory H&K scope mount system.

Cals. 7x64mm and 9.3x62mm were also available in this model.

Significant price increases stopped the importation of this model.

▲ **Model 940K** — similar to Model 940, except has 16 in. barrel and higher cheekpiece. Two imported 1984 only. Rarity precludes accurate price evaluation.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MODELS SL6 & SL7 CARBINE — .223 or .308 cal., 17.71 in. barrel, semi-auto, delayed roller lock bolt system, reduced recoil, vent. wooden hand guard, 3 or 4 shot mag., 8.36 lbs., matte black metal finish, HK-SL6 is .223 cal., HK-SL7 is .308 cal. Disc. in 1986.

\$725 \$650 \$550 \$495 \$460 \$430 \$400

Add \$175-\$225 for factory H&K scope mount system.

RIFLES: BOLT ACTION

BASR — .22, .22-250, 6mm PPC, .300 Win. Mag., .30-06, or .308 cal., Kevlar stock, stainless steel barrel, limited production. Special order only. Mfg. 1986 only.

\$5,750 \$5,000 \$4,500 \$4,000 \$3,650 \$3,300 \$2,600

Last Mfg.'s Sug. Retail was \$2,199.

Less than 135 of this variation were manufactured and they are extremely rare. Contractual disputes with the U.S. supplier stopped H&K from receiving any BASR models.

SHOTGUNS

H & K imported Benelli shotguns can be found under their own heading.

MODEL 512 SEMI-AUTO — 12 ga. only, mfg. by Franchi for German military contract, rifle sights, matte finished metal, walnut stock, fixed choke pattern diverter giving rectangular shot pattern. Importation disc. 1991.

\$1,500 \$1,300 \$1,100 \$925 \$800 \$700 \$600

Last Mfg.'s Wholesale was \$1,895.

HELWAN

Previously imported by Navy Arms Co. and Interarms until 1995.

BRIGADIER — 9mm Para., single action, 4.5 in. barrel, all steel construction, 8 shot mag. with finger extension, black plastic grips, 32.6 oz. Imported 1988-94.

\$195 \$150 \$125 \$115 \$105 \$95 \$85

Last Mfg.'s Sug. Retail was \$260.

This model is patterned after the Beretta Model 1952. They were manufactured at the Helwan arsenal in Egypt.

HENDRY, RAMSAY & WILCOX

Manufacturer located in Perth, Scotland.

Hendry, Ramsay & Wilcox manufacture top quality shotguns and rifles and are priced per individual quotation. Please contact the factory directly (see Trademark Index) for more information on this trademark.

HENRY RIFLE

Please refer to the Winchester section in this text.

HERITAGE MANUFACTURING, INC.

Manufacturer located in Opa Locka, FL since 1992. Dealer and distributor sales.

---------------------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------	--------------

HEROLD RIFLE

Previously manufactured by Franz Jaeger, located in Suhl, Germany.

BOLT ACTION SPORTING RIFLE — miniature Mauser action. .22 Hornet. 24 in. barrel, leaf sight, double set trigger, select checkered stock, imported by Daly & Stoeger, pre-WWII.

\$990	\$880	\$825	\$770	\$660	\$550	\$495
--------------	--------------	--------------	--------------	--------------	--------------	--------------

HERTERS

Previous importer/distributor/retailer headquartered in Waseca, MN from early 1960s - 1979.

Herters subcontracted various manufacturers (mostly European) to fabricate Powermag revolvers, U-9/J-9 rifles, and shotguns which were mostly patterned after more famous original models. Most of these copies were designed to undersell the competition at the time and while quality in most cases was quite good, consumer sales were not strong enough to continue production. While many Herters models are relatively rare, collectibility to date has been minimal. Herters model values are usually under the original trademarks from which they were derived and to date have been based more on the shooting utility than the collector potential.

HESCO, INC.

Manufacturer established in 1996 located in LaGrange, GA. Dealer or consumer direct sales.

Grading	100%	98%	95%	90%	80%	70%	60%

HEYM, FRIEDRICH WILH.

Originally founded in 1865 by F.H. Heym located in Suhl, Germany. Currently manufactured in Muennerstadt, Germany - no current U.S. importation. Previously imported by JagerSport, Ltd. located in Cranston, RI 1993-94 only. Previously imported and distributed by Heckler & Koch, Inc. (until 1993) located in Sterling, VA. Previously imported and distributed by Heym America, Inc. (subsidiary of F.W. Heym of W. Germany) located in Fort Wayne, IN.

Pre-war guns will bring a premium over values listed below.

OVER AND UNDERS

MODEL 22 S2 — rifle/shotgun combination, 12, 16, or 20 ga. (3 in.), under rifle (17 cal. available), single set trigger, takedown feature (standard 1990), coin finish with engraving, 5½ lbs.

\$3,675	\$3,000	\$2,450	\$1,875	\$1,575	\$1,325	\$1,100
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$4,125.

Subtract \$380 without engraving.

This model features a dampened rifle barrel which prevents the "climbing" of groups, thereby enhancing accuracy.

MODEL 55 BF — rifle/shotgun combination, popular U.S. and European cal., shotgun barrels interchangeable in 12 (disc.), 16, or 20 ga., 25 or 28 in. barrels, boxlock, auto ejectors, silver finish, fine German engraving, folding leaf sight, checkered pistol grip stock. Extra barrels — add \$3,250 for O/U rifle and \$2,250 for O/U shotgun or shotgun/rifle combination.

\$6,500	\$5,400	\$4,950	\$4,525	\$3,950	\$3,615	\$3,210
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$7,485.

▲ **Model 55 B** — O/U rifle only, various cal., engraving similar to Model 55 BF. Importation disc. 1994.

\$9,250	\$7,800	\$7,000	\$6,000	\$5,150	\$4,700	\$4,000
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$10,800.

Add \$5,715 for extra set of interchangeable barrels.

▲ **Model 55 BS** — O/U rifle only with different caliber for each barrel, double set triggers, "Bergstutzen" design.

\$9,000	\$7,750	\$6,950	\$5,950	\$5,125	\$4,650	\$3,975
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$10,435.

▲ **Model 55 F** — O/U shotgun, ejectors, 20 or 16 ga., engraved, 6.6 lbs. Importation disc. 1992.

\$5,100	\$4,525	\$3,950	\$3,615	\$3,200	\$2,775	\$2,300
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$5,500.

▲ **Model 55 SS** — sidelock version of Model 55 F, large engraved hunting scenes.

\$4,500	\$3,825	\$3,300	\$2,850	\$2,400	\$2,000	\$1,700
---------	---------	---------	---------	---------	---------	---------

Last Mfg.'s Sug. Retail was \$4,890.

MODEL 200 — 20 ga., 3 in. chambers, boxlock action, DTs, 28 in. VR barrels, light engraving, previous importation.

\$895	\$795	\$700	\$650	\$600	\$550	\$500

HI-POINT FIREARMS

Distributed by MKS Supply, Inc. located in Mansfield, Ohio. Dealer and distributor sales.

Prior to 1993, trademarks sold by MKS Supply, Inc. (including Beemiller, Inc., Haskell Manufacturing, Inc., Iberia Firearms, Inc., and Stallard Arms, Inc.) had their own separate manufacturers' markings. Beginning in 1993, Hi-Point Firearms eliminated these individualized markings and chose instead to have currently manufactured guns labelled Hi-Point Firearms.

HI-POINT FIREARMS**PISTOLS: SEMI-AUTO**

HIGGINS, J.C.

Trademark used on Sears & Roebuck rifles and shotguns manufactured between 1946-1962.

The J.C. Higgins trademark has appeared literally on hundreds of various models (shotguns and rifles) sold through the Sears & Roebuck retail network. Most of these models were manufactured through subcontracts with both domestic and international firearms manufacturers. Typically, they were "spec." guns made to sell at a specific price to undersell the competition. Most of these models were derivatives of existing factory models (i.e., Browning, High Standard, Marlin, Mossberg, Savage, Stevens, Winchester, etc.) with less expensive wood and perhaps missing the features found on those models from which they were derived.

To date, there has been minimal interest in collecting J.C. Higgins guns, regardless of rarity. Rather than list J.C. Higgins models, a general guideline is that values generally are under the models of their "1st generation relatives" (listed above). The Ranger trademark was also used by Sears & Roebuck - it is not any more desirable than those guns marked J.C. Higgins. As a result, prices are ascertained by the shooting value of the gun, rather than its collector value.

For converting J.C. Higgins models to the sub-contracted manufacturers, please refer to the "Store Brand" Crossover listing in the back of the Serialization section.

HIGH STANDARD

High Standard Mfg. Co. was founded in 1926. They purchased Hartford Arms and Equipment Co. in 1932. The original plant was located in New Haven, CT from 1932-1952 until they moved to a larger facility at Hamden, CT from 1951-1976. High Standard also operated another Hamden, CT plant between 1940-1949. In 1968 the company was sold to the Leisure Group, Inc. A final move was made to East Hartford, CT in 1977 where they remained until the doors were closed in January, 1984.

High Standard values have risen dramatically over the past several years. Many collectors have realized the rarity and quality factors this trademark has earned (Models C, A, D, E, H-D, H-E, H-A, H-B First Model, G-380, GB, GD, GE, GO - 13 different variations had a total production of less than 43,000 pistols). For these reasons, top condition High Standard pistols are getting more difficult to find each year.

Note catalog numbers did not always change with design series and in 1966/1967 changed with accessories offered and not design series.

The approx. ser. number cut-off for New Haven, CT marked guns is 43X,XXX.

The approx. ser. number cut-off for Hamden, CT manufacture is 44X,XXX - 2,495,000 and G or ML 010000 - G or ML 25,000.

The approx. ser. number range for E. Hartford, CT manufacture is ML 25,000 - ML 87,000 and SH 10,000 and SH 35,000.

SEMI-AUTO PISTOLS

Pre-war High Standard Semi-Automatic pistols had 3 different takedown types.

TYPE I-A MFG. 1932-38. Takedown lever on left side of frame next to safety. Round retracting rod on rear of slide. This takedown was used on Models B & C.

TYPE I-B MFG. 1938. Similar to I-A Type except has strengthened rectangular rod on rear of slide.

TYPE II MFG. 1939. Takedown lever located on right side of frame. Round pick-up rod on top of slide.

As a final note on High Standard pistols, original factory boxes have become very desirable. Prices can range from \$75-\$100 for a good condition Model 106 or 107 factory box to over \$150 for an older box of a desirable model.

HAMMERLESS FIXED BARREL SERIES

This series consists of the 5 original pistols mfg. in 1932-1942. All serial numbers are located on forestrap of frame. This series is also sometimes referred to as the "Letter Models".

MODEL B — original High Standard pistol, basically the same gun as Hartford Arms 1925 Automatic, .22 LR, small frame, 4½ or 6¾ in. light weight barrel, fixed Patridge type front and rear sights, checkered hard rubber grips with or without H.S. monogram, 10 shot mag. Beginning ser. no. 5,000. Approx. 65,000 mfg. 1932-42.

\$675

\$575

\$450

\$325

\$250

\$200

\$150

Add \$75 for I-B Type takedown.

Less than 14,000 pistols with this takedown were mfg.

MODEL S — essentially a Model B with a 6¾ in. smooth bore barrel only without choke, chambered for .22 LR shot shell cartridge, left side of slide is stamped "HI-STANDARD MODEL S .22 LR SHOT ONLY", this variation was never a production model with approx. 5-10 guns mfg. total, 10 shot mag., a second variation using Model C slides was called the Model C/S - also not a production model with approx. 5 mfg. Mfg. 1939 only.

Because of the extreme rarity factory of this model, a specimen in almost any condition will bring \$3,000 - \$5,000. This model was used primarily for pest control.

MODEL C — identical to Model B in appearance, except .22 Short only, small frame, 4½ or 6¾ in. light weight barrel, fixed rear sight, checkered hard rubber grips with or without H.S. monogram, this action was adapted for the decreased power of the .22 Short cartridge. Beginning ser. no. 500 to 31XX, later beginning ser. no. 42XXX. Approx. 4,700 mfg. 1936-42.

MODEL D — identical to Model A except 4½ or 6¾ in. medium weight barrel, .22 LR, adj. sights, walnut grips, slide lock trigger stop, 10 shot mag. Beginning ser. no. 33XXX. Approx. 2,500 mfg. 1938-42.

\$950 \$775 \$550 \$400 \$300 \$250 \$215

Add \$250 for I-B takedown.

MODEL E — high quality, deluxe model of the hammerless series, .22 LR, adj. sight, 4½ or 6¾ in. heavy bull barrel, checkered walnut target grips with thumbrest, automatic slide lock, 10 shot mag. Beginning ser. no. 34XXX. Approx. 2,600 mfg. 1938-42.

\$1,275 \$1,045 \$800 \$575 \$440 \$360 \$300

Add \$250 for I-B takedown.

EXPOSED HAMMER — FIXED BARREL SERIES

This series consists of 4 pistols that were introduced in 1940. Frame and slide modified to accommodate external hammer. All ser. no.'s located on forestrap of frame Prefix "H" added to standard model designation with the exception of Model C. Mfg. 1940-42. This series has very low production numbers. May also be referred to as the "Hammer Letter Models".

MODEL H-D — first exposed hammer model, similar to Model D, .22 LR, 4½ or 6¾ in. medium weight barrel, adj. sight, target or standard walnut grips, no external safety, 10 shot mag. High quality pistol. Beginning ser. no. 45,463. Approx. 2,000 mfg. 1940-42.

\$1,650 \$1,350 \$1,275 \$900 \$695 \$565 \$475

This variation is infrequently encountered.

MODEL H-E — high quality, deluxe model of exposed hammer series, .22 LR, 4½ or 6¾ in. heavy barrel, adj. sight, deluxe hand checkered walnut grips with thumbrests, no external safety, 10 shot mag. Rarest of the H.S. pistols. Beginning ser. no. 51,802. Approx 1,000 mfg. 1941-42.

\$2,275 \$1,875 \$1,300 \$950 \$725 \$600 \$500

MODEL H-A — similar to Model A, .22 LR, 4½ or 6¾ in. light weight barrel, adj. sight, plain checkered walnut grips, no external safety, 10 shot mag. Very rare gun. Beginning ser. no. 53,176. Approx. 1,000 mfg. 1940-42.

\$1,050 \$865 \$665 \$475 \$365 \$295 \$250

MODEL H-B — duplicate of Model B with external hammer, .22 LR, 4½ or 6¾ in. light weight barrel, fixed sight, checkered hard rubber grips with or without H.S. monogram, no external safety, 10 shot mag. This first Model H-B had beginning ser. no. 52,405. Approx. 2,200 mfg. 1940-42.

\$850 \$695 \$495 \$355 \$275 \$235 \$200

▲ **Model H-B Second Model** — H.S. reintroduced a H-B second model similar to first model, except with external safety. Beginning ser. no. 308XXX. Approx. 25,000 mfg. 1949-1954.

\$750 \$595 \$435 \$310 \$235 \$200 \$170

U.S. MILITARY SERIES

These models are earlier H.S. pistols adapted as training guns during WWII. They were the sole suppliers of the .22 cal. pistol for military training. Ser. no.'s located on forestrap of frame.

MODEL B-US — adapted Model B with minor changes, .22 LR, available in 4½ in. barrel only, checkered hard rubber grips, fixed sight, marked "Property of U.S." on right side of frame and on top of barrel. Ordnance acceptance crossed cannon stamped on right side of frame above triggerguard, 10 shot mag. Beginning ser. no. 95XXX. Approx. 14,000 mfg. 1942-43.

HIGH STANDARD DID NOT HAVE A MODEL 105 SERIES

MILITARY MODEL 106 SERIES

This series was mfg. 1965-1968. This new military model features a walnut checkered grip and a frame that has the exact heft and feel of the famous Military 45. This military model features a new slide and a new adj. rear bridge or saddle type sight, permanently fixed to the frame. Front and rear grip straps are stippled and a new design magazine has an extension foot. Removable stabilizer and wts. available on all models. Beginning serial no. for 106 series was approx. 1,436,000-2,030,000.

---------	-------	-------	-------	-------	-------	-------

The High Standard catalog number for this model was 9238.

THE VICTOR — introduced 1972, newest and most expensive production target pistol, all steel vented rib running length of barrel until 1974 when it changed to an alloy VR/SR, early adj. sight located on rear of barrel on rib., .22 long rifle built on a military frame, walnut grips, available in 4½ or 5½ in. barrel, push-button takedown, stippled front and rear straps, 10 shot mag., barrel slab sided, wts. are rectangular. Mfg. in Hamden, CT. Stamped "THE VICTOR" on left side of barrel.

\$825	\$675	\$520	\$375	\$295	\$235	\$200
-------	-------	-------	-------	-------	-------	-------

Add \$100 for 4½ in. barrel.

The High Standard catalog number for the vent. rib model was catalog number 9216-17.

NUMBERED SERIES

In 1973, High Standard stopped marking the series numbers (either 104 or 107) on the guns. These guns just carry the normal seven digit serial number and are sometimes referred to as "NUMBERED SERIES", "UNNUMBERED SERIES", or "SEVEN-NUMBER SERIES". These pistols include the following - the Sport King, Sharpshooter, Supermatic Citation, Supermatic Trophy, The Victor, and the ISU Olympic (in both military and slant grip models). The serial number range for these guns is 2,330,000 to 2,500,000.

PLINKER — .22 long rifle, introduced in 1970-73. Successor to Duramatic and identical in almost all aspects. Thumb screw takedown.

\$365	\$295	\$225	\$160	\$115	\$100	\$85
-------	-------	-------	-------	-------	-------	------

Early guns were marked M-101, R.H. slide 1970-71.

The High Standard catalog number for this model was 9214-15.

SPORT KING — similar to Series 102/103, 4½ or 6¾ in. barrel.

\$395	\$325	\$230	\$165	\$125	\$100	\$85
-------	-------	-------	-------	-------	-------	------

The High Standard catalog number for this Model was 9200-01.

SPORT KING (NICKEL PLATED) — .22 LR, this was a nickel plated Sport King with black slanted plastic grips with silver medallion insert on grip. Mfg. 1974-77.

\$475	\$390	\$280	\$200	\$155	\$130	\$110
-------	-------	-------	-------	-------	-------	-------

The High Standard catalog number for this Model was 9208-09.

SHARPSHOOTER — .22 LR, successor to the Tournament, introduced in 1969 as part of the Model 103 Series, new model using the slant model grip frame, 5½ in. bull barrel only.

\$575	\$450	\$325	\$250	\$195	\$165	\$140
-------	-------	-------	-------	-------	-------	-------

The High Standard catalog number for this Model was 9205.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

ISU OLYMPIC MILITARY — .22 Short cal., otherwise identical to 107 series.

\$1,150	\$950	\$550	\$395	\$325	\$265	\$225
---------	-------	-------	-------	-------	-------	-------

The High Standard catalog number for this Model was 9238.

THE VICTOR — slant grip, mfg. 1973-74.

\$3,150	\$2,575	\$1,875	\$1,350	\$1,025	\$850	\$715
---------	---------	---------	---------	---------	-------	-------

Add \$75 for early steel rib.

Add \$200 for solid rib.

Add \$150 for 4½ in. barrel.

The High Standard catalog numbers for this model were: 4½ vent. rib, 9218 mfg. 1973-74.

5½ vent. rib, 9219 mfg. 1973-74. 4½ solid rib, 9226 mfg. 1974 only. 5½ solid rib, 9229 mfg. 1974 only.

THE VICTOR — .22 LR cal., similar to 107 series, Hamden mfg., military grips, in 1974, an aluminum vent. rib was used to lighten this variation, a solid rib was also available.

\$795	\$675	\$475	\$350	\$270	\$230	\$195
-------	-------	-------	-------	-------	-------	-------

Add \$150 for solid rib.

Add \$75 for steel rib.

Add \$100 for 4½ in. barrel.

The High Standard catalog number for the solid rib with military grips was 9206-11. The vent. rib model was catalog number 9216-17.

G PREFIX SERIES

Identical to 103/104 series (most models retained the same HS catalog no.) Due to the GCA of 1968, High Standard decided to serialize their rifles and shotguns beginning with ser. no. 3,000,000. In 1975, handgun serialization (pistols, revolvers, and derringers) was up to ser. no. 2,500,000 and High Standard felt they needed an alternate serial number system before handgun serialization reached 3,000,000. They decided to use the following prefixes - G for slant grip pistols, ML for military grip pistols, R for revolvers, and D for derringers. These prefixes were followed by the 5 digit ser. no. This is the last of the slant grip pistols.

SPORT KING — identical to 102/103 series, 4½ or 6¾ in. barrel. Disc. 1977.

\$395	\$325	\$230	\$165	\$125	\$100	\$85
-------	-------	-------	-------	-------	-------	------

The High Standard catalog numbers for this model were 9200-01.

SPORT KING (NICKEL PLATED) — identical to 102/103 series, nickel plated, 4½ or 6¾ in. barrel. Disc. 1977.

\$475	\$395	\$275	\$200	\$155	\$130	\$110
-------	-------	-------	-------	-------	-------	-------

The High Standard catalog numbers for this model were 9208-09.

SHARPSHOOTER — identical to 103 series, 5½ in. bull barrel only. Disc. 1977.

\$575	\$450	\$325	\$250	\$195	\$165	\$140
-------	-------	-------	-------	-------	-------	-------

The High Standard catalog number for this Model was 9205.

SUPERMATIC CITATION — identical to numbered series, 5½ in. bull barrel only. Disc. 1976.

\$875	\$725	\$525	\$375	\$295	\$245	\$210
-------	-------	-------	-------	-------	-------	-------

The High Standard catalog number for this model was 9244.

OLYMPIC ISU — identical to numbered series, 6¾ in. tapered barrel. Disc. 1977.

---------	-------	-------	-------	-------	-------	-------

The High Standard catalog no. for this Model was 9237.

ML PREFIX SERIES

As mentioned in the G Prefix section, High Standard revised their serial numbering system in 1975 from a 7 digit serial number to a five digit serial number with an ML prefix. These guns are basically identical to the guns listed in the 107 series category, but are listed here for chronological and value reasons. Mfg. mid-1975 through 1981. Guns with serial numbers between ML1,000 and

Grading

100% 98% 95% 90% 80% 70% 60%

ML24,999 were manufactured in Hamden, CT. Guns with serial numbers between ML25,000 and ML87,000 were manufactured in East Hartford, CT.

SPORT KING — .22 LR cal., similar to previous Sport Kings, but they now use military grips. Some of these Sport Kings were labeled "SPORT KING-M". Mfg. 1977-1981 in East Hartford only.

\$365 \$295 \$215 \$155 \$120 \$100 \$85

The High Standard catalog number for this model was 9258-59.

SHARPSHOOTER — .22 LR, some of the Sharpshooters with military grips were labeled "SHARPSHOOTER-M". Mfg. 1979-1981 in East Hartford only.

The High Standard catalog number for this model was 9238 (disc. 1977).

THE VICTOR — .22 LR, similar to previous model, military grip, vent. or solid rib. Last solid rib mfg. in 1977. Later Victors in this series were stamped simply "VICTOR" above triggerguard.

\$795 \$675 \$475 \$340 \$260 \$220 \$185

Add \$150 for solid rib models.

Add \$100 for 4½ in. barrel length.

Deduct 10% for East Hartford models.

The High Standard catalog number for this model was 9216-17, catalog number for the solid rib model was 9206-9211 (disc. 1977).

10-X — specifically designed for top flight shooting, 5½ in. bull barrel, push-button takedown. This model used hand-picked parts and was precisely assembled by a High Standard Master Gunsmith (with his initials under the left grip of each gun). Black matte finish, black painted walnut grips, stippled front and back straps. Mfg. 1980 in East Hartford.

▲ **Push Button Barrel Release**

\$2,750 \$2,275 \$1,625 \$1,195 \$925 \$715 \$595

The High Standard catalog number for this model was 9372.

SH SERIES

This was the last series of High Standard pistols and can be differentiated from the 107/Unnumbered/ML series by the mechanical differences within the frame assembly. Mfg. from mid 1981-1984. Serial No. range was approx. 10,000-35,000 and is prefixed "SH". Features a new barrel release in place of the push button takedown. An allenhead screw attached the frame to the barrel. A few guns were mfg. with push-button takedown from parts left over from the previous series. Also, some guns in this series have a "V" suffix.

HOFER-JAGDWAFFEN, PETER

Master gunsmith located in Ferlach, Austria. Custom order only, best quality rifles (over 100 cal. available) and shotguns (O/U and SxS) made per individual order — prices typically start at \$20,000+. Information (including an individualized quotation) can be obtained by writing to Mr. Hofer directly (see Trademark Index).

P.L. HOLEHAN, INC.

Custom rifle manufacturer located in Tucson, AZ. P.L. Holehan, Inc. is a custom rifle maker fabricating best quality bolt action rifles only. All guns are essentially built per individual custom order and the company should be contacted directly for more information and price quotations.

HOLLAND & HOLLAND LTD.

Manufacturer located in London, England since 1835. All H&H long guns are built per individual special order. Orders may be placed directly with their recently opened office located in New York, NY or directly with

HOLLAND & HOLLAND
Established 1835

the factory in England. Please refer to these listings in the Trademark Index for address, telephone, or FAX information.

Holland & Holland over the years has justly earned the reputation of producing some of the finest firearms ever manufactured. Their double rifles chambered for the black powder express cartridges are still among the most powerful rifles ever made, while exhibiting outstanding quality and superior craftsmanship. Most of these fine arms were made to order for the famous, wealthy, or royalty of their day. Because of the individual nature of each firearm, these early guns, as with any high grade item, must be individually appraised.

The early double rifles were proofed and regulated with the black powder ammunition of their day. These exposed hammer rifles were almost exclusively sold cased with accessories by Holland & Holland. They are seldom found on the market, and then not in the best of condition. Purchase of these as well as any high grade firearm should include trusted appraisal.

SHOTGUNS: SINGLE SHOT AND SIDE BY SIDE

Holland & Holland currently manufactures the Royal De Luxe Game Gun and Royal Game Gun models in sidelock configuration (and are listed below). In addition to the sidelock models, H&H also manufactures the boxlock models Cavalier, Cavalier De Luxe, Northwood, and Northwood De Luxe. The values below assume standard model with double triggers, game rib, standard walnut, or casing. Additional special order features will add considerable value to the price of a new custom order.

In 1988, Holland & Holland absorbed W & C Scott and manufactured the Chatsworth, Bowood, and Kinmount boxlock models until they were discontinued in late 1990. H&H has phased this trademark out, and more information can be found in the W & C Scott section of this text.

SINGLE BARREL TRAP GUN — 12 ga., 30 or 32 in. full choke barrel, vent. rib, boxlock, auto ejector, Monte Carlo pistol grip stock, pad. Disc.

\$20,000	\$15,000	\$12,000	\$8,500	\$7,500	\$6,750	\$4,950
Last Mfg.'s Sug. Retail was \$28,420.

Last Mfg.'s Sug. Retail was \$28,000.

RIVIERA SIDELOCK — similar to Badminton model, with two sets of barrels. Mfg. until 1967.

\$15,000	\$11,500	\$9,500	\$7,950	\$7,100	\$6,350	\$5,600
----------	----------	---------	---------	---------	---------	---------

Add 20% for 20 ga.

Add 40% for 28 ga.

Add 60% for .410 bore.

CENTENARY SIDELOCK — 12 ga., 2 in. chambers, lightened version of Royal, Badminton, and Dominion grades. The values would be the same as for the standard models, mfg. until 1962.

SHOTGUNS: O/U

H&H has finalized the design elements of their new O/U shotguns. The descriptions and prices listed below reflect the most current information on these new models.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

Holloway firearms did not make many rifles or carbines before operations ceased.

RIFLES/CARBINES: SEMI-AUTO

HAC MODEL 7 — 7.62mm NATO (.308), gas operated semi-auto paramilitary design rifle, 20 in. barrel, adj. front and rear sights, 20 shot mag., side folding stock. Mfg. 1984-1985 only. Also available in fully auto (class III dealers only) — add \$80. Add \$50 for left-hand variation.

\$995	\$895	\$795	\$695	\$595	\$525	\$465
Last Mfg.'s Sug. Retail was \$675.						

▲ **Model 7C** — 16 in. carbine, same general specifications as Model 7. Disc. 1985.

\$995	\$895	\$795	\$695	\$595	\$525	\$465
Last Mfg.'s Sug. Retail was \$675.						

Also available from the manufacturer were the models 7S and 7M (Sniper and Match models).

HOLMES FIREARMS

Previous manufacturer located in Wheeler, AR. Distributed by D.B. Distributing, Fayetteville, AR.

These pistols were mfg. in very limited numbers, most were in prototype configuration and exhibit changes from gun to gun. These models were open bolt and subject to 1988 federal legislation regulations.

PISTOLS: SEMI-AUTO

MP-83 — 9mm or .45 ACP cal., paramilitary design pistol, 6 in. barrel, walnut stock and forearm, blued finish, 3½ lbs. Add \$75 for deluxe package and \$220 for conversion kit. Mfg. 1985 only.

\$595	\$550	\$500	\$450	\$400	\$375	\$350
Last Mfg.'s Sug. Retail was \$450.						

MP-22 — .22 LR cal., 2½ lbs., steel and aluminum construction, 6 in. barrel, similar appearance to MP-83. Mfg. 1985 only.

\$395	\$360	\$320	\$285	\$250	\$230	\$210
Last Mfg.'s Sug. Retail was \$400.						

SHOTGUNS

COMBAT 12 — 12 ga., riot configuration, cylinder bore barrel. Disc. 1983.

\$795	\$720	\$650	\$595	\$550	\$500	\$450
Last Mfg.'s Sug. Retail was \$750.						

HOPKINS & ALLEN ARMS COMPANY, 1902-1914

H&A started their firearms business in 1867, manufacturing percussion revolvers. Before 1870, they were producing rimfire cartridge guns and eventually centerfire handguns and long guns. Prior to 1896, H&A guns were marked "HOPKINS & ALLEN MANUFG. CO. NORWICH CONN." or other private tradenames, including Merwin, Hulbert & Company. Hopkins & Allen guns are about equally priced with Stevens, N.R. Davis, Crescent Firearms Co., etc. There are many exceptions due to the numerous limited production guns, examples are the AA GRADE double shotgun and the "PARROT BEAK" Derringer. Hopkins & Allen also manufactured firearms which were not described in their catalogs.

Compiled from Hopkins & Allen catalogs by Charles E. Carder.

HANDGUNS

Most H&A handguns are nickel plated, with blue finish costing \$.50 extra, grips are hard rubber, wood or pearl. Some have engraving from low to very good quality. Revolver barrel lengths vary from 1¾-6 in. Calibers are .22 rimfire to .38 centerfire.

FOREHAND MODEL — breaktop, double action, five shot, .32 caliber. Values range from \$60-\$150.

- FOREHAND MODEL** — similar to above except hammerless. (This model was offered in large and small frame). Values range from \$60-\$150.
- FOREHAND MODEL** — large frame as above in .32 and .38 centerfire with full hammer or “bobbed” hammer. Values range from \$60-\$150.
- FOREHAND MODEL** — solid frame and hard rubber grips, otherwise as above in small frame. Values range from \$50-\$135.
- FOREHAND MODEL** — similar to above models, with “folding hammer”. .22 rimfires were seven shot, while .32 and .38 centerfires were five shot. By 1909, the Forehand logo was dropped from these revolvers. Values range from \$50-\$135.
- H&A NEW MODEL AUTOMATIC HAMMER REVOLVER** — similar to breaktop with hammer, produced in small and large frame, in .22 rimfire, .32 and .38 centerfire. Values range from \$50-\$135.
- H&A SOLID FRAME** — .32 and .38 centerfire, five shot, double action, hammer or “bobbed” hammer. Values range from \$40-\$140.
- H&A XL MODEL** — similar to above in .22, .32 and .38 calibers. Values range from \$40-\$140.
- H&A RANGE MODEL** — .22, .32 and .38 caliber, solid frame, loading gate on right side, wood target style grips, single or double action. (Two models, large and small frames.) Values range from \$50-\$165.
- H&A TRIPLE ACTION SAFETY POLICE REVOLVER** — breaktop with newly design locking mechanism, .22, .32 and .38 caliber, hard rubber or pearl grips. (Considered to be one of the best designed breaktops on the market. Other options for this model, include hammerless, engraved, wood target or pearl grips.) Values range from \$70-\$190.
- H&A NEW VEST POCKET DERRINGER** — .22 short rimfire, single shot, tip up, single action, 3½ in. overall length, folding trigger, blue or nickel finish, wood or pearl grips with golden monograms. This model was first listed about 1910 and known as the “Parrot Beak”. An estimate of less than one thousand were produced and they are very rare. Values range from \$550-\$1,900.
- H&A NEW MODEL TARGET PISTOL** — .22 rimfire, single shot breaktop with the same new locking mechanism as the Safety Police Revolver, wood target grips with golden monograms, blue finish and 6, 8 or 10 in. barrels. Values range from \$200-\$450.
- H&A NEW MODEL SKELETON STOCK TARGET PISTOL** — similar to above, with rounded hard rubber grips with logo, detachable “skeleton metal stock”, 18 in. barrel and blue finish. Values range from \$250-\$525.

RIFLES

Hopkins & Allen started building “falling block” rifles circa 1887-1914 with the buy-out of the Baystate Arms Company. Most commonly seen is the “Junior” model, known after 1902 as 922, 925, and 932. These numbers were in reference to the catalog numbers, not model numbers. In the very late 1890s or early 1900s, the Number 722, 822 and 832 rifles were added. In 1906, a “bolt action” repeater was added to their line, followed in 1909 by a “bolt action” single shot “military”. Lyman tang sights were an option for many H&A rifles - add \$60-\$75.

Grading	100%	98%	95%	90%	80%	70%	60%
NUMBER 922 — falling block, lever operated, .22 cal. rimfire, with round bbl.	\$195	\$165	\$125	\$110	\$90	\$75	\$60
NUMBER 925 — similar to above in .25 cal. rimfire.	\$195	\$150	\$110	\$95	\$80	\$70	\$60
NUMBER 932 — similar to above in .32 cal. rimfire.	\$195	\$150	\$110	\$95	\$80	\$70	\$60
NUMBER 938 — similar to above in .38 S&W centerfire.	\$225	\$200	\$175	\$150	\$125	\$100	\$75

Grading	100%	98%	95%	90%	80%	70%	60%
NUMBER 1922 — similar to above in .22 cal. with octagon bbl.	\$200	\$180	\$165	\$150	\$125	\$100	\$75
NUMBER 1932 — similar to above in .32 cal.	\$200	\$165	\$125	\$110	\$90	\$75	\$65

NUMBER 2932 — similar to above in .32 caliber.	\$265	\$225	\$195	\$175	\$150	\$125	\$100
NUMBER 3922 — similar to above in .22 rimfire, "SCHUETZEN RIFLE", nicked Swiss butt plate, octagon barrel. (Schuetzen rifles in good cond. are somewhat rare.)	\$495	\$450	\$400	\$365	\$325	\$275	\$200
NUMBER 3925 — similar to above in .25-20 centerfire. (This caliber rifle is more rare than the .22 rimfire).	\$650	\$600	\$550	\$500	\$450	\$350	\$250
NUMBER 44XL — similar to Number 922, except has smooth bore, chambered for the 44XL shotshell. (Referred to as, "TAXIDERMIST'S" or "LADIES GUN").	\$350	\$325	\$275	\$235	\$200	\$175	\$140
NUMBER 722 — rolling block, thumb operated, .22 cal. rimfire.	\$195	\$165	\$125	\$110	\$90	\$75	\$60
SCOUT MILITARY RIFLE — similar to above with military style stock and a "Bonneted Indian" stamped on the left side of frame. (These are somewhat rare.)	\$325	\$285	\$250	\$200	\$175	\$150	\$135
NUMBER 822 — rolling block, lever operated, .22 cal. rimfire.	\$195	\$175	\$150	\$125	\$100	\$85	\$75
NUMBER 832 — similar to above in .32 cal. rimfire. (This model was offered first with "pig tail" type levers and later with "loop" type levers. The "loop levers" are somewhat rare.)	\$225	\$200	\$175	\$150	\$125	\$100	\$75
NUMBER 4922 — .22 rimfire cal., bolt action, repeater.	\$135	\$120	\$100	\$80	\$70	\$60	\$50
NUMBER 5022 — similar to above with deluxe checkering.	\$175	\$150	\$135	\$100	\$85	\$75	\$60
MILITARY RIFLE — similar to above, except single shot with military style stock and sling. (In good condition, these are somewhat rare.)	\$250	\$225	\$200	\$185	\$165	\$140	\$125
NOISELESS — .22 rimfire, similar to the Number 922, except for checkered wood and the addition of a noise suppressor attached to the muzzle, by means of mating threads inside of suppressor and outside of barrel. The job is so well fitted, that it is difficult to recognize the suppressor. The front sight is attached to a dovetail slot in the suppressor. (These rifles are listed under the National Firearms Act of 1934 and must have proper licensing. Very rare.) Values range from \$250-\$550.							

SHOTGUNS: SxS

Hopkins & Allen purchased Forehand Arms Co. and continued to produce their line of firearms and after a few years, dropped the Forehand name. In 1902, they offered the Forehand double boxlocks with or without outside hammers. Most models were offered in 12, 16 & 20 gauge. Sidelocks were added 1906-09. In 1902, the AA GRADE, a very high quality boxlock, was offered for \$100 to \$125. It had fine Damascus barrels, straight grip, plain or automatic ejectors, fine wood and engraving and was competitive with some Remingtons, L.C. Smiths, Bakers and

other fine guns of that era. This gun was very short lived and today is rare. One feature found on all H&A double barrel guns is the "rib extension" or "doll's head".

BOXLOCK — Anson & Deeley type frame, damascus, twist, and steel barrels. Values range from \$75-\$250.

BOXLOCK — similar to above, except with outside hammers. Values range from \$75-\$250.

SIDELOCK — hammerless, damascus, twist, and steel barrels. Values range from \$90-\$250.

SIDELOCK — similar to above, except with outside hammers. Values range from \$75-\$250.

SINGLE BARREL SHOTGUNS

H&A produced a "falling block" shotgun in most gauges circa 1887 - early 1900s. Falling Blocks (FBs) in 12 ga. were built on heavy frames with the 20 and 16 gauges sharing a medium frame. Prior to 1902, some FBs were chambered for .45-70 shotshells and, today, these are rare if in good condition. From the 1890s through 1914, 38XL, 44XL shotshell guns were periodically offered in the Junior frame. After 1902, "tip-over" single shotguns were offered in Forehand designs and, later, the Davenport designs.

FALLING BLOCK — lever operated, outside hammer. Values range from \$100-\$275.

BOXLOCK — with outside hammer, damascus, twist, and steel barrels. Values range from \$65-\$150.

BOXLOCK — hammerless, top safety. Values range from \$65-\$150.

GOOSE GUNS — outside hammer, 8, 10, or 12 ga., were offered with barrels up to 40 inches long. Values range from \$90-\$200.

"SAFETY SINGLE GUN" — engraved with outside hammer and top safety. (Was offered in 1911 and recommended for trap shooting for \$15.00). Values range from \$100-\$200.

HORTON, LEW, DIST. CO.

See Lew Horton Dist. Co. listing.

HOWA

Manufacturer located in Tokyo, Japan beginning 1967.

Recently, Howa rifles have been imported by Weatherby (Vanguard Series), Smith & Wesson (pre-1985), and Mossberg (1986-87). Currently, Howa sporting rifles are being imported by Interarms and this trademark will appear in the Interarms section in this text.

HUGLU

Manufacturer of longarms since 1922, located in Istanbul, Turkey. Current importer is Alex Imports beginning 1997, located in Chula Vista, CA.

SHOTGUNS: O/U

The current line-up of Huglu O/U shotguns includes Models 103D, 104A, and 1104. The 103D and variations sell for approx. \$450, the 104A series is currently priced in the \$385-\$450 range, while the 1104 is in the \$875-\$925 range (not the 1104AE high-grade, priced approx. \$2,400-\$2,500).

SHOTGUNS: SxS

The current line-up of Huglu SxS shotguns includes Models 200A, 202B, and 1202. The 200A and variations sell for approx. \$450, the 202B series is currently priced in the \$385-\$450 range, while the 1202 is in the \$725-\$850 range (not the 1202AE high-grade, priced approx. \$2,400-\$2,500).

SHOTGUNS: SEMI-AUTO

Current models include the 401B (approx. \$450), and the 1000SA (approx. \$575).

HUNTER ARMS COMPANY

Manufacturer located in Fulton, NY between 1891 and 1945.

The Hunter Arms Company was formed to manufacture L.C. Smith shotguns. Please refer to the L.C. Smith section in this text for further information regarding this manufacturer (including Fulton, Fulton Special, and Hunter Special models.)

HUSQVARNA

Previous manufacturer located in Husqvarna, Sweden.

I section

I A B SHOTGUNS

Manufactured by Industria Armi Bresciane, Italy. Previously distributed by Sporting Arms International, Inc. located in Indianola, MS.

I A B manufactures high quality competition (O/U and single barrel trap or skeet) shotguns in various styles and configurations including combo sets. These guns employ a boxlock action, have ejectors, and various amounts of engraving. Prices for 100% condition usually start in the \$550-\$900 price range. I A B shotguns are not being imported currently - values for older models will be determined by the prices shooters, not collectors, are willing to pay for them.

I A I

GAL MODEL — .45 ACP cal., single action, 4 $\frac{1}{4}$ in. barrel, includes competition trigger, hammer, and slide stop, black wraparound combat style rubber grips, 8 shot mag., low profile 3 dot sights, 42 oz. New 1997.

Mfg.'s Sug. Retail \$525 \$435 \$375 \$325 \$265 \$230 \$200 \$185

ISRAELI MILITARY INDUSTRIES (IMI)

Manufacturer located in Israel.

IMI manufactured guns (including Galil, Jericho, Magnum Research, Timberwolf, Uzi, and others) can be located in their respective sections of this text.

ITALIAN MILITARY ARMS

Includes the more popular Italian Military Arms mfg. since 1891.

MODEL 1891 MANNLICHER-CARCANO — bolt action, 6.5mm, 6 shot, 31 in. barrel, straight handle, adj. sight, military stock.

\$120 \$100 \$85 \$70 \$55 \$40 \$30

MODEL 38 TERNI MILITARY RIFLE — 7.35mm, similar to 1891, except turned down bolt handle, 21 in. barrel and folding bayonet.

\$120 \$100 \$85 \$70 \$55 \$40 \$30

GLISENTI MODEL 1910 — 9mm Glisenti cal., 4 in. barrel, 7 shot mag., checkered wooden grips, official Italian service pistol of both WWI and WWII, 32 oz.

\$750 \$625 \$450 \$325 \$275 \$225 \$200

Warning: 9mm Parabellum ammunition cannot be used in this pistol - only 9mm Glisenti, as it is approx. 25% less powerful than the 9mm Para.

BRIXIA — similar to Glisenti Model 1910, except utilizes simplified mfg. techniques, mostly sold to civilians.

\$895 \$750 \$575 \$400 \$350 \$325 \$300

SOSSO — 9mm Para., large experimental semi-auto, early pistols were double action and marked "Sosso", late guns were single action and built by FNA. All Sosso pistols feature a unique continuous "chain link" 19 or 21 shot mag. Approx. 5 guns mfg.

Extreme rarity factor precludes accurate price evaluation.

ITHACA GUN

Current manufacturer beginning 1986-to date, located in King Ferry, NY. While production ceased temporarily (approx. August 1995-summer 1996), Ithaca Gun Company, LLC is once again in production with the Model 37 slide action shotgun and variations. Previously manufactured

in Ithaca, NY, 1883 to Nov. of 1986. In early 1987, production was resumed until August, 1995 as Ithaca Acquisition Corp. using the old trademark. On March 6, 1987 some assets of the Ithaca Gun Company were sold to Ithaca Acquisition Corporation. In the past, Ithaca also absorbed companies including Syracuse Arms Co., Lefever Arms Co., Union Fire Arms Co., Wilkes-Barre Gun Co., as well as others.

RIFLES: SINGLE SHOT

MODEL 89 — .243 Win., .30-06, .375 H&H, .416 Rigby, or 7mm cal., falling block action, 26 or 28 in. Shilen barrel, full-length uncheckered walnut stock.

While advertised at \$658 MSR during 1994, this model was never mfg.

SHOTGUNS: SIDE x SIDE - EARLY MFG.

ITHACA HAMMERLESS DOUBLE BARREL — 12, 16, 20, 28 ga., or .410 bore, 26-32 in. fluid steel or damascus barrels, boxlock, extractors, double triggers, any standard choke, checkered pistol grip stock and forearm, grades shown differ in overall quality, ornamentation, grade of wood, and style of checkering. In 1925, the rotary bolt and stronger frame were adapted (ser. no.'s after 400,000 - commonly referred to as NID or New Ithaca Double). Values are the same as for pre-400,000 serial range shotguns. Ithaca doubles incorporated a number of design changes made on the action - they are referred to as the Lewis, Crass, Flues, and Minier frame variations.

Values below are for guns mfg. between 1925-1948. Newer models can be found later in this section.

- Add \$200 for SST.
- Add \$150 for SNT.
- Add \$350 for VR on Grades 4, 5, 7, and \$2,000 Grade.
- Add \$200 for VR - lower grades.
- Add \$175 for beavertail forearm.
- Add 33% for auto ejectors on Grades No. 1, 2, and 3.
- Subtract 33% if without ejectors on Grades 4E-7E.

Early hammer doubles in average condition are approx. valued between \$175-\$450. However, if 60% condition remains (including original case colors), values can approximate those listed below.

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%

SHOTGUNS: SINGLE BARREL TRAP

CENTURY TRAP — 12 ga., 32 or 34 in. VR barrel, engraved, auto ejector, full choke, checkered walnut stock. Mfg. 1973 and 1976 by SKB.

\$550	\$525	\$470	\$440	\$385	\$360	\$320
-------	-------	-------	-------	-------	-------	-------

CENTURY II TRAP — improved trap stock version of Century, Monte Carlo stock.

\$600	\$550	\$495	\$470	\$415	\$385	\$350
-------	-------	-------	-------	-------	-------	-------

SINGLE BARREL TRAP — 12 ga., 30, 32, or 34 in. barrels, VR, boxlock, auto ejector, checkered pistol grip and forearm, grades differ in engraving, overall workmanship, and grade or wood and checkering. Values on these models sometimes vary greatly depending on originality of finish, customer alterations, and other variations trap shooters might use to alter dimensions for their particular shooting requirements. Below values represent trap guns in original, unaltered condition.

Note: Flues model mfg. prior to 1921 with serial numbers under 400,000 generally have better engraving than NID (New Ithaca Double) models over serial number 400,000 (also referred to as Knick models).

Trap guns under 60% original condition will be within 25% of the value shown in the 60% column.

▲ **Victory Grade** — disc. 1938.

▲ **Sousa Grade** — extremely rare.

Extreme rarity factor precludes accurate pricing evaluation. Prices will be higher than the \$5,000 Grade.

SHOTGUNS: MISCELLANEOUS

AUTO & BURGLAR SxS — smooth bore 20 ga. with 10 in. double barrels, case hardened finish, pistol grip, mfg. 1922-1934. Model A (approx. 2,500 mfg.) has grip spur, Model B (approx. 2,000 mfg.) has squared grip; both were mfg. in lots of about 100 according to demand, and serial numbers are mixed with those of regular Ithaca shotguns. Guns not currently registered with BATF cannot be legally owned and are subject to seizure.

▲ **Model A** — serial no. range is 343,336-398,365.

\$1,850	\$1,450	\$1,200	\$975	\$775	\$675	\$575
---------	---------	---------	-------	-------	-------	-------

▲ **Model B** — serial no. range is 425,000-464,699.

\$1,450	\$1,200	\$975	\$775	\$675	\$575	\$465
---------	---------	-------	-------	-------	-------	-------

Add \$300-\$500 for original holster (very rare). Prototype or special order guns (in 16, 28 ga., or .410 bore) are extremely rare and command premiums of 100%+.

---------	------	-----	-----	-----	-----	-----	-----

MODEL 66 LEVER ACTION — 12, 20 ga., or .410 bore single shot lever action, field gun only. Mfg. 1963-1978.

\$125	\$95	\$90	\$75	\$70	\$65	\$55
-------	------	------	------	------	------	------

Add 33% to .410 bore.

Add 25% for VRs that were also available on special order.

▲ **Model 66 RS** — 20 ga. slug gun with 22 in. barrel and rifle type sights, recoil pad.

\$195	\$165	\$135	\$115	\$90	\$80	\$70
-------	-------	-------	-------	------	------	------

Note: Ventilated ribs were also available on special order — add 25%.

SHOTGUNS: O/U

Please refer to the Fabarm section in this text for those models previously imported by Ithaca (imported 1994-95).

SKB SHOTGUNS: PREVIOUSLY IMPORTED BY ITHACA

Note: Can be found under SKB heading.

SHOTGUNS: SLIDE ACTION

During late 1996, Ithaca Gun Co., LLC resumed manufacture of the Model 37, while discontinuing the Model 87. In 1987, Ithaca Acquisition Corp. reintroduced the Model 37 as the Model 87. Recently manufactured Model 87's are listed below in addition to both new and older Model 37's (produced pre-1986).

MODEL 37 TRENCH AND RIOT GUNS — see separate listing under Trench Guns in the T Section.

MODEL 37 DS POLICE SPECIAL — 12 ga. only, 18½ in. barrel with rifle sights, Parkerized finish on metal, oil finished stock, typically subcontracted by police departments or law enforcement agencies, with or without unit code markings.

\$295	\$250	\$225	\$200	\$185	\$170	\$160
-------	-------	-------	-------	-------	-------	-------

MODEL 37 FEATHERLIGHT STANDARD — 12, 16, or 20 ga., bottom ejection, 4 shot mag., 26, 28, or 30 in. barrel, hammerless, take down, any standard choke. Mfg. 1937-disc.

\$245	\$225	\$195	\$175	\$160	\$140	\$125
-------	-------	-------	-------	-------	-------	-------

MODEL 37V — similar to 37, except VR. Mfg. 1962-disc.

\$315	\$260	\$240	\$195	\$180	\$170	\$165
-------	-------	-------	-------	-------	-------	-------

All currently manufactured Model 37s have the Featherlight designation. Prices above are for older manufactured Model 37's.

MODEL 37D — similar to 37, except recoil pad, beavertail forearm, checkered. Mfg. 1954-1981.

\$295	\$275	\$235	\$200	\$185	\$175	\$160
-------	-------	-------	-------	-------	-------	-------

MODEL 37DV — similar to 37D, except VR. Mfg. 1962-1981.

\$350	\$295	\$250	\$225	\$200	\$185	\$170
-------	-------	-------	-------	-------	-------	-------

MODEL 37 FIELD GRADE MAGNUM — 12 or 20 ga., 3 in. chambers, VR, walnut stock and corncob forearm, supplied with three choke tubes. Mfg. 1984-1986.

\$300	\$240	\$195	\$180	\$170	\$165	\$150
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$428.

MODEL 37 FIELD GRADE STANDARD — 12 or 20 ga., economy model, corncob forearm, 26, 28, or 30 in. barrel. Mfg. 1983-1985 only.

\$245	\$225	\$195	\$175	\$160	\$140	\$120
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$298.

MODEL 37 ULTRALITE — 12 or 20 ga., new manufacture features checkered pistol grip (with Sid Bell red grip cap) and forearm. New late 1996.

Mfg.'s Sug. Retail	\$600	\$550	\$475	\$400	\$350	\$300	\$250	\$225
--------------------	-------	-------	-------	-------	-------	-------	-------	-------

Grading	100%	98%	95%	90%	80%	70%	60%
MODEL 37 ENGLISH ULTRALITE — 12 or 20 ga., 25 or 26 in. barrels, world's lightest pump, 20 ga. weighs 4¾ lb., 12 ga. weighs 5½ lbs., checkered straight stock. Mfg. 1983-1986.	\$395	\$350	\$300	\$265	\$225	\$200	\$180
	Last Mfg.'s Sug. Retail was \$522.

MODEL 37 PRESENTATION — 12 ga., blued, engraved, gold mounted receiver with extra-fancy walnut, cased, limited production. Mfg. 1981-86.

\$1,475	\$1,245	\$1,080	\$915	\$830	\$745	\$665
---------	---------	---------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,658.

A 3 gun set was also available - an NIB set is currently priced in the \$1,750 range.

MODEL 37 DUCKS UNLIMITED — 12 ga., VR.

\$385	\$305	\$275
-------	-------	-------

MODEL 37 \$1000 GRADE — all gauges, deluxe engraving and checkering, gold inlaid, select figured walnut, hand-finished parts. Mfg. 1937-1940.

\$5,750	\$5,200	\$4,750	\$4,250	\$3,750	\$3,250	\$2,650
---------	---------	---------	---------	---------	---------	---------

MODEL 37 \$5000 GRADE — similar to \$1000 Grade, post-war designation. Mfg. 1947-1967.

\$5,250	\$4,850	\$4,250	\$3,850	\$3,250	\$2,850	\$2,250
---------	---------	---------	---------	---------	---------	---------

MODEL 87 FIELD (BASIC) — 12 or 20 ga., 3 in. chamber, economy model, walnut stock and forearm with pressed checkering, 26, 28, or 30 (disc.) in. barrel with 3 choke tubes standard. Reintroduced 1987-1996.

\$360	\$290	\$240	\$195	\$170	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$477.

▲ **Model 87 Basic Field Combo** — 12 or 20 ga., includes 20/25 in. deer barrel with special bore and 28 in. VR multi-choke field barrel, uncheckered walnut stock and corncob forearm, 7 lbs. Mfg. 1989-92.

\$400	\$315	\$275	\$235	\$210	\$190	\$170
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$459.

Add \$32 for rifled bore barrel.

Add \$104 for laminated wood (includes rifle bored barrel).

▲ **Model 87 Camo Field** — 12 ga. only, 3 in. chamber, 24, 26, or 28 in. VR barrel, camo-seal rust resistant finish on exterior parts. Available in either green or brown camo finish. Mfg. began 1986, resumed 1988-disc. 1996.

\$425	\$315	\$260	\$200	\$175	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$542.

▲ **Model 87 Turkey Field** — 12 ga. only, 24 in. VR barrel with choice of fixed full choke or full choke tube, camo or matte blue finish. Mfg. 1989-1996.

\$365	\$285	\$235	\$190	\$170	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$466.

Add \$85 for camo finish.

Add \$43 for full choke tube.

MODEL 87 ULTRALITE FIELD — 12 or 20 ga., 3 in. chamber, aluminum receiver, 20 (disc. 1988), 24, 25 (disc. 1988), or 26 in. barrel. 20 ga. weighs 5 lbs., 12 ga. weighs 5¾ lbs, multi-choke (3) became standard in 1989. Originally mfg. 1985-86, reintroduced 1988-90.

\$445	\$375	\$295	\$240	\$210	\$190	\$170
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$481.

Add \$50 for slim grip model (12½ in. stock - disc. 1985).

Subtract \$42 if without multiple choke feature.

The 20 and 25 in. barrels were disc. when mfg. was resumed 1988.

▲ **Model 87 Ultra Deluxe** — similar to Ultralite Field except has cut checkering, high gloss lacquer finish, and gold trigger. Mfg. 1989-91.

\$425	\$360	\$300	\$250	\$220	\$190	\$170
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$514.

MODEL ENGLISH 87 — 20 ga. only, 3 in. chamber, 24 or 26 in. VR barrel with 3 choke tubes, steel receiver, checkered walnut stock and forearm, recoil pad, 6¾ lbs. Mfg. 1991-96.

\$425	\$315	\$260	\$200	\$175	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$545.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MODEL 87 DELUXE — similar to Model 87 Field Grade except has cut checkering, 26, 28, or 30 in. VR barrel, high gloss lacquer finish, and gold trigger, newer mfg. includes 3 choke tubes. Mfg. 1989-1996.

\$415	\$310	\$255	\$200	\$175	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$533.

Add \$54 for combo package (includes 20 in. special bore deer barrel, disc. 1992).
 Add \$87 for combo package with 20 or 25 in. rifled bore deer barrel, disc. 1992.

▲ **Model 87 Deluxe Magnum** — 12 or 20 ga., 3 in. chambers, VR, deluxe wood with checkered forearm. Mfg. 1981-1986, production resumed 1988 only.

\$320	\$270	\$230	\$210	\$200	\$185	\$165
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$395.

Add \$77 for Combo package (extra 28 in. barrel).
 New mfg. 20 ga. shotguns were available with a 25 in. barrel only (with choke tubes).

MODEL 87 SUPREME GRADE — 12 or 20 ga., presentation walnut, high luster blue, limited production, previously available in either trap, skeet, or field models, fixed chokes. Mfg. 1988-1996.

\$640	\$475	\$395	\$325	\$295	\$270	\$250
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$809.

BASIC DEERSLAYER — 12 ga. only, 20 or 25 in. special bore or rifled barrel, oil finished stock and corncob forearm with no checkering, iron sights, matte metal finish, 7 lbs. Mfg. 1989-1996.

\$345	\$280	\$240	\$195	\$175	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$425.

Add \$40 for rifled barrel.

MODEL 87 FIELD DEERSLAYER — 12 or 20 ga., rifle slug barrel, 20 or 25 in. special bore barrel, open sights. Mfg. 1959-86, reintroduced 1988-1993.

\$300	\$250	\$210	\$180	\$160	\$150	\$140
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$364.

MODEL 87 DELUXE DEERSLAYER — similar to Field Deerslayer except has cut checkering, high gloss lacquer finish, and gold trigger. Mfg. 1989-1996.

\$365	\$285	\$235	\$190	\$170	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$465.

Add \$34 for rifled bore.
 Add \$120 for combo package (28 in. multi-choke barrel).

▲ **Model 87 Ultra Deerslayer** — similar to Deluxe Deerslayer except has aluminum frame. Mfg. 1989-90 only.

\$350	\$285	\$245	\$200	\$175	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$444.

MONTE CARLO DEERSLAYER II — 12 ga. only, 20 or 25 in. barrel with rifling, Monte Carlo stock and forearm with cut checkering, receiver is drilled and tapped for scope mounting, 7 lbs. Mfg. 1989-1996.

\$445	\$335	\$270	\$210	\$175	\$160	\$145
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$567.

DEERSLAYER II FAST TWIST — 12 ga. only, 25 in. rifled permanently fixed barrel, Monte Carlo stock with checkering, receiver is drilled and tapped. Mfg. 1992-1993.

\$440	\$385	\$325	\$275	\$235	\$200	\$180
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$550.

MODEL 87 MILITARY & POLICE — 12 (3 in.) or 20 (new 1989) ga., short barrel Model 37 w/normal stock or pistol grip only, 18½, 20, or 24¾ (scarce) in. barrel, 5, 8, or 10 shot. Originally disc. 1983, reintroduced 1989-1995.

\$265	\$230	\$200	\$180	\$170	\$160	\$150
-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$323.

Add \$104 for nickel finish (mfg. 1991-92 only).
 Subtract \$35 without parkerizing (disc.).

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

SHOTGUNS: SEMI-AUTO

MODEL 51A FEATHERLIGHT STANDARD — 12 or 20 ga., 30 in. full, 28 in. full or mod., 26 in. imp. cyl., gas operated, autoloading, checkered pistol grip stock. Mfg. 1970-1985. Vent. rib became standard during late production.

Older models (no VR)	\$250	\$230	\$200	\$180	\$165	\$150	\$130
Recent production (w/VR)	\$285	\$265	\$235	\$210	\$190	\$175	\$165

Last Mfg.'s Sug. Retail with VR was \$477.

MODEL 51A MAGNUM — similar to 51 Standard, except 3 in. shells only, blue finish, recoil pad, VR became standard in 1984. Disc. for 1985.

Older models w/o VR	\$265	\$235	\$220	\$205	\$180	\$165	\$150
Vent. rib	\$295	\$275	\$250	\$225	\$200	\$185	\$170

MODEL 51A MAGNUM WATERFOWLER — similar to 51 Standard, except 3 in. shells only, matte finished metal & flat finished walnut, recoil pad. Vent. rib standard. Mfg. 1984-1986.

	\$325	\$295	\$275	\$250	\$230	\$200	\$180
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$625.

Add \$40 for camouflaged exterior finish (mfg. 1986 only).

MODEL 51A SUPREME TRAP — similar to 51 Standard, except 12 ga. only, 30 in. barrel, 7 post rib, full choke, select wood, pad, trap style stock. Add \$36 for Monte Carlo. Mfg. 1970-1986.

	\$425	\$365	\$315	\$295	\$270	\$250	\$230
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$869.

MODEL 51A SUPREME SKEET — similar to 51 Standard, except 26 in. VR barrel, skeet choke, select wood. Mfg. 1970-present. 20 ga. was available 1983. Disc. 1986.

	\$465	\$395	\$340	\$300	\$280	\$260	\$240
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$858.

MODEL 51A DEERSLAYER — similar to 51 Standard, with 24 in. slug barrel, rifle sights, recoil pad, no rib. Mfg. 1972-1983.

	\$350	\$300	\$260	\$230	\$195	\$180	\$165
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$477.

MODEL 51A TURKEY GUN — 12 ga. Mag. only, 26 in. barrel, matte finish, sling and swivels included. Mfg. 1984-1986.

	\$360	\$305	\$275	\$265	\$250	\$230	\$210
--	-------	-------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$625.

MODEL 51 DUCKS UNLIMITED — similar to 51 Deluxe, with D/U emblem on receiver.

	\$425	\$375	\$335	\$300	\$280	\$260	\$230
--	-------	-------	-------	-------	-------	-------	-------

MODEL 51 PRESENTATION — 12 ga., blued, engraved, gold engraved receiver with deluxe walnut. Mfg. 1984-1986.

	\$1,250	\$1,000	\$875	\$700	\$575	\$450	\$325
--	---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,658.

MODEL XL 300 — 12 or 20 ga., gas operated, various barrel lengths with or w/o VR, mfg. 1973-76.

	\$250	\$230	\$200	\$180	\$165	\$150	\$130
--	-------	-------	-------	-------	-------	-------	-------

Add 15% for VR barrel.

MODEL XL 900 — 12 or 20 ga., gas operated, various barrel lengths with VR, mfg. 1973-78.

	\$295	\$275	\$245	\$210	\$185	\$170	\$150
--	-------	-------	-------	-------	-------	-------	-------

Add 10% for skeet, trap, or slug variations.

SEMI-AUTO: MAG-10 SEMI-AUTO

All Ithaca Mag-10s were disc. 1986.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MAG-10 — 10 ga., 3½ in. Mag., semi-auto, various barrel lengths, stainless steel breech block assembly, gas operated, various chokes, plain barrel, 11 lb. Mfg. 1975-1986.
 100% values assume NIB condition - if without, subtract 10%.

▲ **Standard Grade** — no checkering, ribless barrel, dull finished wood.
 \$600 \$550 \$500 \$460 \$430 \$395 \$375
 Last Mfg.'s Sug. Retail was \$726.

▲ **Standard Grade with VR** — available in 22, 26, 28, or 32 in. barrel lengths - otherwise similar to Standard Grade.
 \$595 \$550 \$495 \$450 \$400 \$360 \$330
 Last Mfg.'s Sug. Retail was \$781.

Add \$60 for camouflaged exterior finish.
 Add \$60 for interchangeable choke tubes (3) - became available in 1986.

 \$795 \$725 \$675 \$595 \$550 \$495 \$450
 Last Mfg.'s Sug. Retail was \$1,124.

▲ **Mag. 10 Roadblocker** — 22 in. cylinder bored ribless barrel, parkerized finish.
 \$750 \$625 \$575 \$500 \$460 \$430 \$400
 Last Mfg.'s Sug. Retail was \$741.

▲ **National Wild Turkey Fed. Special Edition** — mfg. in 1985 only.
 \$950 \$795 \$625

MAG-10 PRESENTATION OR CENTENNIAL — 10 ga. Mag., blued, engraved, gold inlaid receiver, extra fancy walnut. Limited production. Approx. 200 mfg. in Presentation Grade 1983-1986.

\$1,875 \$1,550 \$1,300 \$1,050 \$915 \$830 \$745
 Last Mfg.'s Sug. Retail was \$1,727.

This configuration was also offered as a 3 gun set - an NIB set is currently priced at approx. \$4,750.

PERAZZI SHOTGUNS

NOTE: Ithaca was sole importer for Perazzi in the '70s. All new and used models will be in the P section under Perazzi. Perazzi today distributes their own firearms.

IVER JOHNSON ARMS, INC.

Manufactured in Fitchburg, MA, 1883-1984 and Jacksonville, AR 1984-1993. Formerly Johnson Bye & Co. 1871-1883. Renamed Iver Johnson & Co. in 1871 until 1891. Renamed Iver Johnson's Arms & Cycle Works in 1891 with manufacturing moving to Fitchburg, MA. In 1975 the name changed to Iver Johnson's Arms, Inc., and two years later, company facilities were moved to Middlesex, MA. In 1982, production was moved to Jacksonville, AR under the trade name Iver Johnson Arms, Inc. In 1983, Universal Firearms, Inc. was acquired by Iver Johnson Arms, Inc.

Iver Johnson Arms was sold in March of 1987 and was acquired by American Military Arms Corporation (AMAC). AMAC ceased operations in early 1993.

REVOLVERS

MODEL 1900 — .22, .32 S&W, or .38 S&W cal., double action, 2½, 4½, or 6 in. barrel, fixed sights, blue or nickel, rubber grips. Mfg. 1900-1947.

\$125 \$80 \$70 \$60 \$55 \$45 \$40

TARGETMASTER SLIDE ACTION — .22 LR or Mag. (disc. 1986) cal., 18½ in. barrel, 12 shot (LR) tube mag., 5¾ lbs. Mfg. 1985 only, reintroduced 1988-90.	\$175	\$140	\$125	\$115	\$100	\$90	\$80
	Last Mfg.'s Sug. Retail was \$209.						

This model was designated EW.22 HBP previously.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MODEL EW.22 HBL LEVER ACTION (WAGONMASTER) — .22 S, L, and LR or .22 Mag. cal., 18½ in. barrel, walnut finish, hardwood stock, blue finish, 5¾ lbs., grooved for scope mounts. Mfg. 1985-1986, reintroduced 1988-90.

\$175	\$140	\$125	\$115	\$100	\$90	\$80
-------	-------	-------	-------	-------	------	------

Last Mfg.'s Sug. Retail was \$209.

Add \$23 for .22 Mag. cal. (19 in. barrel).

This model was designated EW.22 HBL previously. It was also available in a Junior model featuring smaller dimensions; values same as listed above.

TRAIL BLAZER SEMI-AUTO (MODEL IJ.22 HB) — .22 LR only, 10 shot clip mag., 18½ in. barrel, 5.8 lbs. Mfg. 1985 only.

\$115	\$100	\$90	\$85	\$80	\$75	\$70
-------	-------	------	------	------	------	------

Last Mfg.'s Sug. Retail was \$125.

SHOTGUNS

CHAMPION — 10, 12, 16, 20, 24, 28, 32 ga., or .410 bore, also available in .44, .45, 12mm, or 14mm rifle cal., single barrel shotgun or rifle, 26-32 in. full barrel, exposed hammer, auto ejector, plain pistol grip stock. Mfg. 1909-1956.

\$145	\$100	\$80	\$60	\$40	\$35	\$25
-------	-------	------	------	------	------	------

Values on both smaller gauge shotguns and rifles would be considerably higher than those listed above. A mint .32 ga. might command 400% more than the above values. Rifles will also bring premiums over values listed above.

MATTED RIB GRADE — similar to Champion, except in 12, 16, or 20 ga. only, solid rib, checkered stock. Mfg. 1909-1948.

\$165	\$115	\$95	\$70	\$50	\$45	\$40
-------	-------	------	------	------	------	------

This model has either a semi-octagon (with top matted) or jacketed breech.

TRAP GRADE — similar to Matted Rib, except 32 in. full barrel, super select wood, 12 ga., vent rib. Mfg. 1909-1942.

\$275	\$165	\$140	\$120	\$100	\$90	\$80
-------	-------	-------	-------	-------	------	------

HERCULES GRADE — 12, 16, 20, 28 ga., or .410 bore, double barrel, 26-32 in. barrels, hammerless, boxlock, various chokes, extractors and double triggers standard, checkered pistol grip or straight stock. Mfg. 1918-1943.

\$795	\$525	\$450	\$425	\$375	\$335	\$310
-------	-------	-------	-------	-------	-------	-------

Add \$100 for auto ejectors.

Add \$100 for SST.

Add 10% for 16 ga.

Add 20% for 20 ga.

Add 200% for 28 ga.

Add 100% for .410 bore.

Add 200%+ for rare factory engraved specimens.

The Hercules Model was mfg. in both USA and Canada. The Hercules name was dropped in 1936 and became known as the "Iver Johnson Hammerless" until the end of production. Case colored frames were standard until 1936, blued frames were standard 1937-1943. A special run of Hercules Doubles was built in the 1930s for Montgomery Ward under the "Western Field" Model 53 nomenclature. All Western Field guns had a beavertail forearm, twin ivory sights, and recoil pad. Hercules 28 ga. SxS's are extremely rare.

SKEET-ER MODEL — 12, 16, 20, 28 ga., or .410 bore, similar to Hercules Model, except has blued receiver, super select wood and beavertail forearm, many Skeet-ers were special order guns with options including selective or non-selective Miller trigger, custom stock, barrel chokes, chamber lengths, checkering and wood finishes, sling swivels, recoil pad, checkered butt, VR, and various engraving patterns. Approx. 1,800 mfg. 1933-1942.

\$1,295	\$900	\$700	\$600	\$500	\$450	\$400
---------	-------	-------	-------	-------	-------	-------

Add 20% for auto ejectors.

Add 20% for SST.

Add 50% for factory VR.

Add 20% for 16 or 20 ga.

Add 100% for 28 ga. or .410 bore.

Add 200% for rare factory engraving.

.410 bore is the most commonly encountered gun and was made on a special small frame.

This model was probably responsible for more Skeet records than any other American .410 bore SxS shotgun.

SUPER TRAP — 12 ga. only, 32 in. full VR, boxlock, extractors, checkered pistol grip stock, beavertail forend and recoil pad. Mfg. 1928-1942. Scarce.

\$1,095	\$750	\$550	\$475	\$415	\$395	\$370
---------	-------	-------	-------	-------	-------	-------

Add \$100 for auto ejectors.

Add \$100 for SST.

SILVER SHADOW — O/U, 12 ga., 26 or 28 in. barrels, various chokes, extractors, vent rib, checkered pistol grip stock, Italian mfg. Disc.

\$375	\$325	\$300	\$275	\$225	\$185	\$175
-------	-------	-------	-------	-------	-------	-------

Add \$100 for ST.

JEFFERY, W.J. & CO. LTD

Previously manufactured in London, England.

In addition to making a complete line of their own shotguns and rifles, W.J. Jeffery also was subcontracted by many other exporters, distributors, and retailers (including London's famous Army & Navy department store). Many models were produced and rather than list them individually, a generalized format has been adopted for determining values on both rifles and shotguns.

RIFLES

SINGLE SHOT — various calcs., falling block action, checkered walnut stock and forearm, usually multiple folding leaves rear sight (also tangent), excellent quality. Prices start in the \$600 range for poor condition specimens in obsolete or undesirable calcs. and can go up to \$5,000 for 100% condition in .600 Nitro Express.

Subtract substantially for the Martini action variation.

BOXLOCK DOUBLE RIFLE — many calcs., various engraving patterns, top or under (usually large calcs.) lever opening, multiple folding leaves rear sight, checkered walnut stock and forearm. Prices usually start in the \$1,500 range for poor condition in undesirable calcs. and can exceed \$8,000 if encountered with elaborate engraving in .475 Express or larger calcs.

Subtract approx. 40% if with hammers, over 50% if with damascus barrels.

SIDELOCK DOUBLE RIFLE — various calcs., available in No. 1 or No. 2 grade, top-lever opening, best quality engraving, deluxe checkered walnut stock and forearm, almost any custom order could be filled. Prices start in the \$3,250 range for 60% condition in smaller calcs. and can easily go to \$12,000+ when found in excellent condition in the larger calcs.

Subtract approx. 40% if with hammers, over 50% if with damascus barrels.

SHOTGUNS

BOXLOCK SHOTGUN — most ga.'s, many combinations of options available, top-lever opening, many ranges of engraving, high quality and workmanship. Values usually start in the \$650 range if in poor condition and can go to \$4,500+ if in a small ga. in near new condition (\$1,750 for 12 ga.).

Subtract approx. 40% if with hammers, over 50% if with damascus barrels.

SIDELOCK SHOTGUN — most ga.'s, many combinations of options available, top-lever opening, many ranges of engraving, high quality and workmanship. Values usually start in the \$1,250 range if in poor condition and can go to \$8,500+ if in a small ga. in near new condition (\$3,950 for 12 ga.).

KDF, INC.

Previous manufacturer and current custom riflemith specializing in restocking and installing muzzle brakes, in addition to supplying specialized rifle parts located in Seguin, TX. KDF utilized Mauser K-15 actions imported from Oberndorf, Germany. Previously, KDF rifles were manufactured by Voere (until 1986) in Vöhrenbach, W. Germany. Manufacture in 1987 was absorbed by Mauser-Werke in Oberndorf, Germany.

Older KDF rifles were private labeled by Voere and were marked KDF. Since Voere was absorbed by Mauser-Werke in 1987, model designations changed. Mauser-Werke does not private label (i.e. newer guns are marked Mauser-Werke), and these rifles can be found under the Mauser-Werke heading in this text.

RIFLES: U.S. MFG.

In 1989, KDF announced the release of a new American built redesigned Model K15 with many improvements. While advertised, approximately only 25 were manufactured in various cal.

K15 — .22-250 (disc. 1992), .243 Win., 6mm Rem., .25-06 Rem., .270 Win., .280 Rem., .30-06 cal. or .308 Win. cal., 60 degree short lift bolt action with 3 lugs, Kevlar composite or laminate walnut stock, adj. single stage competition trigger, box magazine, thumb activated slide safety, satin blue finish, 24 in. match grade barrel, deluxe checkered walnut stock with ebony accents and Pachmayr Decelerator recoil pad, approx. 8 lbs. Limited mfg. in U.S. starting 1989.

KENDALL INTERNATIONAL

Previous importer/distributor located in Paris, KY. Kendall International also imported Australian Automatic Arms, the Keberst Rifle, and several air rifles that can be found in their respective sections in this text.

KEPPELER + FRITZ GmbH

Manufacturer located in Fichtenberg, Germany. No current importer.

Keppeler manufactures many types of top quality rifles which are typically centerfire and target configured (UIT-CISM, Prone, Free, and Sniper Bullpup). Both metric and domestic calibers are available as well as a variety of special order options. Please contact the factory directly for more information and current pricing (see Trademark Index).

KEPPLINGER, ING. HANNES

Manufacturer located in Kufstein, Austria. No current importer.

RIFLES

Kepplinger rifles are essentially built per individual order. In addition to his unique bolt action, he also makes other bolt action designs and O/U rifles as well. It is recommended that Mr. Kepplinger of Kufsteiner Waffenstube be contacted for more information, including price quotations on his quality, custom order rifles (please refer to the Trademark Index).

Grading	100%	98%	95%	90%	80%	70%	60%
----------------	-------------	------------	------------	------------	------------	------------	------------

3-S SYSTEM RIFLE — various cal., unique short action allows for straight on cartridge loading, high strength alloy main parts, grip safety on lower pistol grip, unique uncocking device allowing manual cocking/decocking of the firing pin spring, 23.6 in. standard barrel, 3 shot detachable mag., iron sights, receiver drilled for scope mounts, best quality wood, available in either Schnabel forearm or Mannlicher configuration, many styles of engraving are optional, 7.14 lbs.

This model is currently priced at approx. \$4,650 FOB Austria.

KESSLER ARMS CORPORATION

Previous manufacturer located in Silver Creek, NY.

LEVERMATIC SHOTGUN — 12, 16, or 20 ga., lever action, 26 or 28 in. full choke, takedown, plain pistol grip stock. Disc. 1953.

\$150 \$125 \$100 \$85 \$65 \$55 \$50

BOLT ACTION SHOTGUN — 12, 16, or 20 ga., 26 or 28 in. full, takedown, plain stock. Mfg. 1951-1953.

\$90 \$65 \$50 \$45 \$35 \$35 \$35

KEYSTONE SPORTING ARMS, INC.

Current rifle manufacturer located in Milton, PA since 1996. Distributor and dealer sales.

CRICKETT BOLT ACTION — .22 LR cal., manually cocking single shot, 16 1/8 in. barrel with adj. rear aperture sight, steel construction, 11 1/2 in. pull (youth dimension) Monte Carlo stock with choice of walnut or colored laminate, blue barrel and receiver, 30 in. overall length, 2 1/2 lbs. New 1997.

Mfg.'s Sug. Retail \$164 \$150 \$135 \$120 \$105 \$95 \$85 \$75

Add \$23 for laminated stock, in various color schemes.

J. KIMBALL ARMS CO.

Previous manufacturer located in Detroit, MI.

AUTOMATIC PISTOL — .30 U.S. Carbine or .22 Hornet (very rare) cal., semi-auto, 7 shot, 3 in. (Combat Model) or 5 in. (Target Model) barrel, approx. 32 oz. Less than 300 mfg. in 1958 only.

\$950 \$850 \$725 \$600 \$500 \$395 \$300

Functional weaknesses of this pistol caused discontinuance. Surviving specimens should be checked carefully for slide failures and other potential problems. Values above assume no operational damage to the pistol. .22 Hornet cal. rarity factor precludes accurate price evaluation.

KIMBER OF AMERICA, INC.

Manufacturer located in Clackamas, OR beginning 1993. Exclusively distributed by Nationwide Sports Distributors, Inc. located in South Hampton and Tyrone, PA and Sparks, NV.

PISTOLS

Rifles: Sporterized Swedish Mauser 96 Rifles

Beginning 1995, Kimber began sporterizing the Swedish Mauser Model 96 military surplus rifles. They feature stainless steel fluted barrels and a black synthetic Ramline stock, receivers are drilled and tapped to accept Weaver scope mounts, bead blasted bluing, and original reprofiled military bolt. The Sporter configuration includes .243 Win., 6.5x55mm, or .308 Win. cal., while the heavy fluted barrel models are available in .22-250 Rem. or .308 Win. (Varmint or Heavy Barrel). Prices range from \$340-\$415 for the Standard Sporter, while the Varmint/Heavy barrel variation is priced at approx. \$510. Sporter variations are also available as a combo package with scope and hardshell case - add approx. \$30. For more information, please contact Nationwide Sports Distributors directly (see Trademark Index).

KIMBER OF OREGON, INC.

Previous manufacturer located in Clackamas, OR between 1980-1991.

Kimber of Oregon had its final sale in 1991, and is now out of business. Rare models are starting to attract premiums already. In some models, magazines for these fine quality rifles are getting extremely hard to find with healthy premiums being asked. Once "B" suffix models were introduced, older manufacturer started being referred to as "A" models.

Grading**100% 98% 95% 90% 80% 70% 60%****PISTOLS**

PREDATOR MODEL — .221 Fireball, .223 Rem., 6mm TCU (disc. 1987), 7mm TCU, or 6x45mm (disc. 1987) cal., single shot Model 84 action with shortened 14 $\frac{7}{8}$ in. barrel, scope use only, one piece deluxe walnut stock with contoured pistol grip, 5 $\frac{1}{4}$ lbs., rare cal. will command a premium. KODIAK CO.

Previous manufacturer located in North Haven, CT - circa 1965.

Kodiak Co. was in business for only a short time in the mid-1960s. They produced the first .22 Mag. semi-auto rifle (Model 260), as well as a center fire bolt action (Model 158 Deluxe), and a slide action shotgun (Model 458). While Kodiak long guns are rare and extremely well made, collectability to date has been minimal with most specimens selling at a slight premium over similar quality trade name counterparts of that era. Kodiak Firearms prior to 1963, were marketed under the trade name of Jefferson.

KOLIBRI

Manufactured 1914-1925 by H. Grabner located in Krems/Donau, Austria.

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

KOLIBRI SEMI-AUTO PISTOL — 2.7 or 3mm centerfire, unrifled barrel, 5 shot box mag., world's smallest semi-auto centerfire pistol.

\$2,250	\$1,950	\$1,750	\$1,500	\$1,350	\$1,175	\$1,000
---------	---------	---------	---------	---------	---------	---------

Add approx. \$300 for original case.

Add approx. 40% for nickel finish (rare).

Individual rounds of 2.7 or 3mm (more rare) ammunition are currently trading in the \$75 range as it has the distinction of being the world's smallest centerfire shell (shooting a 3 grain bullet).

KONGSBERG

Manufacturer located in Norway. Currently imported and distributed beginning 1996, by Kongsberg America L.L.C. located in Fairfield, CT. Previously imported until 1996 by Lew Horton Distributing Co., Inc., located in Westboro, MA.

KORTH

Manufacturer established c. 1955, and located in Ratzeburg, Germany. Previously imported by Mandall Shooting Supplies, Inc. located in Scottsdale, AZ, Beeman Precision Arms, located in Santa Rosa, CA and by Osborne's in Cheboygan, MI.

Korth handguns are very high quality and are literally manufactured one-at-a-time, resulting in limited mfg. and importation.

REVOLVERS

The crane of the main cylinder and of the extra cylinder (.22 LR/.22 Mag. or .357 Mag./9mm Para.) are cut from the same billet of steel, and for reasons of smallest tolerance that Korth guarantees, once a gun is made with a single cylinder, the extra convertible cylinder cannot be ordered at a later date. Probably the world's most expensive revolver.

SPORT/COMBAT RIMFIRE — .22 LR or .22 Mag. cal., 3, 4 (Combat only), 5¼, or 6 in. barrel (VR available on 4 in. or longer barrel only), 6 shot, micro adj. sights (Sport). Combat sights fully adj., full length shrouded ejector rod, adj. trigger, checkered and oil finished walnut grips. 2.6 lbs. Introduced 1967.

Mfg.'s Sug. Retail **\$3,700** **\$3,475** **\$2,450** **\$1,850** **\$1,600** **\$1,325** **\$1,050** **\$925**

Add \$320 for ISU Match Model.

Add \$800 for special order 8 in. barrel.

Subtract \$475 if without extra .22 LR cylinder.

Add \$400 for stainless steel (limited mfg.).

Add \$400 for plasma coating chrome/titanium finish.

SPORT/COMBAT CENTERFIRE — .22 Rem. Jet (disc.), .32 S&W Long, .32 H&R Mag. (disc.), .38 Spl., .357 Mag., or 9mm Para. cal., 2½ (scarce), 3, 4 (Combat only), 5¼ or 6 in. barrel, 5 (1st Model) or 6 shot, otherwise similar specs. as Sport/Combat Rimfire Model. 2.1-2.6 lbs.

Mfg.'s Sug. Retail **\$3,700** **\$3,475** **\$2,450** **\$1,850** **\$1,600** **\$1,325** **\$1,050** **\$925**

Add \$320 for ISU Match Model.

Add \$800 for special order 8 in. barrel.

Add \$400 for stainless steel (limited mfg.).

Add \$400 for plasma coating chrome/titanium finish.

Subtract \$475 if without extra 9mm Para. cylinder.

This model is available in additional rimmed and rimless calibers on special order. Most importation has occurred in .357 Mag. cal. only, with or without additional 9mm Para. convertible cylinder.

▲ **Model Everest, 40 Years Korth, Ltd. Ed.** — .357 Mag., 5¼ in. barrel only, deeply engraved frame and barrel with gold inlays, smooth select walnut grips, cased. only 25 mfg. 1995-96.

Mfg.'s Sug. Retail **\$8,500** **\$8,500** **\$6,250** **\$4,750**

PRESENTATION MODEL — deluxe variation of the Sport/Combat Model.

This variation is available with etching, engraving, and other special options that are priced per individual quotation from the importer.

PISTOLS: SEMI-AUTO

KORTH SEMI-AUTO — 9mm Para., .357 SIG, .40 S&W, or 9x21mm IMI, double action, 4 in. barrel, all steel construction, 10 shot mag., adj. sights, checkered walnut stocks, top quality manufacture throughout. Introduced 1986 with first guns shipped 1988.

Mfg.'s Sug. Retail **\$4,700** **\$4,350** **\$3,875** **\$3,300** **\$2,850** **\$2,450** **\$2,000** **\$1,750**

Add \$400 for plasma coating chrome/titanium finish.

Price for interchangeable barrels by request only.

KRAG-JORGENSEN

U.S. magazine military rifle. First U.S. (.30-40) military repeating rifle to shoot smokeless powder ammunition. Manufactured 1892-1902.

There have been many conversions of Krag-Jorgensen rifles - many of which are hard to identify. As a rule, these conversions are not as desirable as these specific models listed below.

M1892-DATED 1894 — Springfield Armory, with cleaning rod. Note: designated Type I, has wide, solid upper barrel band.

KS-5 SINGLE BARREL TRAP — 12 ga. only, 32 or 34 in. barrel, adj. point of impact, innovative trigger configuration, optional choke tubes, redesigned streamlined receiver (new 1993). New 1985.

Mfg.'s Sug. Retail \$3,675 \$3,175 \$2,775 \$2,475 \$2,125 \$1,875 \$1,625 \$1,400

- Add \$2,100 per additional barrel.
- Add \$425 for screw-in choke option.
- Add \$395 for factory adj. comb stock.
- Add \$425 for aluminum case.

Adj. point of impact on this model is achieved by means of different, optional fronthangers.

▲ **KS-5 Special** — 12 ga. only, 32 or 34 in. barrel, features adj. rib and comb stock, cased. New 1990.

Mfg.'s Sug. Retail \$4,695 \$4,100 \$3,550 \$2,975 \$2,475 \$2,050 \$1,750 \$1,500

- Add \$2,750 per additional barrel.
- Add \$425 for screw-in choke option.

Adj. point of impact on this model is achieved by an adj. rib and comb stock at no extra charge.

K-80 TRAP — 12 ga. only, available in O/U, Unsingle, Top Single (single top barrel), and Combo (O/U with extra trap barrel) configurations, standard model has silver finished receiver, adj. rib allowing variable points of impact (new 1993). In O/U configuration the barrels are separated, about 8½ lbs. A wide variety of custom order options can be ordered on this model.

For the Model K-80 Trap, extra barrels cost \$2,900 for O/Us, \$2,950 for top single, and \$3,575 for unsingle barrel.

\$650 for O/U screw-in chokes (5 tubes).

Add \$425 for 3 screw-in chokes (single barrel guns only).

Add \$425 for single release trigger or \$750 for double release trigger.

▲ **Standard Model O/U** — special order only for Top Single, add 9% for Unsingle, or 40% for Combo Standard K-80 variations.

Mfg.'s Sug. Retail \$7,375 \$6,200 \$5,025 \$4,250 \$3,550 \$3,000 \$2,600 \$2,295

▲ **Bavaria Model O/U** — game scene engraved silver receiver with light scroll perimeter scroll work, select walnut. Special order only for Top Single, add 5% for Unsingle, or 24% for Combo Bavaria variations.

Mfg.'s Sug. Retail \$12,525 \$10,575 \$7,800 \$6,375 \$5,000 \$4,375 \$3,950 \$3,300

▲ **Danube Model O/U** — fine English scrollwork on receiver sides and floor plate. Special order only for Top Single, add 4.5% for Unsingle, or 20% for Combo Danube variations.

Mfg.'s Sug. Retail \$23,625 \$19,325 \$13,950 \$10,750 \$9,000 \$7,150 \$6,570 \$5,850

▲ **Gold Target Model** — deep chiseled scroll engraving with gold line accents, 100% coverage finest quality walnut. Special order only for Top Single, add 3% for Unsingle, and 14% for Combo Gold Target variations.

Mfg.'s Sug. Retail \$27,170 \$22,000 \$15,500 \$12,750 \$9,500 \$7,750 \$7,000 \$6,650

▲ **Centennial Model** — 12 ga. only, available in combo configuration only, 100 only mfg. 1986 to commemorate Krieghoff's centennial year, ser. no. 14501-14600. H. Krieghoff's signature inlaid in gold on frame sides. Add \$150 for screw-in interchangeable chokes, \$1,755 for 4-barrel set.

\$6,000 \$5,000 \$4,400

Last Mfg.'s Sug. Retail was \$5,995.

K-80 SKEET O/U — 12 ga. only, available in Lightweight (8mm rib), Standardweight (8mm rib), or International (12mm rib) configurations, factory porting on both barrels, 28 in. barrels only, 8.2 lbs.

For the Model K-80 Skeet, add \$925 for International Model (Tula choking/even choking became standard in 1996), \$675 for Skeet Special (choke tubes & tapered flat rib).

International Skeet models are supplied with hard case. Standardweight and Lightweight models include soft case.

▲ **Standard Model** — available with either Lightweight (Dural aluminum) or Standardweight frame. Hard case optional.

Mfg.'s Sug. Retail \$6,900 \$5,850 \$4,475 \$3,375 \$2,850 \$2,450 \$2,125 \$1,900

▲ **Bavaria Model O/U** — game scene engraved silver receiver with light perimeter scroll work, select walnut. Available in either Standardweight or Lightweight (disc. 1995) configuration.

Add \$180 for wireless laser combo (5 in. barrel only).

LAURONA

LAURONA

Manufacturer located in Eibar, Spain. Currently imported by Galaxy Imports located in Victoria, TX.

Laurona manufactures high quality O/U shotguns and O/U express rifles/combo guns. Beginning 1992, Laurona switched from a one-piece, demi-block type of fabrication to a monobloc system which has improved strength characteristics while reducing weight in their X-Series line of shotguns and express rifles.

Laurona long guns come standard with a black chrome metal finish that is extremely resistant to oxidation. Left hand stocks are available for the 83 MG Super Game, 85 MS Super Game, Trap, and Super Skeet, Silhouette Trap models, and Silhouette Sporting Clays.

Suffix designations on Laurona shotguns refer to the following: G - twin single triggers, S - selective single trigger, M - multi-chokes, T - Tulip, BV - beavertail.

All Super Game Models were available with a deluxe package which includes a recoil pad, mid-bead sight, and select wood for an additional \$250. Special order dull matte finished barrels (with multi-chokes) were available for an additional \$200 - extra barrels were priced between \$635 (20 ga.) or \$800 (12 ga.) per set.

If more information is required on an older Laurona model not listed in this publication, it is advisable to do the following. Please send/FAX an accurate description of your specimen (including Laurona model name, serial number, and other pertinent data -

Grading	100%	98%	95%	90%	80%	70%	60%

MODEL 82 — double selective trigger system, ejectors, pistol grip, vent rib, various chokes and barrel lengths. Disc.							
	\$549	\$410	\$380	\$340	\$300	\$275	\$250
This model was imported by Exel Arms of America, Inc.							
SUPER GAME MODELS — 12 or 20 ga., boxlock, 28 in. barrels, unique twin single triggers, ejectors, extensive fine scroll engraving on a satin finished receiver, anti-rust black chrome barrel finish, VR, elongated forcing cones, checkered walnut stock and forearm. Twin single triggers can function as conventional double triggers in addition to either trigger functioning as a non-selective single trigger. For example, each trigger can fire both barrels - the back trigger fires from top to bottom and the front trigger uses the bottom to top sequence.							
▲ 82 G Super Game — new designation for 82 Super Game, with T forend, 2¾ in. chambers, 28 in. separated barrels choked F/M or IC/IM with 8mm VR, twin single triggers. Importation disc. 1989.	\$975	\$875	\$795	\$675	\$625	\$550	\$495
	Last Mfg.'s Sug. Retail was \$1,100.						
This model was previously designated 82 Super Game.							
▲ 82 Pigeon Competition — similar to 82 Trap Competition, except 28 in. barrels with different chokings. Importation disc. 1986.	\$545	\$465	\$440	\$420	\$405	\$390	\$375
	Last Mfg.'s Sug. Retail was \$630.						
▲ 82 Trap Combo — trap model, 8mm VR, non-selective single trigger. Importation disc. 1986.	\$485	\$390	\$375	\$360	\$350	\$340	\$330
	Last Mfg.'s Sug. Retail was \$566.						
▲ 82 Trap Competition — 29 in. barrels, oil finished Monte Carlo stock, 13mm VR, non-selective single trigger, motif engraving, rubber recoil pad, 8.1 lbs. Importation disc. 1986.	\$540	\$460	\$435	\$420	\$405	\$390	\$375
	Last Mfg.'s Sug. Retail was \$625.						
83 MG SUPER GAME — 12 or 20 ga., similar to 82 G Super Game except has multi-chokes, 2¾ or 3 in. Mag. chambers.	\$1,275	\$1,025	\$895	\$795	\$675	\$625	\$550
	Last Mfg.'s Sug. Retail was \$1,540.						
▲ 83 MG Super Game 2 Barrel Set — includes 2 sets of barrels (12 and 20 ga.).	\$1,775	\$1,500	\$1,275	\$1,000	\$875	\$775	\$700
	Last Mfg.'s Sug. Retail was \$2,180.						
▲ 83 M Puma Hunting — importation disc. 1986.	\$485	\$445	\$425	\$410	\$395	\$380	\$375
	Last Mfg.'s Sug. Retail was \$529.						
84 S SUPER GAME — similar to 82 G Super Game except has SST and available with 3 in. Mag. chambers. Importation disc. 1989.	\$925	\$840	\$775	\$675	\$625	\$550	\$495
	Last Mfg.'s Sug. Retail was \$1,100.						
84 S SUPER TRAP — 29 in. barrels, extensive fine scroll engraving, separated barrels with 13mm aluminum VR, rubber recoil pad, full pistol grip stock with orthopedic grip, beavertail forearm, single selective trigger, elongated forcing cones, choked IM/F or M/F, 7¾ lbs.	\$1,650	\$1,250	\$995	\$875	\$750	\$625	\$495
	Last Mfg.'s Sug. Retail was \$1,920.						
85 MS SUPER GAME — available in 12 or 20 ga., similar to 83 MG Super Game, except has SST.	\$1,295	\$1,025	\$895	\$795	\$675	\$625	\$550
	Last Mfg.'s Sug. Retail was \$1,575.						
▲ 85 MS Super Game 2 Barrel Set — includes 2 sets of barrels (12 and 20 ga.).	\$1,800	\$1,500	\$1,275	\$1,000	\$875	\$775	\$700
	Last Mfg.'s Sug. Retail was \$2,215.						

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

85 MS SUPER TRAP — similar to 84 S Super Trap, except chokes are full over multi-choke.

\$1,675	\$1,250	\$995	\$875	\$750	\$625	\$495
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,970.

▲ **85 MS Super Pigeon** — similar to 85 Super Trap, except choked IM/choke tube with 28 in. barrels and 13mm aluminum rib, stocked for live pigeon shooting, 7¼ lbs.

\$1,625	\$1,250	\$995	\$875	\$750	\$625	\$495
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,890.

Add \$60 for left-hand stock.

85 S SUPER SKEET — 12 ga. only, 28 in. barrels, 2¾ in. chambers with elongated forcing cones, extensive fine scroll engraving, rust resistant black chrome finish, separated barrels, 13mm aluminum VR, mechanical triggers with 5 lb. pull, 7¼ lbs.

\$1,550	\$1,225	\$995	\$875	\$750	\$625	\$495
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,810.

▲ **85 MS Special Sporting** — 12 ga. only, similar to 85 MS Super Pigeon except with field stock designed for upland game, SST, 28 in. barrels choked IM over multi-choke, 7¼ lbs. Imported 1988-90.

\$1,575	\$1,225	\$995	\$875	\$750	\$625	\$500
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,850.

GTO/GTU TRAP COMBO SILHOUETTE SERIES — 12 ga. only, 2¾ in. chamber, features black and silver striped receiver. 29 in. O/U barrels with multi-F chokes and 34 in. top single barrel with multi-F chokes. Import 1990 only.

\$2,175	\$1,650	\$1,300	\$1,050	\$900	\$800	\$725
---------	---------	---------	---------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$2,660.

Add \$110 for GTU Model (bottom single barrel).

SILHOUETTE GAME — 12 ga. only, 3 in. chambers, 28 in. barrels, multi-K chokes. Although advertised, this model was never imported (similar specifications as the Model 85 MS Super Game).

SILHOUETTE 300 SPORTING CLAYS — 12 ga. only, 3 in. chambers, 28 in. barrels with 11mm VR, field stock with special recoil pad designed for dropped stock style shooting, 7¼ lbs. Imported 1988-90.

\$1,495	\$1,200	\$975	\$875	\$750	\$625	\$500
---------	---------	-------	-------	-------	-------	-------

Last Mfg.'s Sug. Retail was \$1,760.

Available with either flush or knurled multi-chokes.

SILHOUETTE 300 TRAP — 12 ga. only, similar to 85 MS Super Trap except has 29 in. steel barrels with 11mm VR, flush or knurled multi-chokes, black chrome finish, distinctive silver striped receiver (similar to Silver Sporting Clays), 8 lbs. Imported 1988-90.

MODEL 52 PLUMA — boxlock action with back of action scalloped and artistically engraved in fine English style. Churchill rib and double radius extractor. Hard chrome bores. 6 lbs.	\$750	\$650	\$575	\$525	\$475	\$425	\$375
▲ Model 52-E Pluma — similar to Model 52 except with automatic ejectors. 6 lbs 2 oz.	\$850	\$750	\$650	\$575	\$525	\$475	\$425
SHOTGUNS: SxS SIDELOCK							
Models listed below were available in 12, 16, or 20 ga.							
MODEL 103 — blued sidelock with some light border engraving. Triple Purdey type bolting system. Extractor of double radius. Barrels of special "BELLOTA" steel with hard chrome bores.	\$895	\$800	\$675	\$575	\$525	\$475	\$425
▲ Model 103-E — similar to Model 103 except with automatic ejectors.	\$995	\$895	\$800	\$675	\$575	\$525	\$475
MODEL 104 X — case colored sidelock with Purdey type bolting system. Extractor of double radius, fine double safety sidelocks, gas relief vents, articulated trigger, hard chromed bore, demi-block barrels of special "BELLOTA" steel, BlackChrome barrels.	\$1,200	\$1,075	\$925	\$825	\$700	\$600	\$525
▲ Model 104 XE — same as Model 104 X but with Holland automatic selective ejectors.	\$1,350	\$1,200	\$1,075	\$925	\$825	\$700	\$575
MODEL 105 X FEATHER — same as 104 X but with concave rib. 12 ga. weighs approx. 6 lbs. 2 oz.	\$1,250	\$1,100	\$950	\$825	\$700	\$600	\$525
▲ Model 105 XE Feather — same as Model 105 X but with Holland automatic selective ejectors.	\$1,400	\$1,225	\$1,075	\$925	\$825	\$700	\$575

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

MODEL 502 FEATHER — fine side lock with Purdey type bolting system, very fine double safety side locks, hand detachable, gas relief vents, Holland automatic selective ejectors, articulated trigger, inside hard chromed demi-block barrels of special "BELLOTA" steel, outside, Laurona BlackChrome, fine English scroll engraving, marble grey or Laurona Imperial finish, Churchill or concave type rib.

\$2,200 \$1,950 \$1,675 \$1,450 \$1,225 \$1,075 \$825

MODEL 801 DELUXE — same as Model 502 Feather but engraving is a true deluxe Renaissance style engraving, fully hand made with Laurona Imperial finish. First grade seasoned walnut stock and forearm.

\$4,400 \$3,900 \$3,375 \$2,825 \$2,375 \$1,875 \$1,400

MODEL 802 EAGLE — same as Model 801 Deluxe except highly artistic bas-relief engraving of hunting scenes, fully incised with burin and chisel.

\$5,000 \$4,400 \$3,900 \$3,375 \$2,825 \$2,375 \$1,875

LAW ENFORCEMENT ORDNANCE CORPORATION

Previous manufacturer located in Ridgway, PA until 1990.

STRIKER-12 — 12 ga. Mag., paramilitary design shotgun featuring 12 shot rotary mag., 18¼ in. barrel, semi-auto, alloy shrouded barrel with PG extension, folding or fixed paramilitary design stock, 9.2 lbs., limited mfg. 1986-1990.

\$595 \$550 \$500 \$450 \$425 \$395 \$375
Last Mfg.'s Sug. Retail was \$725.

Add \$150 for folding stock.

Add \$100 for Marine variation ("Metal Life" finish).

Earlier variations were imported and available to law enforcement agencies only. In 1987, manufacture was started in PA and these firearms could be sold to individuals (18 in. barrel only). This design was originally developed in South Rhodesia.

LAZZERONI ARMS COMPANY

LAZZERONI

Current manufacturer located in Tucson, AZ since 1995. Direct/dealer sales.

RIFLES: BOLT ACTION

MODEL 2000 — .257 Scramjet, .284 Firehawk, .308 Warbird, .338 Titan, or .416 Meteor (new 1997) bolt action design, features precision machined receiver, helically fluted bolt with heavy duty extractor, stainless steel match barrel with integral muzzle brake, adj. benchrest trigger, matte finish metal, various stock configurations. New 1996.

▲ **Model L2000ST-F** — features 27 in. barrel with conventional fiberglass stock.
Mfg.'s Sug. Retail \$3,695 \$3,400 \$3,150 \$2,800 \$2,500 \$2,250 \$1,975 \$1,725

▲ **Model L2000ST-W** — features 27 in. barrel with conventional black wood laminate stock. Mfg. 1996 only.
\$4,400 \$4,050 \$3,600 \$3,200 \$2,800 \$2,400 \$2,000
Last Mfg.'s Sug. Retail was \$4,795.

LEFEVER ARMS COMPANY

Previous manufacturer 1885-1948 located in Syracuse, NY.

SHOTGUNS

The Lefever was the first commercially successful hammerless double barrel shotgun made in America. They were made in Syracuse, NY from 1885-1916, at which time the company was acquired by Ithaca Gun Company. Ithaca made the Lefever after 1916. In 1921, the Box Lock Nitro Special was introduced and in 1934, the Lefever Grade A was introduced. Production of Lefever guns ceased in 1948.

The following is a percentage breakdown of gauges made between 1885-1916 (totaling 100%): 8 ga.—1/2%, 10 ga.—25%, 12 ga.—60%, 14 ga.—1/2%, 16 ga.—8%, 20 ga.—6%. Total manufacture was approx. 72,000 during this period. Damascus specimens of this trademark are worth approximately the same if in 60% or better original condition as their fluid steel barrel counterparts because of the rarity and desirability factors. Subtract 10%-30% on values with respective condition factors 50%-10%. Prices shown below for 90% and up condition are very difficult to evaluate and are meant as a guide only - any Lefever shotgun is rare and hard to evaluate if in over 95%.

100%	98%	95%	90%	80%	70%	60%	50%	40%	30%	20%	10%
------	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----

SIDELOCK DOUBLE BARREL SHOTGUN — 10, 12, 16, or 20 ga., 26-32 in. barrels, any choke, boxlock action (even though model nomenclature referred to sidelock model), cocking indicators on all but DS and DSE grades, double triggers standard, checkered straight or pistol grip stock, auto ejectors designated by letter E after grade. Mfg. 1885-1919.

Add 50% for 16 ga.
 Add 100% for 20 ga.
 Add 10% for SST.

LEFEVER, D.M. & SON

Previous manufacturer located in Bowling Green, OH.

SHOTGUNS

"Uncle Dan" Lefever, founder of Lefever Arms, designed and manufactured the first breech loading double hammerless shotgun made in the U.S. Production started in 1872 and continued in the Syracuse, NY plant until he sold his interest in the Lefever Arms Company during the early 1900s. He then moved to Ohio and started another factory under the name D.M. Lefever & Son. After his death a few years later the Ohio factory was closed, while his old company (Lefever Arms Co.) continued manufacturing Lefevers until being sold to Ithaca Gun Company in the early 1920s. From that point, Lefever Arms Co. was a branch of Ithaca and continued to make shotguns until shortly after WWII.

Total production on D.M. Lefever shotguns between 1901-1904 totaled less than 1,200. Because of their inherent rarity, values listed below show only 10%-80% condition specimens. D.M. Lefever specimens are so rare in 80%+ condition that prices cannot be accurately ascertained.

LIBERATOR

Manufactured by the Guide Lamp Corporation (division of General Motors) in 1942 only.

LIBERATOR PISTOL — .45 ACP cal., single shot, simplistic design and action utilizing nonstrategic WWII materials, mfg. for European resistance movement during WWII (most were issued or air-dropped in Europe), each gun was individually packaged in a paraffin-coated cardboard box which included the gun, a graphics only (no English) instruction sheet, wooden ram rod, and 10 rounds of .45 ACP ammo stored in the gun's butt, 4 in. smooth bore barrel, sheet steel stamping mfg. with welds, 1 million mfg. 1942 only.

\$1,000 \$875 \$750 \$675 \$600 \$525 \$450

Add \$200 if in original box with instructions.

Even though 1 million of these pistols were mfg., remaining specimens brought into the U.S. with the above listed accessories are rare since all were delivered overseas. While the Liberator's appearance is crude, remember that the entire production run (1 million) was mfg. and ready for overseas shipment in 13 weeks.

LIBERTY

Trademark of SAA revolvers being imported beginning 1997 by K.B.I., Inc. located in Harrisburg, PA.

REVOLVERS: SAA

FRONTIER MODEL — .38-40, .357 Mag., .44-40, or .45 LC, SAA, 4 $\frac{3}{4}$, 5 $\frac{1}{2}$, or 7 $\frac{1}{2}$ in. barrel, case hardened frame with blue barrel and grip straps. Importation began 1997.

Mfg.'s Sug. Retail \$398 \$350 \$315 \$285 \$260 \$240 \$220 \$195

Add \$70 for nickel finish (4 $\frac{3}{4}$ in. barrel only).

TARGET MODEL — similar to Frontier Model, except is not available in .357 Mag. cal., and has adj. rear sight. Importation began 1997.

Mfg.'s Sug. Retail \$445 \$395 \$365 \$325 \$285 \$260 \$240 \$220

LIBERTY ARMS WORKS, INC.

Manufacturer located in West Chester, PA. Dealer direct sales only.

L.A.W. ENFORCER — .22 LR, 9mm Para., 10mm, .40 S&W (new 1994), or .45 ACP cal., patterned after the Ingram MAC 10, single action semi-auto, 6 $\frac{1}{4}$ in. threaded barrel, closed bolt operation, manual safety, 10 (C/B 1994) or 30* shot mag., 5 lbs. 1 oz. New 1991.

Mfg.'s Sug. Retail \$545 \$495 \$450 \$415 \$385 \$335 \$295 \$275

LIEGEOISE D'ARMES

Manufacturer located in Belgium.

Small manufacturer specializing in boxlock shotguns, normally engraved and with ejectors. Prices usually start in the \$600+ range.

LIGNOSE (BERGMAN)

Previous manufacturer located in Suhl, Germany.

EINHAND MODEL 2A POCKET AUTOMATIC — .25 auto, 6 shot, 2 in. barrel, blue, rubber grips, can be cocked by rearward pressure on triggerguard.

\$295 \$245 \$195 \$165 \$140 \$110 \$85

Grading	100%	98%	95%	90%	80%	70%	60%

LUCCHINI, SANDRO

Current manufacturer located in Sarezzo (Brescia), Italy.

Lucchini manufactures high quality double rifles and shotguns (approx. 8-10 guns annually), many of which have elaborate gold inlay work. Shotguns starting prices are as follows: \$8,000 for Anson action with sideplates and moderate English scroll engraving, \$12,000 for standard sidelock with English scroll engraving (add \$2,000 for game scene), \$18,000-\$25,000 for best quality sidelock, depending on engraving. All shotgun barrels are demi-bloc construction. Double rifles in .357 H&H cal. start at \$20,000 and go up to \$26,000 for large cal. - all are constructed with Ferlach barrels. Please contact the manufacturer directly (see Trademark Index) for more information.

LUCIANO, BOSIS

Manufacturer located in Travagliato, Italy. Imported by New England Arms, Co. located in Kittery Point, ME.

All Luciano guns are manufactured on a custom order basis only. Annual production is approx. 25 guns. Please contact the importer directly for more information.

SHOTGUNS

MICHAELANGELO O/U — Boss style sidelock action, chopper lump barrels.

Prices start in the \$30,000 range and go up according to special orders.

QUEEN SxS — Holland & Holland type sidelock action, chopper lump barrels.

Prices start in the \$20,000 range and go up according to special orders.

COUNTRY SxS — Anson & Deeley type boxlock action, chopper lump barrels.

Prices start in the \$12,500 range and go up according to special orders.

LUGERS WITH VARIATIONS

Note: The Luger section in this book is arranged chronologically by year of manufacture (1900 models to Post-War production), under individual manufacturer headings.

Often times, year of production can be hard to nail down, especially on commercial models. An easier way to initially identify your Luger is to categorize by toggle marking first - then by chamber marking within groups (chronologically for dated chambers). Once you know period of manufacture, simply refer to the appropriate subheading in this section. While some rare variations will be excluded in this generalized overview, it will be very helpful to establish correct, basic knowledge about your particular Luger.

While many recently imported Lugers would make workable shooters, they have in no way lowered prices on 90%+ condition specimens due to normal collector activity in top quality only pistols. Recently imported Lugers should have the importer's name visibly stamped on an exterior surface. Most of these imports are in the 9mm - 4 in. barrel configuration.

Every year more and more reblued, restrawed, regripped, reframed, rebarreled Lugers are sold to unknowing military handgun collectors as rare variations. On any expensive contract variation, careful inspection on all parts must be made before potentially purchasing. If in doubt, secure 2 or 3 additional appraisals/observations from qualified individuals. Lugers are a field in themselves and an experienced Winchester dealer would not be qualified to guesstimate the originality of these German handguns.

A final note on Lugers: Original pistols in 95%-100% condition have not been affected by the influx of recent imports as these newly imported guns are usually in 80% and lower condition or have been reblued.

It seems that every year the prices of top quality (98%+ condition) original Lugers get more expensive and less predictable - FOR THIS REASON, THE 100% VALUES ON SOME

VINTAGE LUGERS HAVE BEEN OMITTED INTENTIONALLY SINCE RARITY PRECLUDES ACCURATE PRICE EVALUATION IN THIS CONDITION FACTOR. Please contact this publication for current estimated 100% values on Lugers.

Values for all variations of Lugers listed below assume a proper magazine and matching parts.

REFERENCE GUIDE BY TOGGLE MARKING

DWM TOGGLE IDENTIFICATION

DWM MODELS — mfg. from 1900 to 1930 in Berlin, Germany.

- ▲ **1900 Models** — grip safety and “Dished” Toggles, ser. nos. 1-24,999.
- ▲ **1906 Models** — grip safety, many chamber markings, ser. nos. 25,000-74,000.
- ▲ **1908 Commercial Models** — no grip safety, 9mm, ser. nos. 39,000-74,000.
- ▲ **1908 Military Models** — no stock lug.
- ▲ **1914 Military Models** — stock lug, dated 1913-1918.
- ▲ **1920 Commercial Models** — no grip safety, usually $3\frac{7}{8}$ in. barrel. Most common Luger, undated chamber, 7.65mm or 9mm.

Note: Lugers with 4 inch barrels are most frequently encountered in military and commercial models. 6 in. barrels usually denote “Navy” models. 8 in. barrels usually denote “Artillery” models. Guns with barrels over 8 inches are rare and should be checked carefully for originality.

DWM COMMERCIAL LUGERS

DWM MEANS DEUTSCHE WAFFEN & MUNITIONS FABRIKEN

These are models manufactured from 1900-1923 found in the five digit serial range.

- MODEL 1900** — ser. range 1-20,000. Configuration: $4\frac{3}{4}$ in. x .30 Commercial, American Eagle, Swiss.
- MODEL 1900** — ser. range 20,001-21,000. Configuration: $4\frac{3}{4}$ in. x .30 Bulgarian.
- MODEL 1902** — ser. range 21,001-25,000. Configuration: 9mmx4 in. “fat barrels” and $11\frac{3}{4}$ in. x .30 Carbine models, intermixed with $4\frac{3}{4}$ x .30 American Eagles and Commercials.
- MODEL 1906** — ser. range 25,001-39,000. Configuration: Commercial American Eagle, Navy Commercial and Swiss, both $4\frac{3}{4}$ in. x .30 and 9mm x 4 in. grip safety models.
- MODEL 1908** — ser. range 39,001-71,000. Configuration: First 9mm x 4 in. without grip safety, M1908 Commercials were interspersed with .30 and 9mm Eagles, Commercials, Navy Commercials, and a few Carbines and Swiss.
- MODEL 1914** — ser. range 71,001-74,000. Configuration: Last pre-WWI Commercial Lugers, made with stock lug, with a few 9mm Commercials mixed in.
- MODEL 1920** — ser. range 2,000i-9,999u. Configuration: Post-WWI Commercials, mostly $3\frac{7}{8}$ in. x .30 cal.
- MODEL 1923** — ser. range 89,001-91,000. Configuration: The last thousand or so made have “safe” on lever and “loaded” on the extractor, $3\frac{7}{8}$ in. x .30 barrels.

ERFURT TOGGLE IDENTIFICATION**ERFURT MODELS**

Produced from 1911-1914 and 1916-1918 in Erfurt, Germany. Military Model - Chamber dated 1911-1914 and 1916-1918. Erfurt models exhibit the most proof marks and individual parts numbering. Walnut grips.

SIMSON & CO. TOGGLE IDENTIFICATION**SIMSON & CO.**

Manufactured 1922 to 1934 in Suhl, Germany. Most Simson Lugers are military models (9mm - 4 in. barrels). During this 12 year period, Simson supplied the German Army Lugers exclusively. Can be dated 1925-1928. Many reworks of WWI DWM Military Lugers were refurbished by Simson, and can be detected by the Simson "Eagle-over-6" proof on repaired parts. A very few Simsons made in 1934 have just an "S" on the toggle (very rare).

SWISS TOGGLE IDENTIFICATION**SWISS BERN MODELS**

Manufactured 1924 to 1929 by WAFFENFABRIK Bern, Switzerland. Relatively rare - these Swiss models have "improved" changes (flat and curved front grip strap), 4¾ in. barrels, walnut or plastic grips, grip safety. 1929 model has Geneva Cross in shield on front link.

L

MAUSER TOGGLE IDENTIFICATION**MAUSER VARIATIONS**

Manufactured 1934-1942 in Oberndorf, Germany. Between 1930 and 1934 Mauser Werke was primarily engaged in reworking older Lugers, since transfer of machinery and personnel to the DWM plant in Berlin was completed in 1931. Mauser "Banner" models were made from 1934 to 1942, many are dated from 1939-1942 on the chamber. S/42 models are MOSTLY MILITARY contract guns manufactured between 1934 and 1940, usually chamber marked. "42" toggle marked guns (Mauser code) were mfg. 1939 and 1940 and are dated. "byf" marked toggles indicate guns made for German military use after 1940 and are more common than other military models. The Mauser Werke trademark also appears on those Lugers made in the 1970s.

KRIEGHOFF TOGGLE IDENTIFICATION**KRIEGHOFF MODELS**

Manufactured between 1934-1946 in Suhl, Germany. Early Krieghoffs are side frame inscribed. The German Luftwaffe contracted with Krieghoff for military guns in 1935. Early military Krieghoffs have "S" marked chambers, most are chamber dated between 1936 and 1945. Krieghoff Lugers are prized for their quality fit and finish and command higher prices because of their rarity factor.

VICKERS TOGGLE IDENTIFICATION**VICKERS**

Manufactured by Vickers, Ltd., circa 1921, in England from DWM parts for military contract sale to the Netherlands. Added barrel date is a date of arsenal refinish or refurbishing. Distinguishable by Vickers toggle and "rust" marked safety. Serial range is

Grading	100%	98%	95%	90%	80%	70%	60%
---------	------	-----	-----	-----	-----	-----	-----

1-10,100. Grips can be finely checkered with shallow contour or very coarsely checkered. Configuration is 9mm, 4 in. barrel, and grip safety.

PRE-1900 AND 1900 DWM MANUFACTURED LUGERS

Values on most 100% Lugers have been omitted intentionally since rarity precludes accurate price evaluation in this condition factor.

1898/99 BORCHARDT LUGER TRANSITIONAL — 7.65mm, 5 in. barrel, this is perhaps one of the most desirable Lugers, only few mfg. Examples scarce, no reported sales, an original example would command a price in the 5-figure range.

1899/1900 SWISS TEST MODEL — 7.65mm, 4¾ in. barrel, 100 or less mfg., the very first true Luger. Engraved "Swiss Cross" chamber marking.

N/A	\$15,000	\$10,000	\$7,500	\$6,500	\$6,000	\$5,000
-----	----------	----------	---------	---------	---------	---------

This variation is serial numbered in the 1-50 range approx.

1900 COMMERCIAL DWM — 7.65mm, 4¾ in. barrel, 5,500 mfg.

N/A	\$2,600	\$1,600	\$1,000	\$750	\$600	\$500
-----	---------	---------	---------	-------	-------	-------

1900 SWISS COMMERCIAL DWM — 7.65mm, 4¾ in. barrel, 2,000 commercially mfg. and 3000 military mfg.

N/A	\$3,500	\$2,000	\$1,200	\$800	\$600	\$500
-----	---------	---------	---------	-------	-------	-------

Add 15% for wide trigger (found only in ser. no. range 4,000).

1900 AMERICAN EAGLE DWM — 7.65mm, 4¾ in. barrel, approx. 12,000 mfg.

N/A	\$2,750	\$1,500	\$1,000	\$700	\$600	\$500
-----	---------	---------	---------	-------	-------	-------

Add 30% for U.S. Test Model (approx. ser. no. range 6,100-7,100).

1900 BULGARIAN DWM — 7.65mm, 4¾ in. barrel, 1,000 mfg., very rare in U.S., most often seen in the 60% and lower condition.

N/A	\$7,500	\$4,500	\$3,500	\$2,700	\$2,200	\$1,800
-----	---------	---------	---------	---------	---------	---------

Deduct 30% if rebarreled.

LUGERS: 1902-DWM MFG.

1902 COMMERCIAL — 9mm, 4 in. barrel, serial number range 22,300-22,400 and 22,900-23,500 (500-600 mfg.). Commonly called "Fat Barrel" model.

N/A	\$6,750	\$4,650	\$3,400	\$3,000	\$2,500	\$2,000
-----	---------	---------	---------	---------	---------	---------

1902 AMERICAN EAGLE — 9mm, 4 in. barrel, 600-700 mfg., commonly called the "fat barrel". Same ser. range as 1902 Commercial Model.

N/A	\$7,350	\$5,500	\$4,000	\$3,000	\$2,500	\$2,000
-----	---------	---------	---------	---------	---------	---------

1902 CARTRIDGE COUNTER AMERICAN EAGLE — 9mm, only 50 mfg. with the Powell Indication Device; be extremely wary of fakes. Ser. no. range 22,401-22,450.

N/A	\$20,000	\$13,500	\$9,500	\$7,500	\$6,000	\$5,000
-----	----------	----------	---------	---------	---------	---------

1902 DANZIG TEST — 7.65 or 9mm, blank toggle, 4 in. barrel, Crown D proofs.

N/A	\$4,600	\$3,700	\$3,000	\$2,200	\$1,800	\$1,500
-----	---------	---------	---------	---------	---------	---------

1902 CARBINE — 7.65mm, 11¾ in. barrel, approx. 2500 mfg.

Gun w/matching stock

N/A	\$11,350	\$9,250	\$5,750	\$4,250	\$3,000	\$2,000
-----	----------	---------	---------	---------	---------	---------

Gun only

N/A	\$7,500	\$5,950	\$3,500	\$2,700	\$2,200	\$1,800
-----	---------	---------	---------	---------	---------	---------

Add approx. 40% for American Eagle variation.

Subtract 20% for non-matching stock.

1902/06 TRANSITIONAL CARBINE — 11¾ in. barrel, 50-100 mfg., may have new model frame. Ser. nos. start at 50,000.

N/A	\$9,000	\$6,250	\$4,500	\$4,200	\$4,000	\$3,800
-----	---------	---------	---------	---------	---------	---------

Deduct 30% if without matching stock.

Grading	100%	98%	95%	90%	80%	70%	60%
1903 COMMERCIAL — 7.65mm, 4 in. barrel, 50 mfg., extractor marked "charge". Ser. range 25,000-25,050, with 90 degree toggle checkering.	N/A	\$6,500	\$6,000	\$5,500	\$5,000	\$3,000	\$2,500

LUGERS: 1904-DWM MFG.

1904 NAVY DWM — 9mm, 6 in. barrel, limited mfg., a Transitional Navy, fat barrel with 90 degree toggle checkering and toggle lock, should have 2-digit ser. no.

Extreme rarity precludes accurate price evaluation. Most of these pistols available for sale are fakes - buyer beware.

LUGERS: 1906-DWM MFG.

1906 COMMERCIAL 7.65mm W/"GESICHERT" MARKED SAFETY — 7.65mm, 4 $\frac{3}{4}$ in. barrel, "GESICHERT" marked safety, long frame. Approx. 750 mfg.

N/A \$1,700 \$1,300 \$1,100 \$900 \$750 \$600

1906 COMMERCIAL 9mm PARA. — 9mm, 4 in. barrel, 3,500-4,000 mfg. Scarcer than 7.65mm.

N/A \$1,900 \$1,400 \$1,000 \$800 \$650 \$500

1906 COMMERCIAL 7.65mm — 7.65mm, 4 $\frac{3}{4}$ in. barrel, area under safety polished bright, 5000 mfg.

N/A \$1,700 \$1,250 \$800 \$600 \$500 \$400

1906 AMERICAN EAGLE - 9MM — 9mm, 4 in. barrel, American Eagle stamped in front of breech, 3,000 mfg.

N/A \$2,350 \$1,500 \$1,100 \$700 \$550 \$450

1906 AMERICAN EAGLE - 7.65MM — 7.65mm, 4 $\frac{3}{4}$ in. barrel, 7,500-8,000 mfg. Add 40% for long frame.

N/A \$1,900 \$1,400 \$750 \$600 \$475 \$400

1906 NAVY COMMERCIAL — 9mm, 6 in. barrel, approx. 2,500 mfg. Add 50% for 7.65 cal. with 6 in. barrel.

N/A \$3,400 \$2,600 \$1,800 \$1,600 \$1,200 \$950

1906 NAVY MILITARY FIRST ISSUE — 9mm, 6 in. barrel, first issue, 19,000 mfg., mostly altered safety marking - "GESICHERT" in upper position. Ser. no. range 1-9,000a.

Add 10% for Navy unit markings.

Add 25% for unaltered safety variation.

N/A \$3,000 \$2,250 \$1,600 \$1,200 \$875 \$600

1906 NAVY MILITARY SECOND ISSUE — 9mm, 6 in. barrel, second issue, 2,000 mfg. Ser. range 9,000a-1,000b.

N/A \$3,250 \$2,500 \$1,725 \$1,400 \$1,100 \$900

Add 10% for Navy unit markings.

LUGERS: 1906-1918 DWM AND ERFUET MFG.

Most common variations in good supply within this section in 50% or less condition will approximate the 60% value. This reflects its value as a representative shooter rather than a higher priced collector's gun.

1906 SWISS COMMERCIAL — 7.65 or 9mm, 4 $\frac{3}{4}$ in. barrel, less than 1,000 mfg., Swiss "Cross in Sunburst," short frame.

N/A \$2,400 \$1,750 \$1,500 \$1,350 \$1,200 \$1,100

Add 20% for "Cross in Shield".

1906 SWISS MILITARY — 7.65mm, 4 $\frac{3}{4}$ in. barrel, long frame, Swiss Police has Cross in Shield. Either "Cross in Shield" or "Cross in Sunburst".

N/A \$2,400 \$1,600 \$1,200 \$900 \$800 \$700

Grading	100%	98%	95%	90%	80%	70%	60%
1906/23 DUTCH — 9mm, 4 in. barrel, approx. 4,000 mfg., often seen as arsenal rework. Add 200% for original finish and barrel.	N/A	\$1,600	\$1,400	\$900	\$750	\$600	\$525
1906 BRAZILIAN — 7.65mm, 4¾ in. barrel, 5,000 mfg., extremely rare in fine condition.	N/A	\$2,500	\$1,800	\$1,000	\$800	\$700	\$650
1906 BULGARIAN — 7.65mm, 4¾ in. barrel, 1,500 mfg., most rebarrelled to 9mm (deduct 60%). This is the rarest Bulgarian - most are fakes or have been restored.	N/A	\$4,200	\$3,500	\$3,500	\$2,000	\$1,850	\$1,450
1908 BULGARIAN — 9mm, 4 in. barrel, DWM on chamber, 10,000 mfg., extremely rare in mint condition.	N/A	\$2,500	\$1,800	\$1,000	\$825	\$750	\$675
