OPEN GAME LICENSE

Version 1.0a The following text is the property of Wizards of the Coast, Inc. and is Copyright 2000 Wizards of the Coast, Inc. ("Wizards"). All Rights Reserved.

1. Definitions: (a) "Contributors" means the copyright and/or trademark owners who have contributed Open Game Content; (b) "Derivative Material" means copyrighted material including derivative works and translations (including into other computer languages), potation, modification, correction, addition, extension, upgrade, improvement, compilation, abridgment or other form in which an existing work may be recast, transformed or adapted; (c) "Distribute" means to reproduce, license, rent, lease, sell, broadcast, publicly display, transmit or otherwise distribute; (d) "Open Game Content" means the game mechanic and includes the methods, procedures, processes and routines to the extent such content does not embody the Product Identity and is an enhancement over the prior art and any additional content clearly identified as Open Game Content by the Contributor, and means any work covered by this License, including translations and derivative works under copyright law, but specifically excludes Product Identity. (e) "Product Identity" means product and product line names, logos and identifying marks including trade dress; artifacts; creatures characters; stories, storylines, plots, thematic elements, dialogue, incidents, language, artwork, symbols, designs, depictions, likenesses, formats, poses, concepts, themes and graphic, photographic and other visual or audio representations;

names and descriptions of characters, spells, enchantments, personalities, teams, personas, likenesses and special abilities; places, locations, environments, creatures, equipment, magical or supernatural abilities or effects, logos, symbols, or graphic designs; and any other trademark or registered trademark clearly identified as Product identity by the owner of the Product Identity, and which specifically excludes the Open Game Content; (f) "Trademark" means the logos, names, mark, sign, motto, designs that are used by a Contributor to identify itself or its products or the associated products contributed to the Open Game License by the Contributor (g) "Use", "Used" or "Using" means to use, Distribute, copy, edit, format, modify, translate and otherwise create Derivative Material of Open Game Content. (h) "You" or "Your" means the licensee in terms of this agreement. **2. The License:** This License applies to any Open Game Content that contains a notice indicating that the Open Game Content may only be Used under and in terms of this License. You must affix such a notice to any Open Game Content that you Use. No terms may be added to or subtracted from this License except as described by the License itself. No other terms or conditions may be applied to any Open Game Content distributed using this License.

3. Offer and Acceptance: By Using the Open Game Content You indicate Your acceptance of the terms of this License.

4. Grant and Consideration: In consideration for agreeing to use this License, the Contributors grant You a perpetual, worldwide, royalty-free, non-exclusive license with the exact terms of this License to Use, the Open Game Content.

5. Representation of Authority to Contribute: If You are contributing original material as Open Game Content, You represent that Your Contributions are Your original creation and/ or You have sufficient rights to grant the rights conveyed by this License.

6. Notice of License Copyright: You must update the COPYRIGHT NOTICE portion of this License to include the exact text of the COPYRIGHT NOTICE of any Open Game Content You are copying, modifying or distributing, and You must add the title, the copyright date, and the copyright holder's name to the COPYRIGHT NOTICE of any original Open Game Content you Distribute.

7. Use of Product Identity: You agree not to Use any Product Identity, including as an indication as to compatibility, except as expressly licensed in another, independent Agreement with the owner of each element of that Product Identity. You agree not to indicate compatibility or co-adaptability with any Trademark or Registered Trademark in conjunction with a work containing Open Game Content except as expressly licensed in another, independent Agreement with the owner of such Trademark or Registered Trademark. The use of any Product Identity in Open Game Content does not constitute a challenge to the ownership of that Product Identity. The owner of any Product Identity used in Open Game Content shall retain all

rights, title and interest in and to that Product Identity.

8. Identification: If you distribute Open Game Content You must clearly indicate which portions of the work that you are distributing are Open Game Content.

9. Updating the License: Wizards or its designated Agents may publish updated versions of this License. You may use any authorized version of this License to copy, modify and distribute any Open Game Content originally distributed under any version of this License.

10. Copy of this License: You MUST include a copy of this License with every copy of the Open Game Content You Distribute.

11. Use of Contributor Credits: You may not market or advertise the Open Game Content using the name of any Contributor unless You have written permission from the Contributor to do so.

12. Inability to Comply: If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Open Game Content due to statute, judicial order, or governmental regulation then You may not Use any Open Game Material so affected.

13. Termination: This License will terminate automatically if You fail to comply with all terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses shall survive the termination of this License.

14. Reformation: If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

CHAPTER ONE

WHAT IS ULTRAMODERN5

In 2008, Dias Ex Machina released their first product, *Amethyst*—a techno-fantasy introducing modern rules into traditional fantasy. These rules were later separated and expanded into *Ultramodern4*, offering players the chance to insert technology in any type of 4th Edition game.

4 In 2016, after a successful Kickstarter campaign, *Amethyst* transitioned into 5th Edition, and *Ultramodern5* is the natural evolution of that project. Our goal at (DEM) is to push beyond the accepted assumptions of 5th Edition rules and to allow unlimited freedom to create whatever setting anyone can imagine.

Ultramodern5—or U5—is a supplement designed to offer classes, backgrounds, feats, skills and equipment, and opponents for settings outside of traditional ones involving dragons and dungeons, though still employing 5th Edition rules. This book is an expansion of the core 5E rules and thus does not reprint material from core books required for play.

Ultramodern5 utilizes the 5th edition (5E) of the first fantasy roleplaying game, the defining RPG of the last, current, and most likely next generation. The core books of that edition are required. This book was crafted utilizing those core 5E books and no others, as to not make the required list longer than needed.

Although numerous rules are referenced from these core books, only a few are reprinted or redefined. A few rules (specifically referencing firearms) are expanded upon, but the original 5E rules are not altered. This book creates original material within the same rules structure while also attempting to honor the original game's philosophy.

MODERN / SCIENCE FICTION

The mission of U5 is to present 5th Edition rules for use in non-fantasy settings. These include pre-modern settings, contemporary settings, and those that are far-flung, fantastic and futuristic. U5 is designed to be suited for any modern or future campaign, such as cyberpunk, espionage, modern warfare space opera, techno-fantasy, urban fantasy, and wild west (with or without aliens).

U5 has no default setting including, allowing you to explore the rules in whatever context you wish. The rules are offered in a general way, not assuming any one time period.

DIAS EX MACHINA SETTINGS

These are the following compatible settings published by DEM at the time of U5's release.

AMETHYST

Amethyst is the name of DEM's first product—a techno-fantasy set in a post-apocalyptic distant future where magic return to the world disrupts technology's capacity to function.

What would happen if a true-to-book fantasy setting was forced upon the real world? People read and watch stories speculating how society would react if that were to occur—and most of the time, society takes it rather well. In truth, there wouldn't be such a smooth transition, as fantasy tropes affront modern society. There would be immediate repercussions, including social, political, religious, and philosophical.

The future presented in *Amethyst* emerges from the real world—a world where books and movies written about fantasy exist. Those that live in this new age see firsthand what they had previously thought to be fiction. Some rush to embrace this new world, only to be devoured by the harsh realism that awaits them. They are not the architects of their own dreams. Nothing

matches expectations. Even major religions have difficulty adapting to such massive shocks to their dogma.

On top of this social dilemma comes the issue of disruption. Magic is a chaotic system that overwrites itself on reality, disrupting many of the normal rules of the universe that technology requires to operate. Although this interference doesn't directly destroy life, it does retard the progress of civilization, preventing technology from operating beyond simple mechanisms like windmills and bicycles. Where magic is prohibited, normality returns and technological advancement can continue. Those creatures born from magic have little choice on the matter, but those consequential to evolution can still choose which world to live in.

What remains of mankind's previous society and its technology survive in cities resembling those of memory, though walled in against the encroaching magic around it. Inside are cars, central heating, refrigerators, and all the other conveniences of modern life.

Meanwhile, outside of these bastions of technology is a complex mythology with its own conflict, where the fantasy world is divided between two opposing forces. Magic is not a singular energy but a complex power emerging from two metaphysically contrasting sources, the white star of Attricana and the black gate of Ixindar. The main axis between evil and good is not one where the law-abiding, civilized nations of good battle against

the destructive force of chaos, but where the chaotic tendencies of life clash with the controlled and methodical might of syntropy. The conflict sets anarchy against order, uniformity against unpredictability, and determinism against free-will. Where life needs a level of uncertainty to blossom, homogeneity leads only to death. The fantasy world is not some singular entity, but a complicated multi-layered world of warring nations, political strife, and monsters clever and powerful, as well as dumb and many.

Ultramodern5 is built from the skeleton of *Amethyst*. From a presentation perspective, U5 and *Amethyst* are very different, but their similarities cannot be denied. Both games feature identical rules regarding firearms, power armor, explosives and vehicles. U5 is more complicated, and there are additional rules not present in *Amethyst*.

Amethyst also features considerable setting detail not found here. Where *Amethyst* assumes a mix of fantasy elements, *Ultramodern5* makes no such presumption. There are mechanics in U5 not available in canon *Amethyst*, though game masters are welcome to insert them in whatever hybrid game they envision.

Unlike *NeuroSpasta* described below, *Amethyst* does not require *Ultramodern5* to function

NEUROSPASTA

NeuroSpasta is a DEM setting designed to work with *Ultramodern5*. It is a cyberpunk/espionage campaign inspired by the recent generation of books and films on the genre (*Appleseed*, *Chrysalis*, *Cypher*, *Ghost in the Shell*, *Natural City*, *Renaissance*, etc).

The setting is centered on the fictional autonomous city-state of Archon, built as the future headquarters of the United Nations. In the years since its founding, the city has become a powder keg of political tension and controversy. Characters would either take on the role of radicals or peacekeepers, their attention focused solely upon this city.

The setting book not only contains the campaign background but advanced rules unique to the setting GMs can also use in their homebrew games. These include the full-sized manipulator class—our variation on the hacker. *NeuroSpasta* also offers hacking feats, an expanded Computer Use skill, cybernetics, new races (built around the melding of machine and man, not actual races), robots, and new opponents.

Unlike *Amethyst*, *NeuroSpasta* requires *Ultramodern5* to play.

NEW RULES

SUMMARY

Here is a general list of what to expect in *Ultramodern5*:

AUTOFIRE

Many of the firearms in *Ultramodern5* are able to fire multiple rounds of ammunition in a single attack. Said weapons feature the auto or auto-heavy property, with the former firing five rounds of ammunition with each attack roll and the latter firing ten rounds of ammunition with each attack roll. This is separate from the burst fire property that all auto and auto-heavy weapons also possess. Burst fire always fires ten rounds of ammunition. Where normal autofire is a direct attack, burst fire sprays a 10-foot-cube area within normal range, with targets opposing a Dexterity saving throw (15 or 8 + your Dexterity modifier + your proficiency bonus if proficient).

Normally, an autofire attack only increases the damage dice of a weapon (see Equipment), though some classes can increase the capacity of this type of attack (like grounders). When wielding a weapon with auto or auto-heavy property, state if you are making an autofire attack and use the appropriate ammunition.

SKILLS & PROFICIENCIES

INTELLIGENCE

(COMPUTER USE)

Knowing where the "on" switch is and understanding a point/click interface is a common skill expected of everyone. Computer Use specifically covers more advanced concepts like hardware modification, upgrade, and maintenance. Computer Use is also employed in the researching of online materials. You can attempt the repair or modification of a computer, circumvent security, create programs, or use it to replace Intelligence (Investigation) when researching a subject.

INTELLIGENCE (DEMOLITIONS)

If proficient in demolitions, you can set and disarm explosives. This includes the planting of all manners of mechanical and electronic detonators. A successful check lets you place explosives to best effect and set or disarm detonators. Failure means that the explosive fails to go off as planned. The explosives are not lost. Failure by 10 or more means the explosive might go off (if it is an explosive that can) as the detonator is being installed. A failure with wiring explosives together means the extra wired explosives will not go off with the primary (See **Equipment**).

INTELLIGENCE (ENGINEERING)

This is the broad skill dealing with all applications of technology, allowing you to craft, modify, and repair devices. These include electronics, general machines, exo-armor, techan armor, techan weapons, and vehicles.

Crafting: Crafting technology deviates slightly from crafting mundane items. Not only are you required to be proficient in Intelligence (Engineering), but you also must possess the appropriate Engineering kit. If so, then you can expend \$5 in widgets each day until you reach the market value of the item (this is called a build schedule). You must have widgets or parts on hand. Alternately, you can attempt to make an Intelligence (Engineering) check—the result -10 is how much in \$ you progress instead of taking the normal \$5 each day. This value can increase with the use of engineering kits.

The tech level of your engineering kit affects the speed of your build. If the tech level of the kit matches the item you are building, the build schedule remains 1 day for each widget investment. If the tech level of the kit is lower, add the difference to the number of days to your build schedule (if the item is TL 5 and you only have a TL 1 kit, it takes 4 extra days, 5 total, before you can expend more \$). If your engineering kit is more advanced, the difference is added to the \$ you can expend on that day (if the kit is TL 5 and you are building a TL1 item, you expend \$4 more that day). You cannot build other kits or medical injections.

Disarm Electronic Locks: When attempting to disarm a trap or break through a lock using an Engineering tool kit, you can use Intelligence (Engineering) granted you have a tool kit of at least equal tech level of the device you are trying to affect.

Recover Hit Points: You can take a day of downtime and make an Intelligence (Engineering) to recover the hit points of damaged items or vehicles. The number of hit points recovered is equal to the result of your skill check -10.

This value can be adjusted with an appropriate engineering kit. If the kit is more advanced than the item being repairs, add the difference to the hit points recovered. If the other way around, the recovered hit points is reduced (if repairing a TL2 item with a TL4 kit, you gain a +2 bonus to the hit points recovered—if reversed, it becomes a -2 penalty).

The repair cost in widgets for each day is equal the number of hit points recovered x 5.

Reverse Engineer: You can use the Intelligence (Engineering) skill to convert technology into widgets to be used in the creation of other technology. Each attempt to reverse engineer an item takes six hours.

Reverse engineering destroys the item being selected. The end result is you acquire one-fifth of the item's value in widgets.

Sabotage: You can use Intelligence (Engineering) skill to sabotage devices and vehicles. With this technique, you can inflict effects instantly or when certain conditions occur.

You can only attempt sabotage against a target which you can incapacitate logically. The GM can refuse a sabotage attempt if you have no way of accessing vital components in the target. The GM may also require you to spend time gaining access to said components.

There are hundreds of different effects you can accomplish with sabotage. Effects last until the effect is repaired unless stated otherwise. Effects can be repaired by a contested Intelligence (Engineering) check or with specific solutions to each problem (breaking open a door instead of fixing the sabotage).

INTELLIGENCE (SCIENCES)

This is the general study of the applications of the unaltered rules that govern the real world. It deals with broad studies like Biology, Astronomy, and Geography and into further specific fields of expertise like Biochemistry and Astrophysics. Given enough dedication, you could earn grants and degrees, specializing in a field of study to better your species and the natural world. Being a top mind of the profession could enable you to unravel a genome or to design and build your own superconducting supercollider.

You do not have to specify a field of expertise. This skill refers to a general knowledge of science. You use this skill for general scientific observations.

VEHICLE PROFICIENCY

If proficient with a vehicle, you know how to drive or pilot said vehicle and any situation. There are five types of vehicle proficiency—light ground, heavy ground, super-heavy ground, and aircraft, and watercraft. If possessing one, you know how to control all vehicles of that type. So if you ride one bike, you can ride them all. Although not entirely accurate given the broad range of technology seen across the world, this is a compromise to prevent clutter.

Routine tasks such as ordinary driving don't require a check. You only make a check when experiencing unusual circumstances (such as stormy weather or a slippery surface), performing a stunt, driving at high speeds, or if trying to operate a vehicle while being attacked or attacking.

If you fail a Dexterity check with a vehicle, you must suffer the consequences. This can include a second change to recover, a slide, or a crash. Some stunts

are easy, and they neither require a skill check nor have consequences.

If you are crashing, you often lose control of your vehicle and cannot perform any checks involving your vehicle until the crash is resolved. In most crashes, you continue your remaining movement in the direction you were previously pointed. In others (like catastrophic jumps), you immediately stop your movement.

See **Vehicle Rules** in the **Equipment** chapter for detailed rules on vehicles and how they are controlled.

Vehicles used to be a skill, but I decided to make them an item proficiency. Although one would expect me to follow suite with medicine requiring a medical kit, but Wisdom (Medicine) has already been established

NEW FEATS

Ultramodern5 also presents a handful of new feats.

EXO-ARMOR PROFICIENCY

- Increase your Strength or Dexterity score by 1, to a maximum of 20.
- You gain proficiency with exo-armor.

CROSSFIRE

- Increase your Dexterity or Intelligence score by 1, to a maximum of 20.
- Any ability you have requiring an ally within 5-feet of an enemy is now extended to any ally with a firearm within 20 feet of an enemy.

FIDGETY FINGERS

- Increase your Intelligence or Wisdom score by 1, to a maximum of 20.
- When crafting technology, the \$ you can expend per day (or longer with a mismatched engineering kit) is doubled.

FIREARM EXPERTISE

- Increase your ranged attack ability score by 1, to a maximum of 20.
- You can reload one clip, magazine, or cell using fifteen feet of unspent movement.
- Before making a ranged attack with a firearm that you are proficient with, you can choose to take a -5 penalty to the attack roll. If the attack hits, you add +10 to the attack's damage.

CHARACTER CREATION

Characters are created using the same process as the core 5th Edition games. You determine ability scores, establish dominant modifiers, and select race just as you would in a fantasy game. All race selections are assumed human unless the GM permits otherwise (see official 5E licensed products for rules on humans). The first point where character creation alters from the established rules is with the inclusion of the ladders.

RACE

Many of the games set in a semi-modern, modern, or futuristic setting will assume all player characters are human. This does remove one level of choice from character generation. The human race entry has therefore been expanded with optional rules to allow more customization. These include adding in genetic traits and natural skills distinguish one character from the rest.

LIFEPATH

Backgrounds have been heavily revised. Though you are welcome to select any background from any officially licensed product, you can also take your chances with the lifepath system where virtually every facet of a character's life can be determined. Instead of selecting a single background and rolling on a handful of tables for personality and motivations, there are now dozens of tables to work from, including ones where windfall or tragedy are only a dice roll away.

LADDERS

In traditional 5th Edition rules, classes represent defined fantasy archetypes. The type of story that *Ultra-modern* seeks to emulate calls for characters with more complexity. Therefore, a character's capabilities are derived from two sources: a ladder that determines their general traits, outlook and disposition, and a class that determines their vocational abilities.

You choose a ladder at character generation, gaining an initial level 1 ability. You can neither change your ladder nor multi-class into another ladder. There are no prerequisites for ladders, but having high values in the ladder's key abilities will certainly help. When you reach a level where you can select either an ability score improvement or a feat, you can gain an ability from your ladder instead.

Unlike classes, which fill specific roles, ladders are based on what you are and how you live your life. These include various mental and physical disciplines as well as natural talents. Although some classes and ladders obviously complement each other, any ladder can be combined with any class. Ladders are generic in their benefits.

BORN LEADER

You possess a genuine charisma, always taking center stage. People naturally gravitate towards you. As result, Charisma is your primary ability with Intelligence as your secondary.

JUGGERNAUT

You're big. You were the tallest in school, excelled in sports, and were groomed for a career where you wouldn't have to speak so much. Constitution and Strength are equally important to you.

RUNNER

You are healthy, lithe, and fast. Your mind and body are one as you focus your energy into evasion and pursuit. Dexterity is the obvious primary, but Intelligence or Wisdom are important secondary abilities.

SAVANT

You are compelled know as much as your brain can comprehend. You enjoy reading, understanding, and resolving problems. Intelligence is an automatic priority but smarts is useless without Wisdom.

SURVIVOR

No matter the situation, you always appear to make it out alive. You can endure any hardship, from hostile weather to hostile locals. Constitution is your primary ability with Wisdom a close second.

VETERAN

You are grizzled and seasoned. You have become hardened to the traumas of the world through practical experience. Wisdom is your primary attribute with Charisma not far behind.

WARRIOR

You're a fighter in any situation, whether that is in a ring, in an alley, or in a warzone. You can wield a blade, a bow, a pistol, or a tank. Sometimes all you need are your fists. Dexterity and Strength are both vital.

ATTACK / DAMAGE MODIFIER

Almost every ladder allows you to alter the ability score required for attack rolls and damage rolls. Some of these entries list specific conditions that must be met in order for you to swap your primary ability (only one-handed small arms, for example).

BEYOND ULTRAMODERN

Ladders are fully compatible with all 5th Edition-compatible products. You can marry them to any 5E game (if you want to include druids, fighters, or wizards, for example). Some of the ability swap features listed for several ladders don't appear to offer much variety unless you integrate them into classes not listed here.

Yes, ladders are back, though not as monumentally game-changing as they were in Ultramodern4. They are still in place to slightly alter classes they are paired with. I fully expect players to select a ladder but never select any later level features.

CLASSES

There are ten classes presented in *Ultramodern5*, and although similar in build to those in official 5th Edition licensed products, readers will notice a few notable exceptions.

Firstly, all U5 classes have martial archetype options, and unlike their fantasy counterparts, offer these options at the same levels. Archetypes are no longer bound to specific classes, meaning you can feasibly match any class to any archetype.

There are also classes that are not combat-based—their power is not in how much damage they inflict, but how they can alter the course of a story. The ten classes are as follows.

FACE

You use words and a smile to succeed in areas where bullets would fail. Your abilities confound and seduce. Combine with the runner and know when to run when words fail. Combine with warrior so you can throw a punch under those same circumstances.

GUNSLINGER

You wield pistols like they're an extension of your body. It could be one firearm or two. You can fire one bullet or unleash volleys. Pair this with runner and dash through combat like an action hero. Opt for veteran and be the stone-faced marshal of a classic western.

GRUNDER

You're the tried and trained soldier, able to use any weapon in any situation. Unlike the heavy class, you wield firearms against specific opponents, most likely the greatest threat on the battlefield. Select a born leader to be a front line leader that has earned authority through shared combat, or opt for warrior and be full time militant.

HEAVY

You often wield the largest, most devastating weapons. Your powers involve raining down large area effects on multiple opponents, hindering their movements and preventing them from gaining advantage. Pair this with juggernaut to create an unstoppable force of fire and thunder. Select veteran and be the largest gun that has survived the most battles.

INFILTRATOR

You're an assassin trained to operate independently from others. You move in by stealth and inflict massive damage on single foes. You go about this using either a firearm or a blade. Select the survivor ladder and be the singular killer that journey's for weeks to dispatch your enemy. Select runner and make haste your escape after you succeed.

MARSHAL

You use strategy and tactics to control the battle theater. Your limit enemy movement, hindering their effectiveness. Inflicting damage comes via placing enemies in harm's way. You can pair this with born leader and affect both allies and enemies. Select veteran and be a trained commander of a unit. Be a warrior and stand on the front line with your brothers.

MARTIAL ARTIST

You disdain the efficiency of firearms in favor of straight melee fighting. The martial artist covers nearly every style, whether it is using fists or swords. Although you would think a warrior would be the obvious choice, nearly every ladder has something to offer. Be a juggernaut to ram through opponents or be a savant to use your mind as well as your fists.

SNIPER

You don't offer yourself as a target. You take out enemies from as far away as possible. You target single opponents and inflict devastating conditions, a talent you can employ with every attack. Pair with survivor and be a guerilla or select savant and brandish your weapon openly while you surgically remove enemies from the battlefield.

MEDIC

You are a doctor, pure and simple. Because of the nature of the class and the game, you are encouraged to be a healer. Although a savant would be an obvious ladder, any combat-based ladder will supply some much needed offensive abilities.

TECHIE

You sabotage enemy technology while modifying your own to boost its performance. Abilities are based around improving the capacity of your weapon. Pair your class with warrior or juggernaut to be a combat engineer. Alternately, you could select savant and be a general geek.

Amethyst features all these classes save for the face and the infiltrator. Any changes between the Amethyst classes and these are mostly due to the errata, and if you own both books, the classes here are more up to date. There are also more archetypes in this books as well.

CHAPTER TWO

BIRTH & LIFE

HUMANS

There are thousands of variations of the human species, many races biologically compatible with very little genetic differentiation. Game books would claim they fall under the umbrella of a single race, but ignoring stereotypes of color or ethnicity, there can be variations between even family members more extreme than two individuals on opposite sides of the globe.

Ultramodern5 does not present a canon setting, thus it cannot list any races outside of the default human found in officially licensed products. This canon option is still available, or you can choose the Genetic Diversity option. You can still select this option even if there are other races available.

ETHNICITY

It would be a disservice to the human race to list all the creeds and colors in summation here. If set in the modern world, you are invited to be specific about your character's life, including details about country and culture. The lifepath section does offer a lot of detail, but it avoids specifics relating to race and ethnicity.

It would be near impossible to create a table cataloging all the variations of humanity, and even then, it would only be for a default modern setting and not necessarily the setting being played. In this case, you are invited to be creative.

GENETIC DIVERSITY

Despite humans being biological compatible with one another and sharing 99.9% of their genetic data, there is a universe of possibilities in that final decimal point. Deviating no more than 5% of that chromosomal data begets apes and chimpanzees. So it's no shock that a microscopic variation in the genetic code can change someone from short to tall, or make them prefer art over sports. There are no doubt people exhibiting certain physical or mental advantages that are superior over others. It's a simple fact of life. Someone can be born with numerous disadvantages over the norm. However, in real life, people do not have a disembodied puppeteer controlling every aspect of their creation...at least not one that roll dice and paints miniatures.

The Genetic Diversity table allows you to select an additional benefit to your character, or more at the cost of an ability score increase. Since most people can't choose their biological parents, you can roll randomly instead of selecting (rolling twice and taking the preferred bonus).

COMMON 99.9% BASE HUMAN TRAITS

These are traits all humans share:

Ability Score Increase. Your ability scores each increase by 1. You can forego one of these increases for one additional roll on the Genetic Benefit table.

Age. Humans reach adulthood in their late teens and live between 80 and 110 years depending on the level of technology in the setting.

Alignment. Humans don't naturally adhere to any alignment, or even to the concept of alignment.

Size. Humans vary widely in height and build. Nutrition, genetics, and gender all play factors. The average height for men is 5'5" while women is 5'2", and anything between 5 feet and 6'5" can be considered within the median.

Speed. Humans have a vast variety of walking speeds, based on both height and physical fitness...but this is a game, so they all have a speed of 30 feet.

Languages. You can speak, read, and write in your native language and one extra language of your choice. While the current 'common tongue' of our planet is English, who is to say what it will be in the future? Humans typically learn the languages of other peoples they deal with, including obscure dialects.

Genetic Benefit. Select or roll for one genetic benefit below. You can gain additional benefits by either forgoing one of your +1 ability score increases, or by incurring a penalty by selecting a shortcoming. The GM may choose to limit the number of benefits you can gain - generally no more than two or three. The GM may also require you to roll for both benefits and shortcomings instead of choose, to enforce the randomness of the genetic lottery.

GENETIC BENEFIT

Roll or
Choose

Benefit

- 1 **Skill / Tool Proficiency:** You are adept at one thing since birth, a calling. You gain proficiency in one skill or tool of your choice.
- 2 **Enhanced Secondary Senses:** A connoisseur, you have advantage with any Wisdom (Perception) checks regarding taste or
- 3 **Night Eyes:** You have superior vision in dark and dim conditions. You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, only shades of gray.
- 4 **Disciplined Lungs:** You've always had the capacity to hold your breath longer than others. You can go without oxygen for as many minutes as twice your Constitution modifier.

- 5 **Extreme Fortitude.** You gain 2 additional hit points at 1st level, plus 1 additional hit point every additional level.
- 6 **Light Sleeper.** It's been a positive and a negative, but you cannot be surprised by sleeping. Alas, it can also be difficult to get a proper night's sleep.
- 7 **Short Sleeper.** You don't need much. You only require 3 hours of sleep per night to function, and a good night's sleep is only 4 hours.
- 8 **Eidetic Memory.** You remember nearly everything. You automatically pass any Intelligence checks to recall any information you have been exposed to.
- 9 **Empathy.** You've always been able to understand someone's emotional state, allowing for sympathy or manipulation. You gain a +2 bonus to Wisdom (Insight).
- 10 **Extra Fatigue.** You've always been running. You can ignore level 1 and 2 exhaustion effects.
- 11 **Fashion Sense.** You look good in anything, from haute couture to dollar store rejects. You have a +1 bonus to all Charisma ability checks.
- 12 **Quick Healer.** Very useful when you were a child—you regain 1 additional spent Hit Die when you take a long rest.
- 13 **High Pain Threshold.** You can take a punch. When reduced to zero hit points, you do not fall unconscious until you fail your first death save.
- 14 **Disease Immunity.** You rarely get sick. You have advantage on saving throws against disease.
- 15 **Poison Immunity.** Tastes minty. You have advantage on saving throws against poison.
- 16 **Speed Boost.** Limber. You gain a +5 foot bonus to speed.
- 17 **Strong Will.** Not easy to stare down. You have advantage with Wisdom saving throws; you also have proficiency with Wisdom (Intimidation).
- 18 **Toughness.** Each time you suffer damage from a piercing or slashing weapon, you suffer 2 fewer points of damage.
- 19 **Nimbleness:** You can move through the space of any creature that is of a size larger than yours.
- 20 **Ornery:** When you score a critical hit with a melee weapon attack, you can roll one of the weapon's damage dice one additional time and add it to the extra damage of the critical hit.

SHORTCOMINGS

- 1-2 Bad Eyes.** It happens to everyone. You need glasses. Without them, you have disadvantage with Wisdom (Perception) checks when using your eyes.
- 3-4 Long Sleeper:** You get...headaches. You need to have at least 8 hours of sleep a night to qualify for having a long rest.
- 5-6 Bad Hearing:** I said, you need hearing aids. Without them, you have disadvantage with Wisdom (Perception) checks with them.
- 7-8 Hairless:** You have no hair. Anywhere. You have disadvantage with Charisma (Persuasion) checks.
- 9-10 Dwarfism:** The accepted term is "little person"—and while rumors of short people having big tempers aren't necessarily true, people should think twice before testing it with you. You choose whether you are size Medium or Small, but your speed is reduced by 5 feet either way.
- 11-12 Fat:** It's not big boned, you've accepted that. You are not slightly overweight. Your speed is reduced by 5 feet.
- 13-14 Frail Frame:** You do not handle pain very well. Each time you suffer damage, you lose 1 additional hit point.
- 15-16 Albino:** You suffer from a condition resulting in a complete lack of melanin. When in direct sunlight, you have disadvantage with Wisdom (Perception) checks when using your eyes.
- 17-18 Dyslexia:** You have disadvantage on checks that involve reading or research unless you take double the usual time to perform them.
- 19-20 Shyness:** You don't like being in public spaces. You have disadvantage with all Cha-

14

LIFEPATH

It may not be about where you are, but where you came from. Even then, you are not as easily categorized by a single word, title, or background. Your life, until this moment, cannot be summarized with a single sentence. Two people, born from the same walks of life, can live very different lives. These following pages allow that individuality.

In order to encourage unique character development, backgrounds in *Ultramodern5* are presented thinly, offering little content outside of one's primary origin, which is then used as a springboard into a customizable lifepath. You are encouraged to piece together the oftentimes random elements of a life into a story of one character. Although on the surface certain combinations may not make sense, this should encourage creativity...or the GM can simply allow you to re-roll.

With *Ultramodern5*'s lifepath, after a player selects a background / origin, which establishes a dominant aspect of one's life, the lifepath continues, determining family status, siblings, friends, enemies, romantic con-

quests, and various other important events.

With exception of Life Moments, which should be rolled, every other element can be chosen. A life built this way is still only a skeleton on which to create fleshed-out moments that integrate into the setting in question. The GM should alter these following pages, and the roll results, if they don't mesh well in the established setting.

Players are also welcome to ignore the following pages. If wishing to adhere to the standard rules regarding backgrounds, it should be noted the ones presented here offer considerably less than those listed in official license products. The player should discuss a selection with the GM in order to make a background balanced.

BACKGROUND / ORIGIN

These following backgrounds denote where you came from, usually detailing the first few years of your life. It may not determine your current status, only that which was given to you upon your birth. You can start wealthy and lose it all or be born into poverty, only to find wealth through actions rather than luck. It should be noted that several backgrounds can be integrated together, but you can only gain the benefits of one. Avoid the instinct to select the one background most connected to your class or ladder. People change a lot through their lives, and it may be more interesting to see a rollercoaster of life-changing events rather than a straight line.

AFFLUENT

You were born into privilege. Regardless if yours is the first generation with such wealth or the latest tracking back hundreds of years, your early years were not one in poverty. If you wanted something, you generally could get it, regardless of cost or difficulty. This does not assume an arrogance or ignorance in the difficulty of achieving wealth—you are simply one that had always gotten what you wanted. Said fortune can remain with you, or an event later could take it all away, just after you had gotten used to money's presence.

Skill Proficiencies: Deception or Persuasion

Tool Proficiencies: One musical instrument.

Languages: Two languages of your choice.

Equipment: A set of fine clothes, \$200 in a fine leather wallet.

BRUISER

This is not a record of your physical capacity. You may not be strong or even agile. You simply won't back down from a fight, and have been known to provoke one on occasion. You can be a flat-out bully, or someone always willing to stand up for themselves or other against any form of oppression. You have been called scrappy, not always open to instigate an attack but always open to ending one, usually after a bout of physical violence. Unlike other backgrounds, this mentality started early in school and probably remained with you for the rest of your life.

Skill Proficiencies: Athletics or Acrobatics

Languages: One language of your choice.

Equipment: A trophy from a fight (official or informal), \$20 in loose bills, common clothes.

DELINQUENT

You dabbled in some form of criminal activity, as little as petty theft or as severe as organized crime. This is not assuming you enjoy it or whether or not you were even caught. Perhaps you had embraced the life of a

career criminal, only for said life to bite you back via a double-cross or jail time. Ignoring such presumption, you could have just been an irresponsible youth lacking proper education or parenting that fell in with the wrong crowd...unless you were the ringleader that tempts others. Children make mistakes—it's part of growth. What you do now is what matters.

Skill Proficiencies: Sleight of Hand or Deception

Tool Proficiencies: Thieves' tools

Languages: One language of your choice.

Equipment: Common clothes, \$15 of stuff you stole.

DISCIPLE

A large chunk of your early life was spent in prayer, surrounded by others that validated your devoutness. Companions could have been family members or unrelated followers. Maybe you escaped a cult; maybe you are still a loyal member of a massive society. Were you raised in loving family or the victim of fanaticism? Perhaps you were given to a monastery where you learned a variety of skills from martial arts or wine making. Your opinion on faith or religion is unrelated to the selection of this background, though you would be required to select a faith, real or not.

Skill Proficiencies: Religion or Nature

Languages: One of your choice.

Equipment: Holy items (if said faith endorses them) including books and symbols, a set of common clothes.

DRIFTER

By force or by choice, you have moved from location to location, following friends or family as they struggled for income. Regardless of your education level, you acquired more from your time on the streets than anything learned from books. Drifting doesn't always equate to being homeless—perhaps you lived out of a vehicle or a small apartment, huddling with others for warmth. Perhaps you have no connections at all, and live your life one day at a time. You may be a runaway or an orphan, why has yet to be determined.

Skill Proficiencies: Deception or Survival

Languages: Two languages of your choice

Equipment: A set of common clothes, backpack, bedroll, blanket, \$5 in coins.

INTELLECTUAL

It's not a matter of how smart you are but more your choice to never stifle your curiosity about the world. You always asked questions. If parents didn't satisfy, you pestered teachers, and when they failed, you took matters in your own hands and embraced books or online sources. Regardless of your capacity to solve problems or retain complex theories, you refused to accept an explanation without evidence. This may act in opposition to your upbringing or the environment in which you live, where ignorance and blind faith can be the norm. This may not lead into a life of science, but simply one that embraces change.

Skill Proficiencies: Engineering or Science

Languages: Two languages or your choice.

Equipment: A set of common clothes, a handful of textbooks, \$15 in a wallet.

LABORER

You've always appreciated the value of a day's work. You can't handle sitting in a cubicle. To you, a life is not worth leading unless you get your hands dirty. There's a decent probability you were raised on a farm, or idolized a parent or sibling following blue-collar

work, a pursuit in mining, manufacturing, or construction. Perhaps they were a firefighter or paramedic. Despite a possible lingering fascination with creative arts, a need has been instilled to contribute to society in a physical way. You don't have to be strong, just committed.

Skill Proficiencies: Animal Handling or Athletics.

Tool Proficiencies: One set of artisan tools

Languages: One language of your choice.

Equipment: One set of artisan tools, \$50 in well-earned money.

PRODIGY

To the detriment of other aspects of your life, you excel overwhelmingly in one talent. It could be something abstract. It could be a sport. It could be a musical instrument. You picked up a fascination early in life and thought of nothing else. Thankfully, there was a support structure in place allowing you to follow your dream. Someone put the instrument in your hand, dropped you in front of a computer, or paid for your classes. This obsession could drive you to exclude most other desires, even to such an extreme as to develop psychological complications. You may even suffer from some form of neurodevelopmental disorder, but probably not one to make you non-functional in society, but even this is not outright prohibited.

Skill Proficiencies: Athletics or Performance

Tool Proficiencies: One musical instrument or one artisans tool kit

Languages: One language

Equipment: One musical instrument or artisan tool kit, a trophy, \$15 in a wallet.

RECLUSE

You're an introvert, requiring solitude from time to time. You may not hate people; you just can't handle groups for long periods of time. As such, your default stance is to dive into books or in front of a computer. It may go further, forcing you to live life as a hermit in a hut or as a hobo pining his days in a van down by the river. This is unlikely as you are required to be functional in some way among other people. This concept could encompass a monastic order, or you could be geek. You are not required to create an extravagant reason why you avoid people—you could just be a nerd. You excel when allowed to act by yourself.

Skill Proficiencies: Computer Use or Investigation

Languages: Two languages of your choice

Equipment: A set of common clothes, a personal computer, \$20 in game cards, \$10 in your wallet.

REGULAR JOE

You don't consider yourself special—you don't excel in any one thing. And yet, you are still a unique and interesting snowflake. The combination of skills and strengths, despite nothing marking you as the best in the world, still distinguishes you to the world...it's just the world will probably never know. You don't consider yourself average, but you are aware you have never been recognized for much in your life. You are the one society depends on to be reliable. You lack any debilitating psychological traits, but you are also not gifted to be outclass those around you. This does not assume you will never achieve anything—it just says you were never expected to.

Skill Proficiencies: Any one skill of your choice.

Tool Proficiencies: Any one tool or vehicle of your choice.

Languages: One language of your choice

Equipment: \$50 in a wallet—always good to have change.

SMOOTH TALKER

As a mirror to the recluse, you find interacting with people thrilling. They invigorate you, and you find confidence and motivation when surrounded by those paying attention. You are often the leader in a situation, or you desire to be said leader. In school, you quickly found that words and actions would gather the interest of others, encouraging you to continue the practice. You can't stand remaining still in front of a computer, or in isolation. You have to get out.

Skill Proficiencies: Persuasion or Intimidation

Tool Proficiencies: One gaming set

Languages: One language of your choice

Equipment: One gaming set, a set of fine clothes, \$50 in a wallet you always try to keep on hand.

ORIGIN

These tables detail your birth, your parents, your general family, and the events which punctuate your life. The good and bad. The loves and the tragedies. The following pages comprise a loose flowchart in which to build a life, creating the significant events that will hopefully pop up during a campaign.

Start with parenting (A1), and then move onto siblings (B1), then onto life events (C1). Several tables are referred to several times.

AI—PARENTING

What happened to one or both of your parents?

Choose or roll 1d20

- | | |
|-------|--|
| 1-11 | Both parents are alive.
(Go to A2-Status) |
| 12-14 | Orphan – Your parents are dead.
(Go to A3-Casualty, then go to A5-Surrogate) |
| 15-17 | Abandoned – Your parents are gone, but unlikely dead.
(Go to A4, then go to A5-Surrogate) |
| 18-20 | One parent is absent.
(1-10: Mother; 11-20: Father)
(1-10: Got to A3-Casualty; 11-20: Go to A4-Separation)
(Also go to A2-Status) |

A2—STATUS

Both parents are alive, but what standing are they and the family in?

Choose or roll or roll 1d20

- | | |
|-----|--|
| 1-8 | Your family has had its highs and lows, but you've got nothing to complain about. |
| 9 | A bad business deal bankrupted the estate—you've got nothing. |
| 10 | A parent or parents were abusive; you hated them. |
| 11 | Your family got swept up in a cult. |
| 12 | Parents doted on either you or a sibling hand and foot at the expense of others. There might be resentment. |
| 13 | Unpredictable employment moved your family from town to town, never establishing roots. |
| 14 | You lived a bucolic life (on a farm, off the grid). |
| 15 | Your family is a cog in a well-oiled corporate or government machine. |
| 16 | Your family sold you into slavery—whether out of selfishness or extreme need, makes no difference to you. |
| 17 | Trauma tore the family apart and you've never fully recovered. |
| 18 | The family would be better off without you. You are damaged. |
| 19 | Your parents are criminals, and that's the source of some stress. You don't need to follow in their footsteps. |
| 20 | Your family is embroiled in a rebellion. It's respectable, but also dangerous. |

A3—CASUALTY

Someone close to you died. What happened?

Choose or roll or roll 1d20

- | | |
|-------|---|
| 1-2 | Murdered in a targeted attack (it was not random violence). |
| 3-4 | Murdered by gang violence. |
| 5-6 | Assassinated by a corporation/organization. |
| 7-8 | Assassinated by the government/kingdom. |
| 9-10 | Killed in a terrorist strike—he/she was not a target, but the location was. |
| 11-12 | Died by natural causes.
(cancer, diabetes, etc.). |
| 13-14 | Died in a viral outbreak. |
| 15-16 | Suicide—you could deny it, but it's the truth. |
| 17-18 | Killed in an accident (fire, vehicle crash, drowning, etc.). |
| 19-20 | Civilians casualty of armed conflict. |

A4—SEPARATION

Someone close to you is no longer around. Why?
Choose or roll or roll 1d20

1-3	Amnesia—the memories of you are gone.
4-6	In hiding, probably to protect you.
7-9	Confinement (jail, concentration camp).
10-12	Vanished, just like that.
13-15	Kidnapped, you're certain of it.
16-18	Separation, for your safety or someone else's.
19-20	There were psychological problems in place. Maybe they were committed.

A5—SURROGATE

Someone raised you other than your parents.
Choose or roll or roll 1d20

1-4	You were raised by relatives. (go to A1-Parenting again)
5-6	You bounced through foster homes.
7-8	You were reared on the streets (gang).
9-10	You joined a cult or monastery.
11-12	You were raised in an orphanage.
13-14	You were adopted. (go to A1-Parenting again)
15-16	An inheritance paid for a private school.
17-18	You joined a military organization.
19-20	Your family is atypical (animals, aliens, machines, etc.).

BI—SIBLINGS

Did you have brothers and / or sisters? If so, how many?
Choose or roll or roll 1d20

1-6	You are an only child.
7-11	You have 1 sibling.
12-15	You have 2 siblings.
16-17	You have 3 siblings.
18-19	You have 4 siblings.
20	You have 5 siblings.

After determine the number of siblings, go to B2

B2—SIBLING INDIVIDUALITY

Is your sibling older or younger, and by how much?
Choose or roll 1d20 for each sibling

1-2	Baby Sister
3-5	Slightly younger sister
6	Twin sister
7-9	Slightly older sister
10	Matriarch sister
11-12	Baby brother
13-15	Slightly younger brother
16	Twin brother
17-19	Slightly older brother
20	Patriarch brother

B3—SIBLING VIEWPOINT

What does your sibling think of you?
Choose or roll 1d20 for each sibling

1-6	The sibling is a sibling, love and rivalry will always be there.
7-9	Your sibling is also your best friend.
10-12	The sibling loves you but you don't see eye to eye.
13-14	The sibling worships the very ground you walk on. You respect that.
15-16	The sibling has issues with you, which may or may not be justified.
17-18	The sibling and you don't talk. They may hate you; you may hate them.
19	Feelings are moot—your sibling is dead (go to A3-Causality).
20	Feelings are moot—your sibling is no longer around (go to A4-Separation).

LIFE EVENTS

This is the one section you cannot choose, where you must gamble the events of your life. After selecting your current age, roll 1d6+4 or select a value between 5 and 10; the final result is the number of life changing events which occurred in your past, in the order in which they are determined. You can spread the events around as much as you'd like, and they can even be swapped around if it best suits the backstory the GM is approving.

You can assume each event marks one year of your life. If older, each event could occur each few years. If younger, the events could occur over a matter of a few months (once a year is default). Roll on the Life Episodes table (C1) for each event.

Optional Rule: Each time Tragedy is rolled, it cannot be rolled again before a windfall is selected, and vice-versa.

CI—LIFE EPISODES

Roll 1d20

1-4	Tragedy (go to C2-Tragedy)
5-8	Friendship (go to D1-Friendship)
9-12	Enemy (go to E1-Enemy)
13-15	Romance (go to F1-Romance)
16-20	Windfall (go to C3-Windfall)

C2—TRAGEDY

Roll 1d20

1-2

Injury: You suffer a crippling wound. This could be from (1-10) an accident, or (11-20) in a battle. Roll 1d20 to determine the extent of the injury.

1-10: Most of the damage is internal or psychological; most people don't notice.

11-12: You have scars or burns across your body, but most can be covered by clothes. *If a critical hit is scored on you, you are stunned until the end of your next turn.*

13-14: You suffered facial scars or burns. *You have disadvantage with Charisma (Persuasion) checks.*

15-16: You developed hearing problems. *You have disadvantage with any ability check that requires hearing. If you also have the Bad Hearing shortcoming, you are completely deaf instead.*

17: You developed a limp. It's noticeable and may require a cane. *Your speed is reduced by 5 feet.*

18: You lost a hand. Unless cybernetics have advanced far enough, your functionality is severely reduced. *You lose the function of one hand.*

19: An internal injury never fully healed. It's not visible, but it affects you. *Your hit points are reduced by 2 at 1st level, and you gain 1 hit point less every additional level gained.*

20: You lost an eye, replaced with a false eye or patch. Advances in cybernetics may mitigate this penalty—otherwise, *you cannot score a critical hit.*

3-4

Addiction: You developed a substance addiction. You can try to kick the habit in game (you may kick it later in life habits), but it shouldn't be easy. *If separated from your fix for more than a day, you are poisoned until your addiction is satisfied.* Roll 1d20 to determine the addiction.

1-6: Caffeine

7-11: Alcohol

12-14: Cannabis

15-16: Tobacco

17-18: Prescription drugs

19: Amphetamines

20: Opioids

5-6

Psychological Trauma: You suffered an ordeal which left permanent emotional scars or even a behavioral addiction. Roll 1d20 to determine the trauma.

1-10: You wake up every morning suddenly. You are slightly moody. You sweat on occasion in stressful situations. These are minor manifestations that don't affect you greatly, but friends notice.

11-12: You're an alcoholic. *If separated from alcohol for more than a day, you are poisoned until your addiction is satisfied.*

13-14: You developed a stutter, and have issues with public speaking. *You have disadvantage with both Charisma (Persuasion) and Charisma (Intimidation) checks.*

15-16: You suffer from nightmares. Even if no one notices, it affects you. *After you wake from unconscious, you have disadvantage to ability checks and attack rolls for five minutes.*

17-18: You suffer from migraines. *You have disadvantage with Intelligence ability checks.*

19-20: You love gambling, but this is not necessarily limited to games; you may place yourself at risk in order to achieve the same stimulus.

7-8

Lover, friend, or relative killed: Which one dies can be up to you or the GM, but it should be a lover or friend established through life events or a relative from your immediate family. *(Go to A3-Casualty)*

9-10

Pursued by Criminals: You have crossed some very dangerous people and are now being hunted. This may continue to the present, or be resolved in the same event or a later event. Roll 1d20 to determine who hunts you.

1-6: You crossed a small gang, forcing you to avoid certain areas.

7-11: A small crime organization put a mark on you.

12-15: You crossed a prominent crime family.

16-18: You ticked off a major crime syndicate with connections across the land.

19-20: Turns out, you cut the finger of a massive criminal body with shell corporations and influence over governments.

11-12

Illness: You either contract a major illness or a hereditary disease rears its ugly head. You spend a time suffering from it. Pick a specific condition. Roll 1d20 to determine the affliction.

1-10: Level 0—You contract an infectious disease and for a while the prognosis looked grim. Thankfully, you pulled through with only minor aftereffects.

11-14: Level 1—You cannot fully recover from your condition and must manage it with medication. If properly dosed, no one notices your situation. *If you are denied your pill, injection, or treatment, you do not recover any Hit Dice after a long rest.*

15-17: Level 2—Despite regular medication, everyone that knows you is aware you'll never be 100%. *You suffer from the Level 1 impairment, and you also have disadvantage with Constitution ability checks.*

18-19: Level 3—Your condition is apparent to most everyone. Friends worry; strangers often keep their distance. *You suffer from the Level 1 and Level 2 impairments, and at the start of every morning, you suffer hit point loss equal to 10% of your total hit points. This can be healed through any available means.*

20: Level 4—It's honestly a miracle you're still alive. There's no doubt that your lifespan has been reduced from an affliction that you suffer from daily. *You suffer from the Level 1, Level 2, and Level 3 impairments, and your hit points are reduced by 2 at 1st level, and you gain 1 hit point less every additional level gained.*

13-14 **Pursued by the Law:** From tax evasion to premeditated murder, an arrest was issued with your face and name. You and/or the GM can decide if the accusation was legitimate or not. Perhaps you were framed. That aspect is up to choice (and should be assumed for the major crimes). The severity of the crime and the lengths people will go to your capture is not. Roll 1d20 to determine who pursues you.

1-6: You honestly don't know the big deal, but obviously someone does. Outside of a few police officer that know you, most others won't even bother chasing you.

7-11: It's a relatively minor offense (petty theft, drug use) in a small town, though still warranting jail time.

12-15: It's a major crime (grand theft, drug dealing), though you are relatively safe if you avoid the big cities.

16-18: The state or local militia have posted rewards for information leading to your capture. This sort of crime (individual murder, organized crime, serial robbery, sex crimes) is considered severe.

19-20: A national police force is dedicated to your capture. Information regarding you has spread to every corner of the globe. This crime is nothing less than terrorism, spree killings, or serial murder.

15-16 **Debt:** What you owe can be financial or personal. It could be to a government or to one person. Roll 1d20 to determine to what extent you owe.

1-6: Someone, somewhere, did you favor, something you needed at the time. This is not entirely financial, but they can call on you anytime for help.

7-11: You were saddled with incredible amounts of debt, which thankfully you have resolved in your later life. However, the stigma of that liability lingers, preventing you from taking chances financially or even getting approval for credit.

12-16: Your debt derives from some very bad decisions, decisions that you are still paying for. Your debt is \$1d6x100. When paid by a later event or in game, your debt is fulfilled.

17-18: There is not legal recourse; this is bad. You owe some powerful people a lot of money. You better appease them or make installments; otherwise you might find a price on your head. Your debt is \$1d6x1000. When paid by a later event or in game, your debt is fulfilled.

19-20: In cash or blood, you must repay this obligation. In lieu of a very dangerous mission, your debt is massive. Your debt is \$1d6x10000. When paid by a later event or in game, your debt is fulfilled.

17-18 **Imprisonment:** You've been either kidnapped or sent to prison. Whether or not it's warranted or how you get out at the end is up to you or the GM. Roll 1d20 to determine the number of months served.

19-20 **Failure:** Your career has faltered. Something you have been working on for a very long time has failed miserably. You may need to reconsider your goals, perhaps even your direction in life. Roll 1d20 to determine how bad you screwed up.

1-7: The failure cost you financially. You lose \$3d6x10 from starting money.

8-12: You lose your current status at your employment. If you had a rank, you are demoted. If it was a corporate job, you were banished to a lower floor.

13-17: You were fired outright or placed on leave. If in the military, you are busted down to private.

18-20: You lose everything, your position, your rank, and any hope of following that career again. What did you do? It might have been unethical. Was it warranted, or were you framed?

C3—WINDFALL

Roll 1d20

1-2

Earned Favor: Someone appreciates your actions. You might have saved a life or offered critical advice at the right time. A debt is owed that you can call on. How you can call on this favor and how often you can be determined below. A favor can supply equipment, transportation, access, money, or even military support. Roll 1d20 for frequency and influence.

Frequency

1-7: The debtor is limited to what she can accomplish by herself.

8-13: You can call of them for a single favor a level, or one big favor that will resolve the obligation.

14-18: You can call on them, big or small, but you are limited to six favors total.

19-20: You can call on them, big or small, but are limited to two favors per level.

Influence

1-6: The debt is owed by a single person who can or will only supply oneself.

7-11: The debtor can bring in a small group, like a gang, retinue, or a few employees.

12-15: The debtor will bring in dozens of people if necessary, calling on the right people for the right job.

16-18: The debtor has power and influence across hundreds, and can call on favors as well.

19-20: The debtor will move heaven and earth to appease you and may be able to do so. You want an army?

Identity

1-5: A relative nobody but who obviously has connections you don't know about.

6-9: The military or police commander.

10-12: A lord, small-town mayor, or the president of small company.

13-15: The patriarch or matriarch of a major crime family.

16-17: The president of a corporation. In medieval times, a duke or baron.

18-19: Royalty or the president of a multinational corporation.

20: This person runs a country.

3-4

Informant: Differentiated from favor, this is a connection that supplies information or their skill when called upon. This is probably someone you helped or a friend in a position of access. An informant has one dominant skill, rolled with a +8 bonus—this check has advantage. You can call on an informant once a week. The informant will never put oneself at risk and won't have access to anything outside of what's around.

Roll 1d20 for identity and skill.

1-2: Professor. Intelligence (History)

3-4: Scientist. Intelligence (Nature / Sciences)

5-6: Doctor. Wisdom (Medicine)

7-8: Hacker. Intelligence (Computer Use)

9-10: Engineer. Intelligence (Engineering)

11-12: Priest. Intelligence (Religion)

13-14: Entertainer. Charisma (Performance)

15-16: Charlatan. Charisma (Deception)

17-18: Private Investigator. Intelligence (Investigation)

19-20: Survivalist. Wisdom (Survival)

5-6

Wealth: What a stroke of luck, you've come into some money. Don't spend it all at once. Roll 1d20 for amount.

1-7: It wasn't much, a tax refund probably. You gain \$3d6x10.

8-13: You received a bonus, a commission, or a bank error in your favor. You gain \$6d6x10.

14-18: You've had a good night gambling, or finished a long-term project. Maybe you won a contest. You gain \$1d4x1000.

19-20: This is nothing short of a lottery win, inheritance, or a bank heist. However, the money is put aside for a rainy day. You gain the following bonuses when achieving the listed level: 1st level - \$500; 5th level - 2,500; 10th level - \$10,000; 15th level - \$55,000.

7-8

Combat Training: You gain admittance in a self-defense Class or find a martial-arts / weapons teacher. You spend an extended time specializing in a craft apart from your usual training. Each time you gain this windfall, you learn an additional tier.

Tier 1: You gain 1d4 weapon proficiencies.

Tier 2: You gain a +2 bonus to initiative.

Tier 3: Your speed increases by +5 feet.

Tier 4: You gain 1 feat.

9-10

Education Grant: People believe you're smart and throw money your way in order to develop your skills further. Each time you gain an education grant, you gain proficiency in one skill or tool of your choice as well as one additional language.

11-12

Recognition: You have been bestowed a well-deserved award, perhaps a gilded trophy. Maybe a medal. This doesn't assume a contest. If in the military, you receive medals; you don't win them. If in academia, you receive acknowledgement for a peer-reviewed paper which has advanced your field. *You have advantage on Charisma (Persuasion) checks with other people in in the same field that know of your achievements.*

13-14 Positive Side Effect: Well, that was unexpected. You have been subjected to a medical experiment, a yet untested treatment to a condition you suffer from, or something latent hidden for many years has finally manifested itself. *Roll on the Genetic Benefit Table*

15-16 Reputation / Rank: If in the military, you achieve a promotion. If on contract, you are able to raise your prices based on reputation alone. You are given more authority, influence over underlings or employees. This may have reaching aftereffects in the game. *You have advantage on Charisma (Intimidation) checks with other people under you command or influence.*

17-18 Recovery: You recover from one effect from the Tragedy table you are suffering from (chosen by you or the GM).

19-20 Personal Treasure: You discovered, was bequeathed, or were given something of value, something you treasure more than most other things, something you neither should sell or even want to (not that you would get anything, as selling it would only net you 1/10 its original value. Select one item worth \$5,000 or less as your item.

DI—FRIENDSHIP

You found a friend. Good for you. Roll 1d20 to determine how you met. Gender and race are up to you. Friends are different than earned favors or informants. Friends can be there for you in a pinch, help you out, but they should not be taken advantage of. They can be at home waiting for a phone call, or side-by-side with you in the neck of battle (as an NPC).

Roll 1d20

1-2 You reconnect with a relative (cousin, uncle, lost sibling, etc.)

3-4 A previous romantic interest. Either your separated prior and reconnected later, or the relationship didn't work and you remained as friends.

5-6 An old childhood friend, either that you've never lost contact with or one you bumped into and realized no time had really passed.

7-8 A co-worker, which could mean a tedious day job or a comrade you shared basic training with.

9-10 You owed this person a favor, or they owed you. Turns out you two both like the same things. The debt has long since been paid.

11-12 This person had known your family or mutual friends for years and you always considered him/her as a big brother / big sister. Alternatively, you've known this person through his/her family or mutual friends for years and you always considered him/her as a kid brother / kid sister.

13-14 It started as a teacher or mentor relationship, but after the classes were concluded, you two stayed in touch.

15-16 An old enemy, if you have one, and it makes sense. You two came to an understanding.

17-18 You two met through common interests or mutual friends. Consider it boring but it's also common.

19-20 He or she was more like a foster-parent, or rather the closest one you had to one,

EI—ENEMY

Yikes. You really got someone's hackles up. Decide on who the person is, what caused it, and what the other will do when encountered. Gender and age are up to you. If a combination doesn't work, the GM is more than welcome to order a re-roll.

Roll 1d20

1-2 Alas, not all friendships end well. A friend you picked up becomes an enemy.

3-4 A relationship you are currently in ends very badly. Or else someone you used to date comes back with an aim to destroy your life.

5-6 Regardless of blood, some lines still cannot be crossed. A relative is no longer a friend.

7-8 Either someone that bullied you or someone you bullied in your youth returns.

9-10 A coworker in a higher position wants to keep you down. As long as he/she is above you, you'll never advance.

11-12 Someone under your authority wants to bring you down to his/her level.

13-14 Someone you work with (a co-worker on equal footing) has it in for you.

15-16 A criminal is out for you.

17-18 Someone with a lot of weaponry (like someone in military or law enforcement) really doesn't like you.

19-20 Make sure you filed your taxes, because even the slightest slip could bring down the wrath from this government official with a lot of bureaucratic clout.

E2—THE CAUSE

Why is there such a divide between you two?

Roll 1d20

- | | |
|-------|---|
| 1-2 | Either you or the enemy caused the other to lose face (not literal) or position. |
| 3-4 | You caused your enemy a physical disability.
1-4: Facial scars or burns
5-8: Developed hearing problems
9-12: Developed a limp
13-16: Lost a hand
17-20: Lost an eye |
| 5-6 | You or your enemy caused the enemy to lose a loved one. |
| 7-8 | You or your enemy exposed a dark secret of the other that upset the other's life (but did not involve criminal proceedings). |
| 9-10 | You or your enemy was humiliated. Sometimes, that's enough. |
| 11-12 | There was a betrayal or abandonment. |
| 13-14 | You or your enemy was responsible for jail time.
1-10: You went to jail;
11-20: Your enemy went to jail.
Roll 1d20 to determine the number of months served. |
| 15-16 | You or your enemy just hates the other's stupid, stupid face. |
| 17-18 | You or your enemy cost the other a job or a lucrative deal. |
| 19-20 | You or your enemy foiled the other's cunning plan. |

E3—WHO TICKED OFF WHO

Maybe you hate him/her; maybe it's the other way around; maybe it's mutual.

Roll 1d20

- | | |
|-------|--|
| 1-6 | Your enemy is ticked off with you. You don't fully get it, and probably think it's being really overinflated. Someone needs a hug. |
| 7-12 | Your enemy is your enemy. It doesn't matter that he or she doesn't hold a grudge; you do. |
| 13-20 | It's totally mutual. |

Astute and aged players may recognize similarities between these tables and those found in another role playing game from nearly thirty years ago (well, about twenty-six years ago). Regardless of rules used or setting employed, my campaigns nearly always employed those tables in the creation of characters. I never forced it, but every player given the option always preferred leaving their lifepath up to random chance, always willing to let the chips fall where they may. That being said, as a GM, I did throw out rolls I didn't agree with. It's about constructing a backstory, a sensible backstory—sometimes events don't make sense. I'm honestly surprised it took me this long to create my own set of tables.

E4—WHO DOES WHAT

How angry are either of you? One of you can take this really personally. Choose logically who is the more cross (or if both sides are equally irate), then roll below.
Roll 1d20

- | | |
|-------|--|
| 1-4 | The crossed individual (or both) will try to kill the other when given the chance, no remorse. Is that going too far? |
| 5-8 | The crossed individual (or both) wants to beat the living snot out of the other. Maybe it's something you both need to get out of your system. |
| 6-12 | The crossed individual (or both) wants to destroy the other's life, to suffer for years and years. |
| 13-16 | The crossed individual (or both) have been prepping some choice zingers to fling at the other at the first opportunity. |
| 17-20 | It's just best you just avoid each other. |

E5—WHAT CAN BE THROWN

The influence of your enemy—what he or she can throw at you, assuming there's motivation for doing so.
Roll 1d20

- | | |
|-------|--|
| 1-6 | Despite any authority, your enemy will only handle matters personally. |
| 7-11 | Your enemy can bring in a small group, like a gang, retinue, or a few employees. A line is drawn about bringing in more. |
| 12-15 | Your enemy will bring in dozens of people if necessary, calling on the right people for the right job. |
| 16-18 | Your enemy has power and influence across hundreds, and can call on favors as well. |
| 19-20 | Your enemy will move heaven and earth to appease you and may be able to do so. You want an army? |

F1—ROMANCE

Aww...Sweet. You found someone important in your life. It might have been a quick fling, or a much longer affair. Roll for the type of relationship unless it's a continuation of a prior relationship, its current status, and it's potential for joy or misery.

NEW RELATIONSHIP

Roll 1d20

- | | |
|-------|--|
| 1-6 | You met someone, dated for a spell, but ultimately it didn't work out after only a few weeks or months. The break up might not have been mutual, but these things happen all the time. |
| 7-11 | You met, are still together, but you can't see it lasting.
(go to F4—Feelings) |
| 12-15 | You met and are still together. This may be the one. |
| 16-18 | You met someone, but from the beginning, there were complications.
(go to F2—Issues) |
| 19-20 | Tragic Love Why? WHY?
(go to F3—Misfortune) |

PREVIOUS RELATIONSHIP

You are currently in a relationship. Roll to see if you two are still together, and how things are coming along. Roll 1d20

- | | |
|-------|--|
| 1-4 | It's going very well. If it wasn't before, it is now. If it was before, congratulations. |
| 5-8 | The relationship is as before. Nothing has changed. |
| 9-12 | This is the one. You get married. |
| 13-15 | You have a child.
Roll 1-10: boy; 11-20: girl. |
| 16-18 | It has started to go downhill because of complications.
(Move to F2—Issues) |
| 19-20 | Something bad happened.
(Move to F3—Misfortune) |

F2—ISSUES

Your relationship encountered several complications. After rolling in F2-Issues, roll again in F4-Feelings.

Roll 1d20

- | | |
|-------|---|
| 1-2 | Your family and/or friends hate your romantic interest. |
| 3-4 | Your romantic interest's family and/or friends hate you. |
| 5-6 | There is a romantic rival involved trying to divide you to. Who the rival is interested in can be chosen or randomized. |
| 7-8 | You fight constantly. |
| 9-10 | You are professional rivals. |
| 11-12 | There is a lot of jealousy between you to. |
| 13-14 | One of you two had an affair and the other found out. |
| 15-16 | The both of you come from different walks of life, and it puts pressure on the relationship. There may not be internal pressures, but there may be external ones. |
| 17-18 | The two of you differ in ethnicity or race. There may not be internal pressures, but there may be external ones. |
| 19-20 | There are money problems; aren't there always money problems? |

F3—MISFORTUNE

Something bad happened in the relationship, including a simple break-up, which can feel like the end of world sometimes.

Roll 1d20

- | | |
|-------|---|
| 1-4 | Sometimes bad things happen, but the relationship survives it. |
| 5-8 | You break up. It just was never going to work out—the separation is mutual. |
| 9-12 | You dumped your romantic interest. |
| 14-16 | Your romantic interest dumped you. |
| 17-18 | You two are separated.
(go to A4-Separation) |
| 19-20 | Your romantic interest has died.
(go to A3-Casualty) |

F4—FEELINGS

Your relationship has complications, but how do you two feel about each other?

Roll 1d20

- | | |
|-------|---|
| 1-4 | Despite everything (and there are a lot), you still love each other. |
| 5-6 | Your romantic interest appears to have issues, but won't leave you. Why? |
| 7-8 | You have issues, but you won't leave your romantic interest. Why? |
| 9-10 | You both have issues—the relationship should have ended, but it doesn't. Something is holding you together. |
| 11-12 | Your romantic interest still loves you; you're not so certain. |
| 13-14 | You still love your romantic interest. You are worried it is no longer reciprocated. |
| 15-16 | You're drifting apart from mutual apathy. |
| 17-18 | You'll always be friends, but you fear the spark has faded. |
| 19-20 | Screw it. It's over. |

CHAPTER THREE

LADDERS

At 1st level, you can select a ladder. You gain the ladder's 1st-level feature, and can choose to gain its additional features instead of choosing an ability score increase or a feat at 4th, 8th, 12th, 16th, and 19th levels. In essence, ladders are a collection of similarly themed feats with an additional benefit when selected at 1st level.

24

You do not have to select the ladder's additional features at their listed levels if you would rather gain the normal ability score increase or a different feat. However, all ladder features must be taken in order: you can't skip a feature if you want a later one, and not choosing all the features prevents you from being able to achieve the apex of the ladder. Most ladder features include an ability score increase, so there is little incentive not to take them.

Unlike classes, which fill specific roles, ladders are based on what you are and how you live your life. These include various mental and physical disciplines as well as natural talents. Although some classes and ladders obviously complement each other, any ladder can be combined with any class.

Ladders are an optional system. The GM may choose to use them or not. If they are included, however, all players should choose one to avoid imbalance.

LADDER GAINS

At 5th, 11th, and 17th level, each ladder offers an additional benefit. This accounts for the lack of magic in most non-fantasy settings. Although weapons and armor may offer additional properties, almost none in *Ultramodern5* offer significant bonuses to attack or damage, and since modern games don't always feature incrementally better gear over the course of a campaign, it is entirely possible for you to carry the same equipment for the entirety of your character's life.

If your campaign features magic items or sudden jumps in technological advancement, ladder gains should be ignored. If you choose to use them anyway, treat each bonus as an attuned magic item, which must be relinquished (and later reattuned if you want it back) in order to benefit from a comparable item bonus.

BORN LEADER

You have always displayed confidence in the way you talk and present yourself. You were the captain of a sports team, the head of a technical department, the supervisor for a menial commission retail job, or the squad commander in an army. You could also have been a used car salesman or actor. You don't even need to be all that physically attractive; you simply project a presence that encourages followers. Thankfully, beyond the simple aura of your charisma, you're also clever enough to know what to say at the right times to have the greatest effect. You know that how you speak means more than the words themselves. Even if you're not the leader of the group, you often do most of the talking when the need arrives. In your spare time, you socialize with others.

Key Abilities: Charisma, Intelligence

BRAINS AND GOOD LOOKS

Beginning when you choose this ladder at 1st level, you can always choose to use Intelligence instead of Wisdom for the Insight and Perception skills.

Additionally, after taking a long rest, if you wear no armor and wield no weapons, you gain a +2 bonus to Charisma or Intelligence (select one) until you make an attack roll or cast a spell. Select either Charisma or Intelligence as your primary born leader ability.

COMPELLING DIRECTIVE

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary born leader ability, which has a maximum value of 22.

Additionally, after you finish a long rest, roll a d20 and put the result aside. You can swap out any roll you or an ally that can communicate with you makes for that result. You should always have a d20 result put aside this way, but after swapping two die rolls, you cannot swap another until you finish a short or long rest. After you finish a long rest, you always roll a new d20.

SOCIAL SCIENCES

At 8th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary born leader ability, which has a maximum value of 22.

Additionally, your *compelling directive* ability improves—you can swap out four die rolls between short and long rests.

PRESENCE OF LEADERSHIP

At 12th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary born leader ability, which has a maximum value of 22.

Additionally, after taking a long rest, if you wear no armor and wield no weapons, you have advantage with either Charisma or Intelligence skill checks (select one) until you make an attack roll or cast a spell.

EARNED LOYALTY

At 16th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary born leader ability, which has a maximum value of 22.

Additionally, you are able to turn a short rest into a long rest without an extension of time. This affects you and all allies you can see. After you use this ability, you cannot use it again until you have completed three additional long rests.

JUST STOP

At 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary born leader ability, which has a maximum value of 22.

Additionally, you are able to take a moment to focus and gather your wits, as well as the wits of your allies. Use an action, and you and all allies able to communicate with you gain the benefit of a short rest. This takes no time other than the action on your turn. After you use this ability, you cannot use it again until you finish a long rest.

LADDER GAINS

The born leader gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You gain a +2 bonus to any Charisma or Intelligence skill of your choice.

11th Level: You gain a +1 bonus to AC.

17th Level: You gain a +1 bonus to attack and damage rolls.

JUGGERNAUT

The juggernaut is a beast. Blessed with amazing stamina and brutal strength, you base your reputation upon the build you were gifted with and train daily to maintain. You may have worked in a gym, a farm, or a military base. You were self-taught, trained by a coach, or beaten down by a drill instructor. You might have earned a name in a ring or on the combat field. You could be an imposing behemoth or a gentle giant, only raising your hand when necessary. Regardless of what kind of pitiful body you were born with, you have worked up to nothing less than the physique of Greek legends. In your spare time, you work to maintain your physical perfection.

Key Abilities: Constitution, Strength

FULL TORQUE

Beginning when you choose this ladder at 1st level, you can use Strength in place of Dexterity for all attack and damage rolls with ranged weapons. You cannot use this ability with thrown explosives. Alternately, when wielding two-handed small arms, heavy weapons, or super heavy weapons, you can use Constitution in place of Dexterity for all attack and damage rolls. Select either Constitution or Strength as your primary juggernaut ability.

GOOD CARDIO

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary juggernaut ability, which has a maximum value of 22.

Additionally, your speed is not reduced when moving through difficult terrain, and you gain a bonus to your hit points this level equal to twice your primary juggernaut ability modifier (meaning triple if you selected Constitution).

UNSTOPPABLE

At 8th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary juggernaut ability, which has a maximum value of 22.

Additionally, you also gain 1 additional Hit Die at this level, and you maximize your hit points gained from both this Hit Die and the normal one you receive at this level.

BUILT LIKE A TRUCK

At 12th level, you can increase one ability score of your choice by 1, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary juggernaut ability, which has a maximum value of 22.

Additionally, you gain a bonus to your hit points this level equal to your primary juggernaut ability modifier

(meaning double if you selected Constitution), and you gain a damage bonus with melee attacks against incapacitated targets or immovable objects equal to your primary juggernaut ability modifier. You also have advantage on saving throws against being poisoned or stunned.

HULKING SMASH

At 16th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary juggernaut ability, which has a maximum value of 22.

Additionally, you can also use an action to activate your "hulking" ability. After you use this ability, you cannot use it again until you finish a long rest. When hulking, the following occurs.

- You gain temporary hit points equal to twice your level + twice your primary juggernaut ability modifier.
- As long as you have temporary hit points, you gain a bonus to damage rolls with melee attacks equal to your primary juggernaut ability.
- You suffer disadvantage on all skill checks, ability checks, and attack rolls utilizing Intelligence, Wisdom, or Charisma for one hour.

IN YOUR PRIME

At 19th level, you can increase one ability score of your choice by 2. You can't increase an ability score above 20 using this feature except for your primary juggernaut ability, which has a maximum value of 22.

Additionally, you have resistance to non-magical slashing, bludgeoning, and piercing damage.

LADDER GAINS

The juggernaut gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You recover 1 hit point every hour, provided that you have at least 1 hit point.

11th Level: You regain 1d4 additional lost Hit Dice when you take a long rest.

17th Level: Your regeneration increases to 2 hit points per hour.

RUNNER

With unmatched physical discipline, you have perfected a body designed for raw speed and agility. You are not a born soldier. If you served time in the military, your talents were as a scout, lightly armored and light on your feet. You may have grown up with an eye for sports. You broke records in the dash and ran for hours in marathons while others fell exhausted by the roadside. This was still not enough and you soon began finding more challenging ways to get from point A to point B.

Climbing walls, jumping across roofs, sliding under cars--nothing stood in your way. It's not enough just to be athletic: you have to keep your eyes and mind sharp, to gauge distances, crawlspaces, and the shortest possible route even if it involves some death-defying feat of acrobatic skill. You can keep an entire landscape in mind, analyzing paths and routes of escape, even when everyone else just sees walls. This may not be raw brainpower but a natural instinct of the surrounding environment. In your spare time, you run.

Key Abilities: Dexterity, Intelligence

POWER TO WEIGHT RATIO

Beginning when you choose this ladder at 1st level, you can always choose to use Dexterity instead of Strength for the Athletics skill, and Intelligence instead of Wisdom for the Perception skill. You can also use Dexterity in place of Strength for attack or damage rolls with all weapons without the heavy property, and you have proficiency with Dexterity (Acrobatics). Select either Dexterity or Intelligence as your primary runner ability.

CAT BALANCE

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary runner ability, which has a maximum value of 22.

Additionally, your speed also increases by +5 feet.

Additionally, if you move at least 10 feet while moving towards a wall, your remaining movement becomes a climb speed until the end of your turn. This movement can be any direction as long as it follows a vertical surface.

SAUTÉ DE PRECISION

At 8th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary runner ability, which has a maximum value of 22.

Additionally, if you use the Dash action, your movement increases by 1.5 times your speed (round down). You also add both your Dexterity and your Intelligence modifier to all Dexterity (Acrobatics) checks.

NATURAL ATHLETE

At 12th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary runner ability, which has a maximum value of 22.

Additionally, as an action, you can set your next Dexterity check or saving throw to your Dexterity score without rolling. You can do this as many times as your Intelligence modifier, and regain all spent uses after you finish a long rest.

Additionally, you also don't suffer half damage from an effect that inflicts half damage on a successful Dexterity saving throw.

ALL ABOUT THE FLIPPING

At 16th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary runner ability, which has a maximum value of 22.

Additionally, when wearing medium armor, your max Dex modifier is increased to 3. If wearing light armor, you gain a +1 bonus to AC. Also, if you take an action to analyze your path before making any movement on your turn, until the beginning of your next turn, you gain a bonus to your AC equal to your Intelligence modifier.

PARKOUR MASTER

At 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary runner ability, which has a maximum value of 22.

Additionally, you gain a pool of additional actions equal to your primary runner ability modifier. You can only use one additional action per turn, and only to take the Dash, Disengage, or Use an Object actions. Your action pool refills when you finish a long rest.

LADDER GAINS

The runner gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You gain a +1 bonus to AC when not wearing heavy or exo-armor.

11th Level: Your bonus to AC increases to +2

17th Level: Your bonus to AC increases to +3.

SAVANT

Your strengths are not in your endurance, speed, or ability to shoot something with pinpoint accuracy. You use a part of the body most of your comrades seem to let necrotize, your brain. You're the one with all the answers, an encyclopedia of knowledge. You went to school; you have degrees and awards of merit. You took those credentials and either went underground to use your expertise in nefarious ways or accepted a position with a school or corporation where they rained you with stock options and complimentary cars. You understand that you may be on the border between genius and madness, but all the great minds of the world balance that knife-edge. In your spare time, you read.

Key Abilities: Intelligence, Wisdom

TRAINING BEATS EXPERIENCE

Beginning when you choose this ladder at 1st level, you can use Intelligence in place of Dexterity for attack and damage rolls with one-handed and two-handed small arms. You can also use Intelligence or Wisdom as your modifier to AC instead of Dexterity, and as your spell-casting ability (if you cast spells). Select either Intelligence or Wisdom as your primary savant ability.

NOT STUPID

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary savant ability, which has a maximum value of 22.

Additionally, you gain the insight to discover if something is simply... stupid. You can ask the GM if a course of action (either yours or an ally's you know about) is just plain dumb, or the GM can volunteer this information. If the action is borderline, the GM's answer may be cryptic, otherwise it should be straightforward. You can ask as many times as your primary savant ability modifier before you finish a long rest.

TRAINING BEATS EXPERIENCE

At 8th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary savant ability, which has a maximum value of 22.

Additionally, you also are proficient in all skills of your primary savant ability (if not already) and use your primary savant ability instead of Dexterity for your bonus to initiative.

TOOOO SMART

At 12th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary savant ability, which has a maximum value of 22.

Also, if you use any skill tied to your primary savant ability to practice a profession during downtime activities, you can maintain a Wealthy lifestyle without having to pay per day. You also do not have to pay for research, and training costs 1/4 the usual time and money.

EIDETIC MEMORY

At 16th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary savant ability, which has a maximum value of 22.

Additionally, if you have advantage on any roll (including attack rolls and saving throws) and both results would succeed, you can set one aside. At any point in the next five minutes, you can choose not to make a d20 roll and instead use the saved die. You can only set aside one result at a time, and if not used within 5 minutes, it is lost.

OPUS

At 19th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary savant ability, which has a maximum value of 22.

Additionally, anytime you roll an ability check, skill check, or saving throw with your primary savant ability, you can set your die roll to your primary savant ability score.

LADDER GAINS

The savant gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You gain a +1 bonus to AC.

11th Level: You are immune to being charmed.

17th Level: You are immune to being frightened.

SURVIVOR

Regardless of how you have lived or where you were raised, you have always found a kinship with nature. You find salvation where others find death. While others starve, you prosper. No matter the environment, from bitter cold to scorching heat, you know the secrets to best stay alive. You can identify which foods will kill you or which animals will attack you. This is not knowledge gleaned from books but practical experience you may have earned the hard way. You may embark on weekend expeditions in the wilderness or elect to spend your entire life isolated from industry and popu-

lation. You refuse to depend on technology. If the world were to fall into ruin, you would still survive. In your spare time, you prepare yourself for the next day.

Key Abilities: Constitution, Wisdom

HUNTER

Beginning when you choose this ladder at 1st level, you can use Wisdom in place of Dexterity for attack and damage rolls with ranged attacks. You can use Constitution in place of Dexterity when determining your modifier to AC. Select either Constitution or Wisdom as your primary survivor ability.

NATURAL EQUILIBRIUM

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary survivor ability, which has a maximum value of 22.

Additionally, you can also use an action and make a DC15 Constitution ability check to reduce your exhaustion level by 1. Each time you attempt this save, the DC increases by 5. When you finish a long rest and have a chance to eat and drink something, the DC resets to 15.

Additionally, you also have proficiency in Wisdom (Survival) or Wisdom (Animal Handling) (pick one).

TOUGH IT OUT

At 8th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary survivor ability, which has a maximum value of 22.

Additionally, you can also increase your exhaustion level by 1 and select one of the bonuses below. Once you use one of the following abilities, you cannot use that same one again until you finish a long rest (though you can select the others, each time increasing your exhaustion level).

Hit Points: As an action, you gain temporary hit points equal to your primary survivor modifier + your level.

Critical Hit: As part of an Attack action, you can turn a hit into a critical hit and inflict additional damage equal to twice your level.

AC Bonus: As an action, you gain a +1 bonus to AC for 1 minute (10 rounds).

Combat: As an action, you gain a +1 bonus to Attack rolls for 1 minute (10 rounds).

DEAD MAN WALKING

At 12th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary survivor ability, which has a maximum value of 22.

Additionally, you can be reduced to less than 0 hit points (counted as being negative hit points) but remain conscious and standing at the cost of your minimum exhaustion level. If you already have levels of exhaustion, they increase accordingly. Though you can remove additional levels, the minimum cannot be removed until your hit points are raised back above 0.

- If your hit points are reduced to 0 hit points but more than -10, your minimum exhaustion level is 1
- Between -11 and -20 hit points, your minimum exhaustion level is 2.
- Between -21 and -30 hit points, your minimum exhaustion level is 3.
- Between -31 and -40 hit points, your minimum exhaustion level is 4.
- Between -41 and -50 hit points, your minimum exhaustion level is 5.

You can voluntarily fall unconscious and not compound exhaustion levels; additionally, after -50 hit points, your minimum exhaustion level increases to 6, and you die.

Although 5th Edition rules remove negative hit points, this specific feature puts them back.

ELITE

At 16th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary survivor ability, which has a maximum value of 22.

Additionally, you automatically pass Wisdom (Survival) checks with a DC of 20 or less unless you have disadvantage on the check.

UNNATURAL SURVIVAL

At 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary survivor ability, which has a maximum value of 22.

Additionally, when you finish a long rest and ingest some food and drink, you reduce your exhaustion level by 2.

LADDER GAINS

The survivor gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You have resistance to cold damage.

11th Level: You gain a +1 bonus to AC.

17th Level: You have resistance to fire damage.

VETERAN

Beyond any strength you may have in muscle or willpower, your survival through life could still be counted as luck. Your instincts have proven to be your greatest ally. You never ignore the lessons learned when events in your life turn desperate. You have seen or read enough to gauge where to be and when, what to say and how to say it. It isn't as much about avoiding injury as it is avoiding the escalation of a disagreement. You can

see the symptoms of conflict before most others. You impart advice when needed; act first when events are unavoidable. You may not be the leader but you're certainly the one everyone turns to for advice. You may not know all the answers, but most everyone trusts your gut over what a computer might say. When situations are at their worst, you're at your best, staying cool and calm while others flee. You don't have to be grizzled and old to be wise. The world has a tendency to not care how old you are when it puts you through hell. In your spare time, you reminisce.

Key Abilities: Charisma, Wisdom

CALM REFLEXES

Beginning when you choose this ladder at 1st level, you can use Wisdom for all attack and damage rolls with ranged attacks, unarmed attacks and attacks with melee weapons without the heavy property. Select one Charisma-based skill to be proficient in. You can also use Wisdom or Charisma for spells. Select either Wisdom or Charisma as your primary veteran ability.

GOOD GUESS

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary veteran ability, which has a maximum value of 22.

Additionally, you gain a pool of rerolls for any roll you might make equal to your primary veteran ability modifier. This occurs as part of the same action (or reaction); if you suffer from advantage or disadvantage, you gain the re-roll after taking the final result—you can then select whichever roll you want. Once you use *good guess*, you cannot use it again until the beginning of your next turn. You regain all your *good guess* re-roll dice when you finish a long rest.

EXPECTING TROUBLE

At 8th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary veteran ability, which has a maximum value of 22.

Additionally, the number of uses you gain for *good guess* increases by 3. You also regain a *good guess* die roll if that roll results in a 1 or a 2.

You also can make an Intelligence (History) check as a Wisdom (History) check—effectively a gut instinct of what is probably true—or as a Charisma (History) check—where you are making something up that might be true.

STONE-FACED

At 12th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score

above 20 using this feature except for your primary veteran ability, which has a maximum value of 22.

You are also immune to fear and being charmed.

INSTINCT WITH TIME

At 16th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary veteran ability, which has a maximum value of 22.

Additionally, the number of uses you gain for *good guess* increases by 2. Also, you can move 5 feet before making any saving throw: if this movement would take you out of the area of the effect that requires a save, you don't have to make one.

AT ANY COST

At 19th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary veteran ability, which has a maximum value of 22.

Additionally, the number of uses you gain for *good guess* increases by 2. You are also able to more easily overcome foes if you have dealt with them (or something similar) previously. If you fight a similar foe in the future, you have advantage on attack rolls until the first time you hit, and your first hit is also a critical hit. 'Similar' is defined as having the same basic creature stat block (with allowances for minor customizations the GM may have made to a particular creature): for instance, if you previously defeated a space gnome security guard, you would have a bonus against other space gnome security guards, but not against space gnome mercenaries or space elf security guards.

LADDER GAINS

The veteran gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You gain a +1 bonus to AC

11th Level: You gain a +1 bonus to attack and damage rolls.

17th Level: Your bonus to AC increases to +2.

WARRIOR

Your life is defined by your path, not how you walk it. You have trained from an early age by choice or by inheritance to take the role of a combatant. Your natural gifts were discovered and focused into a lifelong dedication. This is not to assume you're a warmonger, as such training comes with the responsibility to know restraint. For many, having the skills is a means for self-discovery. This can apply in the application of hand-to-hand combat, the use of melee weapons, or in the proficiency of small-arms. You might have lived on a farm, on a military base, or in a temple. You might have devoted your

life to the implement of one craft or to the broad use of many. Your power comes from commitment. Your victory is due to training. A true warrior knows when to fight and what to learn when a defeat occurs. In your spare time, you meditate and contemplate.

Key Abilities: Dexterity, Strength

STRENGTH OVER AGILITY

Beginning when you choose this ladder at 1st level, you can use Strength in place of Dexterity for all attack and damage rolls when wielding two-handed small arms, heavy weapons, or super heavy weapons. When wearing medium armor, your max Dex modifier is increased to 3. When wearing heavy armor, you gain a max Dex bonus of 1. Select either Strength or Dexterity as your warrior ability.

POWER UP

At 4th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary warrior ability, which has a maximum value of 22.

Additionally, you can power up as an action. You gain a power rank, starting at 1 and increasing to a maximum of 5 with successive power ups. Each rank has an associated power up ability which you can choose to apply to one attack (each ability also includes all lower ranks). You lose your power ranks when you use the ability, or when you roll for initiative, suffer any damage, or finish a short or long rest.

Power Rank 1: You have advantage on your next attack; if you hit, the damage die of any weapon you wield increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12).

Power Rank 2: Regardless of your next attack roll, it automatically hits; the damage die of any weapon you wield increases by an additional step.

Power Rank 3: Regardless of your attack roll, your next attack is a critical hit.

Power Rank 4: Re-roll all 1s and 2s on your damage dice of your next hit. Each time you roll the maximum result on a damage die, roll that die again and add the result to your damage. If you roll the maximum result on a reroll, keep rolling and adding until you get a different result.

Power Rank 5: With your next hit, double all damage dice—this stacks with your critical hit.

ULTRA SUPER

At 8th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary war-

rior ability, which has a maximum value of 22.

Additionally, you can also increase your power rank by 1 with a bonus action—once you use this ability, you cannot use it again until you finish a short or long rest. You can also spend 1 Hit Die as a reaction to suffering damage—you regain no hit points but you do not lose your current power rank.

CONVERT ENERGY

At 12th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary warrior ability, which has a maximum value of 22.

Additionally, if you don't move from your spot starting on your turn, at the beginning of your next turn, you gain a power rank—once you use this ability, you cannot use it again until you finish a short or long rest. Also, after you roll for initiative, you start your first turn at power rank 1.

VIGOROUS SURGE

At 16th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary warrior ability, which has a maximum value of 22.

Additionally, you don't lose your power rank if you suffer damage.

LOSES PATIENCE, FINDS ANGER

At 19th level, you can increase one ability score of your choice by 1. You can't increase an ability score above 20 using this feature except for your primary warrior ability, which has a maximum value of 22.

Additionally, when you suffer a critical hit or are reduced to below half hit points, roll a d4 and you start your next turn set to a power rank equal to your die roll result.

LADDER GAINS

The warrior gains the following additional benefits at 5th, 11th, and 17th level:

5th Level: You gain a +1 bonus to attack and damage rolls.

11th Level: You gain a +1 bonus to AC

17th Level: Your bonus to attack and damage rolls increase to +2.

CHAPTER FOUR

CLASSES

Modern classes are cut from a different cloth than traditional fantasy ones. In a dungeon crawl, it's important to have each character contribute to the acquisition of treasure and the survival as a whole. There can be no fat, leaving a lean fantasy party only permitting specific classes within their ranks.

It is expected, but not required, that characters in a modern campaign encompass a broad mix of roles, entirely dependent on the needs said campaign. It is entirely possible to create a character with little to no combat abilities. A strength of personality can sometimes be more important than one's capacity to aim a gun.

34

There are no suggested party compositions here; this would fall entirely on the specifics of the game being run. If the GM is running a setting based entirely in a post-apocalyptic wasteland, then grounders, medics, and techies would be more important than faces. Likewise, a team of assassins may not require an engineer, but an infiltrator or two would be vital. This book does not endorse any one party composition, not even for the assumed top-end combat classes like grounder and heavy. All that matters is that players and the GM work together to ensure that not only does everyone have fun, but contributes in their own and often as possible.

Modern characters are also largely dependent on technology, which comes in two forms—current tech and future tech, although these terms are relative to the technology base of the campaign. While the 5th Edition rules have reduced the traditional reliance on magical items to make the combat math work, the default game still presumes that characters will change

and upgrade their equipment over the course of a campaign. In U5, weapons can possess certain properties, but even the most advanced weapon lacks any incremental bonuses to attack or damage (these bonuses being supplied through Ladder Gains instead). *Ultramodern5* characters could therefore conceivably carry the same equipment through the entirety of the campaign (possibly becoming attached to their personal gear), or change their loadouts for a particular mission.

However, in a game with scaling technology (such as *Amethyst*, where bastions sport different levels of technology), or advanced alien technology, tech can be treated the same as magic items, with incremental bonuses assigned as normal. In this case, ladder gains should be ignored or treated as filled attunement slots, as detailed in Chapter Two. The GM should indicate at the start of the campaign which tech rules apply.

It's important when making a character that not only you, but everyone else at the table (including the GM) understands the strengths and weaknesses of your class.

QUICK BUILDS

Something worth doing well requires patience and effort. There are no quick-build instructions offered in these pages. *Ultramodern5* encourages you to take the time and put heart into your character. U5 assumes you are not constructing disposable people ready for the recyclotron.

FACE

You are all talk. Thankfully, your strengths depend on that. Some call you empathic while others claim you just have good instincts. You may have cut your teeth as a psychologist or a confidence artist. You can spot a liar by their puckering lips and lazy eyes. You sense the heat of attraction and the searing loathing of those obsessed with violence. Your words have been known to disarm, sooth, or enrage. When shooting is not the solution, you're the only that can save the situation. You're the smooth talker, the negotiator, and the haggler. When a gun is pointed at your head or when dangling off a cliff, your first response is "can't we discuss this?"

PLAYING A FACE

You're at your best when bullets are not flying. Though you are not as skilled in ways of warfare, this doesn't mean you sit back when combat starts. Certain abilities allow you to literally "psych out" enemies by imitating commands over the radio, causing diversions, and imposing your presence to cause hesitation. You have even been known to negotiate the release of prisoners and convince an enemy to run instead of fight. However, these abilities are limited in their effectiveness.

CLASS FEATURES

As a face, you gain the following class features.

HIT POINTS

Hit Dice: 1d8 per face level

Hit Points at 1st level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 5) + your Constitution modifier per face level after 1st

PROFICIENCIES

Armor: Light armor

Weapons: All simple weapons and one-handed small arms

Tools: Disguise kit

Saving Throws: Intelligence, Charisma

Skills: Perception, Insight, and four skills from Computer Use, Engineering, History, Intimidation, Investigation, Performance, Persuasion, Sciences, Stealth, and Vehicle Operation.

EQUIPMENT

You start with the following equipment in addition to the equipment granted by your background:

- a one-handed small arm costing \$300 or less
- a set of light armor \$300 or less
- a ground vehicle with a value of \$30,000 or less
- a disguise kit
- \$200 in additional gear.

BULLETPROOF EGO

Starting at 1st level, as long as you wear light or no armor, you gain a bonus to AC equal to half your proficiency bonus (rounded down).

DOUBLE YOUR EFFORTS

You are not a fighter. You're a... well... everything that's not a fighter. Starting at 1st level, you can make a DC15 Wisdom (Perception) check as a bonus action; if you pass, you can take an additional action on top of your regular action. You cannot use the Attack action with this extra action.

LIFE INSURANCE

You're not expecting to be in a fight, so best to use your resources in a more constructive fashion. Starting at 1st level, instead of using your Hit Dice to recover hit points during a short rest, you can expend them to gain an edge when required. Spend a Hit Die on your turn, and you gain the following benefits:

- You automatically pass the *Double Your Efforts* skill check in order to gain the additional action.
- You have advantage on all attack rolls, ability checks, and skill checks until the beginning of your next turn.
- Any Charisma saving throws you force a target to make before the end of your next turn gains a +5 bonus to the DC.

WAY OF PROTAGONIST

You know, deep in your heart, you're a hero, regardless if you're actually a sociopath. Starting at 1st level, you begin developing skills enabling you to manipulate people through force of will, a winning smile, and the right sequence of words. You gain two *Protagonist Traits* at 1st level, gaining an additional trait at 5th, 9th, 14th, and 17th level.

Several traits require the use of a Charisma saving throw. The DC to resist your...well...behavior is 8 + your Charisma modifier + your proficiency bonus.

Way of Protagonist actions are not Attack actions, and as such can be used with the additional action with Double Your Efforts.

Biting Taunt

You are able to scream an obscenity that is shockingly personal and vile to your opponent. As an action, you can target an enemy that can hear and understand you. It makes a Charisma saving throw. If the target fails, it has disadvantage on attack rolls and ability checks until the beginning of your next turn. A target that succeeds on the DC has advantage on additional saving throws against this effect until you finish a long rest.

Cognitive Empathy

The truth is written in their faces. Through interpreting microexpressions, body language, and other aspects of applied psychology, you are able to read the thoughts of certain individuals. As an action, you can focus your mind on any one creature that you can see within 30 feet of you and that has an Intelligence of 4 or higher. It makes a Charisma saving throw.

If it fails, you learn the surface thoughts of the creature—what it is most likely to do in the immediate future and what could possibly be on its mind. You also gain insight into its reasoning (if any) and/or its emotional state. This effect lasts until the end of your next turn or until you break line of sight.

Faceman

It's all about the personality. Select one Intelligence, Wisdom, or Charisma skill or one item proficiency. As an action, double your proficiency bonus with the next check made with that skill or item. You can select *faceman* a second time and select another skill or item.

Fascination

You are, in fact, the most interesting person in the world...at least to your target. As an action, you can attempt to charm a target. It must be able to hear and understand you. It makes a Charisma saving throw. If it fails, the creature is not only charmed by you but by

Level	Proficiency Bonus	Protagonist Traits	Special
1	+2	2	Bulletproof Ego, Double Your Efforts, Life Insurance, Way of Protagonist (x2)
2	+2	2	Hustle Pool
3	+2	2	Archetype feature
4	+2	2	Ability Score Improvement
5	+3	3	Way of Protagonist
6	+3	3	Automatic Improvisation
7	+3	3	Archetype feature
8	+3	3	Ability Score Improvement
9	+4	3	Way of Protagonist
10	+4	4	Double Your Efforts
11	+4	4	Archetype feature
12	+4	4	Ability Score Improvement
13	+5	4	Make Them Flinch
14	+5	4	Way of Protagonist
15	+5	5	Archetype feature
16	+5	5	Ability Score Improvement
17	+6	5	Way of Protagonist
18	+6	5	Archetype feature
19	+6	5	Ability Score Improvement
20	+6	6	Automatic Improvisation

all your allies the target can see. The charmed effect ends if the target suffers damage or five minutes have passed. When you use this feature, you cannot use it again until you finish a long rest. If the target makes the saving throw, you recover the use of *fascination* but cannot use it against the same target until you finish a long rest. You can select *fascination* a second time and gain a second use before finishing a long rest.

Iceman

If you suffer a critical hit, you regain 1 lost Hit Die.

Know the Signs

You have advantage against any Charisma and Wisdom saving throws.

Mind Twist

More so than insulting a target, you say something so bizarre (or perhaps amazingly insightful), the target is forced to take time to think it over. As an action, you can target an enemy that can hear and understand you. It makes a Charisma saving throw. If the target fails, it is stunned until the beginning of your next turn. When you use this feature, you cannot use it again until you finish a long rest. If the target makes the saving throw, you recover the use of *mind twist* but cannot use it against the same target until you finish a long rest. You can select *mind twist* a second time and gain a second use before finishing a long rest.

Poker Face

You are immune to being frightened or charmed. Additionally, all allies that can see you have advantage against being frightened or charmed as well.

Polyglot

You learn three additional languages. You also gain one additional language every three levels from now on.

Possible Sociopath

You have resistance to psychic damage, as well as having advantage on saving throws against any effect that would sense your emotions or read your thoughts.

Veneer

A disguise kit is only the beginning; outside of clothing and make-up, you can now alter your voice and mannerisms. You can also mimic specific people. If attempting a generic person, the disguise is near flawless (you have advantage on the disguise kit). Regardless if you are mimicking a specific or generic person, if your ability check to create a visual disguise is less than your Charisma saving throw DC, you can use that instead.

Winning Smile

Before making a skill check for a skill you are proficient with, you can instead set your roll to your ability score. When you use *winning smile*, you cannot use it again until you finish a long rest. You can select *winning smile* a second time and gain a second use before finishing a long rest.

HUSTLE POOL

You are a born talker and love to debate, regardless if its versus friends, enemies, or entities. Starting at 2nd level, you can alter the natural result of any d20 roll you make. You gain a pool equal to double your Charisma modifier, and can pull from said pool to alter the result of a d20 roll you just made. Your hustle pool refills after you finish a long rest.

ARCHETYPE

At 3rd level, you choose an archetype from the archetype chapter. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Additionally, you can forego your archetype selection at 3rd level and gain an additional *Way of Protagonist* trait at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

MAKE THEM FLINCH

Starting at 13th level, you can force a creature that made a Charisma saving throw you imposed to re-roll. When you use this feature, you cannot use it again until you finish a long rest. If the target still succeeds on the saving throw, you recover the use of *make them flinch* but cannot use it against the same target until you finish a long rest.

AUTOMATIC IMPROVISATION

You are really good at giving the illusion that you know what you are doing. At 6th level, you can spend a Hit Die as a bonus action to gain proficiency with a tool for one minute (including musical instruments). At 20th level, this improves, and you have proficiency with all tools.

GROUNDER

You're the front line attacker, the one your opponents are most likely to see, the one that carries the flag and takes the ground. You're the first deployed and the last to leave. Whether you consider yourself another ground pounder or an elite member of a special team, your general talents at warfare have made you a reliable ally in combat. You are a multi-talented, general purpose soldier, able to pick up and master nearly every weapon you can find. Your skills with firearms have few equals.

PLAYING A GROUNDER

A grounder has two main build options, employing rapid autofire attacks or more accurate single-shot strikes. Because of generalized training, you can employ pistols like a gunslinger, more powerful small arms like a heavy, or even long-range precision weapons like a sniper. There really is nothing you can't do.

Generally you gain purpose from the others around you, joining a team because of loyalty and friendship, not because a commander issued an order. Even when the goal is a paycheck, you would never commit to this job without others to have your back.

Creating a grounder requires the use of firearms, either in single-shot or autofire modes. Your combat abilities are focused mostly on high damage attacks upon single targets while also aiding allies in their own duties.

CLASS FEATURES

As a grounder, you gain the following class features.

HIT POINTS

Hit Dice: 1d10 per grounder level

Hit Points at 1st level: 10 + your Constitution modifier

Hit Points at Higher Levels: 1d10 (or 6) + your Constitution modifier per grounder level after 1st

PROFICIENCIES

Armor: All armor, shields

Weapons: Simple weapons, one-handed and two-handed small arms, heavy weapons, super heavy weapons.

Tools: All ground vehicles and aircraft

Saving Throws: Strength, Dexterity

Skills: Select two skills from Acrobatics, Athletics, History, Insight, Intimidation, and Perception.

EQUIPMENT

As a grounder, you receive the following equipment at 1st level.

- three small arms, each \$300 or less
- two Concussion Grenades
- a set of armor \$300 or less
- \$100 in additional gear

FIRE SUPPORT

Starting at 1st level, you can select a *fire support* discipline. There are two to choose from: *assault* or *precision*.

By pursuing assault, you favor automatic weapons that fire multiple rounds, increasing damage at the risk of accuracy. By selecting precision, you keep your weapon firing single rounds, ensuring a hit without wasting ammunition.

Level	Proficiency Bonus	Fire Support	Brotherhood	Special
1	+2	1	1	Fire Support, Brotherhood
2	+2	1	1	Take A Knee
3	+2	1	1	Archetype feature
4	+2	1	2	Ability Score Improvement
5	+3	2	2	—
6	+3	2	2	Double Tap
7	+3	2	3	Archetype feature
8	+3	2	3	Ability Score Improvement
9	+4	3	3	Triple Tap
10	+4	3	4	Meat Shield
11	+4	3	4	Archetype feature
12	+4	3	4	Ability Score Improvement
13	+5	4	5	—
14	+5	4	5	Quadruple Tap
15	+5	4	5	Archetype feature
16	+5	4	6	Ability Score Improvement
17	+6	5	6	—
18	+6	5	6	Archetype feature
19	+6	5	7	Ability Score Improvement
20	+6	5	7	All In

Each time a discipline is selected, it increases its tier. You select additional disciplines at 5th, 9th, 13th, and 17th level.

FIRE SUPPORT PATHS

Assault

Tier 1: Whenever you make an autofire attack, you inflict additional damage equal to the amount you beat the enemy's AC by, up to a maximum of 5 (for an auto weapon) or 10 (for an auto-heavy weapon).

Tier 2: If you hit, you can increase your final attack roll for purposes of this path (up to a maximum value based on your type of weapon from tier 1).

Auto: +2 to your attack roll after you hit.

Auto-heavy: +4 to your attack roll after you hit.

Tier 3: If you hit, you can increase your final attack roll for purposes of this path (up to a maximum value based on your type of weapon from tier 1). This replaces the values from Tier 2.

Auto: +4 to your attack roll after you hit.

Auto-heavy: +8 to your attack roll after you hit.

Tier 4: The maximum upper limit on damage with this path doubles (10 (for an auto weapon) or 20 (for an auto-heavy weapon)).

Tier 5: If you hit, you can increase your final attack roll for purposes of this path (up to a maximum value based on your type of weapon from tier 1). This replaces the values from Tier 3.

Auto: +8 to your attack roll after you hit.

Auto-heavy: +16 to your attack roll after you hit.

Precision

Tier 1: You gain a +1 bonus to all non-autofire attack rolls.

Tier 2: If you score a critical hit with a non-autofire attack, roll all damage dice three times instead of twice.

Tier 3: Set aside a natural 20. Replace one missed attack roll you make with a non-autofire weapons with that natural 20. Once you do, you cannot set aside another natural 20 until you finish a short or long rest.

Tier 3: If you roll a natural 2 or 3 on a non-autofire attack, you can re-roll.

Tier 5: You have advantage on non-autofire attack rolls.

BROTHERHOOD

At 1st level you select one of the following brotherhood abilities. These abilities complement the group you are in, rewarding teamwork over selfish ambitions.

You select additional abilities at 4th, 6th, 10th, 13th, 16th, and 19th level.

Action Star

If you score a hit on a creature 20 feet or closer, you can elect to piss said creature off. It now suffers disadvantage on all attack rolls that don't include you as a target. The effect ends if you move out of range or out of line of sight (like behind total cover), or don't attack the same target before the end of your next turn (you don't need to hit, just attack).

Cauterize

You can use your action to heal an injured ally. The target recovers hit points equal to 1d6 / your level. When you use this feature, you cannot use it again until you finish a short or long rest.

Combat Ineffective

If an allied character in line of sight is reduced to 0 hit points or less, you have advantage on attack rolls against the creature that hit the ally until the creature is destroyed or until the felled ally recovers hit points.

Comrades In Arms

If an ally within 10 feet of you suffers a critical hit, you have advantage on attack rolls against the creature that made that attack until the end of your next turn.

Solid Frame

When wielding a two-handed small arm, you do not suffer the -2 penalty to firing while moving.

Covering Fire

Before making an Attack action, you can suffer disadvantage on all attack rolls for that action; all allies in line of sight gain a +1 bonus to AC and advantage on all saving throws against any target you attack until the beginning of your next turn.

Front Line Deployment

Select one ally within 10 feet as a bonus action. Until the beginning of your next turn, the targeted ally gains a +1 bonus to AC.

For The Common Honor

If an ally within 5 feet of you suffers a hit from an enemy, as a reaction, you can swap locations with the ally and suffer the hit and all effects instead.

Jump In Front

If you and at least one ally are struck by an area effect no bigger than 60 feet across, as a reaction, you can push your allies out of the target area. However, you are then targeted by the effect a number of times equal to the number of allies you pushed. When you use this feature, you cannot use it again until you finish a short or long rest.

Man Down

If you occupy the same space as a dead, prone, or unconscious ally, the ally cannot be targeted by any ranged or melee attacks and automatically passes all Dexterity saving throws. The effect ends if the target stands, if you leave the target's area, or if the target makes any kind of attack.

Member Of A Team

You can spend 30 feet of movement and select an ally within 5 feet. That ally can use the Disengage action without using her action on her next turn.

Slow Is Smooth

When you move, you can reduce your speed by 10 feet and pull one ally within 5 feet with you. If you use the Disengage action, the ally also disengages.

Snap Out Of It

Use your action to remove one of the following conditions an ally suffers from, unless you suffer from the same condition: charmed, frightened, stunned, or unconscious (unless dying). When you use this feature, you cannot use it again until you finish a short or long rest.

Spotter

Target an enemy in light of sight with your action; one ally within 5 feet of you has advantage on his next attack roll against said target.

Toss Magazine

You can spend 30 feet of movement and reload an ally's weapon. The ally must be within 10 feet and you must have the proper ammunition or cell.

TAKE A KNEE

Starting at 2nd level, you are able to crouch quickly and brace your elbow against your knee for a secured firing position. Spend 30 feet of movement and make an additional ranged attack as part of an Attack action this turn. You cannot use this feature if you are within reach of an enemy or an enemy is in reach of you.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and select either an additional fire support path or a Brotherhood ability at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of

your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

DOUBLE/TRIPLE/ QUADRUPLE TAP

Starting at 6th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. This increases to three attacks at 9th level in this class and four attacks at 14th level in this class.

MEAT SHIELD

An enemy is more useful to you when it's dead. Starting at 10th level, as a reaction—or part of your action if on your turn—when a creature within 5 feet is killed or otherwise reduced to below 0 hit points, you grab it; it now grants you half-cover until you move. If using a two-handed small arm, you suffer a -1 penalty to attack rolls while holding the target. You cannot use a heavy or super heavy weapon with *meat shield*. You also cannot use *meat shield* with *take a knee*.

ALL IN

At 20th level, if you hit an enemy, you can empty a full magazine to ensure a messy kill. Double the number of attacks you make with an Attack action against a single target. When you use this feature, you cannot use it again until you finish a short or long rest. That weapon is also out of ammunition.

GUNSLINGER

On the battlefield, you specialize in infiltrating behind enemy lines before sowing confusion in the ranks, dancing acrobatically around the field dealing out point-blank death and disrupting the foe's cohesion.

Unlike other classes like grounder and heavy, you are mobile and agile. It would be unlikely that you would wield a pistol with a full functioning rifle on their backs. You walk light, often near the front lines or scouting far ahead of a unit. You are not required to carry a shovel or plant explosives. Their purpose is singular, if not slightly selfish.

PLAYING A GUNSLINGER

Decide on the number of weapons you'll be wielding in combat. It will not only set your play style, but your potential personality as well. There is admittedly some theatrics involved, regardless of the choice, a talent picked up outside of standard military training channels.

No doubt, you probably picked up a few tricks through specialized trainers and even practice. You might have possessed a background in law enforcement or been a crime lord's hired thug. There was a reason why you never held a rifle—it was either never given to you, or the details of your profession precluded its use.

You may be required to be agile, sometimes clandestine. You have no problem intimidating people with your appearance and demeanor and don't require some phallic compensation to aid in that. You can admit being somewhat of a cliché—the question is, do you embrace it? And if so, which one—the ancient American west or the later cinematic bullet ballet artist. Oddly enough, both roles have been embraced in this new world.

CLASS FEATURES

As a gunslinger, you gain the following class features.

HIT POINTS

Hit Dice: 1d8 per gunslinger level

Hit Points at 1st level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 5) + your Constitution modifier per gunslinger level after 1st

PROFICIENCIES

Armor: Light and medium armor

Weapons: Simple weapons, one-handed and two-handed small arms

Tools: All ground vehicles and aircraft

Saving Throws: Dexterity, Wisdom

Skills: Select three skills from Acrobatics, Athletics, History, Insight, Intimidation, Perception, and Performance, and sleight of hand.

EQUIPMENT

You start with the following equipment in addition to the equipment granted by your background:

- two one-handed small arms, \$300 or less
- a set of armor \$300 or less
- \$100 in additional gear

CINEMATIC STYLE

Starting at 1st level, choose whether you fight with either one firearm or two.

Two Weapons

Wielding two one-handed small arms is the same as wielding two light melee weapons for the purposes of two-weapon fighting. As such, you can use a bonus action to attack with your second small arm. You don't add your ability modifier to the damage of the bonus attack, unless the modifier is a negative. At 6th level, you no longer have this limitation, and can add your ability modifier to the damage of the bonus attack.

One Weapon

If wielding only one one-handed small arm, you gain a +3 bonus to damage rolls with that weapon. This increases to +6 at 6th level.

CONVERGING FIRE

Starting at 1st level, when attacking a creature 5 feet or closer with one or two one-handed small arms, you gain a +1 bonus to attack rolls and a +2 bonus to AC.

KATA

Starting at 1st level, you are able to use kata exploits fueled by kata points. You have 4 kata points at 1st level, gaining 1 additional point every third level beginning at 2nd level. You regain all spent kata points when you finish a short or long rest.

At 1st level, you select two kata exploits, gaining one additional exploit at 2nd, 5th, 9th, 13th, and 17th level. Each time you are able to select a new exploit, you can replace one you know with a different one.

All exploits require the use of one-handed small arms. Certain kata exploits also cost more than one point.

At 1st level, you can only use one exploit per turn. This increases to two at 10th level.

Abnormally Fast

Kata Cost: 1

Spend 1 kata as part of your movement to double your speed until the end of your turn. If you are hit with an attack before the beginning of your next turn, you gain 1 kata.

Between The Eyes

Kata Cost: 1

Spend 1 kata before making a ranged attack roll to have advantage on that attack roll. If both attack rolls hit, double your attribute modifier damage. If both miss, you regain 1 kata.

Blood In The Eyes

Kata Cost: 1

Spend 1 kata as a reaction if an enemy scores a critical hit on you to make a ranged attack against the triggering enemy. If you hit, your attack is also a critical hit. If you miss by 5 or more, you regain 1 kata.

Boundary Threshold

Kata Cost: 1

If you are within 5 feet of at least two enemies, you can spend 1 kata along with 30 feet of movement to make one ranged attack to one of those enemies.

Classic Tumble

Kata Cost: 1

Spend 1 kata as a reaction when hit with an attack or if you fail a Dexterity saving throw. You take only ¼ damage.

Level	Proficiency Bonus	Kata Points	Kata Exploits	Special
1	+2	4	2	Cinematic Style, Converging Fire, Kata
2	+2	5	3	—
3	+2	5	3	Archetype feature
4	+2	5	3	Ability Score Improvement
5	+3	6	4	Gun-Fu
6	+3	6	4	Cinematic Style
7	+3	6	4	Archetype feature
8	+3	7	4	Ability Score Improvement
9	+4	7	5	Reflex Shot
10	+4	7	5	Kata Improvement
11	+4	8	5	Archetype feature
12	+4	8	5	Ability Score Improvement
13	+5	8	6	Gun-Fu
14	+5	9	6	Heroic Bloodshed
15	+5	9	6	Archetype feature
16	+5	9	6	Ability Score Improvement
17	+6	10	7	Gun-Fu
18	+6	10	7	Archetype feature
19	+6	10	7	Ability Score Improvement
20	+6	11	7	Endorphin Response

Equilibrium

Kata Cost: 1

Spend 1 kata as part of a reaction when an enemy misses with a ranged attack—you make a ranged attack. If you score a critical hit with said attack, you recover 1 kata.

Hydrostatic Shot

Kata Cost: 1

Spend 1 kata after hitting a target; you inflict additional damage equal to your level, and if the creature is your size or smaller and moves or attacks before the start of your next turn, you can knock the enemy prone as a reaction.

Just One Bullet

Kata Cost: 1

Spend 1 kata before an attack action to add your Wisdom modifier to all damage rolls until the end of your turn. If any attack rolls you make on your turn score a critical hit, you gain 1 kata (max 1).

Kinesics

Kata Cost: 1

Spend 1 kata on your turn: your movement is not reduced through difficult terrain, you don't provoke opportunity attacks, and all attacks against you have disadvantage until the beginning of your next turn. If you suffer more than one hit while *kinesics* is in effect, you regain 1 kata.

Limber Up

Kata Cost: 1

Spend 1 kata at the beginning of your turn to have advantage on Dexterity and Strength ability checks, skill checks, and saving throws until the end of your next turn.

Rapid Kill

Kata Cost: 2

Spend 2 kata after hitting a creature to turn that hit into a critical hit.

Way Of The Gun

Kata Cost: 1

If you hit a creature at least 20 feet away, spend 1 kata to gain an additional attack against one additional enemy within 5 feet of the first target.

Weak Spot

Kata Cost: 4

Spend 4 kata after hitting a target; you gain a damage bonus to every subsequent hit on that specific target equal to your Wisdom bonus until the target is killed.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and gain a kata exploit and 1 kata point at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

GUN-FU

Starting at 5th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. This increases to three attacks at 13th level in this class and four attacks at 17th level in this class.

Additionally, at 5th level, if all ranged attacks you make with an Attack action are directed at the same target, you can make one additional ranged attack against that target. This increases to two additional attacks at 17th level in this class.

REFLEX SHOT

Starting at 9th level, when wielding a one-handed small arm, you can use a ranged attack as an opportunity attack.

HEROIC BLOODSHED

At 14th level, you become a staple of action films. If wielding two one-handed small arms, you double the number of ranged attacks you make with your Attack action, your Bonus action and any Reactions until the beginning of your next turn. If wielding one one-handed small arm, until the beginning of your next turn, if you hit with an attack roll, that attack is automatically a critical hit and you double all dice rolled. Once you use this feature, you cannot use it again until you finish a short or long rest.

ENDORPHIN RESPONSE

At 20th level, instead of using your Hit Dice to recover hit points during a short rest, you can expend them on your turn as a bonus action and gain 4 points of kata.

HEAVY

You are most likely the scariest opponent on the entire battlefield. You're the one the enemy must kill in order to take the field. You cut massive swaths of devastation across whole landscapes, bringing down trees and buildings. You strike fear into opponents, sending entire armies to their grave. Though limited in speed, where you step, you secure ground. Reverse or retreat does not come easily to your lips. You specialize in the heaviest of weapons, from rocket launchers and grenades to machine cannons and howitzers.

When bullets fly, you plant your feet and begin hailing down ammunition upon your foes, suppressing their movement or making them dive for cover. You eradicate obstacles and assist your allies by denying your enemies the opportunity to advance. You might be strong but this is not a requirement, though it helps, especially when carrying the biggest guns.

PLAYING A HEAVY

Size does matter—let's just get that out of the way. Although not as common as a grounder, you fill a similar role and are the second most common found in the general military population.

You rarely walk into a situation with only one gun. Like those avatars in famous video games, you probably carry a few, more than most people think you need. Pistol? Check. Machine gun? Check. Flamethrower? Check. Rocket Launcher? Why not. You have a solution for any problem, at least those problems requiring weapons to solve...and in your eyes, most problems usually can be solved that way.

This is the best class of all since you wield the biggest guns, the heaviest armors, and are the class most resembling a character from a first person shooter.

CLASS FEATURES

As a heavy, you gain the following class features.

HIT POINTS

Hit Dice: 1d10 per heavy level

Hit Points at 1st level: 10 + your Constitution modifier

Hit Points at Higher Levels: 1d10 (or 6) + your Constitution modifier per heavy level after 1st

PROFICIENCIES

Armor: All armor, shields

Weapons: Simple weapons, one-handed and two-handed small arms, heavy weapons, super heavy weapons.

Tools: All ground vehicles and aircraft

Saving Throws: Strength, Constitution

Skills: Select two skills from Acrobatics, Athletics, History, Insight, Intimidation, and Perception

EQUIPMENT

You start with the following equipment in addition to the equipment granted by your background:

- any three small arms, each \$300 or less
- a set of armor \$300 or less
- \$100 in additional gear

Level	Proficiency Bonus	Special
1	+2	Artillery Talent (x4)
2	+2	Artillery Talent
3	+2	Archetype feature
4	+2	Ability Score Improvement
5	+3	Artillery Talent
6	+3	Too Close
7	+3	Archetype feature
8	+3	Ability Score Improvement
9	+4	Artillery Talent
10	+4	Strongpoint
11	+4	Archetype feature
12	+4	Ability Score Improvement
13	+5	Artillery Talent
14	+5	Strongpoint
15	+5	Archetype feature
16	+5	Ability Score Improvement
17	+6	Artillery Talent
18	+6	Archetype feature
19	+6	Ability Score Improvement
20	+6	Artillery Talent

ARTILLERY TALENT

At first level, you gain artillery talents. You gain four talents at first level. You gain an additional talent at 2nd, 5th, 9th, 13th, 17th and 20th level. Several talents can be selected multiple times, increasing their talent rank, though you cannot achieve more than rank 2 at 1st level.

Several talents require the use of a Dexterity saving throw. The DC to resist your attack is 8 + your attack ability modifier + your proficiency bonus + any weapon bonus.

Attack of Necessity

As an action, while you are wielding an auto or auto-heavy weapon, each creature in a 10-foot cone (or 15-foot for auto-heavy) centered on you must make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a successful one. You expend ammunition with each saving throw attempted.

Rank 2: The cone increases by 5 feet (15 and 20 feet respectively).

Rank 3: Targets your size or smaller are knocked prone if they fail their saves.

Rank 4: The cone increases by 5 feet (20 and 25 feet respectively).

Rapid Fire

As an action, while you are wielding an auto or auto-heavy weapon, each creature in a 10-foot cube (20-foot with auto-heavy) within weapon range must make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a

successful one. You expend ammunition with each saving throw attempted.

Rank 2: The cube's area increases by 10 feet (20 and 30 feet respectively).

Rank 3: All targets in the cube have their speed halved until the beginning of your next turn.

Rank 4: The cube's area increases by 10 feet (30 and 40 feet respectively).

Easy Target

When attacking a Large or larger creature with a weapon using the auto or auto-heavy property, you gain a bonus to damage against the target for every size above Medium the creature is. You gain this damage bonus with both autofire and area-effect attacks using auto and auto-heavy weapons.

Auto: Large +2, Huge +3, Gargantuan +4.

Auto-Heavy: Large +3, Huge +4, Gargantuan +5.

Rank 2: The damage bonus improves.

Auto: Large +3, Huge +4, Gargantuan +5.

Auto-Heavy: Large +4, Huge +5, Gargantuan +6.

Rank 3: The damage bonus improves.

Auto: Large +4, Huge +5, Gargantuan +6.

Auto-Heavy: Large +5, Huge +6, Gargantuan +7.

Rank 4: The damage bonus improves.

Auto: Large +5, Huge +6, Gargantuan +7.

Auto-Heavy: Large +6, Huge +7, Gargantuan +8.

Gaming Avatar

As an action, make a single autofire attack. If you hit, you impose one or more effects on the enemy depending on how much you beat the target's AC by (to a maximum of 5 for an auto weapon or 10 for an auto-heavy weapon). All effects are cumulative:

2 or more—The target is pushed 5 feet.

6 or more—The target is pushed 5 feet (10 total).

Rank 2: You gain two additional effects.

3 or more—The target has disadvantage on ranged attack rolls against you until the beginning of your next turn.

8 or more—The target has disadvantage on all ranged attack rolls until the beginning of your next turn.

Rank 3: You gain two additional effects.

5 or more—The target's speed is reduced to zero until the beginning of your next turn.

10—The target loses its action on its next turn. It still can take reactions and bonus actions.

Rank 4: You have advantage with this attack.

Imposing Frame

You can spend 30 feet of movement and gain a +1 bonus to AC and provide half cover for all allies within 5 feet until the beginning of your next turn. You also have advantage against being moved against your will until the beginning of your next turn.

Rank 2: Allies now gain three-quarters cover.

Rank 3: The bonus to AC increases to +2.

Rank 4: Imposing Frame now only costs 20 feet of movement.

Overwatch

You are able to target large areas in the battlefield and impede enemy advancement. While wielding an auto or auto-heavy weapon, spend 30 feet of movement on your turn and select a 10-foot cube (20-foot with auto-heavy) within your weapon's range. Until the beginning of your next turn, the area is considered difficult terrain to any enemy targets attempting to move through it. As a reaction, you can force an enemy that enters the area to make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a successful one. You expend ammunition with each saving throw attempted.

Rank 2: The cube's area increases by 10 feet (20 and 30 feet respectively).

Rank 3: *Overwatch* now costs only 20 feet of movement to use.

Rank 4: The cube's area increases by 10 feet (30 and 40 feet respectively).

Rank 5: You can use your action as well as spending movement with *Overwatch* and double its area of effect.

Rank 6: If you used *Overwatch* on your previous turn, you can continue sustaining it on this turn, costing only 10 feet of movement to do so. You cannot shift its location.

Precision Fire

When making a non-autofire attack, you can re-roll any damage die roll of 1 until the result is other than 1. If you roll the maximum result, add +1 damage.

Rank 2: If you score a critical hit, roll all damage dice twice and take the higher values.

Rank 3: If you roll the maximum result of a damage die, add +2 damage (instead of +1).

Rank 4: If you roll the maximum result of a damage die, instead of adding +2 damage, roll 1d6 instead (this die and any subsequent dice can also benefit from *precision fire*).

Shrapnel

When you hit a creature with a ranged attack using the auto or auto-heavy property, one creature within 5 feet of the first target (10 feet with auto-heavy) takes damage equal to your Dexterity or Strength modifier.

Rank 2: Increase the range by 10 feet (15 and 20 feet respectively).

Rank 3: Double the damage the second target suffers.

Sure-Footed

You treat heavy weapons as two-handed small arms for the purposes of attack penalties while moving. This does not apply to super heavy weapons.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and gain an additional artillery talent at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

TOO CLOSE

At 6th level, if you are hit by an opportunity attack, you can make a single melee attack, using your weapon as a club, as part of that same action.

STRONGPOINT

When you reach 10th level, you can take one additional action on your turn if both this and your normal action are used to employ artillery talents. When you use this

feature, you cannot use it again until you finish a short or long rest.

At 14th level, you gain one additional use of *Strongpoint* before you finish a short or long rest. You can also expend a Hit Die as a bonus action, not recover any hit points and gain an additional use of *Strongpoint*, though you cannot gain more than 1 additional action per turn.

INFILTRATOR

You go where no one else can, deep behind enemy lines, avoiding eyes, ears, and sensors. You're an intelligence operative with specialties in counter-terrorism, espionage, and assassination. Your strengths lie in your ability to avoid either capture or the crosshairs of enemy weapons. After making a killing blow, you're able to break off and vanish into the shadows. Even your kills can go without notice.

You don't consider yourself a thief. You're an elite operative, often working alone well ahead of allies and their noisy footfalls. Your expertise is vital as you relay important information back to your superiors and dispatch dangerous foes before they get the opportunity to be a threat.

PLAYING AN INFILTRATOR

The key to success for an infiltrator is the need to gain advantage to your foe. Infiltrators are able to gain additional benefits from cover and concealment, and can even create diversions in order to slip away without notice. This permits you to maneuver into positions to gain advantage while others would be instantly spotted. You're near worthless when exposed.

CLASS FEATURES

As an infiltrator, you gain the following class features.

HIT POINTS

Hit Dice: 1d8 per infiltrator level

Hit Points at 1st level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 5) + your Constitution modifier per infiltrator level after 1st

Level	Proficiency Bonus	Special
1	+2	Reliable Training, Leet, Intended Target
2	+2	Pacification
3	+2	Archetype feature
4	+2	Ability Score Improvement
5	+3	Ghost
6	+3	Efficient Killer
7	+3	Archetype feature
8	+3	Ability Score Improvement
9	+4	Most Dangerous Prey
10	+4	Crippling Effect
11	+4	Archetype feature
12	+4	Ability Score Improvement
13	+5	Efficient Killer
14	+5	Ability Score Improvement
15	+5	Archetype feature
16	+5	Ability Score Improvement
17	+6	Enhanced Camouflage
18	+6	Archetype feature
19	+6	Ability Score Improvement
20	+6	System Shock

PROFICIENCIES

Armor: Light armor

Weapons: Simple weapons, one-handed small arms, any two melee martial weapons of your choice

Tools: Disguise kit or Poisoner's Kit (select one)

Saving Throws: Dexterity, Wisdom

Skills: Stealth plus three from Acrobatics, Athletics, Deception, Computer Use, Engineering, History, Insight, Intimidation, Perception, Persuasion, Sleight of Hand, and Vehicle Operation.

EQUIPMENT

You start with the following equipment in addition to the equipment granted by your background:

- a one-handed small arm worth \$300 or less
- a one-handed melee weapon worth \$50 or less
- a set of TL0 synthetic weave or TL0 ballistics armor
- \$100 in additional gear

PROCEDURAL MEMORY

You have acquired a very particular set of skills over a very long career. Said skills are essential to be steadfast in your craft, and should never be up to chance. Starting at 1st level, you can re-roll undesirable d20 results you make. You gain as many uses of procedural memory as your Wisdom modifier + your proficiency bonus. You recover spent uses after you finish a short or long rest.

You can re-roll as many times as you wish in response to a bad roll until you accept a result or run out of uses of *procedural memory*.

When you use procedural memory, that roll (whether it be a skill check, ability check, saving throw, or attack roll) is also counted as having advantage. You cannot use *procedural memory* if you have disadvantage. If you already have advantage, you still only get to re-roll one die result.

LEET

Starting at 1st level, anytime you have advantage on an attack roll, the target of your attack has disadvantage on attack rolls against you until the beginning of your next turn.

INTENDED TARGET

Starting at 1st level, you are able to dispatch enemies with extreme prejudice. Once per turn, if you hit on an attack you have advantage with, you can turn that attack into a critical hit. The target must be within 20 feet of you.

PACIFICATION

Starting at 2nd level, you can concentrate all your energy into ensuring a clean kill, even to the risk of your own personal safety. Instead of using your Hit Dice to recover hit points, you can expend them during an action to turn an unfavorable attack roll to a natural 20. This attack roll is counted as having advantage.

ARCHETYPE

At 3rd level, you choose an archetype from the archetype chapter. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Additionally, you can forego your archetype selection at 3rd level and gain an additional use of procedural memory.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

GHOST

Starting at 5th level, you have advantage on initiative. If you act first after rolling initiative, you have two actions on your first turn instead of one, and have advantage on attack rolls until the end of that turn.

MOST DANGEROUS PREY

At 9th level, if using a one-handed small arm or melee weapon, you improve the damage of the weapon by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12) when benefitting from cover, when attacking a surprised target, or if your attack roll had advantage.

CRIPPLING EFFECT

Starting at 10th level, with one-handed melee weapons and one-handed small arms, you score a critical hit on a roll of 19 or 20.

EFFICIENT KILLER

Once you have located your target, under no circumstances can it be allowed to survive. Alas, occasionally a single strike isn't enough, and you are forced to act more brutally. At 6th level, if you hit your target with a melee weapon or a ranged weapon at 20 feet or closer, you can repeat the same attack against the same target as part of the same action. This attack is counted separately from the previous, so any benefits do not carry over. If the additional attack hits, you can make a third attack as part of the same action.

At 13th level, *Efficient Killer* improves, and you can make up to five additional attacks on the same target as part of the same action as long as each previous attack hits.

ENHANCED CAMOUFLAGE

Starting at 17th level, when benefitting from half cover, it is treated as three-quarters cover. When benefitting from three-quarters cover, it is treated as total cover.

SYSTEM SHOCK

Starting at 20th level, you can inflict a crippling injury on an opponent. After scoring a critical hit on a creature, the target is also stunned until the end of your next turn. When you use this feature, you cannot use it again until you finish a short or long rest.

MARSHAL

As a marshal, you often begin your career in the same way as rank-and-file soldiers, but move into a command position either by accident in the field when the former commanding officer falls to enemy attack, or more often by taking classes on how to be someone responsible for a team. Perhaps you have a natural talent for leadership despite being a soldier like the rest.

You have the same battle training as a front-line fighter, can use all the same weapons, but generally will favor lighter arms and armor for greater maneuverability, flexibility and visibility to the team. In a pinch, the ability to convey orders with hand signals and facial expressions may mean life or death. A marshal must also be persuasive, and above all, brave, for nobody is going to risk life or limb for a coward.

You are considered the leader in most parties. It will be assumed by outsiders, even if the assumption is inaccurate. You coordinate other members of the party, plots out strategies before a battle, and alters them tactically as the need arrives.

PLAYING A MARSHAL

Your personality will greatly affect your decision whether or not to select a marshal class, and if so, how you play one. A marshal is generally assumed to lead a party, so if you are not, the question is why. You, not just your marshal character, have to exhibit at least some compelling traits, a reason why those under your command would continue to follow you. In strict military channels, discipline can be enforced. Regardless, the other players should want to follow your instructions. You should know what you are talking about.

So when creating a marshal, be aware that at points during the game, other players will be consulting you, asking for instructions, and seeking advice. If the sniper is in charge of the group instead of you, the GM may inquire as to the reason. This is not saying that the most charismatic personality in the party must select the marshal class, but some justification should be established as to why the marshal is not commanding the party.

Perhaps you are an introverted genius—able to enact brilliant tactical decisions when required but unable to carry a casual conversation. You must acknowledge your capacity as a person when selecting the marshal. Don't assume the GM will hand you the reigns of a party just because you select this class.

CLASS FEATURES

As a marshal, you gain the following class features.

HIT POINTS

Hit Dice: 1d8 per marshal level

Hit Points at 1st level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 5) + your Constitution modifier per marshal level after 1st.

PROFICIENCIES

Armor: Light armor, medium armor

Weapons: Simple weapons, one-handed and two-handed small arms, heavy weapons

Tools: All ground vehicles and aircraft

Saving Throws: Intelligence, Charisma

Skills: Select four skills from Computer Use, History, Investigation, Insight, Medicine, Perception, Survival, Deception, Intimidation, and Persuasion

EQUIPMENT

As a marshal, you receive the following equipment at 1st level.

- two small arms, worth \$300 or less
- a set of armor \$300 or less
- \$200 in additional gear

COMMAND PRESENCE

Starting at 1st level, your words and actions generate a presence that can motivate or generally boost those you deem your allies. Each command presence can also be temporarily boosted, after which you cannot boost it again until you finish a long rest. Unless otherwise stated, you gain no benefit from your own command presence.

At 2nd level, and again at 6th, 10th, 14th, and 18th level, you can either select another command presence or increase the potential of a presence you already possess.

Level	Proficiency Bonus	Command Presence	Team Power	Special
1	+2	1	1	Command Presence, Team Powers, Team Presence, For the Good of the Team
2	+2	2	1	—
3	+2	2	1	Archetype feature
4	+2	2	1	Ability Score Improvement
5	+3	2	2	—
6	+3	3	2	Double Tap
7	+3	3	2	Archetype feature
8	+3	3	2	Ability Score Improvement
9	+4	3	3	Triple Tap
10	+4	4	3	—
11	+4	4	3	Archetype feature
12	+4	4	3	Ability Score Improvement
13	+5	4	4	—
14	+5	5	4	Quadruple Tap
15	+5	5	4	Archetype feature
16	+5	5	4	Ability Score Improvement
17	+6	5	5	—
18	+6	6	5	Archetype feature
19	+6	6	5	Ability Score Improvement
20	+6	6	5	Manifestation of Greatness

By Example

You don't keep back and order from a distance; you stand shoulder to shoulder with those you lead. Allies that can see and hear you have advantage on Constitution, Wisdom and Charisma saving throws.

Exemplary Example (boost): As an action, for the next minute (10 rounds), all allies gain a +1 bonus to AC.

Tier 2: Allies also gain advantage on Intelligence and Strength saving throws as well; the bonus from *exemplary example* increases to +2.

FIELD ADVICE

Using only your words, you call your comrades back from the most harmful of afflictions. Allies that can see and hear you double any effect that removes fatigue. Finishing a long rest reduces an ally's fatigue level by 2, provided that the ally has also ingested some food and drink.

Profound Advice (boost): Use an action to give a rousing speech, and all allies that can see and hear you suppress all effects of fatigue for one hour.

Tier 2: You gain a number of Hit Dice equal to your level that you can distribute to allies that can see and hear you when you and they finish a long rest. These additional Hit Dice must be used immediately or are lost. Additionally, when you use *profound advice*, each ally recovers hit points equal to a quarter of your current hit points.

INTIMIDATING MUG

Opponents take one look at you and begin to rethink their approach. All enemies within 10 feet of you treat the area as difficult terrain.

Menacing Mug (boost): As an action, you double the range of *intimidating mug* for one minute (10 rounds).

Tier 2: Increase the range to 20 feet, and you can use *menacing mug* twice before needing to finish a long rest.

Mask Of Authority

Your friends believe themselves better knowing you are around. All allies that can see and hear you can re-roll all 1s on their damage rolls.

Personification of Authority (boost): Use an action, and for one minute (10 rounds), all allies that can see and hear you gain a +2 bonus to damage rolls.

Tier 2: Allies re-roll all 1s and 2s on damage rolls; *personification of authority* improves to a +3 bonus to damage rolls.

Stand As One

As long as you stand, no one falls. All allies that can see and hear you reduce all damage inflicted on them by 1 (3 at 10th level).

Brotherhood (boost): As an action, you advise your allies on the best way to avoid damage. Select an energy type (acid, cold, fire, force, lightning, necrotic, poison, psychic, radiant, or thunder)—for one minute (10 rounds), all allies that can see you gain resistance to that energy type.

Tier 2: All allies in range reduce all damage inflicted on them by 2 (6 at 10th level).

Strategic Precision

You lead the attack, drawing allied fire to your target. If you hit a creature, pick one ally that can see or hear you—the targeted ally gains a +2 bonus to her next attack roll.

Strategic Superiority (boost): As an action, you convey an attack plan—for one minute (10 rounds), all allies that can see and hear you gain a +1 bonus to attack rolls against the last target you hit until the beginning of your next turn. Your selected ally still only gains a +2 bonus.

Tier 2: Instead of a +2 bonus, the selected ally gains advantage.

FOR THE GOOD OF THE TEAM

Starting at 1st level, as an action, you can allow one ally within line of sight to take any action normally available to her as a reaction to you or as an additional action on her next turn. Additionally, you can swap your initiative order with another ally once per round.

Basically, the marshal has two options. 1: He or she selects an ally—said ally takes an action as a reaction to the marshal selecting them. OR 2: The ally gains a second action on their next turn.

TEAM POWER

Starting at 1st level, and every fourth level after, you can select one *team power*. Several powers are only available to choose after level 5.

Autocratic

If an ally suffers a critical hit from a creature, you can use your reaction to give another ally a single attack against the creature that inflicted the critical hit.

Big Picture

As an action, select one ally able to see and hear you. If the ally hits with an attack before the beginning of your next turn, that hit gains a damage bonus equal to your Wisdom modifier + your level.

Boar's Head

Spend 10 feet of movement to give an ally a 5-foot bonus to her speed until the beginning of your next turn. You can use *boar's head* multiple times on your turn, but each ally cannot gain more than 5 feet of movement this way.

Control The Battle Theatre

When rolling for initiative, you and each ally that can see or hear you has advantage on his or her initiative roll.

Face Slap

(Level 5)

Use an action to wake up one adjacent unconscious creature. If the target was unconscious from being reduced to fewer than 0 hit points, she is healed to 1 hit point. When you use this feature, you cannot use it again until you finish a long rest.

Focus Target

(Level 5)

As a bonus action, you can grant an ally within 5 feet of you a single ranged attack against the same creature you hit with a ranged attack this same turn.

Improvisation Is The Best Plan

Use a bonus action to gain 1 additional reaction before the beginning of your next turn.

Mark Of The Puppeteer

Any time an ally hits with an attack, you can use a reaction to shove that creature 5 feet as long as the target is not moved into hazardous terrain (like fire or a pit).

No One Hits The Chief

(Level 5)

If a creature hits you with a critical hit, all allies that can see or hear you have advantage on attack rolls until the beginning of your next turn against the creature that scored the hit.

Pat On The Back

When the party takes a short rest, you can award any of your Hit Dice to an ally. Allies cannot have more Hit Dice than their level.

Plan of Attack

You can spend 10 feet of movement to move another ally 5 feet. This movement does not provoke opportunity attacks.

Pure Leader

If you hit an enemy with a ranged attack, you can inflict half damage and one ally can disengage from the same enemy and move up to half his speed.

Quick Patch

You can use your action to administer aid to an ally—the target regains a number of hit points equal to 1d6 / your level. When you use this feature, you cannot use it again until you take a short or long rest.

You can select this trait multiple times, increasing the damage cured by 1d6 each time and gaining an additional use of quick patch between long rests.

Reading Body Language

You have advantage on Wisdom (Insight), Wisdom (Survival), Charisma (Deception), Charisma (Intimidation), Charisma (Performance), or Charisma (Persuasion) checks (select one). You can select this trait multiple times, selecting a different skill each time.

Snap Out Of It

If an ally within 5 feet of you is charmed, frightened, or stunned, you can use your reaction to inflict 2d4 damage on that ally and remove the effect.

Unnecessary Abuse

(Level 5)

If an ally within 5 feet of you misses on an attack roll, you can use your reaction to inflict 1d4 damage on that ally and have them re-roll.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and select an additional team power at each of the above levels.

ABILITY SCORE

IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

DOUBLE/TRIPLE/ QUADRUPLE TAP

Starting at 6th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. This increases to three attacks at 9th level in this class and four attacks at 14th level in this class.

MANIFESTATION OF GREATNESS

Starting at 20th level, you gain a pool of 1d4 natural 20s when you finish a long rest, which you can use to replace any ally's d20 roll as a reaction.

MARTIAL ARTIST

The martial artist is specialized in the application of a craft that some people consider primitive. Despite any ranged combat skills you may possess, you prefer to make things personal. You have practiced day and night in the perfection of your craft. There may be countless reasons why you prefer close combat over firearms, but the primary one is usually self-empowerment.

As a martial artist, your strength relies on your lethality in every situation. You require no augmentation, no steel or explosives to articulate your skill. The martial artist's weapons cannot be removed. There is no scanner or sensor to identify one as a threat. You can suppress opponents without causing harm; remove a threat without making a sound. Firearms are a final, violent solution and most times a restrained hand is needed.

PLAYING A MARTIAL ARTIST

As a martial artist, you are a non-magical alternative to the more clichéd official monk. You follow similar ideas, but there is less an emphasis on up magical effects in exchange for attacks that blur the lines. There is also a reduction on the spiritual and religious allusions. Everything that defines a martial artist is a talent that could have been taught in either a lifetime in a monastery or weeknights at the gym.

Your origin as a martial artist is partially based on your skills, feats, and archetype (if you choose to follow one). It is very possible that you have never held a firearm in your life, and such a proficiency can be ignored.

And you know kung-fu.

The playing of a martial artist relies on the stringing of subsequent hits, called a combo-string. There is a risk-reward system in place, where carrying a longer string of successful hits can allow a more powerful finishing move. All other class features aid in this combat style.

CLASS FEATURES

As a martial artist, you gain the following class features.

HIT POINTS

Hit Dice: 1d10 per martial artist level

Hit Points at 1st level: 10 + your Constitution modifier

Hit Points at Higher Levels: 1d10 (or 6) + your Constitution modifier per martial artist level after 1st

PROFICIENCIES

Armor: Light armor

Weapons: All simple melee weapons, all one-handed small arms, and select four martial melee weapons.

Tools: All ground vehicles and aircraft

Saving Throws: Strength, Dexterity

Skills: Select three skills from Acrobatics, Animal Handling, Athletics, History, Insight, Intimidation, Perception, and Survival

This class revolves around building up successive hits in order to activate extremely powerful finishing moves—players are invited to be creative in how they move and strike opponents.

EQUIPMENT

You start with the following equipment in addition to the equipment granted by your background:

- a simple melee weapon for close encounters
- a one-handed small arm \$300 or less
- a set of armor \$300 or less
- \$100 in additional gear

FIGHTING FORM

At 1st level, select either Dexterity or Strength as your ability for attack and damage rolls.

Dexterity

If you use Dexterity as your attack/damage ability, you gain the following abilities:

- When reaching combo-chain tier 2, you gain a +1 bonus to melee attack rolls.
- You add half your Dexterity modifier (round down) to your normal Dexterity modifier when determining your AC with light armor (effectively x1.5 your modifier to AC—a +4 Dex bonus becomes a +6).
- You can use Dexterity (Acrobatics) instead of Strength (Athletics) to make or sustain grapple checks.

Strength

If you use Strength as your attack/damage ability, you gain the following abilities:

- You can re-roll any damage die roll of 1 until the result is other than 1. If you roll the maximum result, add +1 damage.
- You gain proficiency with all medium and heavy armor.
- You have advantage when attempting to shove a target. A shoved creature is pushed 10 feet away instead of 5 feet.

COMBO CHAIN

Starting at 1st level, you gain the ability to string fighting maneuvers together in order to unleash more powerful attacks. You always begin a battle on tier 1, inflicting 1d6 damage with unarmed attacks.

After you hit an enemy and inflict damage, you escalate to the next tier, where your damage dice increases for the next attack. Alternately, on tiers 2, 3, 4, or 5, after hitting a target, you can perform a finishing move. If you don't perform a finishing move, the combo chain can continue, escalating to the next tier (if there is one). When you perform a finishing move, miss on an attack roll, or fail to make an attack before the end of your next turn, you restart the combo chain at tier 1.

You must decide to perform a finishing move after a successful attack, and on the same turn as one. When you reach the maximum tier allowed by your level, you can sustain the chain and your damage dice for as long as possible, but remember, the chain ends—reducing you back to tier 1—if you miss on an attack roll or don't make one until the end of your next turn.

At 1st level, you can only string a combo chain to tier 3. This increases to tier 4 at 9th level, and tier 5 at 13th level.

Note: You can use melee weapons with combo chain but utilize the table's damage die instead of the weapon's. If you have an ability which increases the damage of your unarmed attack, your damage dice may change, but your tier does not.

Level	Proficiency Bonus	Martial Exploits	Special
1	+2	1	Fighting Form, Combo Chain, Martial Exploit
2	+2	2	—
3	+2	2	Archetype feature
4	+2	2	Ability Score Improvement
5	+3	3	—
6	+3	3	Extra Attack
7	+3	3	Archetype feature
8	+3	4	Ability Score Improvement
9	+4	4	Combo Chain
10	+4	4	Extra Attack
11	+4	5	Archetype feature
12	+4	5	Ability Score Improvement
13	+5	5	Combo Chain
14	+5	6	—
15	+5	6	Archetype feature
16	+5	6	Ability Score Improvement
17	+6	7	—
18	+6	7	Archetype feature
19	+6	7	Ability Score Improvement
20	+6	8	Extra Attack

Tier	Unarmed Damage	Finishing Moves
1	1d6	None
2	1d8	Bone Breaker, Circular Attack, Ground & Pound, Surging Punch
3	1d10	Counter, Soul Fist, Spinning Attack, Ranbu
4	1d12	The Zone, Touch of Death, Drop Hammer, Xian
5	2d6	Ultra, Falcon Punch, Sun-Goku-Satsu, Limit Break

TIER 2 FINISHING MOVES

Bone Breaker: You exert pressure on a limb and hear a crack. Double both your damage dice and ability modifier to your last hit

Circular Attack: You spin your leg around to catch another opponent. After resolving damage for your last hit, make a single additional melee attack (at the same tier) against one other creature in reach (different than the one that escalated the combo chain) as part of the same action as the last hit. If you score a hit, you gain an additional identical attack this turn against a new creature different than the first and second.

Ground & Pound: After resolving damage for your last hit, you use your agility and strength to knock the target prone (the creature must be your size or smaller). You can then either use a Disengage action or have advantage on your next attack against the target.

Surging Punch: You channel your willpower, focus your energy, and let out a roar. After resolving damage for your last hit, the target is pushed 5 feet and has disadvantage on skill checks and attack rolls against you until the end of its next turn (the creature must be your size or smaller).

TIER 3 FINISHING MOVES

Counter: You assume a defensive stance. After resolving damage for your last hit, you gain a +2 bonus to AC for one minute (ten rounds) or until you move. If a creature hits you, you can use a reaction to make a melee attack against the triggering enemy.

Soul Fist: Your enemy doesn't know it yet, but it's about to have a real bad day. After resolving your last hit, you can disengage from the target. Additionally, the target you hit last hit suffers additional damage equal to your attack ability score at the beginning of its next turn.

Spinning Attack: Like a hurricane, either you spin in the air or your enemy does—either way, someone's getting hurt. After resolving damage for your last hit, make a melee attack at this tier to each enemy within ten feet of you. If you miss, the creature still suffers your ability modifier damage; if hit, the target is knocked prone.

Ranbu: Double your last hit's regular damage dice, and make additional melee attacks at this tier against the same creature until you miss twice or hit four times.

TIER 4 FINISHING MOVES

The Zone: After resolving damage for your last hit, your damage die remains at this tier regardless of your combo chain tier for one minute (ten rounds).

Touch of Death: After resolving damage for your last hit, until the target is killed or five minutes have passed, the target's speed is halved and it takes damage equal to half your level at the beginning of its turn. This damage value does not increase if you inflict this finisher on the same target more than once.

Drop Hammer: If you are grabbing the last creature you hit (it must be your size or smaller), after resolving damage, you maneuver yourself to force your enemy into the ground. Make a Strength (Athletics) check with advantage and leap into the air. You inflict additional damage equal to your roll as you crash back down, possibly creating an impact crater, with cracks in the ground.

Xian: You achieve perfect clarity for a short while. After resolving damage for your last hit, all enemies in reach are pushed ten feet. You cannot be shoved and are resistant to all damage types for one minute (ten rounds).

TIER 5 FINISHING MOVES

Spirit Bomb: One incredible strike—triple your attribute damage to your last hit, and the creature is incapacitated for five minutes or until the target suffers damage.

Falcon Punch: Your last attack is a critical hit, you inflict max damage, and a creature your size or smaller is shoved 30 feet. If the target hits an obstruction, it suffers additional damage equal to the remaining distance. The target may still pass through the obstruction.

Shun-Goku-Satsu: You perform an incredibly powerful sequence of attacks. After resolving damage for your last hit, make eight additional melee attacks against any number of enemies within ten feet of you (each target can only be attacked a maximum of three

times). Additionally, all attacks on you miss until the beginning of your next turn.

Limit Break: You're about to drop, but you know you cannot afford to lose. After resolving damage for your last hit, you inflict additional damage equal to the hit points you are currently down from your total (maximum 50 hit points).

MARTIAL EXPLOIT

At 1st you can select one martial exploit from the list below. You gain additional exploits at 2nd level, 5th level, 8th level, and 11th level, 14th level, 17th level, and 20th level.

C-C-C-Combo Breaker

If the same creature in a single round hits you twice a single turn, you can perform a single melee attack against that creature as a reaction. If you hit, the target's turn ends.

Calisthenics

You gain a +2 damage bonus to melee damage rolls. You can select this exploit a second time and increase the damage bonus to +4, and select it a third time and increase the damage bonus to +6.

Gun-Something-Something

You treat one-handed small arms as melee weapons when attacking targets at 5 feet or closer.

Maintain Chain

Instead of using your Hit Dice to recover hit points during a short rest, you can expend them to prevent a break in your combo chain. If you miss (but don't roll a natural 1), spend a Hit Die as part of your attack to turn that miss into a non-critical hit. There is no limit of how many Hit Dice you can expend this way per turn.

Marker

When you hit an enemy that is in reach of you with a melee attack, it has disadvantage on any attacks that don't include you as a target until the end of your next turn. The effect ends if you are reduced to 0 hit points, you move out of reach of that enemy, but not if the enemy moves out of reach of you.

Newaza

You are a master at ground fighting. You gain the following benefits:

- If a creature breaks from your grapple, you can use your reaction to attempt a grapple check on the same target.
- You have a +2 bonus to AC against any creature you are grappling.
- You do not have disadvantage on melee attacks while prone. Enemies do not have advantage on you with non-reach melee attacks if you are prone.

Pound For Pound

You are a superior fighter in all respects. You gain the following benefits:

- If a creature moves away from you, even with the disengage action, you can use your reaction to move up to your speed with it.

Redirection Of Energy

When an enemy scores a critical hit on you with a melee attack, you gain temporary hit points equal to the amount of damage dealt. When you use this exploit, you cannot use it again until you finish a long rest.

Additionally, any time a creature scores a critical hit on you with a melee attack, you have advantage on melee attacks against that creature until the end of your next turn.

Rhythm String

After performing a finishing move, the tier of said finishing move is a bonus you receive on your next melee attack at tier 1 (for example, if you perform a tier 5 finishing move, your next attack at tier 1 receives a +5 bonus).

Tag Team

If an ally hits an enemy within 5-feet of you with a melee attack, you can deal additional damage to that hit equal to your Strength or Dexterity modifier as a reaction. This does not count towards your combo-chain.

Ultra

After hitting a creature, increase your combo chain tier by one and perform a finishing move. You must have access to the higher tier, and after using ultra, you can't use it again until you finish a long rest.

Unarmed Expanded Profile

Spend 30 feet of movement, and your unarmed attacks have reach until the beginning of your next turn. If you use this exploit, you cannot voluntarily move until the beginning of your next turn.

Vicious Hook

Prerequisite: 10th Level

Your melee attacks score a critical hit on a natural roll of 19 or 20.

Wrestler

You're a classic brawler. You gain the following benefits:

- If you are grappling a target, you have half cover from attacks from other targets. Additionally, any attack that misses you by 5 or less hits your grappled target instead.
- When moving a grabbed creature your size or smaller, your speed is not reduced.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and gain an additional martial exploit at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

EXTRA ATTACK

Beginning at 5th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. The number of attacks increases to three when you reach 10th level in this class and to four when you reach 20th level in this class.

MEDIC

The medic's job is to keep people alive, usually after they've been shot, stabbed, trampled, gored, poisoned, infected with a unknown disease, or some combination of the above. For those operating in the field, this requires an extensive knowledge of biology, chemistry, and pharmacology.

As a medic, you are not some faith healer or medicine man. You don't rattle chicken bones or blow moon dust over open wounds. You don't ignore the basics of your profession—splints and braces—but you also don't ignore the benefits of the scientific process and the by-products of thousands of years of trial and error. These are modern practitioners of an evolving and every advancing science.

That still being said, this medic is not a doctor that punches a clock and flirts with nurses. This one risks life and limb in order to save the lives of others. Flirting with nurses is still an option, however.

PLAYING A MEDIC

You're a vital member of any group where the lives of its members are at risk, where intelligence in tight situations are required. You are also scientist, a side-effect of being a doctor.

Your class is defined by medical applications that can be used at all times, and with spell-like medical exploits themselves available with limited uses. You have access to combat skills, but these are entirely optional. You can flee in the face of violence, preferring to using one's mind to conquer problems, or you can stand side-by-side with allies in their encounters with opponents.

This is not a variation on the fantasy cleric where you can channel your faith through medieval melee weapons. You have no smiting abilities—medical exploits rarely assist in you in combat outside of hit avoidance. This is a support class. You can occasionally improve the effectiveness of allies, and even cripple your enemy under specific conditions, but damage output is not your speciality.

CLASS FEATURES

As a medic, you gain the following class features.

HIT POINTS

Hit Dice: 1d6 per medic level

Hit Points at 1st level: 6 + your Constitution modifier

Hit Points at Higher Levels: 1d6 (or 4) + your Constitution modifier per medic level after 1st

PROFICIENCIES

Armor: Light armor

Weapons: Simple weapons, one-handed small arms

Tools: Poisoner's kit

Saving Throws: Intelligence, Wisdom

Skills: Medicine; select six skills from Computer Use, Deception, Demolitions, Engineering, History, Insight, Investigation, Nature, Perception, Persuasion, and Sciences

EQUIPMENT

As a medic, you receive the following equipment at 1st level.

- a one small arm \$300 or less.
- a medical kit and a drug kit.
- a set of armor \$300 or less.
- \$200 in additional non-military gear (no weapons, weapon-accessories, bullets, or armor)

MEDICAL EXPLOITS

As a medic, you gain exploits you can use to aid allies or hinder enemies. Mechanically, these are identical to spells. Exploits require both the use of your hands and appropriate materials to perform. Unlike spells, medical exploits require neither contemplation nor studying each morning; you regain the use of them each day automatically. You do not need to choose which exploits to prepare ahead of time: you can employ any exploit on the list of a level that you can use.

At 1st level, you also know two medical applications of your choice from the medical application list. These are at-will abilities you can use as long as you have the requisite materials and action to perform them. You learn additional applications of your choice at higher levels, as shown in the medical applications column of the medic table.

The medic table shows how many slots you have to use your exploits of 1st level and higher. To enact one of these exploits, you must expend a slot of the exploit's level or higher. You regain all expended exploit slots when you finish a long rest.

When you become a medic, select either your Wisdom or Intelligence as your medic ability. It is used when setting the saving throw DC for a medical application you use and when making an attack roll with one. If selecting Intelligence, the Wisdom (Medicine) skill can be replaced with Intelligence (Medicine).

Exploit save DC = 8 + your proficiency bonus + your Wisdom or Intelligence modifier

Exploit attack modifier = your proficiency bonus + your Wisdom or Intelligence modifier

Kits

Many exploits and applications require the use of either a medical kit or a drug kit. A medical kit has enough supplies for 50 actions, while the drug kit has enough for 10 actions. This is regardless of how many targets are affected by said action.

TARGET AVOIDANCE

Starting at 1st level, as a bonus action, you can take a Dash action. At 2nd level, as a bonus action, you can instead take a Disengage action.

PRIMARY TARGET

Starting at 1st level, if you don't make an Attack action on your turn, you gain a +2 bonus to AC until the start of your next turn. At 5th level, this bonus increases to +3.

Level	Proficiency Bonus	Special	Medical Applications	1st	2nd	3rd	4th
1	+2	Medical Exploits, Target Avoidance, Primary Target	2	2	—	—	—
2	+2	Target Avoidance	2	3	—	—	—
3	+2	Archetype feature	2	3	—	—	—
4	+2	Ability Score Improvement	2	3	—	—	—
5	+3	Primary Target	3	4	1	—	—
6	+3	Fight or Flight	3	4	2	—	—
7	+3	Archetype feature	3	4	2	—	—
8	+3	Ability Score Improvement	3	4	3	—	—
9	+4	Fight or Flight	4	4	3	1	—
10	+4	Intelligent Resistance	4	4	3	2	—
11	+4	Archetype feature	4	4	3	2	—
12	+4	Ability Score Improvement	4	4	3	3	—
13	+5	Risk An Aneurysm	5	4	4	3	1
14	+5	Fight or Flight	5	4	4	3	2
15	+5	Archetype feature	5	4	4	3	2
16	+5	Ability Score Improvement	5	4	4	3	3
17	+6	Expanded Knowledge	6	4	4	4	3
18	+6	Archetype feature	6	4	4	4	3
19	+6	Ability Score Improvement	6	4	4	4	3
20	+6	Good Thing You Have Friends	6	4	4	4	3

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and gain one additional medical application at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

FIGHT OR FLIGHT

Starting at 6th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. This increases to three attacks at 9th level in this class and four attacks at 14th level in this class. Additionally, if you make an Attack action, for each attack roll you don't make, you gain a +1 bonus to AC until the beginning of your next turn.

INTELLIGENT RESISTANCE

Starting at 10th level, double your proficiency bonus with all Intelligence and Wisdom saving throws.

RISK AN ANEURYSM

Starting at 13th level, instead of using your Hit Dice to recover hit points during a short rest, you can expend them on your turn to recover a medical exploit of any level you can use. You must employ that exploit within 1 minute or it is lost. You regain one level of exploit slot for each Hit Die sacrificed, but you can only recover one slot per turn. For example, if you spend 4 Hit Dice, you can recover a 4th-level slot.

EXPANDED KNOWLEDGE

At 17th level, select two more skills from your class list to have proficiency in.

GOOD THING YOU HAVE FRIENDS

At 20th level, you gain the ability to use allies for cover. For each ally within 5 feet of you, you can increase the level of cover you have: One ally—half cover; two allies—three-quarters cover; three allies—full cover. If you are still hit with an attack, you can transfer all damage to any single adjacent ally regardless if the original attack roll can hit the ally or not. If the attack targets you and the ally, the ally takes both damage values, taking your damage second. The ally does not have to be willing.

MEDICAL APPLICATIONS

Defilade

Activation Time: 1 reaction

Range: Self

Components: None

Duration: Instantaneous

If a creature scores a critical hit against you, each ally that can see both you and the triggering enemy has advantage on attack rolls against the target until the start of its next turn.

Diagnose And Cure

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Until employed or 1 minute

You use your Medical kit on a willing creature. The target gains a bonus on its next Constitution, Strength, Wisdom, or Intelligence saving throw equal to your proficiency bonus.

Do Science To It

Activation Time: 1 bonus action

Range: Self

Components: None

Duration: Instantaneous

Before attempting a Wisdom (Medicine) or Intelligence (Sciences) check, double your proficiency bonus with the roll.

Evasive Overdrive

Activation Time: 1 bonus action

Range: Self

Components: None

Duration: 1 round

You're able to do everything in your power to avoid getting hit. You gain a +1 bonus to AC against one creature you can see, and you don't provoke opportunity attacks from the target until the beginning of your next turn.

Field Shot

Activation Time: No action

Range: Self

Components: Firearm

Duration: Instantaneous

If you use a medical exploit as your action, you can make a single ranged attack as your bonus action this same turn. You only inflict half damage on a hit with this attack.

Imperative Escape

Activation Time: 1 reaction

Range: Self

Components: None

Duration: Instantaneous

If you are below half hit points and an attacker that you can see hits you with an attack, you can use your reaction to halve the attack's damage against you.

Live, Damn You

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Instantaneous

You use your Medical kit on a willing creature. If the target has been reduced to 0 hit points, the target becomes stable. If above 0 hit points, the target recovers hit points equal to your proficiency bonus + 1d6. This increases to 2d6 at 10th level.

Medical Expertise

Activation Time: 1 reaction

Range: One ally that can hear you.

Components: None

Duration: Instantaneous

You are able to aid allies in pinpointing weak spots in enemies based on your own medical knowledge. You can add your Intelligence or Wisdom modifier as extra damage to a successful attack made by an ally that can hear you.

Medical Knowledge

Activation Time: 1 bonus action

Range: Self

Components: Firearm

Duration: Instantaneous

Use after hitting a target with a firearm. Make an exploit attack against the same target. On a hit, the target has disadvantage on attack rolls until the beginning of your next turn.

Modern Master

Activation Time: 1 bonus action

Range: Self

Components: Medical kit

Duration: Instantaneous

Use after attempting an exploit that recovers a target's hit points. The target recovers 1d4 additional hit points. This increases to 2d4 at 10th level.

Outthink & Outwit

Activation Time: 1 action

Range: 30 feet

Components: None

Duration: Instantaneous

You are able to quickly ascertain your enemy's eye movements and body language and determine the best course of action. Make a ranged attack against the target. You can use Intelligence or Wisdom instead of Dexterity as your modifier for attack and damage.

Weak Spot

Activation Time: 1 bonus action

Range: Self

Components: None

Duration: Instantaneous

Use after you score a hit. The target's speed is reduced by half until the beginning of your next turn.

1st LEVEL EXPLOITS

Anatomy Expert

Activation Time: 1 bonus action

Range: Self

Components: Firearm

Duration: Instantaneous

Target one creature you scored a critical hit on this turn—double the amount of dice rolled for damage.

Clamp The Artery

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Instantaneous

Target one living creature. The target is healed of any damage incurred by the last hit it received since the end of your previous turn.

Cortical Reinforcement Injection

Activation Time: 1 action

Range: Touch

Components: Drug kit

Duration: 24 hours

Target one living creature. The target is immune to being blinded.

Advanced: At 10th level, you can target two creatures, though each one requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

Diagnose And Cure

Activation Time: 1 minute

Range: Touch

Components: Medical kit

Duration: 24 hours

Target one living creature suffering from disease or poison. The target has advantage on any saving throws to recover from disease or poison.

Emergency Patch

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Instantaneous

Target one living creature. The target regains hit points equal to your proficiency bonus + your Wisdom modifier + your level.

Advanced: At 10th level, you can either increase hit points recovered to triple your Wisdom bonus or you can target two creatures instead of one.

Stanozolol Injection

Activation Time: 1 action

Range: Touch

Components: Drug kit

Duration: 1 hour

Target one living creature. For one hour, the target has advantage on Dexterity skill checks and saving throws, and +10 feet bonus to speed.

Advancement: At 10th level, you can target up to 2 creatures, but each requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

2nd LEVEL EXPLOITS

Adrenaline Injection

Activation Time: 1 bonus action

Range: Touch

Components: Drug kit

Duration: Instantaneous

Target one living creature to gain one additional action on its next turn and on its following turn. This is in addition to any actions the target already has, including bonus actions.

Advancement: At 15th level, you can target up to 2 creatures, but each requires either an action or a bonus action (on the same turn).

Advantageous Scleroderma Injection

Activation Time: 1 action

Range: Touch

Components: Drug kit

Duration: Five minutes

Target one living creature to gain a +2 bonus to AC. This bonus increases to +3 at 14th level.

Advancement: At 15th level, you can target up to 2 creatures, but each requires an action: you can sacrifice your action on your next turn in order to administer both injections this turn.

Angel Of Death

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Instantaneous

Target one living creature reduced to 0 hit points or less in the previous round. You gain 5 + your level temporary hit points.

Medical Master

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Five minutes

Target you and one living creature OR two living creatures. The target regains hit points equal to your proficiency bonus + your Wisdom attribute modifier + your level. The target also has advantage on Constitution ability checks and saving throws for five minutes.

Advancement: At 15th level, you can target up to 4 creatures, but every two targets require an action: you can sacrifice the action on your next turn in order to affect all targets this turn.

Natural Healer

Activation Time: 1 action

Range: Touch

Components: Medical kit

Duration: Instantaneous

Target you or one living creature. The target regains hit points equal to double your proficiency bonus + double your Wisdom attribute modifier + your level.

Advancement: At 15th level, increase to triple your proficiency bonus and attribute modifier.

Quick Recovery

Activation Time: 1 bonus action
Range: Self
Components: Medical kit
Duration: 1 round

Double your proficiency bonus to your next Intelligence or Wisdom skill check. If the check still fails, you have advantage on all saving throws until the end of your next turn.

Synthetic Steroid

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: 1 hour

Target one living creature. The target has advantage on Strength ability and skill checks as well as a +1 bonus to Strength-based attack rolls.

Advancement: At 10th level, you can target up to 2 creatures, but each requires an action: you can sacrifice your action on your next turn in order to affect both targets this turn.

Treat Patient

Activation Time: 1 minute
Range: Touch
Components: Medical kit
Duration: Instantaneous

One creature recovers as many Hit Dice as twice your proficiency bonus.

Xanthine Injection

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: 1 hour

Target one living creature. For one hour, the target has advantage on Constitution ability checks and saving throws. The target also gains temporary hit points equal to double your proficiency bonus + double your Wisdom bonus.

Advancement: At 10th level, you can target up to 2 creatures, but each requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

58 3rd LEVEL EXPLOITS

Analeptic Injection

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: Instantaneous/Special

Target one unconscious living creature. The target wakes up. If at 0 hit points, the target is brought to 1 hit point, wakes up, and can expend up to 2d4 hit dice to recover hit points. The target is also immune to sleep effects until you finish a long rest.

Advancement: At 15th level, you can target up to 2 creatures, but each requires an action: you can sacrifice your next turn in order to administer both injections this turn.

Aversion Therapy

Activation Time: 1 bonus action
Range: Self
Components: Firearm
Duration: Until saved or 1 minute

Target one creature you hit with a ranged weapon this turn. The target suffers a -2 penalty to AC and its speed is halved until it makes a Constitution saving throw.

Ephedrine Psychotropic Injection

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: Five minutes

Target one living creature. For five minutes, the target automatically succeeds at all Wisdom and Intelligence saving throws. The target also gains resistance to all physical damage.

Delay Condition

Activation Time: 1 action
Range: Touch
Components: Medical kit
Duration: Instantaneous

Target one living creature. Its fatigue level is reduced by 4.

Advancement: At 15th level, you can target up to 2 creatures, but each requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

Minor Medical Miracle

Activation Time: 1 minute
Range: Touch
Components: Medical kit
Duration: Instantaneous

Target one creature that has been reduced to 0 hit points or killed in the past five minutes. The target regains hit points equal to double your proficiency bonus + double your Wisdom attribute modifier. The target can also expend up to 2d6 Hit Dice to recover additional hit points.

Unhealthy Psychostimulant Injection

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: 1 minute

Target one living creature. When making an attack action, the target may make one extra attack with any weapon it is holding. This is in addition on to any attacks it already has and those gained by a bonus action.

Advancement: At 15th level, you can target up to 2 creatures, but each requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

4th LEVEL EXPLOITS

Exotic Concoction

Activation Time: 5 minutes

Range: Touch

Components: Drug kit

Duration: Instantaneous

Target up to 6 creatures (which can include you). Each target gains temporary hit points equal to double your proficiency bonus + double your Wisdom attribute modifier.

Advancement: At 20th level, target gains +3d4 additional temporary hit points.

Field Experience

Activation Time: 1 action

Range: 30 feet

Components: None

Duration: Five minutes

Target up to 6 creatures (which can include you). For 5 minutes, the target's weapon attacks score a critical hit on a roll of 19 or 20. If the target already can score a critical hit on a roll of 19 or 20, it increases to 18, 19, or 20.

I Can Hear Bells Ringing

Activation Time: 1 reaction

Range: Self

Components: None

Duration: Instantaneous

If you are targeted by an area effect, you are moved to the nearest unoccupied space outside the area (suffering no damage). You also gain a +5 bonus to AC and have advantage on Dexterity ability checks and saving throws until the end of your next turn.

Major Medical Miracle

Activation Time: 1 minute

Range: Touch

Components: Medical kit

Duration: Instantaneous

Target one living creature. The target recovers from all of the following conditions: blinded, charmed, deafened, diseased, paralyzed, poisoned, and stunned. Its fatigue level is reduced to 0 and it recovers hit points equal to double your proficiency bonus + double your Wisdom attribute modifier + double your level.

Playing God

Activation Time: 5 minutes

Range: Touch

Components: Medical kit

Duration: Instantaneous

Target one ally killed in the past 30 minutes. The target returns to life with 20 hit points, and they awaken.

SNIPER

As a sniper, your job is to find a vantage point with a good field of fire and then sit there as motionless and as invisibly as possible until the intended target comes into your sights, and then remove that target from the world.

It is not an exciting job: it calls for more patience than most saints can manage, not to mention a head for complex mathematics and meteorology. You must be able to compensate for wind, light levels, the curvature of the Earth, gravity, angle to the target, your own breathing, and even minute variability in his equipment, and do all of this in a split second, as the target doesn't usually sit still and wait to be shot.

It requires intense training, and it isn't a profession one should enter if he or she plans to make friends, for everyone is slightly afraid of a sniper even when on their side. You tend to be the most stealthy fighter in any unit, as your efficacy is seriously reduced if the enemy knows you are there. Many are hunters in their off-time, honing their skill at moving unseen against creatures with much keener senses and instincts.

You are defined by single moments. In an instant, you turn the table, changes the course of history, and ends conflicts. You are patient and invisible until receiving the signal. In many ways, the sniper is the worst kind of romantic—one that never makes the first move. When a threat emerges, you respond. With the job completed, you vanish until required again. In open combat, with proper flash suppression, you surgically remove the biggest threats, crippling foes and sending enemy formations into disarray, all from the safety of cover with few aware of your position.

PLAYING A SNIPER

Why should you present yourself as a target? Why should you let your allies come to harm? Simply take out your enemies from a distance and those you count as friends will remain safe. You may be tasked to take a life that never knew its life was in danger. That goes along with the profession. The ultimate question is if the target was a threat. When hunting animals, such a dilemma never presents itself. Can you make the distinction?

A sniper is a ranged assassin, and as such is more about agility and stealth than direct one-on-one combat abilities. As one, your abilities are based on maintaining your distance. If you are being targeted by an enemy attack, something has gone wrong. When striking, you have the option to either impose status effects or deliver heavy damage in hopes of dropping foes.

CLASS FEATURES

As a sniper, you gain the following class features.

HIT POINTS

Hit Dice: 1d8 per heavy level

Hit Points at 1st level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 4) + your Constitution modifier per sniper level after 1st

PROFICIENCIES

Armor: Light armor

Weapons: Simple weapons, one-handed small arms, two-handed small arms, and all weapons with the sniper property.

Tools: All ground vehicles and aircraft

Saving Throws: Dexterity, Wisdom

Skills: Stealth plus two from Acrobatics, Athletics, History, Insight, Perception, and Sleight of Hand

EQUIPMENT

You start with the following equipment in addition to the equipment granted by your background:

- a one-handed small arm \$300 or less
- a basic sniper rifle
- a set of armor \$300 or less.
- \$100 in additional gear

MARKSMAN'S TALENT

Starting at 1st level, if you hit a target 25 feet away or further with a sniper weapon, you can spend marksman points to employ one or more of the talents on the following list.

At 1st level, you start with marksman points equal to 2 + your Wisdom modifier, gaining an additional point at 2nd level and every two levels after. When you take a short or long rest, you recover any spent marksman points. Additionally, if you kill a target with a sniper weapon, you gain 2 marksman points.

The number of points you can spend per attack depends on your level, and each talent can only be used once per attack.

1st Level: You can spend 2 points per attack.

5th Level: You can spend up to 3 points per attack.

10th Level: You can spend up to 4 points per attack.

17th Level: You can spend up to 5 points per attack.

20th Level: You can spend up to 6 points per attack.

Academic Kill

Marksman Cost: 1

Use when you hit with an attack to inflict additional 1d6 damage. This increases to 2d6 at 5th level, 3d6 at 9th level, 4d6 at 13th level, and 5d6 at 17th level. You can spend 2 marksman points to double the number of additional dice damage.

Assassin Psychology

Marksman Cost: 1

Use when you roll a natural 18, or 19 on an attack roll to make the hit a critical hit.

BOOM! Head Shot

Marksman Cost: 2

Use when you drop a creature: all Medium-sized enemies in a 5-foot radius around the target have disadvantage on attack rolls until the start of your next turn. Each enemy can only be affected once per long rest.

Dum-Dum

Marksman Cost: 1

Use when you hit with an attack: the target also suffers disadvantage on saving throws and ability checks until the beginning of your next turn.

Level	Proficiency Bonus	Marksman Points	Battle Condition	Special
1	+2	2	1	Marksman Talent
2	+2	3	2	
3	+2	3	2	Archetype feature
4	+2	4	2	Ability Score Improvement
5	+3	4	2	Marksman Talent Improvement
6	+3	5	3	—
7	+3	5	3	Archetype feature
8	+3	6	3	Ability Score Improvement
9	+4	6	3	Mad Minute
10	+4	7	4	Marksman Talent Improvement
11	+4	7	4	Archetype feature
12	+4	8	4	Ability Score Improvement
13	+5	8	4	Mad Minute
14	+5	9	5	—
15	+5	9	5	Archetype feature
16	+5	10	5	Ability Score Improvement
17	+6	10	6	Marksman Talent Improvement
18	+6	11	6	Archetype feature
19	+6	11	6	Ability Score Improvement
20	+6	12	7	Marksman Talent Improvement

Hollow point

Marksman Cost: 1

Use when you score a critical hit: you roll three times the damage dice instead of two.

Magic Bullet

Marksman Cost: 1

Use after dropping a creature to 0 hit points with a sniper weapon: you can make a single ranged attack against one creature within 20 feet of the original target. You use no additional ammunition. You can repeat this process until you fail to drop a creature to 0 hit points, you run out of enemies in range, or you hit three creatures.

Pinpoint Accuracy

Marksman Cost: 4

Use when you score a critical hit: the target is stunned until the beginning of your next turn.

Systemic Inflammation

Marksman Cost: 3

Use when you hit a living creature: the target is poisoned for one minute (ten rounds) or until it passes a Constitution saving throw. The DC for the saving throw is 8 + your proficiency bonus + your Wisdom or Dexterity modifier (your choice).

Twitchy Fingers

Marksman Cost: 1

Use after scoring a critical hit: make 1 additional attack with the same weapon as part of the same action against the same target.

Weak Spot

Marksman Cost: 2

Use when you hit with an attack: until the beginning of your next turn, all your subsequent attacks on the target have advantage.

BATTLE CONDITION

There are many disciplines when pursuing the path of a sniper. Starting at 1st level, you gain one of the following special traits. You may select another condition at 2nd, 9th, 13th, and 20th level.

Army Crawl

While prone, you don't have disadvantage on ranged attack rolls made with sniper weapons.

Ballistics Expertise

Spend 10 feet of movement: you either switch to a one-handed small arm from a sniper weapon OR switch to a sniper weapon from a one-handed small arm.

Covert Operation

Spend 20 feet of movement: you have advantage on Dexterity (Stealth) checks until the end of your turn.

Dead Eye

If a creature 25 feet or closer scores a critical hit on you, you automatically switch to your pistol and make a ranged attack against the target.

Low Profile

While prone, you gain the benefit of half cover. If already behind half-cover while prone, it counts as three-quarters cover. If behind three-quarters cover while prone, it counts as full cover.

Failure Is Not An Option

If you roll a natural 1 on an attack roll with a sniper weapon, you can re-roll. You cannot use this feature if you have disadvantage.

Snap Shot

You can now use Marksman Talent against targets 10 feet away or further with a sniper weapon.

Lead The Target

You slow your breathing and hold the weapon steady. You have all the time in the world to make the perfect shot. Target a creature in line of sight to become your focus. You gain a +1 bonus to attack rolls with sniper weapons against your focus. After you select a focus, you cannot select another until you finish a short or long rest.

Penetration Shot

When making a ranged attack roll with a sniper weapon against a target with cover, you treat total cover as three-quarters, three-quarters cover as half cover, and you ignore half-cover.

Perfect Tracker

You are quick to aim under any circumstances. You can move up to half your speed and maintain your sniper bonus.

Sharpshooter

As an action, you have advantage on your next attack roll with a sniper weapon. This benefit remains until you make an attack roll or move.

Shock & Awe

If you miss with an attack roll with a sniper weapon, the creature you attacked has disadvantage on attack rolls against you until the beginning of your next turn.

Smooth As Glass

You add 2 additional marksman points to your total. You can select this battle condition three times.

Zero Your Weapon

Spend a bonus action to double both the normal and long ranges of any sniper weapon you wield until the beginning of your next turn.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and gain one additional battle condition at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

MAD MINUTE

Starting at 9th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. If you hit with your first attack, you can sacrifice your second attack, gain 1 marksman point, and apply it immediately to your hit.

At 13th level, you can attack three times whenever you take the Attack action on your turn. If you hit with your first or second attack, you can sacrifice an additional attack, gain 1 marksman point, and apply it immediately to your hit (max 2 points).

TECHIE

Machines are your servants, and the local electronics dealer is your church. You believe in the progress of civilization through the perfection of technology. You are not one to live off the land, acquiring skills necessary for an unlikely apocalypse. You've had your head in machines since the moment you constructed your first radio controlled vehicle. Since then, it has been about making things go faster, fly higher, be tougher or act smarter. People and other biological bags of water and carbon are unreliable mechanisms at best. They never speak the truth and are prone to failure even with regular maintenance. Machines never lie, they never cheat, and if properly cared for, will never betray you or die unexpectedly. With only a few basic modifications or tweaks, you can even push a machine to be better than what it was designed for, whether it be a robot, a car, or even a gun.

PLAYING A TECHIE

You can think of yourself as a field engineer, fixing and destroying technology you come across. Because you never leave anything alone, you're constantly looking for new ways to improve every device you can get a hold of. Given enough time, you can make any machine work better. This is reflected in your abilities, allowing you to improve the capacity of your weapons. You can temporarily improve other machines, making cars faster or armor tougher. The group can consider you a medic for machines, as you keep any technology from breaking down when reliability equates survivability.

CLASS FEATURES

As a techie, you gain the following class features.

HIT POINTS

Hit Dice: 1d8 per techie level

Hit Points at 1st level: 8 + your Constitution modifier

Hit Points at Higher Levels: 1d8 (or 5) + your Constitution modifier per techie level after 1st

PROFICIENCIES

Armor: Light and medium armor

Weapons: Simple weapons, one-handed small arms

Tools: Tinker's tools, All ground vehicles and aircraft

Saving Throws: Intelligence, Wisdom

Skills: Engineering; select six skills from Computer Use, Demolitions, History, Insight, Investigation, Medicine, Nature, Perception, Performance and Sciences

EQUIPMENT

As a techie, you receive the following equipment at 1st level.

- a TL0 engineering kit
- a small arm \$300 or less.
- a set of armor \$300 or less.
- \$300 in additional non-military gear (no weapons, weapon-accessories, bullets, or armor)

TECH POINTS

At 1st level you get tech points (TP) which can be used to boost abilities and perform exploits representative of your training. At 1st level, you start with 3 points, which increases by 1 every additional level. You also gain a bonus to your tech points equal to your Intelligence modifier. Your available tech points reset after you finish a long rest.

SHINY RED BUTTON

At 1st level, you can put a button on your firearm. You only need eight hours of work to put the button on a new firearm but only you can press it without breaking the weapon. The button's function is determined by your choices from the options that follow. You can add as many functions into your button as you have available tech points, but each modification can only be added once per configuration unless stated otherwise. If you don't alter the function outside of a battle, your last configuration is used (if you have the available points).

Pressing the button takes no action. When you press the button, you spend the tech points corresponding with each of the functions added. If you don't have enough tech points when you press the button, the entire configuration does not function. Once pressed, its effects last five minutes.

You can own multiple weapons with different configurations, as the points are not spent unless the button is pushed, though pushing multiple buttons during a single battle would be rather wasteful. Changing a configuration takes five minutes, though you can attempt to change a configuration as an action with a DC15 Intelligence (Engineering) check (you cannot change a configuration while one is in effect without voiding the invested tech points of the previous configuration).

Additionally, you can attempt to regain a lost tech point with a DC5 Intelligence (Engineering) check. Each check takes 1 minute, and successive checks increase the DC by 5 (DC10, DC15, etc). The DC increases regardless if you succeed in recovering the point or not, and the check reverts back to DC5 when you take a long rest.

Charge Shot

Cost: 1 point

Each time you hit a target your size or smaller, you shove it 5 feet. If the target cannot be shoved, it takes 1d6 additional damage. You can add this modification twice to push the target 10 feet and increase the damage to 2d6.

Explosive Round

Cost: 1 point

When you score a critical hit, you roll all damage dice thrice instead of twice.

Floating Reticle

Cost: 2 points

You gain a +1 bonus to attack rolls.

Hydroshock

Cost: 2 points

You deal additional damage with a hit equal to the difference between your attack roll and the target's AC. Add this modification a second time to inflict 1d6 additional damage. This increases to 2d6 at 9th level, 3d6 at 13th level, and 4d6 at 17th level.

Increased Caliber

Cost: 2 points

Your weapon's damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). This stacks with any other effects that increases damage die size. You can add this modification twice.

Level	Proficiency Bonus	Tech Points	Special
1	+2	3	Shiny Red Button, Widget Bag, Tech Points, Tech Savant
2	+2	4	Tech Savant
3	+2	5	Archetype feature
4	+2	6	Ability Score Improvement
5	+3	7	Tech Savant
6	+3	8	Pioneer
7	+3	9	Archetype feature
8	+3	10	Ability Score Improvement
9	+4	11	Tech Savant
10	+4	12	McGuy Something
11	+4	13	Archetype feature
12	+4	14	Ability Score Improvement
13	+5	15	Tech Savant
14	+5	16	Pioneer
15	+5	17	Archetype feature
16	+5	18	Ability Score Improvement
17	+6	19	Tech Savant
18	+6	20	Archetype feature
19	+6	21	Ability Score Improvement
20	+6	22	Tech Savant

Increased Rate Of Fire

Cost: 2 points

You double the rate of fire of your weapon (10 for auto, 20 for auto-heavy). When using burst fire, you add double your proficiency bonus to the save DC and you always use the upscaled damage dice. If targeting single creatures, your weapon's damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). This stacks with any other effect that increases damage die size.

Increased Round Velocity

Cost: 1 point

When you roll a 1 or 2 on a damage die, you can reroll. You must accept the new roll, even if it is a 1 or a 2.

Muzzle Flash / Bang

Cost: 2 points

Any creature you hit within 20 feet of you has disadvantage on attack rolls against you until the beginning of your next turn.

Pop-Up Eyepiece

Cost: 1 point

If you roll a 2 or 3 on your attack roll, you can re-roll. You must accept the second result.

Rapid Loader

Cost: 4 points

You gain one additional attack whenever you take the Attack action on your turn. You can add this modification up to two times. This stacks with Pioneer.

Smart Tracking

Cost: 6 points

You have advantage on attack rolls.

Target Scanning

Cost: 3 points

Your weapon scores a critical hit on a natural roll of 19 or 20.

TECH SAVANT

Starting at 1st level, you gain one of the following traits that reflect the uniqueness of your talents. Some require the spending of tech points. You gain additional tech savant traits at 2nd level, 5th level, 10th level, 13th level, 17th level, and 20th level.

Economical Plating

You gain a +1 bonus to AC. Additionally, you can temporarily increase your armor's potential, spending one tech point as an action to increase your AC an additional +1 for five minutes.

Like Machines

Your maximum tech points increase by 2. You can select this trait up to four times.

Priorities

Instead of using your Hit Dice to recover hit points during a short rest, you can use expend them to regain tech points. For each Hit Die spent, you recover 2 tech points. You cannot have more tech

points than your maximum.

Friggin' Love Science

Spend a tech point and you have advantage on Intelligence (Science) or Intelligence (Engineer) checks until the end of your next turn.

If you select this trait a second time, you can spend one tech point to set your next d20 roll Intelligence (Science) or Intelligence (Engineer) check to a natural 20.

Immediacy

Spend one tech point to gain an additional action on this turn. This action can be used to take any action except an Attack action.

Scientist, Not A Soldier

When you use the Disengage action, you can also make a single ranged attack as part of the same action. You inflict half damage on a hit.

Midas Touch

While you are wielding a firearm, its damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). You can select this trait twice, and its effects stack with others that increase damage die size.

Failsafe

If someone other than you attempts to use your weapon with a *shiny red button* on it (regardless if they press it), the weapon explodes, inflicting a critical hit of weapon damage on the unlucky handler and stunning them until the beginning of your next turn. The weapon is now broken (but can be fixed normally).

Shrapnel Modification

You can now spend tech points in combat for an immediate boost to the weapon with your *shiny red button* while it is active. Spend 1 tech point after you hit, and the target is vulnerable to ally attacks until the beginning of your next turn.

WIDGET BAG

Starting at 1st level, you gain a widget bag. It contains random spare parts, useful materials, and salvage worth \$200. During a short or long rest, you can scavenge for components: in most areas you will be able to recover \$10 worth during a short rest and \$20 worth during a long rest, but the GM may award more or less (or none at all) at her discretion.

ARCHETYPE

At 3rd level, you choose an archetype. The archetype you choose grants you features at 3rd level and again at 7th, 11th, 15th, and 18th level.

Alternatively, you can forego your archetype selection at 3rd level and gain one additional tech savant exploit at each of the above levels.

ABILITY SCORE IMPROVEMENT

When you reach 4th level, and again at 8th, 12th, 16th, and 19th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. As normal, you can't increase an ability score above 20 using this feature.

PIONEER

Starting at 6th level, you can attack twice, instead of once, whenever you take the Attack action on your turn. This increases to three attacks at 14th level in this class.

McGUY SOMETHING

Starting at 12th level, you are able to construct useful items or tools to accomplish something generally not allowed given the available resources available. Either the GM can supply a random assortment of items you can use to create a tool or you can make a case for common items one is likely to find in order to solve an immediate crisis. This may involve searching an area or assuming certain items are available; if your widget bag currently contains at least \$20 worth of parts, you can always be assumed to have a variety of small useful items such as screws, nails, paper clips, duct tape, and chewing gum. If the GM is convinced by your argument, make an Engineering skill check to see if the improvised gadget or solution works. When you use this trait, you cannot use it again until you finish a long rest.

In traditional fantasy classes, there are two types of classes—martial classes where abilities refresh after a short rest, and spellcasters where abilities refresh after a long rest. With Ultramodern5, despite all classes technically being martial, I've decided to spice things up with a few different approaches. The one problem I see with the techie is an apprehension in spending any points. A player holds points back and then realizes when having a long rest, that points were wasted. Don't be conservative. Be useful in every combat—the other players will appreciate it.

CHAPTER FIVE

ARCHETYPES

Unlike fantasy classes, all *Ultramodern5* classes have the same set levels for archetypes, at 3rd, 7th, 11th, 15th, and 18th level. Any character who meets an archetype's requirements can choose that archetype (although some classes will synergize better than others, as noted with the archetype). Once you select an archetype, you cannot change it.

66

Unlike fantasy archetypes, several *Ultramodern5* archetypes offer additional proficiencies upon selection. You gain these when you choosing the archetype at 3rd level.

Additionally, if you multiclass, you cannot choose the same archetype again for your second class.

Traditional fantasy classes generally offer three archetype options each. With ten classes presented here and twenty-four archetypes, technically we are short on options, which is why we presented in each class the choice of boosting the class without the need of an archetype at all. Including those, the number of archetype options increases to thirty-four...if you choose to look at it that way...which I do.

ANTI-HERO

You are no one's friend. You have momentary alliances that suit you when the time is right. It's not that you are evil—you just prefer not to make any ties that would upset your cold demeanor. You have a reputation to uphold. You are a mercenary, a calculating killer that just happens to work hopefully for the winning side. But when push comes to shove, you answer to no one, and generally only select a course of action that benefits you. If allies benefit, so much the better, but you still consider that a happy coincidence. You may be a member of a party, but in the end, your fate lies only in your hands.

SYNERGY

This archetype works best with the face, infiltrator, grounder, and sniper classes.

PROFICIENCIES

You have proficiency with simple melee weapons and one-handed small arms

DEAD POOL

Beginning when you choose this archetype at 3rd level, you gain a reservoir of death you can tap to inflict additional damage upon opponents. You can add any amount from your dead pool to any target 20 feet or

closer you hit. When you finish a long rest, your dead pool reduces to zero. You gain points to your dead pool from the following.

- If you reduce a creature 15 feet away or closer to zero hit points, you gain 5 points; additionally, any additional damage you inflicted beyond zero with the killing hit is added to your pool.
- Any time you roll the maximum value of a damage die to a target 20 feet or closer, add half that value onto your dead pool.
- If an enemy scores a critical hit on you, you gain 10 points.

Your dead pool's size is 10 at 3rd level, 20 at 7th level, 30 at 11th level, 40 at 15th level, and 50 at 18th level.

FOURTH WALL

Starting at 7th level, if any ally within 50 feet of you suffers any damage, your dead pool is filled by the same value. Once you use this ability, you cannot use it again until you finish a short or long rest.

CHEAT

Make it look inconspicuous. Starting at 11th level When you finish a long rest, set a d20 roll to 20 and put it aside. You can replace any attack roll, saving throw, or ability check made by you with that die (at which point, it is used up). You can do so before or after a roll, but not after determining the results of that roll. An unused die is lost when you finish a long rest.

Alternately, if you don't have a second d20, you could always just accidentally shift one die result to any other result.

THE LESS INTERESTING 15th LEVEL ABILITY

Starting at 15th level, as a bonus action, you can use any amount from your dead pool to recover your hit points.

THE BENEFIT OF FRIENDS

Starting at 18th level, if an ally is reduced to 0 hit points or lower, you gain 20 points to your dead pool.

AUTHORITY

You are the best in your field. Among the esteemed elite, you consider yourself an equal. You're a leading scientist, the world expert, or a head doctor. Regardless of your path, the money should be good.

SYNERGY

This archetype works best with the face, marshal, medic, and techie classes.

PROFICIENCIES

You have proficiency with one of the following skills: Intelligence (Demolitions), Intelligence (Engineering), Intelligence (History), or Intelligence (Sciences).

PHD

Beginning when you choose this archetype at 3rd level, select one Intelligence skill of your choice. You can set your d20 roll to 20 when you really need a roll to succeed. When you use this ability, you cannot use it again until you finish a long rest.

RESIDENT EXPERT

Starting at 7th level, instead of using your Hit Dice to recover hit points during a short rest, you can use expend them to gain a +10 bonus to any failed Intelligence skill check. If you still fail the skill check, you regain the Hit Die.

SECOND NATURE

Starting at 11th level, when attempting any Intelligence skill, it only takes a bonus action instead of an action. Additionally, if you roll less than 10 for an Intelligence check, increase the result to 10.

SHERLOCK

Starting at 15th level, you can use the Search action as a bonus action. You also gain half your proficiency bonus (round down) to every Intelligence skill you are not already proficient in.

STRAIGHT DOPE

Starting at 18th level, your selected skill with *PHD* improves—unless you have disadvantage with the check, it always results in a natural 20.

BANNER HEAD

You are not a pretty individual. You are not one for arts and crafts. You have no hobbies. You have one job. You shoot people twice in the chest and once in the head. You do it for no other reason than the objective you have been asked to carry out. Your loyalty runs only to the men and women next to you. To them, you're the champion hero. To your foes, you are the one target they need to take down. You want them to think that. What good is war if there is no one to shoot at?

SYNERGY

This archetype works best with the grounder, gunslinger, heavy, and marshal classes.

PROFICIENCIES

You gain proficiency in any two ranged weapons of your choice.

FLEETING ADVERSARY

Beginning when you choose this archetype at 3rd level, select one creature within 50 feet and line of sight to you after rolling initiative. The target is your fleeting adversary. You gain a +1 bonus to attack your fleeting adversary, and your fleeting adversary suffers disadvantage on attack rolls that don't include you as a target. This effect ends if you drop to 0 hit points, the creature drops to 0 hit points, you move beyond 50 feet, or line of sight is broken between you and your target. Once you select a fleeting adversary, you cannot select another until you roll for initiative again.

THE WAR POSE

Starting at 7th level, you can take a -1 penalty to attack rolls for each weapon you wield to wield a two-handed small arm with one hand. The weapon only counts as a one-handed small arms for purposes of how many hands you use to wield it, and for abilities and feats.

ADVERSARIAL RAGE

Starting at 11th level, you deal +2 damage against your fleeting adversary (+4 at 15th level, +8 at 18th level): this bonus ends if the target is no longer your fleeting adversary. Once you use this feature, you cannot select another until you finish a long rest.

REMEMBER ME?

Starting at 15th level, a few well-placed shots can bring an enemy's attention back around to you. If your fleeting adversary attacks an ally, you can make a single ranged attack against it as a reaction.

UNEXPECTED RESPONSE

Starting at 18th level, level, until your fleeting adversary is reduced to 0 hit points, each time it hits you, you gain a +1 bonus to attack rolls against it. This bonus is cumulative up to +3 but is lost if you attack any creature other than your fleeting adversary or you score a hit.

68 BRAWLER

You're a thug...pure and simple. You may not be the biggest or the strongest, but you are certainly scrappy. You might have been a bouncer—you might still be one. Your talents are less about martial discipline and more about using brute strength to manhandle opponents. You generally prefer avoiding weapons outside of those attached to you.

You fight—it clears your head, defines who you are. It's not about art or some Zen state. It's something you are good and it enjoy rush of being in a fight. It helps that you win most engagements you find yourself in.

SYNERGY

This archetype works best with the gunslinger, marshal, and martial artist classes.

PROFICIENCIES

You have proficiency with all simple melee weapons and with unarmed strikes.

HAM HANDS

Beginning when you choose this archetype at 3rd level, you can use both hands when grappling a target your size or smaller to have advantage on all rolls related to the grapple.

HEAD-BUTT

Starting at 7th level, while grappling a creature your size or smaller, you can inflict 1d6 damage per level on the target as a bonus action. Once you use this feature, you cannot use it again until you take a short rest or long rest.

HEAD SLAM

Starting at 11th level, if you have one grappled creature in each hand, you can use a bonus action and make an unarmed melee attack against each target. A hit deals 2d6 + your Strength modifier damage to each target.

BEAR HUG

Starting at 15th level, when grappling a target your size or smaller with two hands, you may attempt a bear hug. Make an unarmed strike as your action (or one of your attacks). A hit inflicts 2d6 + your Strength modifier damage.

NECK SNAP

Starting at 18th level, if you make an unarmed strike against a target you are grappling, you score a critical hit on a natural roll of 19 or 20.

BROTHER OF BLOOD

On the battlefield, every ally is a brother. You are a member of a team and you've all worked together long enough to understand each other's patterns. You know when one is hurt, regardless of where on the battlefield. You would never take risks that will endanger another brother's life. You would never step out of formation; never leave a brother's side. They must depend on you as you depend on them. If one of your own falls, nothing short of god's finger on the battlefield will stop you from carrying your injured out of combat.

SYNERGY

This archetype works best with the groundler, marshal, medic, and sniper classes.

This archetype's abilities are useless unless at least one other party member has taken the same archetype. Be sure to discuss with your group before selecting this archetype.

PROFICIENCIES

You are proficient with one weapon and one armor (except exo-armor) another brother in blood is proficient in. If you both choose this archetype at the same time, you can both choose new items, as long as you both choose the same items.

MORE LIKE FAMILY

Beginning when you choose this archetype at 3rd level, if a creature scores a critical hit on an allied brother of blood, you can make a single ranged attack against the attacker as a reaction.

ALLIED SUPPORT

Starting at 7th level, you can use a bonus action and target one allied brother of blood in line of sight. The targeted brother of blood gains an action that must be used before the end of your turn. This does not count as a reaction for the ally. Each brother of blood can benefit from Allied Support only once per round. Once you use this feature, you cannot use it again until you finish a short or long rest. You gain one additional use of Allied Support at 11th, 15th level, and 18th level.

ARMY OF TWO

Starting at 11th level, you grant a +3 bonus to damage rolls to each brother of blood within 10 feet of you (cumulative up to +6). Remember that they will be granting you this same bonus.

BETTER REFLEXES

Starting at 15th level, you can use the Help action on another allied brother of blood as a bonus action.

TEAM EFFORT

All members of the team synchronize their actions to operate as one organism. Starting at 18th level, after rolling for initiative, you and all allied brothers of blood act on the highest initiative among you. You all can decide which order you act in.

CLEANER

Someone hands you an image, an address, or just a name. You move in quickly and quietly, eliminating defenses that lay in your path. You dispatch the enemy efficiently and vanish into the shadows, leaving onlookers wondering who ordered the hit and why.

You are a silent, cold, calculating assassin. Your skills involve intimate kills, forcing to be close to your enemy. You rise from nowhere and eliminate opponents before others can notice or respond. Pistols and knives, even when they're most quiet, still make a noise you would prefer to avoid.

SYNERGY

This archetype works best with the face, gunslinger infiltrator, and martial artist classes.

PROFICIENCIES

You have proficiency with all with simple melee weapons and one-handed small arms.

ONCE IN THE HEAD

Beginning when you choose this archetype at 3rd level, if you score a hit on a target 20 feet away or closer with a melee weapon or a one-handed small arm, you inflict additional damage equal to four times your level. Once you use this feature, you cannot use it again until you take a short or long rest. If you kill the target, you regain the use of this feature (though only one additional time).

TWICE IN THE CHEST

Starting at 7th level, if wielding a melee weapon or a one-handed small arm, as an action, you can make three attacks on a single target 20 feet away or closer. All attacks have advantage. If you kill the target, you regain the use of this feature (though only one additional time).

QUICK SUCCESSION

Starting at 11th level, if you use Once In The Head but fail to hit the target, make one additional identical attack. This attack automatically hits and you inflict additional damage equal to four times your level (including the additional damage with Once In the Head). Once you use this feature, you cannot use it again until you take a long rest.

OUT OF THE BLUE

Starting at 15th level, you gain a +10 bonus to attack rolls against targets that are surprised.

DESPERATE SOLUTION

Starting at 18th level, as an action, add up all the enemies you can see—you then gain a number of attacks equal to double that number as part of that same action (Max 20). You can distribute the attack anyway you see fit. Once you use this feature, you cannot use it again until you take a long rest.

COUNTRY GUNMAN

You keep your weapon holstered until the last second. You prefer to stare down opponents than use your firearm. However, when drawn, you make it quick and final—single shots, single kills.

SYNERGY

This archetype works best with the face, grounder, gunslinger, and marshal classes.

PROFICIENCIES

You have proficiency with all one-handed small arms.

IMPROVED REACTION TIME

Beginning when you choose this archetype at 3rd level, each time you roll initiative roll 2d6 and add this value to your initiative.

PRECISE SHOT

Starting at 7th level, if you act first before any enemies can act, you have advantage with all attack rolls made with one-handed small arms until the end of your first turn.

QUICK AND THE DEAD

Starting at 11th level, after establishing initiative order, if you have the highest initiative value, said value is a damage bonus to your first hit with a one-handed small arm.

REPUTATION

Starting at 15th level, If you have the highest initiative than anyone (including allies), you gain one additional action on your first turn.

12 O'CLOCK

Starting at 18th level, when you ready an attack action with a one-handed small arm, you have advantage with

the attack, and if you hit the target, the attack becomes a critical hit.

DIPLOMAT

You're the one brought in when weapons cannot be used, when even the brandishing of firearms is considered a total failure. You cannot give the appearance of aggression, not even when the situation goes out of control. You're the wave of the future, where words will solve disputes, not bullets.

SYNERGY

This archetype works best with the face, marshal, medic, and techie classes.

PROFICIENCIES

You have proficiency with two Charisma skills of your choice.

VOLUME AND PRESENCE

Your opponent's argument is invalid and ridiculous and your tolerance for their ignorance is over. Beginning when you choose this archetype at 3rd level, as an action, you can select one target your size within 25 feet that can understand you. The target makes a Wisdom save against your psychological attack. The save DC = 8 + your proficiency bonus + your Wisdom/Charisma modifier. If the target fails, either you have advantage on all contested Wisdom or Charisma ability checks and skill checks until the end of your next turn, or the target is frightened of you until the beginning of your next turn. If you target the same creature on your next turn, the DC increases by +2 (consecutively to +6). This ability does not work on a target that has suffered damage from you or any ally in the past minute.

THE ART OF THE COMPROMISE

Starting at 7th level, select one Charisma skill. You double your proficiency bonus with this skill. At 11th level and 18th level, you may select an additional Charisma skill.

CONFIDENCE COMES WITH THE POSITION

Starting at 11th level, you never have disadvantage with any Charisma skills checks, ability checks, or saving throws.

I THINK WE GOT OFF ON THE WRONG FOOT

Starting at 15th level, instead of using your Hit Dice to recover hit points, you can expend them as a bonus action to set your next Charisma or Wisdom skill check to a natural 20 before making the roll.

EVERYTHING YOU GOT

Your arguments are so compelling, your opponent is having a difficult time concentrating. Starting at 18th level, as an action, you can select one target within 25 feet that can understand you. The target makes a Wisdom save against your psychological attack. The save DC = 8 + your proficiency bonus + your Wisdom/Charisma modifier. If the target fails, it is stunned until the start of your next turn. This ability does not work on a target that has suffered damage from you or any ally in the past minute.

DRIVER

You love your car. You wash her; you change the oil; you maintain every part. You service her regularly, changing the plugs, adding washer fluid. Every week, she gets a fresh coat of wax and on Sunday afternoon, you take her for a cruise. You don't have a problem with this.

SYNERGY

This archetype works best with the face, infiltrator, marshal, and techie classes.

PROFICIENCIES

You have proficiency with Dexterity (Vehicle Operation).

STUNT MASTER

Starting at 3rd level, you are able to learn vehicle stunts. Select one stunt from the list below. You can select one additional stunt at 7th, 11th, 15th, and 18th level. Many of these stunts require a vehicle attack. Your attack bonus equals your Dexterity modifier + your proficiency bonus. If you hit, you inflict 1d8 per vehicle size category your vehicle has on the target. Your vehicle suffers ¼ of the same value.

INSIDE AND OUT

Starting at 7th level, select one specific vehicle (make, model, and year). With your selected vehicle, you have advantage on Dexterity (Vehicle Operation) checks.

FLAT OUT

At 11th level, you gain +5 feet to the acceleration of any vehicle you control.

JAGGED EDGE

Starting at 15th level, you gain a +2 bonus with attack rolls with vehicles.

RACING RECORD

Starting at 18th level, when you inflict damage with your vehicle, roll twice for all damage rolls and take the higher values.

STUNTS

Love Tap

As an action, you can make a ram attack against another vehicle or creature with your vehicle. (see **Ram**). If you hit, add one damage die (the car is counted as moving faster). Your vehicle suffers ¼ of the same value.

Signature Move

As a bonus action, gain a +3 bonus with Dexterity (Vehicle Operation) check until the end of your turn.

Counter Maneuver

If a vehicle or creature hits your vehicle while it is moving with a physical attack (ram or a melee attack), you can make ram attack against the target as a reaction (see **Ram**). If you hit, add one damage die (the car is counted as moving faster). Your vehicle suffers ¼ of the same value.

Drop The Hammer

As a bonus action, you gain a +5 bonus to speed until the end of your turn.

Defensive Driving

As a bonus action, you gain a +2 bonus to your vehicle's AC until the beginning of your next turn.

Damage Avoidance

As a bonus action, you half all side effect damage from using your vehicle as a weapon until the beginning of your next turn.

Hole Shot

As an action, you can make a ram against another vehicle or creature with your vehicle. If you hit, add two damage dice (the car is counted as moving faster). Your vehicle suffers ¼ of the same value. A hit target also suffers disadvantage on all ability checks and attack rolls until the beginning of your next turn. If you hit with this attack, you cannot use it again until you finish a long rest.

Thread The Needle

You can set a Dexterity (Vehicle Operation) check you made to a natural 20. Once you use this ability, you cannot use it again until you finish a long rest. You can select this stunt up to two additional times.

FIELD MACHINIST

You are a troubleshooter. Without you, the others don't amount to much more than a bunch of poorly equipped primitives with clubs. You improvise when needed, solving most mechanical problems when they arise. You are the master of jury-rigging solutions when others consider a problem hopeless. You are resourceful, intelligent, but generally non-violent. You possess a background in physical sciences. Basically, you are a walk-

ing, talking Swiss army knife.

SYNERGY

This archetype works best with the face, medic, and techie classes.

PROFICIENCIES

You gain proficiency with Intelligence (Engineering).

ARTISAN OF GEARS

Beginning when you choose this archetype at 3rd level, you gain a bonus to your Intelligence (Engineering) skill equal to half your proficiency bonus. At 15th level, you instead add double your proficiency bonus to your Intelligence (Engineering) checks.

KIT MASTERY

Starting at 7th level, you treat all tool kits as one tech level higher.

FRANTIC REPAIR

Starting at 11th level, you can attempt to repair broken items as an action. Additionally, your progress in crafting any technology is doubled.

COVERED IN GREASE

Starting at 15th level, all technology you build costs 15% less (and thus takes 15% less time, round down).

PURE ENGINEER

Starting at 18th level, you can set an Intelligence (Engineering) check you made to a natural 20. Once you use this feature, you cannot use it again until you finish a long rest. Additionally, if you roll a natural 1, re-roll until the result is anything except a natural 1.

FIELD MEDIC

You specialize in the treatment of the injured during combat situations. You know when to keep your head low, but more importantly, when to rise in defiance to protect those under your care. You might have been a doctor back home and found a calling out in the wilderness. If so, your allies probably wonder why you've chosen this path.

SYNERGY

This archetype works best with the marshal, martial artist, medic and techie classes.

PROFICIENCIES

You have proficiency with Wisdom (Medicine).

A TRUE HEALER

Beginning when you choose this archetype at 3rd level, you gain a bonus to your Wisdom (Medicine) skill equal

to half your proficiency bonus. At 11th level, you instead add double your proficiency bonus to your Wisdom (Medicine) checks.

PHYSICIAN HEAL THYSELF

Starting at 7th level, once per turn, you can use a bonus action to recover hit points equal to your Wisdom modifier + your level. Once you have used this feature three times, you must complete a short or a long rest before you can use it again.

RACE TO THE FALLEN

Starting at 11th level, you can use the Disengage action without taking an action if you move at least 10 feet directly towards an ally on that same turn.

IN THE PRESENCE

Starting at 15th level, every ally within 5 feet of you can take a bonus action to recover as many hit points as your proficiency bonus. You can use your action to double this hit point recovery until the beginning of your next turn.

NO LONGER CIVILIZED

If an ally succumbs to his or her injuries, you can no longer be a healer. You must be a protector. Starting at 18th level, if an ally in line of sight is reduced to 0 hit points, you have advantage on attack rolls until you hit, and gain a bonus to damage with your next hit equal to your Wisdom score until the ally is at 1 hit point or higher.

GRANDMASTER

This path does not encourage violence. Instead, it is designed for self-control and mental clarity. Some practitioners refuse to apply their discipline in a violent fashion, believing to do so would be a failure of their philosophy. For others, to commit this practice to violence is a logical progression. Some take this to an extreme, using it only to benefit themselves. Others are considered heroes, fighting for noble causes and refusing to stand idle while the innocent suffer.

These adventurers love sparring and often duel aggressively with allies to test their mettle and skill. Though not a requirement for friendship, it goes a long way to match a grandmaster in combat. Even enemies matching their skills in a fair duel will garner respect.

SYNERGY

This archetype works best with the grounder, gunslinger, and martial artist classes.

PROFICIENCIES

You have proficiency with all simple melee weapons.

MARTIAL ART DISCIPLINE

Beginning when you choose this archetype at 3rd level, you can select a specific martial art discipline. A discipline can be activated on your turn as a bonus action. Once activated, you gain the benefits of this discipline for five minutes. Once you use a martial art discipline, you cannot use it again until you finish a long rest.

At 7th, 11th, 15th, and 18th level, you can either select a new discipline or gain one additional use of a prior selected discipline before the need of a long rest. If you select the same discipline three times (they need not be at successive levels), you unlock an additional benefit. You can only have one discipline in effect at a time.

Capoeira

Resembling a dance more than a martial art, those specialized in capoeira are constantly in motion, attempting to find an opening in an opponent in whichever way possible. After activating, you gain the following bonuses:

- You can use the Disengage action as a bonus action.
- You gain a +5 bonus to speed.
- You have advantage on all Dexterity saving throws.
- After you select this discipline a third time, your bonus to speed increases to +10.

Drunken Boxing

In your enemy's eyes, you just appear to stumble around, luring your enemies in a false hope of an easy victory. The more chaotic you look, the deadlier you are. You must be inebriated to activate this discipline, and after doing so, gain the following bonuses:

- You gain temporary hit points equal to twice your level.
- You do not inflict double dice damage when scoring a critical hit. Instead, you gain two additional unarmed melee attacks as part of the same action. There is no limit on the number of additional attacks you can gain this way in a turn.
- Each time a creature misses, your AC increases by +1 (max +3); if a creature misses you at your max AC bonus, this bonus reverts to 0 and you gain an unarmed melee attack as a reaction against the triggering target.
- After you select this discipline a third time, you gain three additional unarmed attacks instead of a critical hit instead of two.

Eagle Claw

You know how to find weak spots in your enemy. You are often seen as being patient, waiting for a moment for a decisive strike. After activating, you gain the following bonuses:

- If you hit a creature, you can instead inflict half damage and grapple the target.
- At the beginning of your turn, any enemy you are

grappling suffers damage equal to your Strength or Dexterity modifier.

- Any time you inflict a critical hit on a creature, the target suffers half your hit damage at the beginning of its turn.
- After you select this discipline a third time, any enemy you are grappling at the beginning of your turn suffers damage equal to your Strength modifier plus your Dexterity modifier.

Karate

Your strength comes from your empty hand—the origin of the word. This discipline is extremely popular given the simplicity of its foundation. After activating, you gain the following bonuses:

- Use an action to focus your discipline: until the end of your next turn, you have advantage on attack rolls.
- You can spend 30 feet of movement to gain a +1 bonus to AC until the beginning of your next turn.
- Use an action to make a single kick attack. This is an unarmed attack that inflicts 1d10 + Strength modifier damage. You gain a +7 damage bonus for each additional attack you would normally make with an Attack action.
- After you select this discipline a third time, your kick attack inflicts 2d6 damage instead of 1d10, and your AC bonus increases to +2.

Iron Palm

You stopped splitting boards and bricks and moved up to bones. Your opponents will fear your strikes. After activating, you gain the following bonuses:

- Double your attribute modifier to damage.
- If you roll a critical hit with an unarmed attack, you maximize one of your damage dice.
- If you attempt to damage obstacles like doors or tables, double all damage dice.
- After you select this discipline a third time, maximize all damage dice with a critical hit, and your triple all damage dice against obstacles.

Iron Shirt

The only way to survive some encounters is to not worry about how many times you are hurt. After activating, you gain the following bonuses:

- You have resistance to all slashing and bludgeoning damage.
- You can spend Hit Dice to recover hit points as if taking a short rest while in the middle of a fight. You can use any number of Hit Dice up to half your level as an action.
- If you suffer 1/5 or more your total hit points in damage before the beginning of your turn, you have advantage on your next attack roll.
- After you select this discipline a third time, you gain resistance to piercing damage as well.

Long Fist

An aggressive style, you push forward to your enemy, hoping a strong offense will discourage counter attacks. After activating, you gain the following bonuses:

- Double your attribute modifier to damage.
- Your unarmed attacks and attacks with a light melee weapon gain the Reach property.
- If you hit a creature with an opportunity attack, you disengage from all other creatures and move within 5 feet of that target.
- After you select this discipline a third time, your reach increases to 10 feet for the purposes of opportunity attacks.

Monkey Kung-Fu

Your bizarre acrobatic maneuvers involve grabs, tumbles, and attacks, which more disorientate your opponents than damage them. After activating, you gain the following bonuses:

- Each time you hit a creature with an unarmed attack, you gain a +1 bonus to AC; this effect is cumulative up to +4 with each successive hit, but is lost if you miss the target, do not attack the target by the end of your next turn, or attack another creature.
- When you activate this discipline, set aside four “monkey points”. You can use a monkey point to (a) knock a target prone as a reaction to it missing on a melee attack against you; (b) automatically pass a Dexterity saving throw; (c) take only half damage from an enemy attack, or (d) double your proficiency bonus and gain advantage on your next Strength (Athletics) or Dexterity (Acrobatics) check. Unused points are lost when the discipline expires.
- After you select this discipline a third time, you gain four additional monkey points.

Muay Thai

A variation of kickboxing, there is not a limb you possess that is not used in direct physical attacks. You are a stand-up fighter with a huge repertoire of attacks. After activating, you gain the following bonuses:

- Instead of a simple unarmed attack, you must select which attacks you wish to make. The damage dice listed cannot be adjusted by any other abilities.

Punch: Damage—1d2; make two punch attacks in place of one normal attack you would normally make (max 2 uses per Attack action); you must hit with both attacks to increase your Martial Artist chain bonus tier.

Elbow: Damage—1d8; if you use an elbow once as part of an Attack action, roll damage dice twice and take the higher value.

Jump Kick: Damage—1d10; you must move at least 10 feet towards your target before making this attack.

Roundhouse Kick: Damage—2d8; you suffer

a –3 penalty to your attack roll.

Knee: Damage—1d6; and you can shove the target 5 feet. If the target hits an obstacle, it takes +2 damage.

- After you select this discipline a third time, if you hit a creature three times or more with an Attack action, the target has disadvantage on attacks against you until the beginning of your next turn.

Praying Mantis

You carry a powerful stance, and emphasize your aggression through rapid and coordinated hand movements that both distract the enemy while delivering powerful blows which cripple one’s enemy. After activating, you gain the following bonuses:

- You gain a +1 bonus to AC.
- If an enemy misses on a melee attack against you, you can make a single melee attack against that target as a reaction—on a hit, you inflict half damage. If you score a critical hit, the target has disadvantage on its next melee attack against you.
- You have advantage against attempts to move you against your will.
- After you select this discipline a third time, your AC bonus increases to +2.

Snake Style

Your strikes are light, but rapid, connecting numerous times and at numerous places against your opponent. Simultaneously, your fluid movements make you a difficult target. After activating, you gain the following bonuses:

- At the beginning of your turn, select one creature you can see to gain a +1 bonus to AC against until the beginning of your next turn.
- Once per turn, if you roll a 1 on any of your damage die, you gain an additional melee attack against the same target as part of that action. If you roll multiple damage dice with a hit, all dice must roll a 1.
- While you are prone, creatures don’t have advantage on you while and you don’t have disadvantage on them.
- After you select this discipline a third time, your AC bonus increases to +2.

Tai Chi

You are able to direct enemy aggression into a weakness. The angrier the opponent, the more energy you can direct back. After activating, you gain the following bonuses:

- If a creature’s melee attack roll against you misses, the difference between the attack result and your AC becomes a damage bonus on your next melee attack. This attack must be made on your next turn against the target that missed you, and if you miss, the damage bonus is lost.
- If a creature’s melee attack roll against you is a natural 1, you can knock the target prone and make a

melee attack as a reaction.

- After you select this discipline a third time, you knock the target prone and make a melee attack as a reaction if your enemy rolls a natural 1 or 2.

Taekwondo

More defined by its powerful leg movements rather than hand strikes, your opponents should always keep their eyes on your feet. After activating, you gain the following bonuses:

- If you are not grappled or your legs otherwise restrained, your unarmed attacks increase their damage die by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). These are kick attacks. This does not affect your martial artist combo chain tier.
- If you move at least 20 feet towards a creature and make an unarmed (kick) attack as your Attack action, you have advantage on the attack.
- Once per discipline activation, if you score a critical hit against a target your size or smaller, you inflict maximum damage.
- After you select this discipline a third time, you can inflict maximum damage with a critical hit twice per activation.

Tiger Claw

You adore getting close, real close. Getting within your enemy's reach, you hope to prevent a strong counterattack. And you kick too. After activating, you gain the following bonuses:

- You gain a +5 bonus to speed.
- You can spend 20 feet of movement and move to occupy the same space as your opponent—you no longer occupy a space around said opponent and allies can attack through you. Any target occupying your space cannot use the Disengage action.
- If you hit a target with an unarmed attack, you can use a bonus action to inflict additional claw (slashing) damage equal to your attack modifier. This damage is not part of the same attack action and thus is not multiplied with a critical hit.
- After you select this discipline a third time, your bonus to speed increases to +10.

GUN DANCER

There is no formal academy or dojo where one acquires the title: it is acquired through the school of hard knocks, its warriors emerging with a prowess exceeding the others—a natural grasp of the skills, as if never needing to be taught.

You have been given such a moniker. You are able to examine a target in an eye blink and determine the perfect point at which to inflict the greatest harm. In addition, you have developed a harmony with the area around you, always analyzing your surroundings for the best cover and field of fire. This allows you to avoid hits while still maintaining your concentration on the

target. You rarely remain still in combat, constantly moving from cover to cover, always with a vital enemy weakness firmly locked in your crosshairs.

SYNERGY

This archetype works best with the gunslinger, infiltrator, martial artist, and techie classes.

PROFICIENCIES

You have proficiency with one-handed small arms.

SPASTIC SHOT

Beginning when you choose this archetype at 3rd level, before the end of your Attack action, roll a second d20: on a roll of 16, 17 or 18, you gain one extra ranged attack as a part of the same action, and on a roll of 19 or 20, you gain two extra ranged attacks.

FASTER THAN EYES CAN SEE

At 7th level, you can reload a single one-handed small arm taking no action. Once you use this feature, you cannot use it again until you take a short rest or long rest. You also gain a +2 bonus to initiative.

COWBOY KEMBO

Starting at 11th level, if you score a critical hit with a ranged attack gained from spastic shot, you one extra attack (max 4 extra attacks).

MAYHEM SONATA

At 15th level, you are able to perform a ballet of destruction. Your spastic shot range increases to 14-17 for one extra attack, and 18-20 for two extra attacks.

GUN WALTZ

At 18th level, if you gain at least two additional attacks with spastic shot, you also gain a +1 bonus to AC and +5 foot bonus to your speed until the end of your next turn (not cumulative).

INFANTRY

SUPPORT SPECIALIST

You are not placed on this world to lead. You support those that have earned your loyalty. You are an infantry support specialist. You carry the largest weapons and know how to employ them effectively without endangering the lives of your allies.

Your only weakness is your speed. Being the heaviest hitter has also often made you the slowest. Your abilities are based upon lying down heavy fire and to prevent the approach of invading forces.

SYNERGY

This archetype works best with the grounder, heavy, marshal, and techie classes.

PROFICIENCIES

You have proficiency with simple melee weapons, all small arms, heavy weapons, super heavy weapons, and two specialty weapons of your choice.

WEAPONS PLATFORM

Beginning when you choose this archetype at 3rd level, spend 30 feet of movement on your turn to gain a +1 bonus to attack rolls with auto or auto-heavy weapons until the start of your next turn.

FOCUSED BARRAGE

Starting at 7th level, as an action, if using an auto or auto-heavy weapon, you can target a single creature with a barrage. The DC of the Dexterity save to resist your attack is 8 + your attack ability modifier + your proficiency bonus + any weapon bonus. A target takes double your weapon damage dice on a failed save, or half as much damage on a successful one.

LAWNMOWER BARRAGE

Starting at 11th level, you can move 5 feet without incurring attack penalties with two-handed small arms and heavy weapons (but not super heavy weapons). At 11th level, you can plant a super heavy weapon as a bonus action.

THE MEAN ONE

Starting at 15th level, all opponents within 20 feet of you suffer disadvantage on any attack that doesn't include you, and you gain a +5 bonus to damage rolls with ranged weapons against them.

LET'S ROCK!

Starting at 18th level, you can use an action to make a single ranged attack against each enemy in range you can see. Once you use this feature, you cannot use it again until you finish a short or long rest. If no targets are hit by this action, you regain the use of this feature.

MACHINE OF WAR

There are some that accuse you of being a warmonger. This may be true but the fact is that there will always be a war somewhere. Your nation or your pocket-book will always be threatened. You have found a niche and fill it well. You may even acknowledge that this journey is only taken on by someone psychotic. Most heroes are insane anyway. At least you're aware of how close you are to losing it. If there was no war, you would be the type picking fights in bars, eventually committing suicide with the very weapon you used to dispatch your foes.

It's a great time to be alive. In this world, there is always a war, always an evil, always an opponent. You spend your life hunting and destroying monsters that obsess over leaving a scar upon planet and people as proof they existed. Medals are for the weak. All you require is a reliable weapon, an enemy, and finger to point the way. Morality and motivation are only convenient crutches you're happy to use when the need arises. You sometimes wonder if you're a good person or just thankfully on the right side. You take the actions you do as proof of your ethics. Save the innocent or kill the bad guy. Regardless of your response, your allies are thankful you're on their side.

SYNERGY

This archetype works best with the grounder, gunslinger, martial artist classes.

ADRENALINE RUSH

Beginning when you choose this archetype at 3rd level, each time you make an attack against a creature within 30 feet of you, you regain 1 hit point of damage. For every ten hit points recovered this way, you gain one additional attack with your next Attack action.

GLAZED LOOK

Starting at 7th level, if you are reduced to 0 hit points by a non-critical hit, you automatically use and roll a Hit Die as a reaction, but only regain half the result (round up).

YOU WANT SOME OF THIS?

Starting at 11th level, you can allow enemies to have advantage on you until the beginning of your next turn. Until the beginning of your next turn, you have advantage on attack rolls and regain 2 hit points instead of 1 with *Adrenaline Rush*.

RISKY MANEUVER

Starting at 15th level, if you have less than 15 hit points, double your proficiency bonus on attack rolls.

ULTIMATE BADASS

Starting at 18th level, when your hit points are reduced to half your total hit point value or less, you gain a bonus to damage equal to half your Constitution bonus. When your hit points are reduced to one-quarter your total hit value or less, this bonus increases to your full Constitution bonus.

MAN-AT-ARMS

You are a professional soldier. You've been so since the moment you picked up a weapon. The only thing you can depend on is your firearm. By the end of the day, it is the most reliable friend you have. Having ventured into this wasteland these outsiders call home, you dedicate most of your time to ensuring your weapon does

not break or jam. War is all you know, and you're good at it.

SYNERGY

This archetype works best with the grounder, gunslinger, heavy, and sniper classes.

PROFICIENCIES

You have proficiency with all armor (except exo-armor), small arms, heavy weapons, super heavy weapons, and any two specialty weapons of your choice.

THIS IS MY RIFLE

Beginning when you choose this archetype at 3rd level, select one specific firearm: you gain a +1 bonus to attack rolls and also do not suffer disadvantage on attack rolls when prone with your chosen weapon.

This is your chosen weapon for all man-at-arms abilities. When reaching a new level, you may select a different weapon.

MY WEAPON IS MY BEST FRIEND

Starting at 7th level, you can change a clip, magazine, or a cell on your chosen weapon without taking an action. Once you use this feature, you cannot use it again until you finish a short or long rest.

FIRE MY WEAPON TRUE

At 11th level, once per turn if you have advantage on your ranged attack roll with your chosen weapon and both rolls hit, you are considered to have hit twice (using additional ammunition accordingly).

WE ARE MASTERS OF OUR ENEMY

Starting at 15th level, once per turn if you drop a creature to 0 hit points using a firearm, you can make a single ranged attack as part of the same action.

INSEPARABLE APPENDAGE

At 18th level, your chosen weapon becomes as much a part of you as an arm. You can re-roll one natural 1 on an attack roll with that weapon—once you use this feature, you cannot use it again until you finish a short or long rest. Additionally, your chosen weapon cannot be targeted or destroyed, you cannot be disarmed of it, and you can stow your chosen weapon and draw a one-handed small arm without taking an action.

MILITARIST

You have probably graduated from a command school or officer college. You emerged as a trained, disciplined leader, ready to rally the uncontrolled masses. You are

not some desk jockey trained from books. You possess natural, applicable talents, earning the respect that goes along with them.

SYNERGY

This archetype works best with the grounder, marshal, medic, and sniper classes.

COORDINATION

Beginning when you choose this archetype at 3rd level, you receive Tactical Points (TPs) each time something unfortunate happens to you or an ally. As these points compound, you are able to counter with positive effects. Points are lost when you take a short rest or long rest or when you roll for initiative. Spending points usually takes either a bonus action or a reaction.

You receive 1 point when each of the following occurs.

- An ally you can see or communicate with rolls a natural 1 on an attack roll.
- An ally suffers a critical hit.
- An ally is reduced past half hit points.
- An ally is reduced to zero hit points.
- Three or more allies suffer damage from an area effect.

You can then spend acquired TPs the following ways.

Elevate Strategy (3+ points)

As a bonus action, select one ally per 3 points spent; the targeted ally immediately gains an action and can either move or take a bonus action. Targeted ally still gets her turn when it comes up.

Eyes Around (2-6 points)

As a bonus action, select one ally per 2 points spent (maximum 3 allies); the targeted ally makes a single attack.

Intelligent Defense (1 point)

One ally gains a +3 bonus to AC until the beginning of your next turn: if you move before then, the bonus is lost.

Opportune Weakness (2 points)

As a reaction, one ally's hit becomes a critical hit.

Outmaneuver (1 point)

Spend 1 point and 30 feet of movement to move a creature within 30 feet of you that is your size or smaller up to 5 feet (it cannot be moved into hazardous terrain).

The target suffers disadvantage on attack rolls until the beginning of your next turn.

Shift Battle Theater

(1-3 points)

As a bonus action, select one ally per 1 point spent (maximum 3 allies); the targeted ally can either make Disengage action for free on her turn or can move immediately up to 20 feet.

Reverse Course Of Action

(10 points)

As an action, all enemies you can see are stunned until the beginning of your next turn.

REEVALUATE STRATEGY

Starting at 7th level, instead of using your Hit Dice to recover hit points during a short rest, you can use them to gain TP points. For each Hit Die spent this way using a bonus action, you gain 1d4 TP.

TIDE OF WAR

Starting at 11th level, you gain 1d4 each time you meet a Coordination condition instead of 1.

BATTLE INSTINCT

Starting at 15th level, if enemies gain a surprise action, you gain 5 TP. If a creature hits you, you gain 1 TP.

BATTLE LEADER

Starting at 18th level, if you are reduced to zero hit points, you gain 10 TP and can use as many Coordination abilities as you want and can afford as a reaction.

PATHFINDER

You move in darkness behind enemy lines. You sneak under heavy cover into prohibited areas. You know how to avoid cameras, dogs, and roaming guards. You sneak through the shadows or stroll in broad daylight, given the proper circumstances.

SYNERGY

This archetype works best with the face, infiltrator, martial artist, and sniper.

PROFICIENCIES

You have proficiency with Dexterity (Stealth).

DUST

Beginning when you choose this archetype at 3rd level, you gain the ability to slip into the shadows. If no opponents can see you (utilizing cover, creating a distraction, or simply passing between objects to break line of sight—even for a split second), you can use your dust pool to teleport a distance away to an area out of sight of any opponent.

Although by the rules this is a teleport, you have to be able to feasibly reach the new area (i.e., you can't pass through bars). Climbing and crawling can be considering part of the move. Your dust pool is emptied when you finish a short rest, long rest, or when you roll for initiative. Your dust movement replaces your normal movement—it does not add to your existing movement made during a turn.

For every 10 feet you don't move on your turn, you fill your dust pool by 5 feet. Your dust pool maximum is listed below.

3rd Level: 20 feet

7th Level: 25 feet

11th Level: 30 feet

15th Level: 35 feet

18th Level: 40 feet

BACK OF YOUR HEAD

Starting at 7th level, if you roll 5 or less on any Dexterity (Stealth) checks, you can re-roll.

LIKE A HAWK

Starting at 11th level, if you use at least 10 feet from your dust pool on your turn, your speed can increase by 10 feet on that same turn.

UNDER ANY SHADOW

Starting at 15th level, if benefiting from cover at the beginning of your turn, you can maintain that same cover until the beginning of your next turn, regardless of where you move.

COMPLETE COVERTNESS

Starting at 18th level, if you use at least 20 feet from your dust pool on your turn, your speed can increase by 20 feet on that same turn. (20 feet total with *like a hawk*).

PISTOLERO

You believe your abilities to be naturally canny skills developed over years of hard training and discipline. You possess the capacity to be in the right place at the right time in close combat to place a perfect shot. You prefer to present yourself in close quarters, preventing enemies from striking from a distance. You maneuver to get close, maximizing your firing potential while reducing the capacity to be hit in return. It is not unheard to jump in the midst of an enemy squad, take every one down at point blank range, and walk away without a scratch.

To do that, you must get close, study your targets, and make every shot count. You study a scene in seconds and know exactly where to stand and in what position to offer the greatest level of defense while making

your weapons lethal with a single shot.

SYNERGY

This archetype works best with the gunslinger, medic, and techie classes.

PROFICIENCIES

You have proficiency with all one-handed small arms.

POINT SHOT

Starting at 3rd level, as an action, you can make a single ranged attack with a non-auto one-handed small arm against a creature 20 feet or closer. You inflict an additional 1d6 damage on a hit, increasing this damage by one step at 7th, 11th, 15th, and 18th level (1d6 > 2d6 > 3d6 > 4d6 > 5d6 > 6d6 > 7d6 > 8d6 > etc.). Any additional effects which increase damage this way, including other pistolero abilities, are compounded.

WEAVER STANCE

Starting at 7th level, you can wield a single one-handed small arm with two hands. If so, you suffer a -10 foot penalty to speed but increase Point Shot damage by 1d4 steps.

KILL SHOT

Starting at 11th level, you make sure each opponent is dead before moving on. If your Point Shot attack reduces a creature to fewer hit points than your level, as a bonus action, you use one additional round of ammunition to kill the target.

KINETIC SHOT

Starting at 15th level, if you act before an enemy after rolling initiative, you can increase your Point Shot damage against that enemy by four steps.

ONLY NEED ONE

Starting at 18th level, if you score a critical hit with a Point Shot attack, increase your damage by four steps.

RECON INTELLIGENCE

You dig yourself in and become one with the terrain. You ignore wind, rain, or even wandering monsters. Nothing distracts you. An entire army could pass without noticing. Even your attack is as silent as a mosquito bite, though far deadlier.

You approach your target and wait for the perfect moment. You adjust for every possible condition, from gravity to wind. When finally squeezing the trigger, only God could stop that round from finding its target. You never miss, as your purpose is to never give a foe the benefit of a reload. When you take out your target, your single goal, you slither away to your next objective. Your foes can dissect the terrain looking for you, but

you were never where they thought. As they hunt you down, you aim for your next victim.

SYNERGY

This archetype works best with the face, medic, techie, and sniper classes.

PROFICIENCIES

You have proficiency with light armor, ghillie/yowie suits, and sniper weapons. You also have proficiency with Dexterity (Stealth) checks.

FLAWLESS REPUTATION

Beginning when you choose this archetype at 3rd level, when you make a Dexterity (Stealth) check against a target's Wisdom (Perception), roll 1d10 and put it aside—this is your reputation die. You can use that result to affect the natural result of any d20 roll made for an attack or a Dexterity (Stealth) check, including the one you just made. You can only set aside 1 die at a time, and can replace one with a better result if it comes up. You lose any acquired reputation die when you finish a long rest.

YOWIE SPECIALIZATION

Starting at 7th level, if you use a ghillie/yowie suit in its proper environment, use an action to become invisible until you move or make an attack.

BRILLIANT SHADOW

Starting at 11th level, roll all acquired reputation dice twice and set aside the higher value.

PSYCHOLOGICAL WARFARE

Starting at 15th level, if you drop a creature 25 feet away or further to 0 hit points, you gain one additional reputation die—in addition to any already acquired.

SPECTER

Starting at 18th level, you can have two reputation dice at once, (three if one is acquired from Psychological Warfare).

RING FIGHTER

You have the belt. You've claimed the trophy. Few others boast the record you have. You fought hard and trained hard for the respect and it is well earned. In the realm of physical training, there is no better.

SYNERGY

This archetype works best with the grounder, gunslinger, marshal, and martial artist classes.

PROFICIENCIES

You have proficiency with simple melee weapons.

GRAPPLE DISCIPLINE

Beginning when you choose this archetype at 3rd level, you are able to gain the upper hand in almost any close combat situation. You have advantage on all rolls related to grappling.

GUARD CONTROL

Starting at 7th level, while grappling a creature, you gain a +1 bonus to AC.

TOLERANCE THRESHOLD

Starting at 11th level, if you are grappling a creature, you have resistance to any piercing, bludgeoning, or slashing damage from the target.

CHOKE / LOCK

Starting at 15th level, each turn you sustain a grapple on a creature, you inflict damage equal to your Strength or Dexterity modifier on the target. This does not count as an action.

MOUNTED ATTACK

At 18th level, you gain complete control over every opponent. While grappling a creature, it suffers disadvantage on escape attempts.

SAPPER

Combat engineers have a long and respected history. You can be a bridge builder and a bridge destroyer. You approach bombs while others turn and run. With seconds on the clock, others give up while you take it as incentive.

SYNERGY

This archetype works best with the marshal, medic and techie classes.

PROFICIENCIES

You have proficiency with Intelligence (Demolitions).

THE LONG WALK

Beginning when you choose this archetype at 3rd level, you have advantage on Intelligence (Demolitions) checks.

RENDER SAFE PROCEDURES

Starting at 7th level, if forced to make a Dexterity saving throw, you can move 5 feet as a reaction but before needing to roll (possibly escaping the area of effect).

SLIGHT CHEMICAL IMPROVEMENT

Starting at 11th level, when you detonate explosives you have set with a blast radius of 10 feet or more, you increase the blast radius by another 5 feet.

PROPER APPLICATION

Starting at 15th level, when determining the saving throw DC for explosives you set, double your Intelligence modifier.

SCORCHED EARTH

Starting at 18th level, your explosives have a tendency to set off chain reactions. After you detonate an explosive, a lingering fire breaks out until the start of your next turn, dealing your Intelligence modifier in fire damage to any targets entering or starting their turn in the affected area. The fire lasts for 1 minute.

SELFLESS PROTECTOR

From the traditions of the most respected security forces on the planet, you possess a natural instinct to protect those assigned to you. You may never have taken a bullet but likely neither has your target. You can spot threats from miles away and can act to move your ward to a better position if that threat gets too close.

SYNERGY

This archetype works best with the face, grounder, heavy, and martial artist classes.

TAKE A BULLET

Beginning when you choose this archetype at 3rd level, you can select one creature within 5 feet of you to be your focus. As long your focus remains in reach of you, he can use your AC if it is higher than his. If your focus is hit by an attack or fails a Dexterity saving throw, you can take any damage and/or effects instead. When you move, you can pull your focus with you. Once you select your focus, you cannot select another until after your take a short rest. If your focus moves out of reach, it no longer benefits from *selfless protector* until he or you returns.

LICENSED RESPONSE

Starting at 7th level, if your focus is hit with an attack, regardless if it suffers any damage, you can make an attack against the attacker as a reaction. If your focus suffers damage, you have advantage with this attack.

JOB WELL DONE

Starting at 11th level, as long as you are actively protecting your focus, you gain a +1 bonus to AC. Additionally, when you take a short rest, if you previously selected focus had suffered no damage, you regain double your Hit Dice.

EVASIVE TECHNIQUES

Starting at 15th level, if your focus is within reach and is caught by an area effect, as a reaction, you throw your focus up to 15 feet away before the effect activates.

KEEP IT TOGETHER

Starting at 18th level, each time you regain hit points, you can give your focus any amount of the hit points instead.

SKIRMISHER

Not all snipers are made alike. For you, your specialty is not in individual assassination, but in the disrupting of enemy lines by surgically removing officers and other threats. As a force of chaos, you cause disarray and fear in your enemies.

SYNERGY

This archetype works best with the grounder, infiltrator, medic, and sniper classes.

PROFICIENCIES

You gain proficiency with all sniper weapons.

AUTOMATIC REFLEXES

Beginning when you choose this archetype at 3rd level, after you hit a creature 25 feet away or farther on your turn with a ranged weapon, you can make a single ranged attack as part of the same action against any other target in range. If you hit a target with this attack, you cannot use automatic reflexes again until you take a short or long rest.

You gain an additional use at 7th, 11th, 15th, and 18th level before needing to take a short or long rest.

WASTE OF SKILL

Starting at 7th level, if you score a critical hit, you may choose inflict normal damage and instead make single ranged attack against any target in range as part of the same action. You cannot score a critical hit with this additional attack. You can only use this feature once per turn.

THE SECOND SHOOTER

Starting at 11th level, after making a ranged attack against a creature 50 feet away or farther, you can move up to 15 feet of your speed and not be counted as having moved.

SPLINTERING SHRAPNEL

Starting at 15th level, if you drop a creature 25 feet away or farther to 0 hit points, each creature within 5 feet of the target takes damage equal to your attack ability modifier.

PERFECT SHOT PLACEMENT

Starting at 18th level, you are able to make multiple shots without a significant reduction in accuracy. If you drop a creature 50 feet away or farther to 0 hit points, you can make another single ranged attack with the

same weapon as part of the same action. You can only use this feature once per turn.

SUAVE

You are debonair and charming, using your natural gifts to get you into areas keys never could. You talk, walk, and sway your way with a talent you've perfected years before ever holding a firearm.

SYNERGY

This archetype works best with the face, marshal, martial artist, and medic classes.

PROFICIENCIES

You have proficiency with Charisma (Deception), Wisdom (Insight), Wisdom (Perception), and Charisma (Persuasion).

IT'S THE CLOTHES

Beginning when you choose this archetype at 3rd level, if wearing no armor, you double your proficiency bonus with Charisma (Deception) and Charisma (Persuasion) checks. You also gain a +1 bonus to attack rolls.

SHAKEN, NOT STIRRED

Starting at 7th level, while wearing no armor, you have advantage on all saving throws.

SPILED DRINK

Starting at 11th level, if you fail any skill or tool check, you have advantage on attack rolls until the end of your next turn.

SURREPTITIOUS WALK

Starting at 15th level, select one creature you can see; you can spend your action to have advantage on your next Wisdom or Charisma skill check against the target.

MESMER STARE

Starting at 18th level, you can triple your proficiency bonus to your next Charisma skill check. Once you use this ability, you cannot use it again until you finish a long rest. You also regain *Mesmer Stare* if your skill check fails.

CHAPTER SIX

EQUIPMENT

TECH LEVEL

An item's Tech Level is an indicator of how advanced its technology is. Most items have a Tech Level (TL) of 0, meaning they have no considerable advantage over other items. Higher levels involve lasers, magnetics, powered armor, and plasma weapons, which are not available in most modern settings. Equipment is listed having a TL of 1, 2, 3, 4, or 5. If an item doesn't have an indicated TL, it is 0.

Modifications for Tech Level: If setting a game at TL1 or higher, the cost of gear at that level and all lower levels (except TL0) is reduced by 50%. While the cost of equipment of a higher TL than the campaign standard should not increase, the availability of such equipment should be strictly controlled. The assumed 'default' TL for most U5 games is TL2 (present day-near future).

Cost: If setting a game at TL1 or higher, the cost of gear at that level and lower levels (except TL0) is reduced by 50%.

TECH LEVEL 0

This level covers the entirety of civilized history until the early industrial era, stopping before the harnessing of electric power: everything from the discovery of the wheel to its use in manufacturing.

Vehicles: Gliders or basic aero-forms. Both ground and aircraft are limited to archaic steam power.

Weapons: All weapons rely on chemical propellant with simple loading mechanisms. The blunderbuss and musket are examples.

Medical: Natural healing. TL0 benefits more from rediscovered human knowledge about biology than the tools that were developed consequently. Surgery can cure most wounds, but recovery can last a while.

Similarity: Up to mid-18th century.

TECH LEVEL 1

At this level, machines come into their own. Internal combustion and steam power have been perfected. Electric power and road vehicles are changing the way cities are built.

Vehicles: Ground vehicles are run off internal combustion and basic electrical systems. The fact they are mass produced is the real achievement. Aircraft are flown by manual controls and receive propulsion from propellers.

Weapons: Bolt action rifles and revolvers. Cartridge-fed firearms are becoming more common.

Medical: The implementation of the scientific method, and laboratory research has resulted in vaccines and the basics of genetic engineering. Drugs have become commonplace.

Similarity: 19th to early 20th Century.

TECH LEVEL 2

At this level, almost every form of technology has integrated electronics and advanced computer control. Electrification is now commonplace, though computers have yet to dominate civilization.

Vehicles: Ground vehicles now sport electronics; some even have climate control and electronic stability. Aircraft now have fly-by-wire, vectored thrust and vertical-take-off capacity.

Weapons: Computer tracking and targeting. Infrared and thermal imaging is available, but not standard. Firearms haven't changed but have grown more complicated with advanced reloading and higher firing rates. Advances in construction make them lighter with larger calibers.

Medical: Computer diagnostic beds, MRIs, and X-Rays.

Similarity: Mid 20th century to the not too distant future.

TECH LEVEL 3

Refinements in the manipulation of magnetic fields and energy levels characterize this stage. Computers now control most of civilization and link all its citizens together.

Vehicles: Vertical take-off fan craft and wingless jets keep aircraft aloft, are much more stable, and can fly rings around more primitive craft. Aircraft designs are no longer dominated by their massive aero-forms. Ground vehicles still use wheels but now mass transit magnetic vehicles appear as an alternative.

Weapons: There will always be bullets, but the rise of both railcannons and self-propelled projectiles offer alternatives. Laser weaponry in its infancy. Advanced magnetics. Prototype exo-armor appears.

Medical: Most known diseases are curable. Healing time cut to one-third with medical attention. Nanotech healing isolated in the laboratory.

Similarity: This tech level would appear to be ultra-high-tech to a 21st century observer, but still vaguely familiar.

TECH LEVEL 4

At this level, energy is almost as freely manipulable as matter and nanotechnology is ubiquitous.

Vehicles: Robots appear beyond the role of "dumb tool." Exo-armor is mass-produced. Wheeled traffic virtually nonexistent or, if it exists, can traverse any terrain. Ramjets shrink and provide massive thrust in small packages, revolutionizing transportation outside of magnetic-traffic.

Weapons: Laser weapons "tunable." Plasma weaponry. Bolt weapons are outdated.

Medical: Nanotechnology can heal any wounds and even regenerate limbs.

TECH LEVEL 5

Any sufficiently advanced technology would be indistinguishable from magic...if magic didn't break sufficiently advanced technology.

Vehicles: Common antigravity replaces all previous transportation.

Weapons: Disruptors, vapor rifles, disintegrator weaponry.

Medical: Complete body reconstruction.

APPLICATION OF TECH LEVELS

The tech level can affect the difficulty and cost of the crafting, repairing and modifying of technology. It can also affect its rarity.

TL 0 and TL 1: Common. All items with no listed TL are TL0.

TL 2: Uncommon

TL 3: Rare

TL 4: Very Rare

TL 5: Legendary

If setting a game at a higher TL, you can shift the rarity down to make items more common. Certain items (like exo-armor) may be rarer than their listed tech level. They may also count as multiple items. Tech levels can also apply in other ways depending on the device in question: see the item descriptions for details.

BATTERY CELLS

Many of the objects in the following sections require batteries. A required battery is included in the item's purchase price (two with weapons). You cannot replace one type of battery for another type under ANY circumstances.

If a weapon's ammunition capacity or an item's consumption capacity is listed alongside a "B", "M", or "H", then that item uses a battery cell.

BATTERY CELLS

The three different types of battery cells are as follows:

Basic (B): These cells are for smaller items and cost \$2 each. Ten cells weigh 1 lb.

Medium (M): These cells power many weapons, smaller vehicles, and larger equipment. They cost \$10 each. One cell weighs 0.25 lb.

High (H): These cells are large, powerful, and usually reserved for huge weapons and massive energy equipment. They cost \$40 each. One cell weighs 2 lbs.

WEAPONS WEAPON GROUPS

The weapons covered here are grouped into the following categories based on their general utility. They do not fall into the normal categories of simple or martial weapons.

HEAVY WEAPONS

These large weapon systems require a tripod, a base, a platform, or any other stable point from which to fire.

Properties: Heavy weapons use the same general rules as ranged weapons, except as follows:

- Because of their cumbersome nature, if you move or are moved any distance you have disadvantage on attack rolls with heavy weapons until the beginning of your next turn.
- Unless mounted, heavy weapons require at least Strength 13 to use.

These weapons may be purchased for a Large user (e.g. exo-armor). If so, the heavy weapons counts as a

two-handed weapon. It can no longer be used by Medium-sized users.

SMALL ARMS, ONE-HANDED

These single-handed firearms are renowned for their ease of use and compact style, making them an easy choice for those preferring stealth.

Properties: One-handed small arms use the same general rules as ranged weapons, except as follows:

- You do not have disadvantage on attack rolls if you are within 5 feet of a hostile creature who can see you and who isn't incapacitated.
- One-handed small arms cannot be wielded by Large or larger creatures (e.g., exo-armor).
- You do not suffer disadvantage on ranged attack rolls if you are prone and proficient with the weapon you are using.
- If your Strength is 13 or higher, one-handed small arms without the Light property gain the property.

SMALL ARMS, TWO-HANDED

These are larger, slightly clumsier weapons usually preferred for longer ranges and high stopping power. With the development of technology, the latter became less a factor, but two-handed arms have the capacity for larger magazine capacities, greater accuracy, and the option of fast automatic fire.

Properties: Two-handed small arms use the same general rules as ranged weapons, except as follows:

- Because of their cumbersome nature, if you move or are moved more than 5 feet, you suffer a -2 penalty to attack rolls with two-handed small arms until the beginning of your next turn.

These weapons may be purchased for a Large user (e.g. exo-armor). If so, a two-handed small arms counts as a one-handed small arm. It can no longer be used by Medium-sized users.

SUPER HEAVY WEAPONS

These are weapons with the potential of incredible damage but balance that with a cumbersome design. These large weapon systems require a tripod, a base, a platform, or any other stable point from which to fire.

Properties: Super heavy weapons use the same general rules as ranged weapons, except as follows:

- Super heavy weapons come equipped with a tripod (unless mounted on a vehicle or exo-armor).
- You must use an action to plant a super heavy weapon in the ground. Once planted, it cannot be moved unless you use an action to uproot it. If you fire a non-planted super heavy weapon, you suffer disadvantage on attack rolls with the weapon. If your Strength is less than 18, immediately after the attack is resolved, you are pushed 5 feet and knocked prone.

These weapons may be purchased for a Large user (e.g. exo-armor). If so, a super heavy weapon counts as a heavy weapon. It can no longer be used by Medium-sized users.

MELEE WEAPONS

Close combat is not the focus of the modern high-tech military. Though a knife will always be standard equipment, it is more often used as a utility item rather than a weapon, at least until the pistol runs out of bullets. As expected, the concepts of laser swords and monomolec-

ular whips are constructs of pure science fiction, and are considered neither possible nor practical for a modern military.

Size: Like firearms, melee weapons can be enlarged for Large users (exo-armor). If one is purchased this way, it can no longer be used by Medium-sized users.

Power: Like firearms, you only use a charge when you make an attack with a melee weapon that has an energy cell. Using the weapon for intimidation does not expend energy (unless you want it to).

NEW WEAPON PROPERTIES

AP (Armor Piercing)

This weapon ignores a target's resistance to the weapon's damage type (e.g.: a piercing weapon ignores resistance to piercing). If the target has fantasy damage resistances, the weapon also counts as magical, silver, and adamantine.

If an opponent has immunity to the weapon's damage type and the weapon has the AP property, the opponent has only resistance to that weapon instead of immunity.

Augment

An augment weapon uses your unarmed strike damage dice. An unarmed strike can only benefit from one augment weapon per hit. By using an augment weapon, you are still counted as being unarmed.

Auto / Auto-Heavy

Auto weapons have the capacity of firing several rounds with each attack. This is used with area effects and when increasing damage against specific targets. A weapon with an auto property need not employ that property, though some abilities require it. Auto weapons are broken up into two subcategories, auto and auto-heavy.

Auto weapons can fire in single-shot mode or in 5-round bursts (called an autofire attack). Auto-Heavy can fire in single-shot mode or in aggressive 10-round bursts (also called an autofire attack). In single-shot mode, the weapon uses its normal damage die. In autofire mode, use the alternate damage value listed on the table.

All auto or auto-heavy weapons also have the burst fire property (thus it is not listed on the table). When making a burst fire attack with a weapon with the auto property, you use ten rounds of ammunition, but do not use the improved damage die. With the heavy-auto property, you use ten rounds of ammunition *and* the improved damage die.

Burst Fire

Burst fire allows the use of a burst fire attack. A burst fire weapon will always have either the auto or auto-heavy property (and as such the burst fire property is not listed on the table). A burst fire attack sprays a 10-foot-cube area within normal range with ten rounds of ammunition. Each creature in the area must succeed on a Dexterity saving throw or take the weapon's normal damage. The DC of burst fire attacks is either 15 or is equal to $8 + \text{your Dexterity modifier} + \text{your proficiency bonus}$ if proficient.

Direct

Only certain weapons with the exp property have this property. Instead of targeting an area, this weapon can make a direct attack on a creature. Make a ranged attack: if successful, the target is automatically ground zero of the explosive attack and does not make a saving throw. It also has the potential to suffer a critical hit: otherwise, proceed with the explosive attack as normal, with the target's position as the intended point. Additionally, if you hit the intended target with an explosive attack, roll all damage dice twice and take the higher values. Creatures in the area of effect still make a Dexterity saving throw. If you miss the intended target, the point of impact becomes a random location within a 15-foot radius of the target (which can still suffer from the area of effect blast).

Electronic Stacked Projectiles

No longer are bullets loaded from an external magazine and launched via a firing pin. Now they are loaded directly into the barrel, separated only by propellant. The concept dates back to traditional fireworks except the stacked projectile weapon does not need to fire its entire payload when ignited. Electrical pulses launch the bullets in the proper order. Misfires are pushed out by the next round, preventing backfire. This removes the need for a magazine, a firing pin, or for that matter, any moving parts at all. The greatest advantage of this technology is a phenomenal firing rate, capable of discharging rounds literally as a stream of bullets.

ESP weapons have both the auto and auto-heavy property. You can only have one in effect at a time, and can switch between them as a bonus action.

EXP

Explosives have an area of effect at the point of impact of 5 feet or more. Additionally, if an explosive's area of effect is impeded by indestructible terrain (like in a dungeon corridor), the explosion carries over to unaffected areas. For every 5 feet impeded by indestructible terrain, the area of effect shifts over to occupy the same area. If both sides of an explosion are occupied by indestructible terrain (like a narrow corridor), the blast carries up and down the corridor. This rule doesn't go into effect if the explosion can damage the obstructing terrain. The number listed next the "Exp" entry indicates the size of the radius in feet. Unless otherwise stated, explosive attacks inflict bludgeoning damage, and also deal extra damage to creatures vulnerable to fire as if they dealt that damage type.

Attacking with Explosives: When using any weapon with an area of effect, you don't make a ranged attack but rather establish a Dexterity saving throw DC that affected creatures must beat. The DC for the Dexterity saving throw equals $8 + \text{your Dexterity modifier} + \text{your proficiency bonus}$ (if proficient in the weapon you are using).

Feed

This property pertains to a weapon with neither a clip nor a magazine. It is either a weapon with a single-shot charge or it is a firearm that can only be loaded one round at a time. With an action and/or a bonus action (the character's choice), one shot is reloaded in the weapon. Like magazine/clip-based weapons, there is a maximum number of shots you can load. If a character has additional actions in a turn, these can be used to load as well.

Grenade

Grenades use their own form of attack depending on the specific grenade.

WEAPON	COST	DAMAGE	RANGE	WT.	PROPERTIES
One-Handed Small Arms					
<i>Starting Weapons</i>					
Air dart pistol	150	Special	20/100	4 lb.	Light, loading, undermount
Break-action shot pistol	300	1d8 piercing	25/50	3 lb.	Feed (2 shots), shotgun, undermount
Capcism spray	55	Special	10/40	2 lb.	Feed (3 shots), Light
High-calibre autoloader	250	1d6 piercing	50/200	2 lb.	Reload (8 shots)
Low-calibre autoloader	250	1d4 piercing	40/160	2 lb.	Light, Reload (16 shots)
Machine pistol	300	1d4 piercing	50/200	3 lb.	Auto (1d6), reload (20 shots)
One-handed grenade launcher	300	Special	50/200	8 lb.	Grenade, loading, undermount
Pocket pistol	200	1d4 piercing	40/160	1 lb.	Light, reload (3 shots)
Revolver	150	1d4 piercing	50/250	2 lb.	Feed (6 shots), light
<i>Advanced Weapons</i>

Guided

These weapons assist in aiming after being fired and can even make a secondary attack if the first one misses.

As many times a day as the weapon's TL +2, you can either have advantage on the attack roll or reroll a missed attack and take the second result. If you choose to reroll a missed attack, it does not take effect until the end of the target's next turn.

Laser

Any condensed, well-defined beam of light or heat can be considered a laser. In history, the initial weapons concentrated radiation to a focal point, burning the target with intense heat: such beams were usually invisible, which is useful for stealth but less so for accuracy. Later developments increased the size, damage potential, and visibility of these beams. Often, lasers are confused with pulse plasma weapons. The largest difference is that lasers cut while plasma splashes. Laser weapons give away their firer's position but deliver devastating damage few can resist. They can also track targets easier with subsequent damage. There are laser pistols, rifles, and thumper cannons.

Laser weapons deal fire damage. If you hit with a laser, you gain a +1 bonus to your next attack roll against the same target. This is lost if you don't fire at the same target or if you miss. If you attack an obstruction or inanimate object, you inflict additional damage equal to twice your tech level.

Goggles Do Nothing: If you roll a critical hit, the target is blinded until the beginning of your next turn.

Magnetic

The specific process of accelerating metal shells using magnetism is complicated, with coil-based and rail-based technology launching shells using different means.

If you roll a critical hit with a magnetic weapon, you inflict additional damage equal to twice the weapon's tech level. If you kill a creature, the shell continues on a straight path from the weapon, making a single free attack on one creature in direct line of effect within the weapon's range.

Power: Magnetic weapons have a magazine but require power from a power cell to operate the magnetic acceleration (H for heavy and super-heavy weapons, M for all others). One is included with the weapon.

Mastercraft

A mastercraft item is simply a more refined, better variation of an already existing design. These are a notch above despite sharing all other qualities with a mundane design.

A mastercraft weapon deals +1 damage if any of its damage dice result in a maximum result. This is in addition to any other effects that occur when the maximum result is rolled.

Nuclear

These are directed energy weapons similar to plasma and laser guns. Where a laser inflicts condensed radiation and plasma inflicts severe heat, weapons with the nuclear property inflict damage via a high-energy beam of atoms. Upon impact, they disrupt the molecular structure of the target. Tissue damage from radiation is an often side effect. This technology has been dubbed a "dirty solution", as it emerges frequently before the

WEAPON	COST	DAMAGE	WT.	PROPERTIES
Martial Ranged Weapons				
Compound longbow	500uc	Special piercing	4 lb.	Ammunition (range 200/600), heavy, two-handed
Carbon Crossbow	500uc	1d10 piercing	6 lb.	Ammunition (range 200/600), heavy, loading, two-handed

advancement of high-powered lasers and plasma weapons. In other circles, these devices have been called particle accelerators.

Nuclear weapons inflict force damage, and also deal additional damage to creatures vulnerable to necrotic as if they dealt that damage type. If you hit with a nuclear weapon, every subsequent hit on the same target gains a +1 bonus to damage. This is cumulative up to the weapon's tech level and is lost if you don't hit that same target before the end of your next turn. If you roll a critical hit, the target is poisoned until the beginning of your next turn.

Pincher

These weapons deliver an electromagnetic pulse that disrupts any item that requires a battery or an electric current to operate.

Pincher weapons inflict lightning damage. If you roll a critical hit on the attack roll and the target is not immune or resistant to lightning damage, the target takes additional damage equal to twice the weapon's tech level, and the target has disadvantage on ability checks and attack rolls until the beginning of your next turn.

Disruption: All functions of battery-powered technology on the target stops working until the end of your next turn.

Plasma

Any weapon employing ionized gas is considered a plasma weapon. A plasma weapon fires a toroid of superheated gas inside a magneto-hydrodynamic bubble that is then accelerated from the barrel in the same way a railgun fires its iron-core shell. The bubble remains

solid for a significant time, or until it strikes its target, at which point the bubble is dispersed and delivers its energetic payload as a cloud of intense heat. There are plasma pistols, rifles, and cannons.

Plasma weapons inflict force damage, and also deal additional damage to targets vulnerable to fire as if they dealt that damage type. Otherwise, the heat generated is too high for a creature resistant to fire to be resistant. Creatures immune to fire are only resistant to plasma weapons. If you roll a critical hit with a plasma weapon, you inflict twice the tech level in additional damage on this turn, twice the tech level -1 on the beginning of your next turn, twice tech level -2 on the beginning of the following turn, and so on until 0.

Directed Energy: As many times a day as the weapon's tech level, you can attempt a directed energy attack—make a single attack, firing a single shot, as an action. On a hit, roll all damage dice twice and take the higher result, add all relevant modifiers as normal, and add twice the weapon's tech level. Each creature within 5 feet of the hit target also suffers damage equal to twice the weapon's tech level. If you miss, the initial target suffers half damage with no area effect.

Reload

This property pertains to a magazine- or clip-fed weapon. A magazine or clip carries a certain number of shots before requiring a reload. A magazine may also be battery with a set number of charges. Note that several melee weapons also require an energy cell, inflicting additional effects with each charge—these same rules apply. Refer to official licensed material for the rules on *reload*.

Shotgun

Shotguns impact with tremendous force at close range, but this stopping power diminishes rapidly further out. Shotguns do +3 damage if fired at targets within 10 feet. At long range, they inflict half damage. If you roll a critical hit, the target is knocked prone.

Sniper

These weapons contain advanced targeting systems for long-range fire. These include tracking systems and scopes.

Sniper weapons list a bonus. If you are proficient with the weapon, you can use an action or bonus action to aim, gaining the bonus on your following ranged attack with the weapon against a creature at least 25 feet away. The bonus is lost if you move, are moved, or after you make a ranged attack with the weapon (whether you hit or not). This bonus is cumulative for up to two actions.

Sonic

The first sonic weapon was no more than a simple high-powered oscillating pain siren generating 175-decibel (dB) acoustic waves in all directions. Newer sonic weapons utilize high frequency ultrasound to carry the painful audio waves in a straight, focused path. This technology offers increased range with no adverse side effects for the firer. In practical uses, the sonic weapon may be downgraded to transmit a normal voice across 10x its range increment to any other target without fear of anyone else overhearing unless they are inline.

Sonic weapons inflict thunder damage, and also deal additional damage to targets vulnerable to bludgeoning as if they dealt that damage type. If you roll a critical hit, the target is deafened for one minute.

Undermount

This property is a modification where a smaller weapon is attached under the barrel of an existing weapon. You can switch to an undermounted weapon instantly, and it occupies the same space as the weapon it is attached to. When you purchase a weapon with the undermount property, establish if it is being purchased as a normal weapon or an undermount, and if the latter, which weapon it is being mounted to. You can only attach an undermount to a weapon one size larger (one-handed small arm > two-handed small arm > heavy weapon > super heavy weapon). A one-handed or two-handed melee weapon counts as a one-handed small arm and a two-handed small arm respectfully.

90

MELEE WEAPON DESCRIPTIONS

Weapons in officially licensed publications are available based on the details of the setting played. Weapons from non-core and third-party supplements are allowed with the GM's consent.

Brass Knuckles

A no fuss weapon, brass knuckles add +1 damage to unarmed melee hits.

Buzz Baton

The buzz baton is a non-collapsible truncheon with a point capable of emanating a powerful electric shock. Basic damage is bludgeoning. As part of a hit, you can use a cell charge and either inflict +2 lightning damage, or replace the entire bludgeoning damage with lightning damage.

Harmonic Blade

Beginning its life as a surgical scalpel, this device quickly evolved to accomplish the ethically opposite goal. The blade vibrates in excess of 75,000 Hz, enabling it to slice or penetrate virtually any substance. More advanced designs translate little of this pulsation to the user's hand, though it does still occur. As a result, using a harmonic blade for more than a few minutes generates significant muscle fatigue. Because a larger blade translates more of its energy to the wielder, there has not been a practical harmonic blade longer than a few inches.

If you have proficiency in Wisdom (Medicine), you gain a +2 bonus to damage with this weapon. Damage increases to 1d6 if you have advantage on the target.

Piton Gauntlet

This weapon mounts to the forearm, and is effectively a captive bolt pistol. When activated, it propels a titanium rod three inches from your fist (or as much as a foot for larger models). Spring action recoil returns the rod to its housing an instant later. The ejection system utilizes compressed air containing enough pressure for five minutes, and refilling the air tank requires one minute.

If you hit a creature with a melee attack, you can activate the piton-gauntlet to inflict additional damage on the target (listed on the table). Once you use the piton, you cannot use it again until the beginning of your next turn.

Power Hooks

These impressive devices are oversized augmented manipulators attached to synthetic muscles and hydraulic pumps. The entire assembly wraps around the arm and most of the shoulder. Purchasing two links the two assemblies around the back.

Power-hooks increase the damage dice of unarmed attacks by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). A power-hook takes up a hand.

Punch Gun

Effectively an impact-triggered firearm, the punch-gun only discharges when a short relay is triggered an inch from your unarmed attack. Earlier versions of the weapon use basic chemical projectiles: at TL4, this is usually replaced with a laser, and at TL5 with a plasma weapon (such variations usually combine with an armored gauntlet to protect the wielder against back blast).

If you hit a creature with a melee attack, you can activate the punch gun to inflict additional damage on the target (listed on the table).

Tesla Glove

This unique item is equipped with more than a half-dozen resonant transformers that conduct severe electrical shocks to a target when you impact with a physical hit.

If you don't hit any creature during a round, at the start of your next turn, increase the damage of your next hit with this weapon by +2. This is cumulative up to +8 damage. After you hit any creature, the bonus is reduced back to 0. At the start of combat, unless you are surprised, the glove is assumed to be primed to +8 damage.

RANGED WEAPONS

DESCRIPTIONS

These descriptions include both advanced medieval weapons as well as advanced firearms, from pistols to artillery weapons.

Air Dart Gun

The air-dart gun resembles a standard pistol except it fires a small needle via an air compressor. The needle inflicts no damage but can deliver any number of medical injections. You choose which injection to employ from your inventory before making the attack.

Capsicum Spray

This item employs a chemical irritant like capsaicin (common in some fruits, plants, and most chilies), also known as a lachrymatory agent. When a target is struck, a sticky, waxy, colorless and odorless liquid adheres to the skin. The spray contains almost pure capsaicin, with a Scoville rating of more than 10,000,000 – double the intensity of pepper spray.

If struck, the target must make a DC 15 Constitution saving throw or be poisoned for 2d4 rounds. If you score a critical hit, the target fails this save. Larger creatures gain a bonus to the save as follows (+2 Large, +4 Huge; larger creatures are immune).

Carbon Crossbow

The weapon is a sleek, smooth, multi-piece item of black and silver, constructed from polymer and carbon fiber. The weapon is less clumsy than ancient designs.

The carbon crossbow comes with a range finding scope. Use a bonus action to aim with the scope, nullifying the disadvantage of firing long range.

Compound Longbow

Compound bows are fashioned of steel or aluminum—a few rare models are constructed from carbon fiber or microlattice. Their power comes from a series of pulleys, cams, and levers. They do not warp and can be adjusted for a variety of conditions.

A compound longbow can be adjusted for greater force at the cost of a more demanding draw. Using settings above the first requires proficiency with the weapon and the listed minimum Strength score. *Setting 1*—1d6 piercing; *setting 2*—Str 15, 1d8 piercing; *setting 3*—Str 18, 1d10 piercing; *setting 4*—Str 20, 1d12 piercing. It takes a full minute to adjust to a new setting.

Disruptor

The almost inaudible wave-rifle discharge inflicts massive damage on physical targets and on enemy combat units. However, in one incident, a test group encountered undead opponents and reported a much-elevated damage potential. Undead creatures are vulnerable to hits from this weapon.

Electroshock Gun

This wand-shaped device fires air-compressed barbed darts attached to coils towards a target. Upon impact, the coils conduct a massive electrical current, disrupting superficial muscle functions. The darts can penetrate enough to attach to anything, and are magnetic. The electrical pulse does not need to penetrate skin to be effective. Upon impact, the target must make a DC15 Constitution save or be paralyzed for 2d4 rounds. If you score a critical hit, the target automatically fails this

save. Larger creatures gain a bonus to the save as follows (+2 Large, +4 Huge; larger creatures are immune).

Firing Rate: Tension springs recoil the darts back to the gun as a free action. However, it cannot fire again for one minutes (10 rounds) as its capacitor needs to charge.

Range: Because of the length of coil, you cannot strike creatures further than 10 feet.

Flamethrower

This weapon has shrunk in size over the years. Though still two-handed, it no longer requires an unsafe pipe to an even more hazardous backpack. Modern flamethrowers keep their tank mounted under the weapon stock. The tank is comprised of a relatively safe solid fuel. When combined with air, it reacts into expanding foam. A small battery compresses air in a separate chamber. The foam enters the final chamber and, when allowed to decompress, sprays out in liquid form. A magnesium igniter at its barrel sends the superheated stream of flame to its target. Despite rumors and urban legends, neither older nor modern flamethrower tanks explode easily if ruptured or if a spark flicks nearby. If the weapon tank is ruptured, the foam would break and spray but not automatically ignite. Even older models would only burst like aerosol cans and not violently explode.

When you attack with the flamethrower, you target a 20-foot cone emanating from you. The DC for the Dexterity saving throw equals 8 + your Dexterity modifier + your proficiency bonus (if proficient in the weapon). Making the save still inflicts half damage. Any target that failed the save against a flamethrower suffers half the inflicted damage again at the beginning of your next turn.

Ground Heavy Gun

This light artillery weapon is designed to act both as a field gun for direct fire or a howitzer for long parabolic, indirect air bursts. It has an incredible range and is able to eliminate most soft targets with a single shot.

Plasma Artillery

Built on the same baseline as the ground heavy gun, plasma artillery operates at significantly reduced range due to its incapacity for parabolic indirect firing (instead, its indirect fire mode relies on the plasma splash effect). It more than makes up for the decreased range with its damage potential.

Restraintment Field

This pistol-shaped weapon from Mann launches a balloon-like force field, capturing a target by warping its containment matrix around its victim and then compressing the field to restrain the target from moving. If this weapon strikes a target, it is restrained: the victim needs to make a DC15 Dexterity or Dexterity (Acrobatics) check to escape. Only Large targets or smaller can be targeted. A target can be hit additional times, each time increasing the save DC by +2 (maximum DC25).

Rotary Cannon

This gun is a modern rendition of the weapon once called the “gatling gun”, a relatively simple design with a manual or spring loaded crank for rotating the numerous barrels. The mechanism is simple, but does not have the massive firing rate or more advanced models.

The rotary cannon has no single shot option: it always fires 10 shots per attack roll.

Self-Propelled Projectile

These are small rockets fired from pistols or rifles that continue to accelerate after an initial air compression push fires them from the shell. Although more expensive than traditional firearms, SPPs proved useful for engagements when range mattered. The ammunition for SPP weapons are sabot rounds, as the shell ejected breaks apart, and the contained self-propelled projectile ignites, breaking from its seal. All SPP weapons can fire underwater, though their range is halved. They are not common but have definitive advantages, such as explosive warheads and guidance systems. All SPP weapons also have the guided property.

Sonic Stunner

Very similar to a normal sonic weapon, the sonic stunner is designed only to be non-lethal. Some variations of other sonic weapons incorporate this configuration as an adjustable switch (though they are commensurately more expensive).

A target hit by a sonic stunner must make a DC20 Constitution saving throw or increase its exhaustion level by +1 (to a maximum of level 5) for 1 minute. Unlike normal exhaustion, levels incurred by this weapon reduce by 1 every minute after suffering the last attack from it.

Vapor Rifle

This weapon fires a plasma bottle similar to other pulse weapons, but the gas inside is of a particular volatile mix. When struck, the victim is literally torn apart by the massive heat and chemical reaction some compare only to fluoroantimonic acid, as molecules are torn apart upon contact. The pulse appears to simply vaporize a section of the victim, sometimes the entire body itself, leaving nothing but vapor and a clean cauterized cavity.

When you hit with an attack with this weapon, you can spend an extra cell charge to re-roll your damage dice and select the higher value. You spend the extra charges after you roll for damage, and there is no limit on the number of charges used (until you roll the desired result).

AMMUNITION

Unlike arrows or bolts, bullets that miss cannot be recovered and used again (although the casings and points can sometimes be scavenged and recycled, but all but the most basic chemical projectiles require a factory to do this). Prices listed are for the quantities indicated next to the entry. Each quantity listed weighs 0.25 lb., except for flame tanks (5 lb.) and rockets (2 lb.).

Note: All characters gain two full magazines, clips, or cells for weapons when they purchase them. The only exceptions are air dart rifles and grenade launchers (which are sold without ammunition).

A NOTE ON CLIPS

It would be frustrating to micromanage one's clip/magazine usage. When purchasing ammunition, you are assumed to purchase clips and magazines as well for the capacities you need. You are not strolling into combat with boxes of loose ammunition. You are expected to be prepared.

ALTERNATE AMMUNITION

Certain weapons can have their standard ammunition altered with a more advanced substitute. Some variants deliver more damage while others fill a specific purpose against an enemy. Some ammunition can only be used with specific ammo types.

You cannot mix alternate ammunition types in the same clip/magazine: thus, you can only use one type of alternate ammunition property per turn unless you attack with multiple weapons.

Armor Piercing

A weapon with AP rounds gains the AP property.

Use: Caseless rounds, ESP bullets, gauss iron flechettes, sabot SPPs, traditional bullets, heavy shells.

Rubber

Large and larger targets suffer neither damage nor any effect. Medium and smaller targets suffer 1 hit point of damage (which cannot be modified) and disadvantage on attack rolls until the start of your next turn. A critical hit causes the target to be stunned until the start of your next turn.

Use: Caseless rounds, ESP bullets, sabot SPPs, shotgun shells, traditional bullets.

Requirement: Non-auto or non-auto-heavy.

Tracer

If you suffer disadvantage from firing at a target at long range and miss with your attack, on your next attack, you no longer suffer disadvantage. You also suffer -2 damage on each damage die.

Use: Caseless rounds, ESP bullets, gauss iron flechettes, sabot SPPs, traditional bullets;

Requirement: Auto or auto-heavy weapons only.

Unusual Ammunition

In a fantasy campaign or certain sci-fi campaigns, it is possible that certain types of foes are vulnerable to certain materials. As long as those materials are able to be placed into a bullet, they can convey their properties to the target. The cost of the round will depend on the rarity of the material. This can include cold iron, fae iron, silver, or adamantite.

Use: Varies depending on substance.

INJECTIONS

Injections are an affliction and act similar to poison, only with injections, the target cannot avoid the initial effect. Injections can be delivered manually with a melee attack or via an air dart gun. Instead of inflicting damage, you impose the injection's effect. Large or larger creatures cannot be affected by injections. If you hit the same target again with the same injection before the effect wears off, the target automatically fails its next saving throw against the effect. Injections do not work on undead or incorporeal creatures. A missed attack with an injector does not destroy the injection.

Detonator

This injection introduces nanites into a subject that are programmed to activate based on parameters you set before injection. As a reaction to a condition you determine, the target takes 12 damage.

Fear

This batch of psychotropic will make the victim think everyone around him is a demon...unless the victim itself is a demon, in which case, it may see angels. A creature hit is frightened. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass two consecutive saving throws to recover from this effect.

Narcosynthesis

Truth serum, multiplied by fifty. For one hour, the target must make a DC 20 Constitution saving throw each time it attempts a Charisma (Deception) check or suffer disadvantage on the check.

Open Mind

This injection is a concoction of barbiturates, amphetamines, and LSD. When injected, the target becomes extremely susceptible to suggestion. A creature hit is charmed. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass two consecutive saving throws to recover from this effect.

Pain

This injection does not inflict pain, but rather hypersensitizes the dermal nerve network, making a creature feel all sensations with uncomfortable intensity. Each time a hit target takes damage, it suffers an additional 1d4 damage. This is not affected by a critical hit. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass two consecutive saving throws to recover from this effect.

Paralysis

This broad-spectrum mélange of neuromuscular-blocking drugs is able to inflict nearly instant paralysis in a target. A creature hit is paralyzed. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass two consecutive saving throws to recover from this effect.

Sleep

This heavy dose of diazepam and various opioids *might* actually kill a horse. A hit creature must make DC15 Constitution saving throw or fall unconscious. If hit again with the same injection within 1 minute, the DC increases by +5 (cumulative to max DC25). The target remains unconscious for five minutes or until the sleeper takes damage or someone uses an action to shake or slap the sleeper awake.

Slow

This strange medley of drugs causes muscle relaxation by depressing the central nervous system. A hit creature has its speed reduced by half. It also suffers disadvantage on Dexterity ability checks and skill checks. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass two consecutive saving throws to recover from this effect.

GRENADES & EXPLOSIVES

It's no secret that extreme increases in volume and energy can occasionally be muffled in the presence of magic. Although deflagration—subsonic combustion—appears unaffected, sudden supersonic expansions of energy can intermittently be suppressed, explaining why even basic combustion engines and chemical firearms sporadically work. As grenades are only required to work once, they remain popular, though there will be a dud from time to time.

Grenades

These explosives come equipped with either an impact detonator or a 1-round timer detonator (exploding at the beginning or end of your next turn—your choice), chosen when you use the grenade. They can be thrown or fired from a launcher without requiring an Intelligence (Demolitions) check. A grenade can still be used with another detonator, but this requires a separate detonator and the use of the Intelligence (Demolitions) skill to plant it. Some modified grenades can still be thrown but most cannot.

Explosives

Explosives all require a separate detonator. Some explosives are not designed to be used as one (like fuel) and may be overly or insufficiently sensitive as well as cumbersome. Explosives can be triggered without an Intelligence (Demolitions) check, but one is required to plant a detonator or at least some form of trigger.

Physical

Grenades and explosives with the physical damage type deal bludgeoning damage unless otherwise stated. Medium or smaller targets that don't save against the Dexterity saving throw are knocked prone by the explosion.

Range

All grenades and explosives 2 lbs. or less can be thrown by Medium-sized targets to a range of 20/60. You cannot effectively throw explosives larger than 5 lbs. A GM can alter these values if the thrower has a higher strength or is larger.

WEAPON	DAMAGE	TYPE	EXP	WT.	COST	TL	SYMP	DETONATOR
Grenades								
Concussion	1d6	Physical	5 ft.	½ lb.	10	1	No	Detonator
EMP	None	None	15 ft.	½ lb.	100	3	No	Detonator
Flashbang	Special	Special	10 ft.	½ lb.	25	1	No	Detonator
Fragmentation	1d8	Physical	10 ft.	½ lb.	25	1	No	Detonator
HEAT	2d6	Physical	5 ft.	½ lb.	45	1	No	Detonator
Nerve Toxin	2d8	Poison	5/10/15 ft.	½ lb.	250	4	No	Detonator

Smoke-Screening	None	None	10/15/20 ft.	½ lb.	10	0	No	Detonator
White Phosphorus	1d8	Fire	5/10/15 ft.	½ lb.	150	1	No	Detonator
Explosives								
Auto Fuel	1d6	Fire	5 ft.	1 g. / 8lb.	5	0	Yes	Ignition
Composition	1d10	Physical	5 ft.	1 lb.	50	2	No	Detonator
Exposed gunpowder	1d6	Physical	5 ft.	1 lb.	5	0	Yes	Ignition
Fertilizer / ANFO	1d6	Physical	5 ft.	1 lb.	5	0	No	Explosive
Jet Fuel	1d8	Fire	5 ft.	1 g. / 8lb.	5	0	Yes	Explosive
TNT	1d8	Physical	5 ft.	1 lb.	20	0	Yes	Explosive

Reading The Table

Exp: All explosives have the Exp property (see Weapons). This entry indicates the area of effect.

Detonator: This indicates the type of detonator required to trigger the explosive:

Ignition—requires an ignition source (a flame or another explosive).

Explosive—requires another explosive (it will not detonate with an ignition).

Detonator—requires an actual detonator (it will not detonate otherwise).

Note: Grenades are equipped automatically with an impact detonator or 1-round timer detonator (choose when using the grenade).

Symp (Sympathetic): A "yes" indicates it can be detonated if caught in the radius of another explosion (50% chance). A "no" indicates it cannot, but it may still be detonated by another method initiated by another explosion as long as it has an appropriate detonator. A sympathetic explosion is treated as part of the same explosion only if it is located in the same area as the primary—otherwise, make a separate explosives attack.

Direct Attack: Grenade launchers, rocket launchers, ground heavy guns, plasma artillery systems, and any other firearm with an "exp" value can target an opponent directly, using the direct property. See the description of that property.

Dexterity Saving Throw DC: The DC for the Dexterity saving throw is either 15 or 8 + your Dexterity modifier + your proficiency bonus, if applicable (whichever is higher). Targets that pass the saving throw still take half damage. Some grenades like EMP and nerve don't require Dexterity saving throws.

After-effects: After an explosive or grenade is detonated, the affected area provides half-cover for one round.

Using Demolitions

Demolitions. When detonating an explosive, all targets in the blast radius must beat the Dexterity saving throw DC or take full damage. Targets that make the save take half damage.

Dexterity Saving Throw DC: The DC for the Dexterity saving throw equals 8 + your Dexterity modifier + your Intelligence (Demolitions) proficiency bonus. Targets that pass the saving throw still take half damage.

Damaging Structures, Inanimate Objects, and Helpless Creatures: Anything in range that does not have a Dexterity score and is not moving takes maximum damage from the blast. Animated targets that are helpless against the blast (for instance, if the explosive is attached to them) cannot make saving throws and also take maximum damage.

Proxy Detonation: Explosives always go off when their detonation conditions are met, regardless of whether the attacker is able to act in the encounter. The Dexterity saving throw DC of the explosive is set by the person making the Demolitions check, not the person who triggers the explosion. If the explosive is thrown, then choose the higher DC between the creator and the thrower.

94 COMBAT WITH GRENADES AND EXPLOSIVES

Most explosives listed can be either a grenade or a planted explosive. Grenades can be thrown or loaded into a grenade launcher and they detonate upon impact or on your next turn (beginning or ending), chosen when using the grenade. Planted explosives require a detonator and a Intelligence (Demolitions) check.

Using Grenades

When making a grenade attack (or an attack where you throw an explosive), you pick a spot in range (20/60 if thrown). All targets in the blast radius must beat the Reflex DC or take full damage. Targets that make the save take half damage.

Impact Point: Any creature within the same space as an exploding grenade takes +1 die of damage from a grenade attack (so a 2d6 concussion grenade will inflict 3d6 to any creature occupying the same space as the grenade when it detonates).

After-effects: After an explosive or grenade is detonated, the affected area provides half-cover for one round.

EXPLOSIVE AND GRENADE TYPES

Composition Explosive

This soft, malleable explosive is also commonly referred to as “plastic explosive”, and is the standard explosive for breaching demolitions because of its ability to be formed into shaped charges. It can be cut, formed, wrapped, and combined with others of its type. Composition explosive is more expensive than standard explosive but effective in its capacity. It is also extremely stable.

With a successful DC10 Intelligence (Demolitions) check, you can change the blast zone of the explosive from a 5-foot radius to a 10-foot cone. You must determine which area the explosive is affecting when you set it and once set and your skill check rolled, you cannot alter the explosive pattern without starting over. You cannot increase the area of a cone beyond 30 feet with additional explosives.

Concussion

This light explosive uses air pressure as well as shrapnel to disrupt enemy lines. They are often employed as mines and in air bursts to break up dense collections of personnel.

Targets with 10 hit points or less that fail the saving throw are killed.

EMP

EMPs don't inflict any damage, but instead discharge an electromagnetic burst that disrupts electronics.

When detonated, all technology that employs a cell suffers stop functioning for 1d4 minutes. Vehicles suffer disadvantage on Dexterity checks for 1d4 minutes.

Flashbang

Also simply referred to as a stun grenade, a flash bang reduces the combat effectiveness of opponents by confusing and disorientating them with a sudden blinding magnesium flash and a deafening blast. The grenade body doesn't actually fragment so no shrapnel is dispersed.

Targets that fail the save are blinded and deafened until the end of your next turn.

Frag (Fragmentation)

Frag grenades are designed purely as an antipersonnel explosive by discharging dozens of plastic or steel flechettes blowing out along with fragments of the explosive's own shell. This deadly shrapnel shreds anything it touches (dealing bludgeoning, piercing, AND slashing damage).

Fuel, Auto / Jet

Despite what movies will have you believe, it's not easy to set jet fuel ablaze. Standard automotive fuel doesn't burn in liquid form, but fumes do, and the heat of a flame is more than enough to start the surface of a liquid slick evaporating.

The blast radius is also on fire for 3d6 minutes. Any target moving into an affected area on its turn or any target beginning its turn in an affected area suffers the basic damage of the fuel (1d6 or 1d8).

H.E.A.T.

Or high-explosive anti-tank, HEAT is able to generate extreme temperature in a focused burst, compromising virtually any defense. When focused into a shaped charge, a HEAT weapon is the greatest threat to armored opponents.

HEAT explosives have the AP property, and also count as fire and radiant against targets resistant to those types.

Nerve Toxin

A deadly and illegal weapon, this grenade expels a potent gaseous mixture blending a batrachotoxin and tetrodotoxin and several other agents produces a deadly gas that causes complete paralysis of all muscles by stopping the release of acetylcholine. By blocking nerve pulses to the muscles, the subject dies from asphyxiation or heart failure.

Nerve toxin grenades are a gas effect that only affects living creatures. After detonation, the area continues to affect any creature that starts its turn in or enters the target area for 1d4 minutes. After detonation, the nerve toxin grenade fills a 10-foot cube, expanding to 20 feet at the top of the next round and 30 feet on the round after that.

Targets are poisoned and suffer 2d6 damage each turn. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass two consecutive saving throws to recover from this effect.

Nitroglycerine

One of the oldest explosives, nitro is no longer actively used due to its instability.

Nitroglycerine will always detonate if caught in the blast radius of another explosive, if dropped from a height of more than 5 feet, or if ignited.

Riot Grenade

Riot grenades are used usually to disperse crowds and disorientate attackers. The grenade doesn't explode but rather opens valves, releasing compressed tear gas. In addition to creating an obscuring field of smoke, the gas causes skin and eye irritation on contact, throat and nose irritation if inhaled.

Riot grenades are a gas effect that only affects living creatures. After detonation, the area continues to affect any creature that starts its turn in or enters the target area for 1d4 minutes. After detonation, the riot grenade fills a 10-foot cube, expanding to 20 feet at the top of the next round and 30 feet on the round after that. Targets are poisoned and their speed is halved. At the beginning of its turn, the target can make a DC15 Constitution saving throw. It must pass 2 consecutive saving throws to recover from this effect.

Smoke Grenade

There are three types of smoke grenades: screening grenades, signal grenades, and white phosphorous grenades. Most smoke grenades are employed as signaling devices, though they can also be used to screen unit movements, conceal advancement and hinder enemy fire. Signal smoke grenades cannot be used for screening, though screening grenades can be used as a signal grenade. Screening grenades expel either a hexachloroethane/zinc (HC) mixture that is also an irritant or a terephthalic acid mixture (TA), which is harmless. Signal grenades use potassium chlorate, lactose, and a colored dye to work. Signal grenades are available in several colors, including white, red, yellow, green, and pur-

ple. The white phosphorus grenade is a smoke grenade with an explosive burst. Rather than burning to make smoke, the phosphorus ignites in the air after spreading. The brilliant yellow flame produces phosphorus pentoxide, the smoke, as a by-product. The intense heat allows the grenade to double as an antipersonnel weapon. The heat is devastating in close quarters.

Screening Special Rule: After detonation, the smoke grenade fills a 20-foot cube, expanding to 30 feet at the top of the next round and 40 feet on the round after that. The smoke obscures all sight, including dark/night vision. Everyone inside or on opposite sides of the smoke from an attack are granted three-quarters cover. Smoke grenades last for 1d4 minutes. Wind can disperse the smoke as well.

White Phosphorus Special Rules: This grenade has the same effect as the screening grenade except it also deals fire damage to targets inside. Targets entering or passing through the affected area automatically suffer damage without a saving throw (saving throws are only for the initial impact). White Phosphorus damage cannot not be increased by direct fire, ground zero, impact square, or a critical hit.

TNT (Trinitrotoluene)

TNT is the standard explosive to which all others are compared. Although not employed in modern industry or military applications, it is still common in black market circles and in civilian use (e.g. mining). Unlike moldable explosive, TNT can accidentally detonate if caught in the blast of another explosion.

ARMOR

Back in the medieval age, people protected themselves with clumsy suits of mail, perhaps the odd shield brandishing a crest. Thankfully, armor is no longer obvious, and can often be slipped underneath regular clothes. And then someone asks to don a giant power armor and subtlety goes out the window.

The time period and setting of a game greatly affects the role of armor. Is it mandatory or do only certain people wear them? If characters are not expected to be wearing protection at every moment, the GM should consider a house rule where the base AC increases for all characters (like 12 instead of 10).

EXO-ARMOR RULES

Powered armor, or exo-armor, is a powered mechanized unit controlled by a pilot inside. While several are not much bigger than their controllers, others weigh several tons and can tower over fifteen feet. Even though these are machines rather than creatures, Large suits can still squeeze like any other creature.

Entering and Exiting Exo-Armor: While under power, it is possible to don or remove exo-armor by using an action and expending 30 feet of movement (on the same turn).

Hit Points & Threshold: Exo-armor has its own hit point total, which the wearer can shunt damage to instead of taking it herself. It also possesses a threshold, which is the maximum amount of damage the suit can absorb (or shunt to its own hit points) from a single hit (the wearer taking the rest). If exo-armor is reduced to 0 hit points, it can no longer absorb damage, but is still functional.

Shutdown: Exo-armor, being more an occupied robot than a suit of armor, is vulnerable to effects that disable machines such as an electromagnetic pulse.

Should the armor lose power and be unable to recover, the wearer is also immobilized, but can escape from the armor by using three consecutive actions or bonus actions followed by 30 feet of movement to extricate herself.'

Weight: Exo-armor can support its own weight, and does not encumber the user. Its movement value is also fixed, despite any other gear the user may be carrying.

LIGHT ARMOR DESCRIPTIONS

Ballistics Armor

This is a light, but still somewhat clumsy collection of ceramic and polymer plates placed strategically to withstand impacts without hampering maneuverability significantly. This armor works well under normal clothes without revealing its purpose.

Resistance (Mk2): You have resistance to slashing from nonmagical weapons.

Leather / Textile

This is a blanket term referring to any high quality set of clothes not directly intended for combat protection. Very often, these clothes are meant for aesthetics with the pleasant byproduct to save the wearer from bumps

98

and scrapes. It also offers the advantage of not impeding the user.

Spider Silk Suit

Computer-controlled looms weave super thin synthetic silk into an extremely flexible nylon. When struck with any attack, the spider silk resists as hard as steel but will still flex more than soft rubber. It employs several thicker pads of carbon fiber in key areas. The spider suit allows for extreme maneuverability.

Resistance: You have resistance to lightning and slashing from nonmagical weapons.

Flexible: If your Dexterity score is 20 or higher, the AC of this armor increases to 13.

Synthetic Weave

The predecessor to advanced aromatic polyamides, this full body set includes thicker pads for impact damage reduction from slashing. It is, however, vulnerable to piercing attacks. Nevertheless, it is a popular basic outfit and the comfortable choice for many in the field. Unlike most armor, synthetic weave can fit easily and covertly under normal clothes (and can even be designed to look more like clothing than armor).

Resistance (Mk2): You have resistance to slashing from nonmagical weapons.

MEDIUM ARMOR DESCRIPTIONS

Aramid Combat Suit

The combat suit employs and blends harder materials, rigid plates and flexible aramids. Additional layers of nylon separate staggered sheets of thin polymer plastic.

Resistance (Mk2): You have resistance to fire and bludgeoning from nonmagical weapons.

Aramid Survival Suit

This employs a combination of flexible aramid fabrics and rigid ceramic and metal plates. The suit covers the wearer completely, sealing her from the outside environment.

Mask: You are immune to gas attacks and inhaled poisons.

Resistances (Mk2): You have resistance to fire and cold, as well as bludgeoning from nonmagical weapons.

Blinder-Mail

This resembles a lightened version of the heavier titanium carbide armor. What it offers in addition is a holographic camouflage net that can alter the physical properties of the suit to resemble nearly any terrain it is using.

Stealth: When you activate the stealth net, you have advantage on Dexterity (Stealth) checks and can attempt to hide even without cover or breaking line of sight (although doing so negates your advantage). The stealth net takes one charge per minute of use.

Force Body Vest

An upgrade from basic ballistics armor, this variation is lighter, equally as resilient, and is offered in a modular configuration, making it far easier to provide a proper fit. If worn below clothes, it is still apparent.

Nanotech Combat Armor

This suit uses molecule-sized machines to alter the composition of the suit at the instant of impact. Usually, the combat suit remains elastic and comfortable. Anytime any impact occurs, the micromachines react with a response time of less than 0.035 seconds. The impact point becomes immediately inflexible and solid, deflecting the attack.

Nano-Reaction: Any critical hit against you becomes a normal hit.

Resistances: You have resistance to fire and cold, as well as bludgeoning and slashing from nonmagical weapons.

HEAVY ARMOR DESCRIPTIONS

Advanced Wasteland Armor

An evolved form of the full combat warrior, cooling systems maintain internal temperature in the harshest environments. A sealed helmet processes external gases.

Resistances: You have resistance to fire and cold, as well as bludgeoning and slashing from nonmagical weapons.

Mask: You are immune to gas attacks and inhaled poisons.

Targeting: You gain a +1 bonus to damage rolls with ranged weapons within normal range.

Carbide Armor

Super-strong plates of tungsten carbide are strapped inside a flexible nylon suit to offer remarkable stopping power. However, these plates are heavy and significantly reduce the user's flexibility.

Resistances (Mk2): You have resistance to fire and cold, as well as bludgeoning from nonmagical weapons.

Flak Longcoat

This clumsy but stylish piece of subtle outerwear contains a thick inner layer of flexible aramid patches able to resist cutting and piercing. It comes available in brown or black. It leaves the head vulnerable, even with the collar up. Most importantly, it flaps dramatically in the wind.

Full Combat Warrior

The full combat suit is a mixture of aramid padding and titanium plates in water-resistant layers of nylon and metallic fibers covered by patterned camouflage. It offers an insulated backpack-mounted computer system that controls various systems on the suit.

Nightvision: You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, and the system renders everything you see in shades of either green, yellow, or blue (user's preference).

Stealth: If your camouflage pattern matches your terrain, you gains a +2 bonus with Dexterity (Stealth) checks. It takes a full minute to adapt a suit to the terrain.

Targeting: You gain a +1 bonus to damage rolls with ranged weapons within normal range.

Resistance: You have resistance to fire, as well as bludgeoning and slashing from nonmagical weapons.

Tactical Body Armor

This is a slightly detuned version of the full combat warrior armor. It offers similar protection in a lighter package. It sacrifices several of its carbide plates to make the suit less expensive for those on a budget, and does not have a computer system built in.

Resistance (Mk2): You have resistance to fire and cold, as well as bludgeoning from nonmagical weapons.

Tech-Mail

The most advanced non-powered armor, tech-mail is based on medieval scale mail, utilizing overlapping discs no bigger than gold coins interlaced together to form a durable but flexible covering. The discs, comprised of silicon, ceramic, and titanium, spread out impacts across the entire body, allowing for greater protection. The exacting pattern of the scales is proportioned perfectly to maximize protection where needed most.

Resistances: You have resistance to fire and cold, as well as bludgeoning, slashing, and piercing from nonmagical weapons.

Yowie Suit

Not designed for actual combat, this clumsy but effective piece of camouflage offers some rudimentary protection. It is not terribly heavy but its overlapping layers of fake foliage renders fast movement nearly impossible. Pouches and straps conceal various other camouflage patterns that can unfold or release to alter the appearance of the suit.

Stealth: In any earth or forest terrain, you have advantage on Dexterity (Stealth) checks. Additionally, if you don't move on your turn, you gain half-cover.

Theroptics (Mk2): The suit employs holographic imaging. If you spend a battery charge and don't move on your round, you are invisible. You remain invisible until you move or make an attack.

EXO-ARMOR DESCRIPTIONS

ATAC-OI God Mech

The most dominant and imposing suit in the known world, the ATAC-01 is designed to take on the largest of targets or engage entire enemy squads by itself. It is the ultimate evolution in mecha development—anything larger would be impractical. Someone acquiring a ATAC-01 would be wise to take care of it. It's unlikely they would get another.

Balance: For the sake of game balance, the ATAC-01 counts as two legendary items and one very rare item.

Bonus: The ATAC-01 has a +3 bonus to AC (21 total).

Disruption Recovery: As a reaction to shutdown, the ATAC-01 comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Gauntlets: Unarmed attacks with the armor do base 1d8 damage. If you already inflict 1d8 or more damage with unarmed attacks, increase the damage dice by one step (1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also have a +2 enhancement bonus to attack and damage rolls.

Gravity Drive: You suffer no damage from a fall.

Hit Points: The ATAC-01 has 60 hit points and a threshold of 60.

Large Size: You are considered a Large creature while wearing the armor. You have reach.

Mask: You are immune to inhaled poisons.

Mecha Fists: The ATAC-01 has a Strength of 25.

Nightvision: You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, only shades of gray.

Phase: As a move action, spend a charge and teleport up to 25 feet.

Power: The ATAC-01 requires an H-class power cell to operate and it does not function without it.

Regeneration: The ATAC-01 recovers 1 of its own hit point per round while the machine is active.

Repair Drone: You can spend a charge as an action to recover 10 of the ATAC-01's hit points.

Resistances: You gain resistance fire, acid, and cold, as well as bludgeoning, slashing, and piercing from nonmagical weapons.

Sensor Net: You have advantage on Wisdom (Perception) checks.

Speed: Your speed is 30 feet.

ATH-Q58 Vertical Tank

The successor of the smaller VF-1, the impressive ATH has unfortunately not found as much recognition. The military division has analyzed the size of the machine and the logistics division has criticized its cost in comparison to its lighter and cheaper cousin. In truth, its reputation as a weaker system is undeserving, as the ATH is considered one of the most powerful weapon platforms on the continent.

Balance: For the sake of game balance, the ATH also counts as one legendary item and two very rare items.

Bonus: The ATH has a +2 bonus to AC (20 total).

Disruption Recovery: As a reaction to the armor's shutdown, the ATH comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Firearm Stabilization: You can wield heavy weapons as if they are one-handed small arms and super heavy weapons as if they are two-handed small arms.

Gauntlets: Unarmed attacks with the armor do base 1d8 damage. If you already inflict 1d8 or more damage with unarmed attacks, increase the damage dice by one step (1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also grant a +2 bonus to attack and damage rolls.

Hit Points: The ATH has 50 hit points and a threshold of 50.

Mecha Fists: The ATH has a Strength of 23.

Power: The ATH requires an H-class power cell to operate and it does not function without it.

Resistances: You gain resistance fire, acid, and cold, as well as bludgeoning, slashing, and piercing from nonmagical weapons.

Speed: Your speed is 25 feet.

Weapon Mount: The ATH has a shoulder or arm mounted assembly, which frees up a hand. This mount

acts as a hand or a brace for holding or mounting weapons.

AV-98 Mecha

The AV-98 is a first-generation powered armor meant to pave the way for further large robots. Until its release, most exoskeletons were basic body-hugging amplification models. The AV-98 was an initial attempt to create a functioning giant mecha. It features no arms but has a very advanced walking system.

Auto-Reload: You have a mechanism to reload your weapons (since you have no arms). You can reload three clips/cells automatically before needing external loading (you either have to exit the suit to reload or have an ally do it for you). External reloading requires an action and a bonus action.

Balance: For the sake of game balance, the AV-98 counts as a legendary item as well as two rare items.

Bonus: The AV-98 as a +2 bonus to AC (20 total).

Disruption Recovery: As a reaction to the armor's shutdown, the AV-98 comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Large Size: You are considered a Large creature while wearing the armor. This does not affect your

reach or damage dice.

Mask: You are immune to gas attacks and inhaled poisons.

Mecha: You ignore penalties for difficult terrain.

Power: The AV-98 requires an H-class power cell to operate and it does not function without it.

Hit Points: The AV-98 has 50 hit points and a threshold of 50.

Nightvision: You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, only shades of gray.

Resistances: You gain resistance fire, acid, and cold, as well as bludgeoning, and slashing from nonmagical weapons.

Speed: Your speed is 30 feet.

Weapon Limbs: You have neither limbs nor manipulators to hold onto external weapons. You have no threatening reach and cannot make opportunity attacks. You are equipped with three heavy weapon mounts. Because the AV-98 is Large, you can install super heavy weapons as heavy weapons. Likewise, you can install heavy weapons or two-handed small arms in these mounts as two-handed small arms and one-handed small arms, respectively. You have disadvantage on attack rolls against Medium or smaller targets 5-feet or closer.

Combat Exoskeleton

The combat exoskeleton resembles an oversized piece of medieval plate, reinforced by limbs of titanium and amplified by synthetic muscle fibers running through the entire assembly. Though not very pretty, the Com-Exo has proved its usefulness in combat.

Balance: For the sake of game balance, the combat exoskeleton counts as one legendary and two rare items. The TL5 combat exoskeleton counts as two legendary items and one very rare item.

Bonus: The TL4 combat exoskeleton has a +1 bonus to AC (16 total); the TL5 combat exoskeleton has a +2 bonus to AC (17 total).

Disruption Recovery: As a reaction to the armor's shutdown, the combat exoskeleton comes back online. Once you use *disruption recovery*, you cannot use it again until you finish a long rest.

Gauntlets: Unarmed attacks with the armor do base 1d6 damage. If you already inflict 1d6 or more damage with unarmed attacks, increase the damage dice by one step (1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also grant a +1 bonus to attack and damage rolls.

Hit Points: The TL4 combat exoskeleton has 35 hit points and a threshold of 4. The TL5 combat exoskeleton has 45 hit points and a threshold of 5.

Mecha Fists: The TL4 combat exoskeleton has a Strength of 23. The TL5 combat exoskeleton has a Strength of 25.

Power: The combat exoskeleton requires an H-class power cell to operate and it does not function without it.

Resistances: You gain resistance fire, acid, and cold, as well as bludgeoning from nonmagical weapons.

Speed: Your speed is 30 feet.

Mobile Motor Armor

This is a generic place-marker for the large variety of custom-designed and prototypical powered armor that appear across the world. These unique designs are simply called mobile motor armors. No two look alike, but they all share similar properties.

Balance: For the sake of game balance, the mobile motor armor counts as one legendary item and two very rare items.

Bonus: The mobile motor armor has a +1 bonus to AC (19 total).

Disruption Recovery: As a reaction to the armor's shutdown, the MMA comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Gauntlets: Unarmed attacks with the armor do base 1d6 damage. If you already inflict 1d6 or more damage with unarmed attacks, increase the damage dice by one step (1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also grant a +1 bonus to attack and damage rolls.

Hit Points: The mobile motor armor has 35 hit points and a threshold of 5.

Large Size: You are considered a Large creature while wearing the armor. You have reach.

Mecha Fists: The mobile motor armor has a Strength of 20.

Power: The motor mobile armor requires an H-class power cell to operate and none of its functions work without it.

Speed: Your speed is 30 feet.

Resistances: You gain resistance fire, acid, and cold, as well as bludgeoning, and slashing from nonmagical weapons.

Removable Weapon Limbs: You can remove a gauntlet and replace it with a heavy weapon mount. Because the mobile motor armor is Large, you can install super heavy weapons as heavy weapons. Likewise, you can install heavy weapons or two-handed small arms in these mounts as two-handed small arms and one-handed small arms, respectively.

RX-78 Motor Slave

This intimidating armor requires its user to slip into a form-fitting suit that mounts tightly in the control area. The pilot's head fits only partially into the machine's helmet with most of the user sitting in the trunk of the armor. The pilot's arms extend to the elbows and the legs only to the knees.

Balance: For the sake of game balance, the apostle counts as a legendary item as well as two very rare items.

Bonus: The apostle has a +3 bonus to AC (21 total).

Disruption Recovery: As a reaction to the armor's shutdown, the apostle comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

102

Gauntlets: Unarmed attacks with the armor do 1d6 damage. If you already inflict 1d6 or more damage with unarmed attacks, increase the damage dice by one step (1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also grant a +2 bonus to attack and damage rolls.

Hit Points: The apostle has 60 hit points and a threshold of 20.

Large Size: You are considered a Large creature while wearing the armor. You have reach.

Mask: You are immune to gas attacks and inhaled poisons.

Mecha Fists: The RX-78 has a Strength of 25.

Power: The apostle requires an H-class power cell to operate and it does not function without it.

Speed: Your speed is 35 feet.

Regeneration: The apostle recovers 1 hit point per round while active.

Resistances: You have resistance to fire, acid, and cold, as well as bludgeoning, slashing, and piercing from nonmagical weapons.

Sensor Net: You gain a +2 bonus to Wisdom (Perception) checks.

Weapon Mount: The apostle has a shoulder or arm mounted assembly, which frees up a hand. This mount acts as a hand or a brace for holding or mounting weapons.

Unit 01 Power Armor

The Unit 01 is an cumbersome design and one considered primitive compared to others. Most of the user is exposed to the elements, as the 01 is primarily built as a strength augments.

Balance: For the sake of game balance, the Unit 01 counts as one legendary item and two very rare items.

Bonus: The Unit 01 has a +1 bonus to AC (19 total).

Disruption Recovery: As a reaction to the armor's shutdown, the Unit 01 comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Gauntlets: Unarmed attacks with the armor do base 1d8 damage. If you already inflict 1d8 or more damage with unarmed attacks, increase the damage dice by one step (1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also have a +2 enhancement bonus to attack and damage rolls.

Hit Points: The Unit 01 has 40 hit points and a threshold of 5.

Large Size: You are considered a Large creature while wearing the armor. You have reach.

Mask: You are immune to gas attacks and inhaled poisons.

Mecha Fists: The Unit 01 has a Strength of 23.

Power: The Unit 01 requires a H-class power cell to operate and it does not work without it.

Speed: Your speed is 30 feet.

Resistances: You have resistance to fire, acid, and cold, as well as slashing and bludgeoning from nonmagical weapons.

Utility Exoskeleton

Similar to the more formidable combat exoskeleton, the utility skeleton emerged after the former rather than the other way around, a byproduct designed for inter-bastion use by the same military program using the military variant. Unlike the combat model, the utility exoskeleton, often known as an Utex ("yue-teks") exposes the majority of the user to the outside environment. Though offering some protection, its primary function is as a muscle augments. Demand rose in this capacity, and eventually the Utex was sold in greater numbers.

Balance: For the sake of game balance, the utility exoskeleton counts as two very rare items.

Disruption Recovery: As a reaction to shutdown, the utility exoskeleton comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Gauntlets: Unarmed attacks with the armor do base 1d8 damage. If you already inflict 1d8 or more damage with unarmed attacks, increase the damage dice by one step (1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also have a +1 enhancement bonus to attack and damage rolls.

Hit Points: The utility exoskeleton has 15 hit points and a threshold of 2.

Mecha Fists: The utility exoskeleton has a strength of 23.

Power: The utility exoskeleton requires an H-class power cell to operate and it does not function without it.

Resistances: You have resistance to bludgeoning from nonmagical weapons.

Speed: Your speed is 25 feet.

VF-1 Power Suit

Originally built as a heavy lift assistant, the VF-1 found popularity later as a muscle augment for weapon applications by the defense department. Eventually a new suit, the ATH-Q58 Vertical Tank, was purpose-built for the role, but the VF-1's smaller size kept it in regular use, and it remains the more popular model. Depending on its loadout, it can serve as both a ranged weapons platform and a close-combat vehicle.

Balance: For the sake of game balance, the VF-1 counts as one legendary item and two rare items.

Bonus: The VF-1 has a +2 bonus to AC (17 total).

Disruption Recovery: As a reaction to the armor's shutdown, the VF-1 comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Firearm Stabilization: Even though you are Medium-sized, you can wield heavy weapons as if they are two-handed small arms and super heavy weapons as if they are heavy weapons.

Gauntlets: Unarmed attacks with the armor do base 1d6 damage. If you already inflict 1d6 or more damage with unarmed attacks, increase the damage dice by one step (1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). The gauntlets also grant a +1 bonus to attack and damage rolls.

Hit Points: The VF-1 has 30 hit points and a threshold of 5.

Mecha Fists: The VF-1 has a Strength of 23.

Power: The VF-1 requires an H-class power cell to operate and it does not function without it.

Resistances: You have resistance to fire, acid, and cold, as well as slashing and bludgeoning from nonmagical weapons.

Speed: Your speed is 30 feet.

Weapon Mount: The VF-1 has a shoulder or arm mounted assembly, which frees up a hand. This mount acts as a hand or a brace for holding or mounting weapons.

VR-052F Superlight

The most advanced armor, the VR-052F is the epitome of technology. When appearing, it is often considered a

prototype or a one-off, and as such should never be considered expendable. Not only equipped with an anti-gravity drive, the VR-052F also sports a flight system and electromagnetic camouflage.

Balance: For the sake of game balance, the VR-052F counts as three legendary items and one very rare item.

Bonus: The VR-052F has a +3 bonus to AC (15 total).

Disruption Recovery: As a reaction to the armor's shutdown, the VR-052F comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Gravity Anchors: You have a climb speed equal to your normal speed.

Gravity Drive: You suffer no damage from a fall.

Hit Points: The VR-052F has 30 hit points and a threshold of 3.

Jump Jets: You are always considered moving when performing a jump. You also have advantage with Strength (Athletics) checks when jumping.

Maneuverability: You have advantage with Dexterity (Acrobatics) checks.

Mask: You are immune to gas attacks and inhaled poisons.

Mecha Fists: The VR-052F has a Strength of 24.

Power: The VR-052F requires an H-class power cell to operate and it does not function without it.

Resistances: You have resistance to fire, acid, and cold, as well as bludgeoning, slashing, and piercing from nonmagical weapons.

Shadow Field: Use an action and spend a cell charge—you are invisible for one minute, until you move, or until you make an attack.

Speed: Your speed is 35 feet.

Vulture System

This basic powered suit enables flight via a set of turbines, control surfaces, and vectored thrusters, but offers only rudimentary protection for its pilot. It also suffers from a limited range for each flight.

Balance: For the sake of game balance, the vulture also counts as two rare items.

Bonus: The vulture has a +1 bonus to AC (15 total).

Boosters: You are always considered moving when performing a jump. You also have advantage with Strength (Athletics) checks when jumping. You also never take damage from a fall if you are conscious. You always land on your feet.

Disruption Recovery: As a reaction to a disruption event, the vulture comes back online. Once you use *disruption recovery*, you cannot use it again until you finish a long rest.

Hit Points: The vulture has 20 hit points and a threshold of 5.

Jump Jets: You have a flying speed of 60 (same as the *fly* spell) for 4 minutes. You regain 1 minute per hour.

Mecha Fists: The Vulture has a Strength of 18.

Power: The vulture requires an H-class power cell to operate its flight system.

Resistances: You have resistance to fire, acid, and cold, as well as bludgeoning from nonmagical weapons.

Special: Entering and powering the suit is the same as full plate armor.

YF-21 Skinsuit

This is a small customized powered armor designed specifically for each user. It conforms tightly to the contours of the body. It employs a combination of lightweight polymers and aramids reinforced with carbon fullerene rings. Solid limbs are made from silicon carbide ceramic which slide perfectly to allow movement via a magnetorheological fluid. The suit covers the entire body, with an attached helmet that seals it completely.

Balance: For the sake of game balance, the YF-21 also counts as one rare item and one uncommon item.

Bonus: The skinsuit has a +2 bonus to AC (14 total)

Boosters: You have advantage with Strength (Athletics) checks when jumping.

Disruption Recovery: As a reaction to the armor's shutdown, the YF-21 comes back online. Once you use *disruption recovery*, you cannot use it again until you finish a long rest.

Hit Points: The skinsuit has 25 hit points and a threshold of 2.

Mask: You are immune to gas attacks and inhaled poisons.

SHIELDS DESCRIPTIONS

Active Dissuasion System

The successor of the energy envelope, the ADS contains a more powerful capacitor to respond to outside attack. The resulting system does not actually offer superior protection; if anything, it is slightly worse, but is kept in production due to an unintended side effect. The ADS capacitor prevents breakdown of its energy shield by temporarily overcharging the repulsor field a microsecond before impact. This maintains shield integrity, but also discharges a significant electric shock that can disable or kill nearby soft targets. The ADS takes two battery cells: one for its shield and one for its force feedback system.

Augmentation: You gain a +1 bonus to all melee damage rolls.

Backpack Mount: The energy envelope does not use up a hand.

Force Feedback: If you are hit by a melee attack, spend a battery charge with a reaction to inflict 4 electricity damage against the creature that hit you. However, when the cell is reduced to zero, the entire ADS system ceases to offer its AC or damage bonus.

Deployable Shield

This arm-mounted device remains concealed and unobtrusive until needed. When deployed (usually by a flick of the wrist), it instantly unfolds and slides into position to offer protection. A single energy cell is required for the deployment of the shield. While collapsed, it doesn't grant its shield bonus but it neither imposes its check nor its movement penalty.

Standard Configuration: Deploying the shield into standard configuration can occur on your turn as a bonus action. While deployed, the shield uses up a hand and grants a +2 bonus to AC.

Tower Configuration: Deploying the shield into tower configuration can occur on your turn as a bonus action. While deployed, the shield uses up a hand but grants a +3 bonus to AC. The maximum Dexterity bonus is +2, and Dexterity (Stealth) checks have disadvantage.

Energy Envelope

The most advanced active defense system available, the energy shield covers its user only a centimeter from his skin, and thus is capable of protecting against all incoming attacks. Its only drawback is its tendency to neutralize temporarily when its user makes a melee physical attack.

Backpack Mount: The energy envelope does not use up a hand.

Hit Points: The envelope has its own hit points and threshold, the same as exo-armor. These hit points cannot be repaired; the energy envelope regains all lost hit points after a long rest. The energy envelope has 30 hit points and a threshold of 10.

Limitation: You lose your shield bonus to AC until the beginning of your next turn if you are hit with a melee attack.

Forced Defense Shield

This is a heavy titanium shield with grooves on its bottom, allowing for a firm root into the ground. In addition, a locked slit can open once it has been planted.

If planted into the ground as a bonus action, the shield remains upright and acts as three-quarters cover to anyone behind it (as well as offering its bonus to AC). You must be occupying the same space as the shield to receive this benefit.

Kinetic Baffle

This reactive system generates a contained energy field that only responds to high energy attacks from distant targets. It cannot react to close or massive targets and is inoperable if a target blocks its sensor net. You gain the AC bonus against ranged attacks only and only as long as no enemies are in reach of you.

Backpack Mount: The kinetic baffle does not use up a hand.

Repulsor Engine

This device is less a method of resisting damage and more of a way of discouraging attack. It resonates an acoustic, magnetic, and gravitational pulse, preventing or dissuading targets from delivering melee attacks. The shield's AC bonus applies only against opportunity attacks.

Induce Pressure Wave: The repulsor engine requires a separate cell for the pressure wave system. Use

a bonus action with a battery charge and all Large and smaller creatures within 5 feet of you are shoved 5 feet. A creature that cannot be pushed is stunned until the start of your next turn. Sacrifice five charges to increase the area effect to 10 feet. If you use the pressure wave in any way, the repulsor engine is deactivated for one minute.

ARMOR MODIFICATIONS

These modifications are available to most armors (including all exo-armors) and often have requirements for their addition. There is no limit to the number of modifications you can add to exo-armor, though non exo-armor is generally limited to 1 for light, 2 for medium and 3 for heavy.

Armors that already have the system cannot add a second version except to upgrade an existing system, as stated in the description

Auto-Reload (exo only)

You have a mechanism to reload your weapons instantly. You can reload three clips/cells without requiring an action before needing external loading (you either have to exit the suit to reload or have an ally do it for you).

Bullet Proof

You gain resistance to bludgeoning from nonmagical weapons. Select this modification a second time, and you gain resistance to slashing from nonmagical weapons. Select this modification a third time, and you gain resistance to piercing from nonmagical weapons. If you already have previous modifications, you can skip them.

Disruption Recovery

As a reaction to shutdown, the armor comes back online. Once you use this feature, you cannot use it again until you finish a long rest.

Gravity Anchors

You have a climb speed equal to your normal speed.

Gravity Drive

You suffer no damage from a fall.

Increased Armor

The armor gains a bonus to AC between +1 and +3 (it must not already have a bonus).

Increased Resistance

When you purchase this upgrade, select a damage type from the following list: acid, cold, fire, lightning, or thunder. You have resistance to that damage type.

Jet Boosters

You are always considered moving when performing a jump. You also have advantage with Strength (Athletics) checks when jumping.

Jump Jets

You gain a flying speed of 60 (same as the *fly* spell) for 4 minutes. You regain 1 minute per hour.

ARMOR	COST	STEALTH	WT.	CELL	TL
Auto Reloader*	1,000	Disadvantage	+50 lb.	H	3
Bulletproofing	10,000	—	+20 lb.	—	1
Disruption Recovery	500	—	+20 lb.	—	2

Structural Reinforcement, Mk2*	20,000	Disadvantage	+50 lb.	--	2
Structural Reinforcement, Mk3*	40,000	Disadvantage	+80 lb.	--	2
Targeting System	500	—	+1 lb.	H	2

* Exo-armor only.

Larger Gauntlets (exo only)

Increase the damage dice of the armor's gauntlets by one step (1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10).

Maneuverability Booster (exo only)

You gain a +5 foot bonus to speed.

Nightvision

You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, and everything you can see is displayed in shades of green, yellow, or blue (your choice). If you already have nightvision, you can select this modification and increase the range to 120 feet.

Stealth Net

This modification nullifies disadvantage on Dexterity (Stealth) checks if your armor imposes it.

Structural Reinforcement (exo only)

The armor gains additional hit points. These hit points do not stack with other levels of Structural Reinforcement. Each level also grants an increase in threshold.

Mk1: +10 hit points and a +2 bonus to threshold.

Mk2: +20 hit points and a +5 bonus to threshold.

Mk3: +30 hit points and a +10 bonus to threshold.

Targeting System

You gain a +1 bonus to damage rolls with ranged weapons when firing at target at normal range.

The previous Ultramodern introduced a hardness rule as well as an armor-piercing value to circumvent said hardness. It was not an unseen element in OGL, but made incorporating Ultramodern into other OGL rules difficult. So I replaced it and employed resistances to replicate the same effect. Enchanted weapons can be considered to have the AP property when adding Ultramodern into fantasy.

GEAR

Like weapons and armor, players can often field more powerful equipment dependent on their mission parameters. Unlike a fantasy setting, you are not expected to be carrying everything around with you wherever you go.

COMBAT ACCESSORIES

Bayonet Plug

This is not a weapon but an adapter to add a melee weapon to any small arm, enabling either weapon to be used without dropping or holstering one. Only one- and two-handed small arms can be equipped with a melee weapon. One-handed small arms can be equipped with a dagger only. Two-handed small arms can be equipped with any light blade. The melee weapon cannot be enchanted. You cannot equip a specialty weapon with a bayonet.

Laser Sight

Laser sights may be used in conjunction with scopes. They paint targets with precision where the weapon's fire will strike. This also doubles as a psychological attack, as most individuals find a green target on their chest to be a great incentive to negotiation. A sniper may, if they wish, swap it for an infrared diode, which is invisible to everything except for night vision (darkvision). The standard sight uses a green diode solid-state laser that is effective for the maximum range of any weapon. You gain a +1 bonus to your first attack roll on each turn.

Scope, Targeting

This is a standard long-range targeting scope which can be fitted to any two-handed small arm or heavy weapon without an auto, blast, auto-heavy, or sonic property. It cannot be used with specialty weapons. Attaching the targeting scope gives the weapon the sniper (+1) property.

Scope, Electro-Thermal/Magnetic

An enhanced digital targeting scope, the ETM system can see past barricades, into rooms, safes, and even people. It can target weak points on potential targets like axles or hearts. This replaces a targeting scope. If you hit, roll a 1d4. If you roll a 3 or a 4, you gain a 1 Marksman Point. You can also ignore one point of obstructing terrain for the purposes of line of sight (but not line of effect).

Suppressor

These attachments muffle the flash and sonic blast of explosively propelled firearms. By slowing the expanding gases exiting the barrel, the suppressor stems the acoustical signature, but does not silence it completely—reducing it to merely loud instead of deafening. Suppressors cannot be used on shotguns, heavy weapons, or weapons rated higher than TL3 (most of which don't need it in any case). Affixing a suppressor takes a standard action.

You don't automatically reveal your location if you are hiding and make a ranged attack. Anyone within the weapon's normal range increment is still aware that a weapon has been fired, but not necessarily from where or by whom.

DETONATORS

Friend/Foe Trigger

This detonator can be programmed to detonate the moment a specific monster enters its blast radius. It can also be programmed to detonate for everything but specific people. There is no limit on its parameters, but setting the programming requires at least one minute.

Impact Trigger

After the safety is pulled, impact triggers detonate upon impact with any rigid surface. This detonator is rarely used except with grenades.

Magnetic Trigger

These unique detonators only function on explosive payloads of 5 lbs. or less. When armed, the detonator detects any sizeable metallic object (such as a vehicle, exo-armor, or suit of plate) passing within 30 feet and is pulled (together with its explosive) towards it, detonating on impact. If there is any form of cover or impedance, the detonator stops but still detonates.

Motion Trigger

This detonator detects movement in its burst area and detonates regardless of the target.

Pressure Trigger

These trigger the moment a weight is pressed upon the detonator. Large and larger targets automatically trigger pressure detonators upon entering a square containing one. Medium and smaller targets have a 50% chance to avoid the sensor unless the person placing the explosive succeeded on an DC15 Intelligence (Demolitions) check for proper placement. The sensor can be manually adjusted to only detonate for specific-sized targets (e.g.: detonation only for Huge targets).

Radio Remote

The range limit of a radio remote is 5,000 feet. Both the transmitter and receiver require batteries.

Timer

Timers utilize a mechanical clock to countdown compared to a digital timer. Although one may purchase a RDR (red digital readout) for the same price, this makes the detonator a TL2 item. The actual trigger is usually chemical or mechanical.

Trip Trigger

This detonator is a simple mechanical or chemical trigger attached to an explosive with a trip wire: a creature passing through the wire pulls the pin and detonates the device. You can run up to 25 feet of wire but the detonation only occurs in the square where the explosives are placed. Because the wire needs to be raised to be triggered, there is a DC20 Wisdom (Perception) check to spot the wire.

Wired Remote

This simple form runs an electrical pulse that triggers the mechanical, chemical, or electrical detonator. The maximum range of any wired detonator is 2,000 feet.

TOOL KITS

Unlike normal tool kits, these kits do not require proficiency but rather are necessary to use appropriate skills.

Engineering Kit

These kits include diagnostic tools, a soldering gun, fine point insulated needle pliers, and wire cutters. It employs a battery for a digital multi-meter measuring ohms, amps, and volts. It also comes equipped with a variety of wires, clips, resistors, banana plugs and crocodile clips. All diagnostic tools in the kit use gold wiring and are shielded by design, as it would be incredibly inconvenient to have to repair the repair kit before repairing another device.

More advanced kits are required when dealing with more advanced technology and can affect build times and cost (see **Skills: Intelligence (Engineering)**).

Drug Kit

Along with syringes required to deliver various medications, the drug kit offers standard chemicals medical professionals use to create various drugs. Additionally, this kit also includes tools enabling one proficient in its use to extract needed drugs from natural sources. Like the medical kit, the drug kit has enough supplies to 10 actions (regardless of how many targets are affected by said action).

Medical Kit

The formidable medical kit holds bandages, pills, trauma shears, ointments, and basic stitching implements for basic injuries. They also have eye pads and cooling gel pads for burns. Along with wound irrigation. Other implements include splints, alcohol pads, an epinephrine injector, hemostatic pads, and various scalpels and scissors for emergency surgical procedures. Trained medical professionals can pull off miracles with a medical kit. A medical kit has enough supplies to 50 actions (regardless of how many targets are affected by said action).

UTILITIES

Battery Flare

A battery-powered bright candle, the charge only lasts for four hours but illuminates to a 50-foot radius.

Big Ear

This tiny device wraps around one's ear and amplifies incoming acoustic data. You have advantage on Wisdom (Perception) checks when listening. It uses one charge upon activation and an additional charge every minute.

Binoculars

Ranging in size from small and concealable to large and clumsy, binoculars bring distant objects into close focus. They are sturdy, waterproof, and survive falls up to 50 feet. If broken, they cannot be repaired.

Camera Ball

This five-inch rubber ball can be thrown or fired from a grenade launcher. Once it lands, it transmits audio and video input from a full 360-degree arc up to 1,000 feet to a receiving monitor. When in range, it can also roll under its own power by remote; it has a speed of 10. It has 1 hit point and an AC of 10. It functions for 1 minute per charge.

The TL5 version contains a small antigravity unit, enabling it to hover for 1 minute per charge used. It has a fly speed of 20 and a ground speed of 10.

Climbing Boots

Boots are free to characters, but these are better. You gain a +1 bonus to Strength (Athletics) checks when climbing.

Clothing

They say clothing makes a man. In this case, they can also help you with skill checks. In an appropriate situation (GM's call) you gain the listed bonus to skill checks. With the exception of wearing synthetic weave, you gain no benefits from these clothes if trying to wear them underneath or (if possible) over your armor or other clothes. Casual wear grants no benefit.

Business: Gain a +1 bonus to Charisma (Persuasion) checks

Formal: Gain a +2 bonus to Charisma (Persuasion) checks

Fatigues: Gain a +1 bonus to Charisma (Intimidation) and a +1 bonus to Stealth if wearing a pattern that matches the environment. Each terrain type requires its own pattern.

Duct Tape

Duct tape is useful for a wide variety of things, subject to your imagination and the GM's approval (ironically, it is borderline useless for repairing ductwork). Some examples include:

- Affix a small item (such as a flashlight or a tracker) to a weapon.
- Create one foot of rope (up to thirty feet).
- Mark up to three feet on the ground or on an object.
- Handcuffs (target is restrained, DC25 to escape).
- Prevent a restrained creature from speaking.

Digital Audio Recorder

This both records and plays back over 1000 hours on an internal digital memory unit. You can have it set to record only your voice or an entire room.

Digital Camera

The resolution, features, and price of this camera is dependent on the current tech level. The megapixel resolution is 10mp at TL1, 20mp at TL2, 100mp at TL3, 500mp at TL4, and 1000mp at TL5. Storage capacities increase accordingly, with each camera being able to take around 5,000 images. The camera can also record around 6 hours of video.

Electric Torch

Modern torches do not employ fragile bulbs but instead use electronically regulated light-emitting diodes that make the end product more efficient, brighter, and more durable for the wilderness adventurer. It employs a miniature electrical generator and capacitor. By either shaking the light or winding a crank, the capacitor charges, allowing the unit to power its LED transmitter.

The light illuminates a 60-foot cone from the user. It lasts 10 minutes before fading out and requiring a recharge (one minute).

Electro Optical Sensor (EOS)

The EOS is equipped with a 360-degree motion sensor meant to detect both ground and aerial targets within 500 feet. It sends all information to a source monitor that cannot be more than 1000 feet away.

Targets must beat a DC25 Dexterity (Stealth) check or be detected. It only detects movement and cannot detect incorporeal targets. One charge is used up every hour.

Filament Camera

This device uses a microscopic wire 50 feet long. Through a remote at one end, it can navigate around corners and through vents. It transmits visual and auditory information back to its source. Because of the size of the wire, it is virtually invisible (DC20 Wisdom (Perception) to spot).

Fire Extinguisher

This expels a chemical that smothers the flame and cools the target. The result is a compressed container capable of putting out almost any kind of fire from combustible metals to burning oils.

As an action, extinguish a 5-foot area fire. Each container has enough for ten uses.

Flash Goggles

This simple eyewear protects the wearing from any blinding effects from bright light, whether natural or technological. They respond to incoming illumination and darken within 0.0005 seconds. When you are blinded via an external effect (like a light), you nullify the effect.

Force Shield

This system consists of two ground-planted generator coils which, when placed up to 20 feet apart and activated, create barrier between them, impenetrable from one side but allowing those behind it to fire through.

Use an action and drain a cell to create a 20-foot long wall that offers total cover for those behind it. It uses one additional charge per round in use. It must be deactivated to be moved (a bonus action to deactivate).

Gas Mask

This flexible and compact unit, when donned, attempts to filter all outside gasses and will protect the wearer from many airborne poisons. It will not protect the user if the environment has no proper earth atmosphere at all. While wearing the mask you are immune to gas attacks and inhaled poisons.

Glow-Paint

This is a spray can that, when applied to a surface, creates illumination. You can spray up to 10 square feet which dimly illuminates that area and the area up to ten feet around it for six hours.

Gravity Lens

The lens resembles a 10x13-photo frame with a handle on one side when unfolded from its compact package. When attached to a wall, it allows the user to peer through it as if looking through a window. It detects secret doors, compartments, caches and so forth as well as snares and pits.

You have advantage when attempting to open a lock, disable a trap, or disarming at explosive. Each attempt uses a charge.

Grip Gloves

This allows the user to climb walls with ease. You have a climb speed equal to your ground speed.

Handcuffs

These high tensile steel restraints require a DC25 Strength ability to break. You can also attempt a DC20 Dexterity (Sleight of Hand) check to open them.

Holographic Generator

This backpack-carried device deploys its own legs when activated. The fabric of the pack conceals most of the gear. Only a reflective sphere on a pintle rises from the top. The device can make a 50-foot circle look and sound like some other sort of natural terrain and can hide structures, equipment, and creatures within the area: multiple generators can be set up to conceal larger areas. All sounds within the dome are muffled from the outside. The effect is not solid, so interacting with the hologram reveals its illusory nature. This device cannot be moved when activated. Each hour of use exhausts a charge.

Infrared Goggles

These non-telescoping goggles still provide stereoscopic vision and allow the wearer to see in total darkness.

You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, and everything you see is rendered in shades of green, yellow, or blue (your choice).

Lie Detector

No paper, needles, or wire; this device is a simple palm-shaped item that is placed gently on the subject's body. You have advantage on Wisdom (Insight) checks on the target. Each attempt uses a charge.

Light Bender

Thought once to be the realm of magic, the bender moves light around it, effectively making itself and its wearer invisible. The device, usually backpack-stored with a remote bracelet to operate it, creates a magnetic field, removing the target from sight, even from darkvision and infrared. As bending *all* light would necessarily prevent the user from seeing out of it, light of very specific wavelengths is allowed through the field, creating a 'shimmer' effect when the field moves (to the wearer, the world merely looks constantly twilit); sudden movements or attacks disrupt the field entirely.

As an action, you become invisible. Each round uses a charge and the effect ends if you interact with something or someone or if you make any form of attack.

Light Sticks

When activated, the chemicals mix with a fluorescent dye. They usually glow red, green, or blue. One stick illuminates a 20-foot radius for one hour.

Lighter

You gain the capacity to make fire. Fire is (almost) always good. In a pinch, the lighter can illuminate a 5-foot area (your immediate vicinity) for one minute for each use. A standard lighter has 20 uses.

Metal Detector

This small device extends a small probe that scans for metal objects. You have advantage on Wisdom (Perception) checks when searching for metals. Each attempt uses a charge.

Nano-Healer

Beyond just patching holes, these nanobots enter the body via an injection gun and repair it from within. The bots quickly run out of power after a few minutes. As an action, the target recovers 8d4+8 hit points.

Pillow

A small fabric pillow often filled with chicken feathers. It is not useful in hand-to-hand combat.

Perfume/Cologne

Rarely found, exotic perfumes comprise of unique scents not found on the average corner market. One finds these tiny bottles in high-class stores that usually sell little else. Each bottle is filled and finished by an expert hand, often encased in high quality glass or crystal. The raw materials alone for exotic perfumes rise ridiculously high, involving sometimes thousands of different flowers picked from the corners of the globe. One such rare brand comprises of 10,000 different roses from over three countries. A container generally holds 20 uses. When used, you gain a +1 bonus to Charisma (Persuasion) checks for 1 hour. However, for the duration, you also suffer disadvantage to Dexterity (Stealth) checks.

Portable Jammer

When activated, this device impedes all incoming and outgoing wireless communication. This includes cell phones, radio detonators, WiFi, and wireless neural implants. It lasts a total of 20 minutes on a charge and radiates 100 feet.

Puppet

A puppet often finds its use entertaining children and the child at heart. Using a puppet for mockery usually fails to deflect retaliation. In a pinch, it can also be used as a distraction or decoy.

Survival Rations

These are no longer limited to freeze-dried meat and crackers, but offer a full range of cuisine including chicken and beef fajitas, hamburgers, meatloaf, beef-steak, and pastas with various sauces, beef stew, and jambalaya. Six days of rations for one person weighs one pound. Each package requires little preparation and can be eaten on the go. Beverages can be ingested right from the pouch. Each ration has a shelf life of five years with a peak temperature range of 60° C. Each day's worth of ration supplies, on average, 3000 calories.

110 Rover Robot

This tiny machine resembles a small, flattened box with two sets of caterpillar tracks. Regardless of how it lands or tumbles, it still can operate, as its propulsion system is larger than its body. A camera adjusts automatically to any change in orientation. It receives instructions from an operator that cannot be more than 5000 feet away and sends back both visual and audio information. The machine rolls at a speed of 35 feet and can tread through rough terrain or even over water. It has AC 20 and 20 hit points. It has a Strength score of 3 through a basic manipulator arm and a Dexterity score of 16. If you have proficiency in an ability check or skill, so does the robot. It uses one charge per minute and both the machine and the remote control require batteries.

Sleeping Bag

Sleeping bags enclose one (or two snugly) occupant in a synthetic bag capable of protecting the occupant (s) from temperatures as cold as -50 degrees C. It resists wind and combustion (thought is still susceptible to magical fire). It is externally waterproof.

Soap

When stranded in a combat arena, everyone will thank the one traveler who brought soap.

Standard Adventurers Kit

This kit includes the following: Two battery flares, five chemical light sticks, one compass, one sleeping bag, one lighter, one canteen (waterskin) and one week of survival rations.

Sunglasses

These are not cheap knock-offs.

Suspension Filament

Often used in covert military applications, suspension filament is a super strong wire that is virtually invisible to the naked eye. Only light reflection can detect it when it is being disturbed (DC 2 Wisdom (Perception) check in daytime, DC25 at night). The wire supports more than 800 lb. before breaking. It also has the ability to disintegrate when not needed as it requires a slight electrical charge to remain intact. When this specific charge stops, the wire breaks apart into separate atoms. When its taut status is loosened (no weight pulling), it disappears, leaving virtually no trace (the wire becomes an odorless gas). Each unit supplies 500 feet of cable. Only the length that had force applied will disintegrate, not the whole roll. This function can be deactivated before use and can also be implemented in a grapple hook.

Synthetic Tent

Tents come in two, four, and six person capacities. Most tents utilize flexible poles and are available in dome, tunnel, single-hoop, and geodesic styles. It takes 5 minutes to set up and take down properly.

Tablet Assistant

This advanced piece of miniaturized electronics permits wireless access to the internet as well as providing dozens (if not thousands) of useful applications from being a GPS or radio to mimicking bodily functions and the sounds of laser swords. You gain a +1 bonus to any Intelligence ability or skill check.

Towel

Any good adventurer always knows where their towel is. A towel can be used to prevent severe traumatic bleeding. Otherwise, it is mostly useful to prevent severe traumatic soaking.

Two-Way Radio

Civilian and military radios use frequencies chosen specifically to avoid eavesdropping and interference with other machines or day-to-day electronics. Military models can tune to any frequency: civilian and emergency service radios are each restricted to a certain range. It has a clear range of 20 miles. Even basic models can withstand some punishment and water pressure.

Ultrasound Goggles

These goggles translate sonic vibrations into visual stimuli. In the absence of ambient sound, they transmit high frequency pulses and detect the ricochet off objects. Any loud noise over 120 decibels causes the goggles to white out. You gain blindsight—you are aware of the location of any hidden or invisible creature within 10 feet of you. The goggles use one charge per hour of use.

Watch, Automatic

Digital watches have fallen out of favor in the world of today. Modern watches employ a balance wheel that winds via the motion of the wearer's arm. This allows the watch to keep perfect time without requiring manual winding or any power source. The compact and complicated device is water resistant, shock resistant, and cannot be over-wound with abuse. They are also completely silent.

Widget Bag

You can use widgets to repair, modify, and create items, defraying the cost of repairs. You keep pieces handy for on-site repairs. These parts cannot be sold or traded, and they are useless to others. The parts work with any device you attempt to repair. When purchased, the bag has no widgets. When you scavenge technology, the GM may award a certain value in additional widgets, or you can simply buy a certain value of miscellaneous parts.

Widgets count against the total treasure awarded. The weight of the widgets in the bag depends on your level (as you get better at separating useful objects from junk): level 1-6, 1 lb. per \$500; level 7-13, 1 lb. per \$1000; level 14-20, 1 lb. per \$100,000.

VEHICLES

Most adults in a modern and "normal" world can operate ground vehicles with relative ease. Aircraft are different case entirely, requiring specific training to prevent a catastrophe. The rarity of vehicles and their advancement is dependent on the specifics of the setting.

VEHICLE RULES

For the most part, vehicles should not be featured in combat, as the logistics of handling two separate scales are too complex for general purposes. When they are featured, they involve a slight departure from regular movement rules.

Armor Class

The vehicle's AC is listed in the vehicle table. Like armor, some vehicles allow you to add either your Dexterity or Intelligence bonus to your vehicle's AC.

Attacking From Vehicles

The vehicle's controller has disadvantage on attack rolls (unless the vehicle is the weapon) while the vehicle is in motion (has a carryover speed) and must make a DC15 Dexterity check to maintain control if using the Attack action. Passengers have disadvantage as well unless using a turret-mounted weapon. Otherwise, vehicle movement is considered the same as personal movement for purposes of penalties and impediments to attacking, especially with firearms.

Control

Only one person can control a vehicle, and the vehicle operates only on that character's (your) turn. If driving, and you are required to make a Dexterity check relating to driving outside of your turn, the effects of that roll take place at the start of your next turn (even if you are crashing). Large creatures cannot control vehicles without heavy modification no matter how big the vehicles are; whether a Large creature even fits in the vehicle is up to the GM's discretion. Only if a vehicle has secondary controls (ground vehicle do not—aircraft often do) can a second character assist the driver via Help or Working Together.

Crash

A crash is a catastrophic failure in vehicle control. If you fail a Dexterity (Vehicle Operation), the result is a crash. In these terms, a crash is a loss of control, not an incident where damage is inflicted, though this ultimately can happen.

If you crash, at the start of your turn you decelerate at your speed rating if you haven't immediately struck an obstruction. If you hit difficult terrain, or you hit an obstruction (like a wall or another vehicle), your movement stops. The vehicle and all occupants inside take damage according to the vehicle's current speed.

SPEED	DAMAGE
Less than 30	No damage
31-50	1d8
51-70	2d8
71-90	3d8
91-110	4d8
111-130	5d8
131-150	6d8
151-170	7d8
171-190	8d8
191-210	9d8
211 and up	10d8

If there are no obstructions to crash into, you continue decelerating at your carryover speed rating each turn until your movement is 0, you recover with a Maneuver action, or until you hit an obstruction or difficult terrain.

If you fail a Dexterity (Vehicle Operation) check while crashing by 10 or more, the vehicle rolls as it crashes. The vehicle takes 2d6 damage at the start of every turn it spends rolling.

Jump Failure: If you fail by 5 or less, you make the jump, but enter a crash. If you fail by 5 or more, your vehicle rolls. If you fail by 10 or more, you drive into the ground or fall short, instantly stopping and suffering damage.

Seatbelts: Occupants in vehicles are assumed strapped in when a vehicle crashes (unless they are moving around inside the vehicle). If a vehicle suffers damage from rolling or crashing, occupants strapped in suffer half the damage inflicted on the vehicle. Those not secured take full damage.

Aircraft: An aircraft that fails its control roll loses altitude equal to x2 its speed. Unlike ground vehicles, aircraft do not decelerate in a slide.

Blimps do not lose altitude when sliding or crashing. They remain suspended in the air via a series of "lifting bags" contained inside a larger carrier. This can be another balloon or a rigid superstructure. Each airship of this type lists the number of internal lifting bags. An attack that inflicts 20 damage or more on an aircraft may puncture a balloon instead of causing damage to the craft (attacker's choice). If so, the hit inflicts no damage on the vessel. Half of an airship's lifting bags must be punctured for an airship to be affected. Once half the lifting bags are punctured, the airship drops 20 feet at the start of each turn, dropping an additional 20 feet for every additional bag punctured. Every bag punctured also imposes a cumulative -1 penalty to the vessel's maneuverability. Only by destroying the vessel can it crash violently.

Escape: If all appears hopeless during a crash, occupants can try to escape (stunned or not) by making a DC20 Dexterity (Acrobatics) check for the driver or a

DC15 check for passengers. Occupants have one chance per turn to try to escape. A driver who attempts to escape no longer has any control over the vehicle.

Destroying Vehicles

Reducing a vehicle to zero hit points renders it non-functional. A vehicle reduced to a negative value equal to its total hit points bursts into flame, immediately inflicting 3d6 fire damage to every creature that moves through or enters its space or within 10 feet of it for five minutes.

Entering And Exiting

Getting in and out of a vehicle costs an amount of movement equal to half your speed (like mounting or dismounting).

New Action: Maneuver

A vehicle is a mindless machine and thus requires continuous input. Moving a vehicle occurs your turn using your movement. However, if you want to do anything significant with your vehicle, you are required to use an action to maneuver, a Maneuver action.

With a Maneuver action, you can accomplish the following.

- Increase your speed by a maximum of your vehicle's speed rating or by a maximum of x2 your speed, the latter requiring a DC10 Dexterity (Vehicle Operation) check—failing, the craft's vehicle does not change.
- Decrease your speed by a maximum of x2 your vehicle's speed rating or by a maximum of x4 your vehicle's speed rating, the latter requiring a DC10 Dexterity (Vehicle Operation) check—failing, the vehicle enters a crash.
- Attempt to gain control of your vehicle if it is out of control (in a crash).
- Ramming is part of a Maneuver action since you are making an attack roll, but it is in addition to any other acceleration, deceleration maneuvers attempted during the same action.

Proficiency

Vehicles are classed as a tool proficiency. For these purposes, vehicles are divided into five categories:

- light ground (Medium-size vehicles, such as bikes and ATVs),
- heavy ground (Large ground vehicles, such as trucks),
- super-heavy ground (Huge and larger, such as tanks and most ETVs),
- aircraft (all manner of flying vehicles),
- watercraft (river- and ocean-going craft).

If you are proficient with a class of vehicle, you add your proficiency bonus to all checks related to the operation of such vehicles.

Ram

To accomplish a ram, you move a vehicle you are controlling into an adjacent space to your target. Take note of your current speed this turn (especially how much you have left). Ramming is part of a Maneuver action, and you can perform other vehicle maneuvers normally as part of that same action.

You can ram any creature or object you could target with a melee attack. You cannot target individual occupants of a vehicle (subject to GM discretion). You make a melee attack using your vehicle as the weapon. You may use Dexterity or Intelligence as the attack ability,

and gain your proficiency bonus with the attack if you are proficient with the vehicle. If you pass through an enemy space and do not perform a ram or if you miss, the target automatically avoids you, and you continue moving your speed.

Damage with a hit depends on how fast the vehicle is traveling (its current total speed at the time of impact) along with how large your vehicle is.

- Normal-sized vehicles inflict 1d6 damage on a hit for every 40 speed the vehicles has.
- Large vehicles inflict 1d10 damage on a hit for every 30 speed the vehicles has.
- Huge vehicles or larger inflict 1d12 damage on a hit for every 20 speed the vehicles has.

If the target was a rigid object (such as a vehicle, or a Large or larger creature), the ramming vehicle suffers half damage from the ram. If it was a soft object (such as a Medium or smaller creature), the ramming vehicle suffers quarter damage.

If the target is a vehicle moving itself, the ramming damage may alter accordingly. Subtract the target's speed from the attacker's if the collision occurred from behind or the side, or add it if it was from the front.

Resistances

Vehicles are immune to all conditions. They are also immune to necrotic, psychic, and poison damage.

Speed

The speed rating for a vehicle is not its top speed but the rate at which you can change its movement (up or down) without making a Dexterity (Vehicle Operation) check.

Here are the rules regarding vehicle movement and acceleration:

- Your vehicle has a "carryover speed"—the speed at the end of your last turn. Your vehicle has a carryover speed of 0 if the vehicle has stopped or hasn't moved before the start of your turn.
- You cannot move your vehicle with a Dash action (only with the movement portion of your turn)—you alter its current speed or perform an extreme maneuver with a Maneuver action.
- If you have any carryover speed (even if only 1), that is your speed at the beginning of your turn, and you must move that distance unless you alter it with a Maneuver action.
- A vehicle can accelerate up to x2 its speed with a DC 10 Dexterity (Vehicle Operation) check (with a Maneuver action).
- A vehicle can decelerate at up to x2 its speed without a check (with a Maneuver action).
- A vehicle can attempt hard deceleration, decelerating at up to x4 its speed with a DC10 Dexterity (Vehicle Operation) check (with a Maneuver action).
- In safe conditions, a vehicle can safely move up to six times its speed rating without a skill check. This may change depending on conditions.
- A vehicle's top speed is x20 its speed rating.
- Road and flight conditions can affect a skill check as seen below.
- Once a vehicle reaches a desired speed, it no longer requires a skill check unless conditions change or a maneuver is severe (a sharp turn, an obstacle, or terrain changes).

NAME	CAP	CARGO	MANEUVER	SPEED	Armor Class (AC)	HP	SIZE	COST	TL
4-wheel ATV	2	100	—	30 ft.	13+ Dex/Int mod.	20	M	500	1

Supercar	2	20	—	90 ft.	13+ Dex/Int mod.	40	L	100,000	2
Tank	4	500	Disadvantage	20 ft.	18	125	H	25,000	2
Truck, Wheeled	4	1,500	—	30 ft.	13+ Dex/Int mod. (max 2)	50	L	8,000	1

- A vehicle automatically fails Dexterity saving throw unless it has a carryover speed.
- Huge or smaller vehicles cannot normally enter squares labeled as difficult terrain. Depending on the situation, they may get stuck or hit an obstruction. Depending on the topography (marsh or debris, for example), Gargantuan or larger vehicles can ignore difficult terrain. The severity of the terrain may impede even these vehicles: trees may stop a tank but not a behemoth.
- A vehicle cannot squeeze, crouch, or adjust its space.

STUNT OR CONDITION	DC
Speed	
Up to x8 vehicle's speed	5
Up to x10 vehicle's speed	10
Up to x12 vehicle's speed	15
Up to x14 vehicle's speed	20
Up to x16 vehicle's speed	25
Up to x20 vehicle's speed	30
Flight conditions	
Strong wind	+5
Raging storm	+10
Tornado / Hurricane	+15
Road conditions	
Gravel	+5
Rain / Snow	+10
Accelerate x2 speed	10
Decelerate x4 speed	10

Targeting And Cover

Creatures inside/on a vehicle receive protection depending on the situation and the attack.

Cover: Most vehicles grant three-quarters cover to their occupants. If an attack targeting a vehicle occupant benefitting from cover would have hit the target without the cover, the attack hits the vehicle instead.

Reach: Vehicles do not have reach but creatures inside may.

Selecting Defense: Creatures inside/on a vehicle targeted by an attack from a creature outside the vehicle may choose to use the vehicle's AC in lieu of their own. Certain vehicles prevent occupants from being targeted by certain attacks (usually disease, gas, or poison). Creatures attacking a vehicle may choose to target the vehicle itself instead of the occupants.

Using Skills

Any skill that could be negatively impacted by the motion of a vehicle—such as Wisdom (Medicine) or Intelligence (Engineer)—has disadvantage.

VEHICLE STATISTICS

Capacity (Cap): The standard person capacity or crew. One person is needed to drive the vehicle; other crewmembers serve as gunners, co-pilots, or passengers. Each unused passenger slot allows the vehicle to carry an additional 200 lbs. of cargo.

Cargo Capacity: The amount of cargo the vehicle is designed to carry in pounds in a cargo module or trunk.

Maneuver: If listed as “Disadvantage”, the driver has disadvantage on Dexterity (Vehicle Operation) checks to operate the vehicle (so best not to push it).

Speed (Rating): The number of feet the vehicle can safely accelerate per round. Double this value is the vehicle's maximum deceleration. Both values can be adjusted with a successful Dexterity (Vehicle Operation) check.

AC: The vehicle's AC, to which the driver applies her Dexterity or Intelligence modifier.

Hit Points: The vehicle's hit points.

Size: The size of the vehicle.

Weapon Mounts: Certain vehicles come equipped with mounting hardware to attach weapons. When available, the mount is able to house any class of weapon listed (the vehicle's size is not taken into account when determining the class of weaponry, as is the case with exo-armor).

Power

Depending on the Tech Level, a vehicle can be run on steam, gasoline, battery, or even nuclear power. The details of the setting can also affect this. For most settings, vehicles are assumed to be run off internal combustion, giving them a range of about 200 miles per tech level. This range is consistent with electric vehicles as well—they are just better for the environment. If the latter, a battery can either be included and rechargeable, an M cell that requires replacement (H for military vehicles), or both (the default, meaning the battery only needs replacing if drained or broken).

GROUND VEHICLES

4-Wheel All-Terrain Vehicle (ATV)

All-terrain vehicles are miniaturized motorized buggies. They don't offer the protection their larger cousins have. ATVs can operate like mounts instead of vehicles for the purposes of combat. This vehicle automatically passes Dexterity (Vehicle Operation) checks at x8 speed.

Armored Truck

Armored trucks offer amazing resistance to outside damage without the high costs or the impracticality of an APC or a tank. Tires are run-flat and the wheels are as well protected as the rest of the truck. The enclosed cabin may have open gun hole sliders that increase offensive and defensive power while still offering cover to those inside.

Armament: The armored trucks is equipped with a single turret heavy weapon mount.

Immunities: The armored truck is immune to cold, fire, and slashing damage.

Resistances: The armored truck has resistance to acid, and thunder, as well as bludgeoning, and piercing from nonmagical weapons.

Armored Personnel Carrier (APC)

Slow and awkward, armored personnel carriers can track their history back for over a century. The enclosed cabin and cargo area provide sufficient protection through heavy gauge steel. The vehicle drives on massive tires with a durable suspension able to withstand a drop from two stories.

Armament: The APC comes equipped with two turret heavy weapon mounts.

Dismount: Non-driving personnel can enter and exit this vehicle with only 5 feet of movement.

Immunities: The APC is immune to cold, fire, and slashing damage.

Resistances: The APC has resistance to acid and thunder, as well as bludgeoning and piercing from nonmagical weapons.

Tank

Tanks continued to evolve almost to extinction. Anti-tank weaponry became so advanced, many drivers and crew found themselves riding in crawling coffins. The advancements of armor could not match the research dedicated to their penetration. Modern tanks offer the same level of protection, but are much more maneuverable than their predecessors.

Armament: The tank contain three turret mounts for heavy weapons.

Immunities: The tank is immune to cold, fire, as well as slashing, bludgeoning, and piercing damage.

Pressurized: The crew is immune to all gas attacks and inhaled poisons until the vehicle is destroyed.

Resistances: The tank has resistance to acid and thunder.

Terrain: Tanks suffer no penalties for passing through difficult terrain. Terrain a tank passes over is no longer difficult. Tanks may even be submerged in water, bringing in air from an outside snorkel that rises up 10 feet from the hull.

Bike, Wheeled

These are durable basic machines with strong chassis and thick, large, run-flat tires with heavy treads. They don't offer any protection to the rider. Some manufacturers refer to them as enduros.

Special: Bikes can operate like mounts instead of vehicles for the purposes of combat. This vehicle automatically passes Dexterity (Vehicle Operation) checks at x8 and x10 speed.

Resistances: The bike has resistance to cold.

Buggy, Wheeled

This refers to semi-enclosed vehicles with a wide footprint upon the ground (with the tires spaced far to the corners). They are much larger than a standard car. The buggy encloses the crew in a steel and plastic frame that offers protection from a crash but does not seal an environment. The body is formed in such a way that shifting a tumbled vehicle back to its wheels is a relatively simple procedure. Thick steel roll bars prevent damage to the frame or the people inside. They are not designed for urban use.

Resistances: The buggy has resistance to cold.

Special: This vehicle automatically passes Dexterity (Vehicle Operation) checks at x8 and x10 speed.

Automobiles

(generic sedan, sports car, sport utility vehicle, supercars, and trucks)

The average car can be gas, electric or hybrid. It can have all-wheel-drive or all-wheel steering, can be equipped with a cellular link, cruise control, a heads-up-display and cup holders. ABS, TCS, AVS, A/C, GPS and DCS are all common features. Higher-end machines have climate control, an entertainment system and leather seats. Anyone inside gains resist 5 poison against outside attacks.

NAME	CAP	CARGO	MANEUVER	SPEED	Armor Class (AC)	HP	SIZE	COST	TL
Aircraft									
Advanced Aerial Vehicle	6	1,500	—	40 ft.	13 + Dex/Int mod.	100	H	100,000	4
Attack Helicopter	2	500	—	50 ft.	15 + Dex/Int mod. (max 2)	90	H	80,000	2
Blimp	5	300	Disadvantage	5 ft.	16	50	G	25,000	2
Buzzboy	1	5	—	60 ft.	13 + Dex/Int mod.	30	M	25,000	2
Helicopter	4	500	Disadvantage	40 ft.	14 + Dex/Int mod. (max 2)	40	H	25,000	2
Helicopter	4	500	—	50 ft.	13 + Dex/Int mod.	40	H	70,000	3
Hover Car	4	200	—	30 ft.	13 + Dex/Int mod.	30	H	25,000	4
Leviathan	60	20,000	Disadvantage	20 ft.	18	200	G	200,000	4
Rocket Yacht	8	800	—	60 ft.	15 + Dex/Int mod. (max 2)	50	H	100,000	5
Swoosh Bike	2	100	—	60 ft.	13 + Dex/Int mod.	20	M	20,000	5
Tilt-Fan	6	2,000	—	40 ft.	15 + Dex/Int mod. (max 2)	100	H	100,000	3
Til-Rotor	10	3,000	Disadvantage	40 ft.	16	100	G	100,000	2
Tilt-Jet	10	5,500	Disadvantage	50 ft.	16	100	H	125,000	3

Resistances: Automobiles have resistance to cold, as well as slashing from nonmagical weapons.

Motorcycle/Super Bike

Although motorcycles can range from all-terrain enduros to racing bikes, this entry is skewed towards the latter—designed for city streets rather than dirt roads. They can have run-flat tires and a GPS. Like cars, they can be run on gas or battery. Motorcycles and superbikes operate like mounts for the purposes of combat.

Resistances: The bike has resistance to cold.

Multi-Ped Armored Vehicle, Heavy

With the advancement of robotics and artificial muscles, an attempt was made to incorporate this technology into modern weaponry. The first generation legged-tank didn't see much use out of the test bed. The second variety was too large and cumbersome. Every prototype that emerged for ten years never went into production because the advantages of the multi-ped system were offset by the inherent vulnerability of leg joints to enemy fire.

Multi-ped tanks are substantially lighter than their heavy treaded cousins. They are much faster, often equipped with a backup wheel system for more maneuverability. They can traverse over any terrain, though they find the most use in urban deployments. Special equipment include composite armor, environment control, fire extinguishers, IR smoke dispensers, a military radio, laser and visual rangefinders, military radar, satellite uplink, thermograph and image enhancement.

Arms: The arms have a Strength of 26. Melee hits cause 2d6 damage. The arms are cumbersome and suffer a -4 penalty to all attack rolls. The arms have reach 2.

Immunities: The heavy multi-ped is immune to cold, fire, as well as slashing, bludgeoning, and piercing damage.

Manipulators: The multi-ped has two micro-manipulator arms. They have Strength 15 and reach 1.

Motive System: All multi-peds have dual movement systems they can switch with a minor action. The first speed rating is with their legs; the second is with the wheels at the base of the legs. The wheels operate as normal movement. Legs can ignore all movement

penalties for difficult terrain and can pass through squares occupied by medium or smaller obstacles or enemies.

Pressurized: The crew is immune to all gas attacks and inhaled poisons until the vehicle is destroyed.

Resistances: The multi-ped has resistance to acid, and thunder.

Sensors: The heavy multi-ped has darkvision to 500 feet and see invisible targets within 100 feet.

Turret: 2 two-handed small arm turrets and 1 heavy weapon turret OR 2 heavy weapon turrets OR 1 super heavy weapon turret.

Multi-Ped Vehicle, Light

Since the development of the main multi-ped tanks being used in various battle theatres across the world, several groups began the natural trend to making the designs smaller and more maneuverable. This was in response to demands for a miniature assault vehicle as a solution to the tight environments of modern day congested cities. Unlike the main production multi-peds often seen on news programs, the LMPV was built for, as is used primarily by, civilian security and law enforcement groups. Although powered armor and slave systems as well as androids have evolved to render most multi-peds absolute, a few LMPVs can still be found in circulation around the globe, often times flanked by their successors.

Arms: Main arms have a Strength of 20. Melee hits cause 1d8 damage. The arms count as unarmed combat but the limbs are cumbersome and suffer disadvantage to all attack rolls.

Grapples: One grappling hook with 500 feet of nano-wire. This can easily support the weight of one LMPV and up to two passengers.

Immunities: The light multi-ped is immune to cold, fire, as well as slashing and bludgeoning damage.

Motive System: All multi-peds have dual movement systems they can switch with a minor action. The first speed rating is with their legs; the second is with the wheels at the base of the legs. The wheels operate as normal movement. Legs can ignore all movement penalties for difficult terrain.

Pressurized: The crew is immune to all gas attacks and inhaled poisons until the vehicle is destroyed

Resistances: The multi-ped has resistance to acid and thunder, as well as piercing from nonmagical weapons.

Sensors: The light multi-ped has darkvision to 250 feet and see invisible targets within 50 feet.

Turrets: 2 two-handed small arm turrets OR 1 heavy weapon turret.

Personal Transport

The PT started as a novelty endorsed by a few schools and fewer cities. Eventually, larger companies jumped into the market with competing designs, presenting a cheaper, more efficient transportation alternative for dense population centers. Variations include stand-up and sit-down models, covered and open, all-terrain and city-use. They are all battery powered with a range of 150 kilometers before requiring a recharge.

Special: The personal transport operates like mounts for the purposes of combat.

AIRCRAFT

Advanced Aerial Vehicle

This military aircraft uses fanjets to keep itself airborne and is unable to stay aloft otherwise, as it is not equipped with an aeroform. The fanjets have a built-in redundancy which can compensate if the craft loses one of its engines. It operates as both a transport and as an attack vehicle capable of parking over a location and securing ground like a tank. It doesn't deliver the massive punch of a focus attack helicopter but it can nearly equal one in an even engagement. Its size and payload have dubbed it a "flying fortress". The rear cargo area can hold up to six fully armed soldiers

ECM: If the AAV is hit with a ranged attack, as a reaction, the attack has disadvantage.

Resistances: The AAV has resistance to acid, cold, and fire, as well as slashing, bludgeoning, and piercing from nonmagical weapons.

Sensors: The AAV has darkvision to 500 feet.

Turrets: 2 two-handed small arm turrets and 1 heavy weapon turret OR 2 heavy weapon turrets.

Attack Helicopter

Modern attack helicopters dominate the modern urban battlefield. They have unmatched nightvision and threat analysis, equipped with laser range finder, thermal imaging night sights, and a digital computers. Both the fuel and ammunition are compartmented to enhance survivability.

Active Camouflage Denial System: Spend 40 feet of movement and target an area 40 feet in diameter up to 200 feet away. Until the start of your next turn, all enemy creatures in the area of effect cannot benefit from cover. This includes using cover to make stealth checks.

ECM: If the attack helicopter is hit with a ranged attack, as a reaction, the attack has disadvantage.

Resistances: The attack helicopter has resistance to acid, cold, and fire, as well as slashing and bludgeoning from nonmagical weapons.

Sensors: The attack helicopter has darkvision to 500 feet and see invisible targets within 50 feet.

Turret: 2 heavy weapon turrets or 3 two-handed small arm turrets. One weapon turret can be controlled by the pilot without having to make a control roll.

Blimp

Blimps are hot-air ships with a non-rigid structure. Without pressure, they deflate. After cold air is pumped in and then heated, the baffles fill up and the final shape takes form. Only the passenger car or gondola has rigid construction. The difference between blimps and simple hot-air balloons is the addition of tail fins and propulsion.

Lifting Bags: This aircraft is equipped with four lifting bags.

Resistances: The blimp has resistance to acid, cold, and fire, and thunder, as well as bludgeoning from nonmagical weapons.

Buzzboy

The buzzboy is a nickname assigned to a variety of one man aerial transports developed from a trio of companies from America, Sweden, and Japan. The "buzzboy" name was coined and copyrighted by American Aero-Tran, though it is now the brand name of all transports of this type. They are used in law enforcement, traffic control, and military divisions assigned to urban warfare. They are occasionally fitted with weapons but are mostly used for reconnaissance. They can also be controlled by an artificial or synthetic intelligence or by remote via cyberlink. They have no room for passengers. The craft wraps around its user.

Resistances: The buzzboy has resistance to acid, cold, and fire, as well as slashing and bludgeoning from nonmagical weapons.

Sensors: The buzzboy has darkvision to 250 feet.

Turret: 1 two-handed small arm turret.

Helicopter

Standard helicopters are a common sight. They are agile despite their size, come equipped with a jet-stabilization system, and can ferry several armed personnel into a conflict. This entry is not for a heavy transport or for a nimble 2-person craft, but for the mid-size multi-purpose aircraft. They are still significantly more maneuverable than their predecessors, able to navigate the forest of city towers with no chance of clipping a rotor.

Resistances: The helicopter has resistance to acid, cold, and fire.

Hover Car

Everyone wanted a flying car. They were promised a flying car. It's the mark of a futuristic world, the sure sign of progress. Despite wireless internet and miniature portable computers, the public will not be satisfied until they have their flying car. Thankfully, when it finally arrived, it came with an auto-drive to prevent those same people from killing themselves the first day they took their flying car for a spin. Hover cars probably utilize ducted-fans or magnetic repulsion technology. They have altitude limitations but are known for their maneuverable

Resistances: The hover car has resistance to acid, cold, and fire.

Leviathan

A colossal flying fortress, the leviathan stays aloft via a dozen ducted-fans or jets. This mobile strongpoint supports numerous weapon turrets and dozens of personnel. There are few leviathans in the world, and they rarely appear over densely populated areas. Thanks to its size, the leviathan is slow, but it is not an easy target, able to lose half of its engines and remain aloft.

Armament: A leviathan contains six turret mounts for heavy weapons.

Immunities: The leviathan is immune to cold, fire, as well as slashing and bludgeoning damage.

Pressurized: The crew is immune to all gas attacks and inhaled poisons until the vehicle is destroyed.

Resistances: The leviathan has resistance to acid and thunder, as well as piercing from nonmagical weapons.

Sensors: The leviathan has darkvision to 1,000 feet.

Rocket Yacht

It's not so much a rocket vehicle as it is a spacecraft capable of escape velocity. It doesn't run on liquid propulsion, and can make such trips repeatedly. It does not resemble a ground vehicle, and functions clumsily in urban environments. In space, it glides, but its range is severely limited. Often, the rocket yacht achieves low-Earth orbit in order to make quick hops across the planet.

Immunities: The rocket yacht is immune to cold and fire.

Pressurized: The crew is immune to all gas attacks and inhaled poisons until the vehicle is destroyed.

Movement Mode: The rocket yacht is not required to make vehicle control checks for speed as long as it is traveling in a straight line.

Resistances: The rocket yacht has resistance to acid and thunder, as well as slashing, bludgeoning, and piercing from nonmagical weapons.

Swoosh Bike

A swoosh is a vehicle designed by a madman—a collection of jets and miniature control surfaces barely able to keep the whole thing stable in the air. As such, only insane daredevils would hope to master it, and few have. Those exceptions claim a thrill like no other. Everyone else is scared for his or her life.

Resistances: The swoosh has resistance to cold and fire.

Special: A swoosh operates like a mount instead of a vehicle for the purposes of combat.

Tilt-Fan/Jet/Rotor Transport

This is a blanket term for several variations of tilt-wing aircraft. They are mostly reserved for company presidents and military applications. The engines rotate for quick take-offs and offer up to a 200% increased horizontal acceleration over regular helicopters. The tilt-fan utilizes ducted-fan engines and the overall design is smaller, with less control surfaces and larger engines compared to vehicle size. The larger tilt-rotor and tilt-jets are similar in size and operate nearly identically.

Movement Mode: A tilt transport in hover-mode cannot move faster than x8 its speed. If it attempts to

move faster, it enters overland mode, and the tilt transport counts x14 its speed as x8.

Resistances: Tilt transports have resistance to acid, cold, fire, and thunder, as well as slashing and bludgeoning from nonmagical weapons.

VEHICLE MODIFICATIONS

Only one modification of any type can be applied although you can apply different grades of the same type. For example, you can apply interlaced armor plating grade I and II and have the values compound but you cannot apply two grade I interlaced armor plating. That being said, if a modification is already on a vehicle, you can skip that level and gain the second. Each higher grade is a substantial increase in product quality and is not a simply repeat of the previous grade. There is no limit to the number of modifications you can place in a vehicle.

Auto Reloader

You have a mechanism to reload your weapons. You can reload three clips/cells without requiring an action before needing external loading.

Complete Composite Retrofit

Ultra high molecular-density polyethylene plates are bolted to the outer panels of the vehicle, removing any illusion of the transport's purpose. When you purchase this upgrade, select a damage type from the following list: acid, cold, fire, lightning, or thunder. You have resistance to that damage type.

Electronic / Physical Counter Measures (EPCM)

This is not one modification but several accomplishing similar ends. Reactive plating, adaptive camouflage, and regenerative countermeasures assist in making even an immobile vehicle harder to target with both close and ranged attacks.

Level I: +1 bonus to the vehicle's AC.

Level II: +2 bonus to the vehicle's AC.

Level III: +3 bonus to the vehicle's AC.

Electronics Flash Reprogramming

EFP involves removing the vehicle's engine control system that limits the vehicle's power output by dictating throttle response injection timing. The unit is then replaced or reprogrammed for higher and more efficient output, granting a +5 ft. bonus to speed rating.

Forced Induction

This involves installing a larger supercharger or turbocharger. Later levels include larger wastages and anti-surge/blow-off valve. Eventually, secondary forced induction systems may be included as well as larger intercoolers.

Grade I Property: Increase speed rating by +5

Grade II Property: Increase speed rating by +5

Grade III Property: Increase speed rating by +5

Nawz!

Your customized vehicle has a slight modification you haven't told anyone else about. As a bonus action, the speed of your vehicle increases by +10 feet for 1 minute. Once you use this ability, you cannot use it again until you finish a long rest.

Parachute

Parachutes attach to the main cabin or cockpit of an aircraft and deploy in case of freefall. A mechanical barometric switch triggers parachutes to prevent a terminal crash. The vehicle must be at least 200 feet above the ground for the parachute to operate safely.

Reinforced Chassis

By strengthening the chassis with strut and sway bars, adding run flat tires, and replacing key components with harder and lighter materials like carbon fiber, the vehicle can endure more punishment.

Level I: Vehicle gains +20 hit points.

Level II: Vehicle gains +100 hit points. Vehicle must have at least 40 hit points for this modification.

Level III: Vehicle gains +130 hit points. Vehicle must have at least 80 hit points for this modification.

Level IV: Vehicle gains +80 hit points. Vehicle must have at least 100 hit points for this modification.

Visual Active Camouflage

This is an active cloaking system that can conceal a vehicle when not engaged in combat.

As an action, you become invisible for up to five minutes. If you are hit by a melee or ranged attack, you enter a square filled with water, you are hit with debris, or you fire any weapons, there is a 50% chance you become visible and the effect ends. Once you use this ability, you cannot use it again until you finish a long rest.

Weapon Mount / Turret

A vehicle must have a listed hit point total equal to or greater than 30 to mount a two-handed weapon turret, equal to or greater than 60 to mount a heavy weapon (unless stated otherwise), and equal to or greater than 100 to mount a super heavy weapon (unless stated otherwise). Most vehicles can have only one weapon mount. Weapons use their original size when determining what can be fitted to a mount, even if they nominal count as a smaller weapon for a larger user.

Interlaced Armor Plating

Though it does increase weight, this modification attempts to maintain the overall appearance of the vehicle without any visible evidence of the increased protection. Normal windows are replaced with bulletproof glass. Aramid plates are inserted behind the body panels. Later upgrades involve upgrading the reinforced glass with even tougher ballistics glass, though windows no longer roll down and a cursory examination reveals the heavy defense. Grade 1 is B3/IA compliant, providing optimal defense against most one-handed small arms. Grade 2 is B4/II compliant, increasing small arm defense to include heavy caliber pistols. Grade 3 is B5/IIA compliant and includes protection against most two-handed small arms.

Grade I Property: Gain resistance to slashing from nonmagical weapons.

MODIFICATION	COST	TL	CELL

¹Ground vehicle only

²Aircraft only

Grade II Property: Gain resistance to bludgeoning from nonmagical weapons. The vehicle's speed is reduced by 5 feet.

Grade III Property: Gain resistance to piercing from nonmagical weapons. The vehicle's speed is reduced by 5 feet.

Premiere Performance Suspension

This expensive modification involves installing an intelligent active suspension system which includes computer enhanced systems like TCS (Traction Control System), ASR (Anti-Slip Regulation), and ESC (Electronically Stability Control).

Property: Gain a +2 bonus to ability checks with this vehicle.

VIN Registration Change

This alters the vehicle's identification number, making the Automatrix (if your game has one) think your vehicle is different than it is. By altering your VIN, you remove the AM's capacity to track you, although all VINs are registered. Unless it is told the new VIN is registered to you, it won't know you are the owner of the vehicle and people attempting to track your location via your VIN must be aware of the new number. Note that in some jurisdictions failure to maintain proper vehicle registration is illegal (GM's discretion).

CHAPTER SEVEN

ANTAGONISTS & ENEMIES

NEW PROPERTIES

Minion: Certain creatures can be turned into minions. A creature with the minion property uses the listed stats instead of its normal ones. Monsters from other sources may be turned into minions by reducing their AC by 1 and cutting their hit points to 1/4. Three minions count as one normal creature of the listed challenge rating.

ADVERSARIES

120

The creatures under this heading are generic, to allow for a wider range of enemies. To customize them, assign them one of the adversary traits below. For ease of bookkeeping, it is recommended that you use only one group of adversaries in a single encounter. Adversary traits should be given only to creatures in this section, not to the unique opponents later in this chapter or to creatures from other sources.

Adversaries are listed in order of their challenge rating, not by their name.

ADVERSARY TRAITS

When building a battle involving common adversaries, choose one of the following special rules below.

Drone

Drones are usually robots or otherwise mindless automatons built or gathered in massive numbers, designed to overwhelm opponents in enormity rather than capabilities. Certain losses in combat are expected.

More Than Expected. A drone has disadvantage on Strength, Dexterity, and Constitution saving throws. When fielding creatures with the *minion* property, increase the number of minions to 4 instead of 3 for each group of minions.

Fanatic

Fanatics believe absolutely in their chosen path. They will risk everything, including their lives, for the completion of the task they place before themselves. They are often, but not always, religious zealots.

For the Cause. A fanatic has advantage on Constitution and Wisdom saving throws and is immune to being frightened. In addition, when the fanatic is reduced to 0 hit points or less, all fanatics in line of sight may move up to 30 feet as a reaction.

Guerrilla

Guerrillas avoid presenting themselves as a target. They are often underequipped and undermanned, offsetting that deficiency with stealth. They will prefer quick attacks and maneuverability over straight open gunplay.

Dirty Fighter. The guerrilla has advantage with Dexterity (Stealth) checks. It also gains an additional +2 bonus to AC when benefiting from cover (+4 and +7 respectfully). It also inflicts +2 extra damage when making ranged attacks from cover.

Hive

A hive shares one mind or has many minds synchronized to operate as one in the combat arena. Although technically possible with organic brains, this is seen almost exclusively with robots.

We Are One. Every hive unit knows the location of all other hive units. A member of a hive can sacrifice its action to give another hive advantage on one attack roll, ability check, or skill check on its turn (pick one). Hive adversaries cannot receive more than one benefit per round.

Ironclad

Occasionally, an opponent may not be particularly well trained but may be particularly well funded. They may have better weapons and better armor because of the economy of their government or because of their position in the army, despite deficiencies in other fields.

Tough Man. An ironclad gains resistance to bludgeoning, slashing, and piercing. It also gains +1 damage if any its damage dice roll the maximum result.

Mob

Mobs supply courage and strength through numbers. A mob is populated by underequipped, untrained individuals and must offset that by overwhelming their foes. They are often civilians.

Group Confidence. If mob creatures outnumber their opponents by 2-to-1 or more, each mob creature has advantage on attack rolls but cannot inflict a critical hit.

Regimented Unit

Regimented units work as a team and must deploy in numbers in an encounter to be effective. On their own, they are useless. Unlike a mob, however, these forces have undergone training to work together, and as such are not known for acts of stupidity, like breaking from a line.

Reliable Backup. The regimented unit gains a +2 bonus to AC while within five feet of another allied regimented unit. In addition, if it moves, it can disengage one allied regimented unit within five feet and

ILL-EQUIPPED COMBATANT

Medium human, any alignment

Armor Class 15 (armor) or 14 with *minion*

Hit Points 22 (15d8) or 5 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
14(+2)	12(+1)	11(+0)	10(+0)	10(+0)	10(+0)

Senses Passive Perception 10

Languages One language (English usually)

Challenge 1/2 (100 XP)

Minion. Ill-equipped combatants can be used as minions in a battle. A combatant used this way decreases its AC to 14 and its hit points to 5. Three ill-equipped combatants count as 1 normal combatant at the listed challenge.

Actions

Hatchet. *Melee Weapon Attack:* +4 to hit, reach 5 ft., one target. *Hit:* 4 (1d4+2) slashing damage.

Possible Revolver. *Ranged Weapon Attack:* +4 to hit, range 50/100 ft., one target. *Hit:* 5 (1d6+2) piercing damage.

CHAIN BRAWLER

Medium human, any alignment

Armor Class 16 (armor) or 15 with *minion*

Hit Points 27 (5d8+5) or 7 with *minion*

Speed 30ft.

Challenge 1 (200 XP)

Minion. Chain brawlers can be used as minions in a battle. A chain brawler used this way decreases its AC to 15 and its hit points to 7. Three chain brawlers count as 1 normal brawler at the listed challenge.

Leverage Swing. The chain brawler does +3 extra damage against prone targets.

Actions

Length of Chain. *Melee Weapon Attack:* +4 to hit, reach 10 ft., one target. *Hit:* 11 (2d8+2) bludgeoning damage and knock the target prone.

Rifle. *Ranged Weapon Attack:* +4 to hit, range 100/400 ft., one target. *Hit:* 8 (2d6+2) piercing damage.

pull it up to 20 feet.

Trained

After years in some form of military, these adversaries know to maximize their effectiveness when with others equally trained. Unlike a regimented unit, these are closer to pure soldiers and do not have to be linked arm-and-arm to be effective.

Encouraging Reaction. When a trained adversary scores a critical hit or is killed, the next allied trained adversary has advantage on its next attack roll.

BRUTAL THUG

Medium human, any alignment

Armor Class 17 (armor) or 16 with *minion*

Hit Points 39 (6d8+12) or 10 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA

Hit Points 51 (6d8+24)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
16(+3)	16(+3)	18(+4)	10(+0)	14(+2)	11(+0)

Senses Passive Perception 12

Languages One language (usually English)

Challenge 2 (450 XP)

Squeezing Off. The phallic compensator has advantage on its pistol attacks. One shot is fired each roll.

Actions

Pistol. *Ranged Weapon Attack:* +6 to hit, reach 5ft. or range 20/600, one target. *Hit:* 6 (1d6+3) piercing damage.

Pistol Whip. *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 6 (1d6+3) bludgeoning damage, and the target is pushed 5 feet.

Grenade (Recharge 5, 6). The compensator launches a grenade that strikes a 10-foot radius area within 60 ft. Each creature in that area must make a DC 13 Dexterity saving throw, taking 12 (4d6) fire damage on a failed save, or half as much damage on a successful one.

KNIFE MAN

Medium human, any alignment

Armor Class 17 (armor) or 16 with *minion*

Hit Points 51 (6d8+24) or 10 *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA

Senses Passive Perception 12

Languages One language (usually English)

Challenge 3 (700 XP)

Minion. Knife men can be used as minions in a battle. A knife man used this way decreases its AC to 16 and its hit points to 10. Three knife men count as 1 normal thug at the listed challenge.

Actions

Multiattack. The knife man makes two assorted knife attacks. If both attacks hit, the knife man makes a third attack.

Assorted Knives. *Melee or Ranged Weapon Attack:* +5 to hit, reach 5 ft. or range 20/80 ft., one target. *Hit:* 5 (1d4+3) piercing damage.

BELL-TOWER SNIPER

Medium human, any alignment

Armor Class 18 (armor)

Hit Points 27 (6d8+24)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
12(+1)	18(+4)	10(+0)	12(+1)	16(+3)	13(+1)

Skills Perception +5, Stealth +6

Senses Passive Perception 18

Languages One language (English usually)

Challenge 3 (700 XP)

Hawkeye. The sniper has advantage on its sniper weapon if firing from cover.

Actions

Combat Knife. *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 6 (1d4+4) piercing damage.

Sniper Rifle. *Ranged Weapon Attack:* +6 to hit, range 60/200 ft., one target. *Hit:* 9 (1d10+4) piercing damage. The sniper rifles scores a critical hit on a natural 19 or 20. On a critical hit, the target is stunned until the beginning of the sniper's next turn. This weapon has the AP property.

QUALIFIED COMBATANT

Medium human, any alignment

Armor Class 15 (armor) or 14 with *minion*

Hit Points 56 (10d8+11) or 14 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
14(+2)	16(+3)	12(+1)	1(+1)	10(+0)	13(+1)

Skills Perception +2,

Senses Passive Perception 12

Languages One language (usually English)

Challenge 4 (1,100 XP)

Minion. Qualified combatants can be used as minions in a battle. A qualified combatant used this way decreases its AC to 14 and its hit points to 14. Three combatants count as 1 normal combatant at the listed challenge.

Crouch (Non-Minion). The qualified combatant can spend 30 feet of movement to have advantage on its assault rifle attacks until the end of this turn.

Actions

Multiattack. The qualified combatant makes two combat knife attacks or two assault rifle attacks.

Combat Knife. *Melee Weapon Attack:* +4 to hit, reach 5 ft., one target. *Hit:* 5 (1d6+2) piercing damage.

Assault Rifle. *Ranged Weapon Attack:* +5 to hit, range 200/800 ft., one target. *Hit:* 9 (2d6+3) piercing damage.

MACHINE GUN MENACE

Medium human, any alignment

Armor Class 17 (armor)

Hit Points 78 (10d8+20)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
14(+2)	16(+3)	16(+3)	10(+0)	10(+0)	10(+0)

Senses Passive Perception 10

Languages One language (usually English)

Challenge 5 (1,800 XP)

Actions

Bring Down the Rain (Recharge 5, 6). The machine gun menace can make an area attack with its heavy machine gun. Select one 20-foot-radius within 150 feet. Each creature in that area must make a DC 15 Dexterity saving throw, taking 30 (10d6) explosive damage on a failed save, or half as much damage on a successful one.

Heavy Machine Gun. *Ranged Weapon Attack:* +6 to hit, range 200/800 ft., one target. *Hit:* 9 (2d6+3) piercing damage.

Rifle Butt. *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 5 (1d6+2) bludgeoning damage, and target is pushed 5 feet..

I know, you're probably thinking minions are not needed—one could just use lower level monsters given that AC and attack bonuses don't scale like the older games did. I figured this is a way to expand the number of monsters without drastically increasing the page count. I also think there are slight differences than using lower-level monsters.

AMMO WASTER

Medium human, any alignment

Armor Class 18 (armor) or 17 with *minion*

Hit Points 65 (10d8+20) or 16 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
12(+1)	16(+3)	14(+2)	10(+0)	11(+0)	10(+0)

Saving Throws Dex +6

Senses Passive Perception 10

Languages One language (usually English)

Challenge 5 (1,800 XP)

Minion. Ammo wasters can be used as minions in a battle. An ammo waster used this way decreases its AC to 17 and its hit points to 16. Three wasters count as 1 normal waster at the listed challenge.

Actions

Multiattack. The ammo waster can either make two SMG attacks OR four SMG attacks, though all four attacks have disadvantage.

Rifle Butt. *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 5 (1d6+2) bludgeoning damage, and target is pushed 5 feet.

SMG. *Ranged Weapon Attack:* +6 to hit, range 100/400 ft., one target. *Hit:* 7 (1d8+3) piercing damage.

CELL LIEUTENANT

Medium human, any alignment

Armor Class 17 (armor)

Hit Points 65 (10d8+20)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
14(+2)	16(+3)	14(+2)	16(+3)	16(+3)	16(+3)

Skills Perception +5, Persuasion +5

Saving Throws Int +4, Wis +5

Senses Passive Perception 15

Languages One language (usually English)

Challenge 4 (1,100 XP)

Action Point. As a bonus action, the cell lieutenant can offer an action to another ally within 60 feet. The action is lost if not used before the beginning of the cell lieutenant's next turn.

Actions

Multiattack. The cell lieutenant makes two combat knife attacks or shotgun attacks.

Knife. *Melee Weapon Attack:* +6 to hit, reach 5 ft., one target. *Hit:* 4 (1d4+2) piercing damage, and the cell lieutenant can disengage from the target.

Shotgun. *Ranged Weapon Attack:* +7 to hit, range 25/50 ft., one target. *Hit:* 8 (1d10+3) piercing damage, and if the attack is a critical hit, the target is knocked prone. The shotgun also inflicts +3 damage if fired at targets 10 feet or closer. At long range, it only inflicts half damage.

Reactions

Help Me! If an ally is reduced to 0 hit points, as a reaction, the cell lieutenant can disengage any other allied within 30 feet and move them up to 30 feet. Up to five allies in line of sight gain an additional action on their next turn.

WATCHER IN THE CROWD

Medium human, any alignment

Armor Class 16 (armor)

Hit Points 72 (13d8+13)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	16(+3)	12(+1)	14(+2)	12(+1)	16(+3)

Skills Deception +6, Intimidation +6, Perception +3, Stealth +6

Saving Throws Str +7, Cha +6

Senses Passive Perception 13

Languages One language (usually English)

Challenge 5 (1,800 XP)

A Looker. Until the watcher in the crowd hits with his concealed knife, he gains a +3 bonus to AC as well as having advantage on Dexterity (Stealth) and Charisma (Intimidate) skill checks.

Slip Out/Slip In. The watcher in the crowd can use the Disengage action as a bonus action. It also has advantage on its concealed knife the first time it attacks a creature. If it hits a creature before it can attack, this hit turns into a critical hit.

Actions

Multiattack. The watcher makes two concealed knife attacks.

Concealed Knife. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target. *Hit:* 7 (1d6 +4), and the target takes 5 damage at the beginning of each of its turns until it makes a DC 15 Constitution saving throw.

FLESH FORTRESS

Medium human, any alignment

Armor Class 14 (armor)

Hit Points 126 (12d8+72)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
20(+5)	16(+3)	22(+6)	8(-1)	6(-2)	10(+0)

Senses Passive Perception 8

Languages One language (usually English)

Challenge 6 (2,300 XP)

Hulking. The flesh fortress has advantage on Constitution ability checks and saving throws.

Actions

Multiattack. The flesh fortress makes two lead pipe attacks. If you attack the same target twice, the second attack has advantage.

Lead Pipe. *Melee Weapon Attack:* +10 to hit, reach 5ft., one target. *Hit:* 12 (2d8+4) bludgeoning damage.

Heavy Rifle. *Ranged Weapon Attack:* +8 to hit, range 200/1000 ft., one target. *Hit:* 14 (2d10+4) piercing damage. This weapon has the AP property.

SWORD MASTER

Medium human, any alignment

Armor Class 21 (armor) or 20 with *minion*

Hit Points 50 (12d8) or 12 with *minion*

Speed 40 ft.

STR	DEX	CON	INT	WIS	CHA
17(+3)	18(+4)	11(+0)	14(+2)	14(+2)	10(+0)

Saving Throws Dex +8

Skills Acrobatics +8, Athletics +7, Stealth +8

Condition Immunities frightened

Senses Passive Perception 12

Languages One language (usually English)

Challenge 6 (2,300 XP)

Minion. Sword masters can be used as minions in a battle. A sword master used this way decreases its AC to 20 and its hit points to 12. Three brothers count as 1 normal brother at the listed challenge.

Weapon Preference. The sword master selects a weapon preference, drawing out one weapon or two. Switching takes an action. The sword master either wields one blade in each hand or a single blade two-handed.

Actions

Multiattack. If wielding two swords, the sword master makes two attacks; if wielding one sword, the sword master makes one attack with advantage.

One-Handed Sharpened Steel. *Melee Weapon Attack:* +8 to hit, reach 5 ft., one target. *Hit:* 8 (1d8+3) slashing damage. If wielding this weapon two-handed, increase damage to 11.

Two-Handed Sharpened Steel. *Melee Weapon Attack:* +10 to hit, reach 5 ft., one target. *Hit:* 12 (2d6+6)

Reactions

Parry. If an enemy misses on a melee attack against the sword master, the sword master can either a) if dual-wielding, make a single attack as a reaction, or b) if wielding two-handed, double the damage of the sword master's next hit before the beginning of the sword master's next turn.

BAND BROTHER

Medium human, any alignment

Armor Class 18 (armor) or 17 with *minion*

Hit Points 90 (12d8+36) or 23 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
16(+3)	16(+4)	16(+3)	14(+2)	10(+0)	12(+1)

Senses Passive Perception 10

Languages One language (usually English)

Challenge 6 (2,300 XP)

Minion. Band brothers can be used as minions in a battle. A band brother used this way decreases its AC to 17 and its hit points to 23. Three brothers count as 1 normal brother at the listed challenge.

Actions

Multiattack. The band brother makes two assault rifle attacks and selects one band brother in line of sight to have advantage on its next attack roll.

Assault Rifle. *Ranged Weapon Attack:* +10 to hit, range 100/400 ft., one target. *Hit:* 8 (1d8+4) piercing damage.

Rifle Butt. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target. *Hit:* 6 (1d6+3) bludgeoning damage

PROXIMITY THREAT

Medium human, any alignment

Armor Class 18 (armor) or 17 with *minion*

Hit Points 123 (14d8+60) or 30 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
20(+5)	16(+3)	18(+4)	10(+0)	12(+1)	10(+0)

Skills Athletics +9

Senses Passive Perception 12

Languages One language (usually English)

Challenge 7 (2,900 XP)

Minion. Proximity threats can be used as minions in a battle.

A Proximity threat used this way decreases its AC to 17 and its hit points to 30. Three threats count as 1 normal threat at the listed challenge.

Actions

Multiattack. The proximity threat makes one auto-shotgun attack but has advantage on the attack.

Auto-Shotgun. *Ranged Weapon Attack:* +10 to hit, range 25/100 ft., one target. *Hit:* 11 (2d8+3) piercing damage, and if the attack is a critical hit, the target is knocked prone. The shotguns also inflicts +3 damage if fired at a target 10 feet or closer. At long range, it only inflicts half damage.

Sprint Shot. Disengage from all enemies, move up to 10 feet, and make an *auto-shotgun* attack.

PYROPHILIAC

Medium human, any alignment

Armor Class 19 (armor)

Hit Points 78 (12d8+24)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
16(+3)	18(+4)	17(+3)	12(+1)	14(+2)	12(+1)

Saving Throws Str +9, Dex +9, Wis +6

Damage Immunities fire

Senses Passive Perception 12

Languages One language (usually English)

Challenge 8 (3,900 XP)

Smoke 'Em If You Got 'Em. Any target within 5 feet of the pyrophiliac when the pyrophiliac uses his *flame thrower* suffers 5 fire damage.

Actions

Flamethrower. The pyrophiliac can shoot napalm in either a 20-foot cone or a narrow stream 30 feet long and 5 feet wide. Each creature in the area of effect must make a DC 14 Dexterity saving throw, taking 24 (6d8) fire damage on a failed save, or half as much damage on a successful one.

Slam. *Melee Weapon Attack:* +8 to hit, reach 5 ft., one target. *Hit:* 6 (1d6+3) bludgeoning damage, and target is pushed 5 feet.

ADVANCED COMBATANT

Medium human, any alignment

Armor Class 19 (armor) or 18 with *minion*

Hit Points 104 (16d8+32) or 26 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
20(+5)	20(+5)	15(+2)	14(+2)	16(+3)	12(+1)

Senses Passive Perception 12

Languages One language (usually English)

Challenge 8 (3,900 XP)

Minion. Advanced combatants can be used as minions in a battle. A combatant used this way decreases its AC to 18 and its hit points to 26. Three combatants count as 1 normal combatant at the listed challenge.

Snapshot. The advanced combatant can reduce its remaining speed by 10 feet and make an additional bullpup attack as part of the same attack action (for example, it can make three additional attack if it doesn't move and reduce its speed to zero).

Actions

Bullpup Rifle. *Ranged Weapon Attack:* +13 to hit, range 50/200 ft., one target. *Hit:* 10 (1d10+5) piercing damage.

Rifle Butt. *Melee Weapon Attack:* +13 to hit, reach 5 ft., one target. *Hit:* 8 (1d6+5) bludgeoning damage, and target is pushed 5 feet.

FORCE COMMANDER

Medium human, any alignment

Armor Class 15 (armor)

Hit Points 98 (13d8+39)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
20(+5)	16(+3)	17(+3)	10(+0)	16(+3)	15(+2)

Skills Perception +7, Intimidation +6

Saving Throws Wis +10, Cha +9

Senses Passive Perception 17

Languages One language, usually English

Challenge 7 (2,900 XP)

Tactical Genius. The force commander acts twice every round, once at its initiative value, and again at its initiative value -10.

Sleep When You're Dead. When an ally within 25 feet of the force commander is reduced to 0 hit points or fewer, the target makes an attack action before dropping. This is considered a reaction for the ally.

Empty the Clip (Recharge 6). When the force commander hits with a *machine pistol* attack, he can use a bonus action to repeat the attack and continue repeating until the commander misses or hits 4 times. (If using empty the clip with multiattack, the force commander still gains the second attack).

Actions

Multiattack. The force commander makes two *machine pistol* attacks.

Machine Pistol. *Ranged Weapon Attack:* +10 to hit, range 50/200 ft., one target. *Hit:* 8 (1d8+3) piercing damage.

INSIDIOUS ASSASSIN

Medium human, any alignment

Armor Class 18 (armor)

Hit Points 127 (17d8+51)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
17(+3)	20(+5)	16(+3)	13(+1)	14(+2)	14(+2)

Skills Stealth +9, Perception +6

Saving Throws Dex +9

Senses Passive Perception 16

Languages One language (usually English)

Challenge 9 (5,000 XP)

Natural Predator. Any hits against targets you have advantage against are critical hits.

Pervasive Wound (Recharge 6). When the insidious assassin scores a critical hit on a target, as a bonus action, it inflicts a continuous injury, inflicting 5 damage at the beginning of the target's turn until the insidious assassin is dead, the target is reduced to below zero hit points, one minute (10 rounds) as passed. A target can only suffer one pervasive wound at a time.

Actions

Assassin Maneuver. The insidious assassin disengages from the target, moves up to 30 ft. and makes a Non-LARP Blade attack. This attack has advantage on the attack roll.

Non-LARP Blade. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target. *Hit:* 10 (1d10+5) slashing damage.

KUNG-FU GUY

Medium human, any alignment

Armor Class 18 (armor) or 17 with *minion*

Hit Points 120 (16d8+48) or 30 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA

Saving Throws Str +9, Dex +8

Senses Passive Perception 12

Languages One language (usually English)

Challenge 10 (5,900 XP)

Minion. The kung-fu guy can be used as a minion in a battle. A kung-fu guy used this way decreases its AC to 17 and its hit points to 30. Three kung-fu guys count as 1 normal kung-fu guy at the listed challenge.

Actions

Multiattack. The kung-fu guy makes three iron fist attacks.

Iron Fists. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target. *Hit:* 10 (1d10+5) bludgeoning damage.

Headstrong (Recharge 5, 6) (Non-Minion). The kung-fu guy makes five iron fist attacks.

LAND WHALE

Medium human, any alignment

Armor Class 13 (armor)

Hit Points 210 (20d8+120)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	16(+3)	22(+6)	12(+1)	12(+1)	10(+0)

Saving Throws Str +10, Con +10

Skills Athletics +10

Senses Passive Perception 11

Languages One language (usually English)

Challenge 12 (8,400 XP)

Actions

Multiattack. The land whale either makes two goliath fist attacks or two autocannon attacks.

Goliath Fists. *Melee Weapon Attack:* +10 to hit, reach 5ft., one target. *Hit:* 18 (4d6+6) bludgeoning damage. Once the land whale is reduced below 99 hit points, its damage increases to 24 (6d6+6) bludgeoning damage.

Autocannon. *Ranged Weapon Attack:* +7 to hit, range 300/1,200 ft., one target. *Hit:* 15 (1d8+11) piercing damage, and the next hit increases damage by +2 (this is cumulative until the total damage is 1d8+31 or the land whale is stunned, incapacitated, or reduced below 0 hit points. This weapon has the AP property.

Sweep the Enemy (Recharge 6). The land whale makes an autocannon against each enemy in range that it can see.

KATANA CLICHÉ

Medium human, any alignment

Armor Class 20 (armor) or 19 with *minion*

Hit Points 120 (16d8+48) or 30 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
16(+3)	20(+5)	16(+3)	15(+3)	15(+2)	15(+2)

Skills Perception +7

Saving Throws Dex +10

Senses blindsight 60ft., passive Perception 17

Languages One language (usually English)

Challenge 14 (11,500 XP)

Minion. Katana Clichés can be used as minions in a battle. A Katana Cliché used this way decreases its AC to 19 and its hit points to 30. Three Katana Clichés count as 1 normal cliché at the listed challenge.

Focus Attack (Non-Minion). The cliché can make one of its attack rolls automatically hit (still roll), though its AC is reduced by 2 until the beginning of its next turn.

Actions

Multiattack. The Katana Cliché makes two katana attacks. Once per action, one hit is turned into a critical hit.

Katana. *Melee Weapon Attack:* +10 to hit, reach 5ft., one target. *Hit:* 10 (1d10+5) slashing damage.

DRUG NUT

Medium human, any alignment

Armor Class 16 (armor)

Hit Points 152 (16d8+80)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
20(+5)	18(+4)	20(+5)	8(-1)	12(+1)	10(+0)

Saving Throws +5 Con

Senses Passive Perception 9

Languages One language (usually English)

Challenge 14 (11,500 XP)

Damage Resistances bludgeoning

Juicer. The drug nut has advantage on Strength, Dexterity, and Constitution saving throws. It also has advantage on attacks against targets it is grappling.

Actions

Multiattack. The drug nut makes two improvised weapon attacks, three if all attacks are against a grappled target.

Improvised Weapon. *Melee Weapon Attack:* +10 to hit, reach 5ft., one target. *Hit:* 13 (2d8+5) bludgeoning damage

One-Handed Choke. *Melee Weapon Attack:* +10 to hit, reach 5ft., one target. *Hit:* a Medium or smaller target is grappled (escape DC18).

Menacing Lift (Recharge 5,6). *Melee Weapon Attack:* +10 to hit against a grappled target, reach 5ft., one target. *Hit:* 21 (4d8+5).

FORMIDABLE OPPONENT

Medium human, any alignment

Armor Class 20 (armor)

Hit Points 120 (16d8+48)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	22(+6)	16(+3)	16(+3)	16(+3)	16(+3)

Saving Throws Str +11, Dex +11, Wis +8

Skills Athletics +11, Acrobatics +11, Perception +8

Senses Passive Perception 18

Languages Common

Challenge 15 (13,000 XP)

Head Shot (Recharge 6). As a bonus action, you can double all dice damage on your last customized rifle attack (this stacks if the attack already is a critical hit).

Actions

Called Shot. The formidable opponent makes two customized rifle attacks—any hits are turned into critical hits.

Rifle Butt. *Melee Weapon Attack:* +11 to hit, reach 5ft., one target. *Hit:* 10 (1d8+6) bludgeoning damage, the target is pushed 5-feet, and you can immediately make a customized rifle attack.

Customized Rifle. *Ranged Weapon Attack:* +12 to hit, range 50/200 ft., one target. *Hit:* 11 (1d10+6) piercing damage, and the target's speed is reduced to zero until the beginning of the formidable opponent's next turn.

PISTOL PACKER

Medium human, any alignment

Armor Class 19 (armor) or 18 with *minion*

Hit Points 152 (16d8+80) or 38 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
20(+5)	20(+5)	20(+5)	10(+0)	14(+2)	14(+2)

Saving Throws Str +10, Con +10

Senses Passive Perception 12

Languages One language (usually English)

Challenge 16 (15,000 XP)

Minion. Pistol packers can be used as minions in a battle. A pistol packer used this way decreases its AC to 18 and its hit points to 38. Three pistol packers count as 1 normal packer at the listed challenge.

Ranged Response (Non-Minion). The pistol packer can Disengage, Dodge, Dash or make a single hammer shot attack as a bonus action.

Actions

Multiattack. The pistol packer makes four hammer shot attacks

Hammer Shot. *Ranged Weapon Attack:* +11 to hit, range 40/160 ft., one target. *Hit:* 9 (1d8+5) piercing damage.

Pistol Whip. *Melee Weapon Attack:* +11 to hit, reach 5 ft., one target. *Hit:* 8 (1d6+5) bludgeoning damage.

BIG BOSS

Medium human, any alignment

Armor Class 19 (armor)

Hit Points 207 (18d8+126)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	22(+6)	24(+7)	18(+4)	18(+4)	16(+3)

Saving Throws Str +11, Dex +11, Con+12, Int +9, Wis +9, Cha +8

Skills Perception +9, Intimidation +8, Persuasion +8

Damage Resistances bludgeoning, piercing, and slashing from nonmagical weapons

Senses Passive Perception 19

Languages Three languages (including English)

Challenge 16 (15,000 XP)

Health Bar. At the start of its turn, if the big boss has not been reduced to less than 100 hit points, he regains 5 hit points.

Weak Point. When an enemy scores a critical hit on the big boss, the big boss suffers 5 extra damage.

Actions

Multiattack. The big boss makes three groovy gauntlet attacks or two street howitzer attacks.

Groovy Gauntlet. *Melee Weapon Attack:* +11 to hit, reach 5ft., one target. *Hit:* 14 (2d8+6) bludgeoning damage, and the target is knocked prone.

Street Howitzer. *Ranged Weapon Attack:* +11 to hit, range 300/1,200 ft., up to two targets within 5 feet of each other. *Hit:* 22 (2d8+14) explosive damage. This weapon has the AP property.

Grenade Bandolier (Recharge 6). The big boss can toss a grenade to within 60 feet. Each creature in a 20-radius of the impact point must make a DC 17 Dexterity saving throw, taking 35 (10d6) explosive damage on a failed save, or half as much damage on a successful one.

Reactions

Action Point (Recharge 6). As a reaction to the end of an enemy's turn, the big boss gains a turn.

Second Phase (Once). When the big boss is reduced to 0 hit points or lower, as a reaction, the big boss regains 190 hit points, loses access to the health bar ability, and its action point ability now recharges on a 4, 5, and 6.

PENULTIMATE ANTAGONIST

Medium human, any alignment

Armor Class 19 (armor) or 18 with *minion*

Hit Points 220 (21d8+126) or 55 with *minion*

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
24(+7)	20(+5)	22(+6)	15(+2)	16(+3)	12(+1)

Saving Throws Str +13, Con +12

Condition Immunities poisoned

Senses Passive Perception 13

Languages Common

Challenge 19 (22,000 XP)

Minion. Penultimate Antagonists can be used as minions in a battle. A Penultimate Antagonist used this way decreases its AC to 18 and its hit points to 55. Three Penultimate Antagonists count as 1 normal Antagonist at the listed challenge.

Actions

Multiattack. The Penultimate Antagonist makes two hammer shot attacks and two throttle hit attacks.

Throttle Hit. *Melee Weapon Attack:* +13 to hit, reach 5ft., one target. *Hit:* 12 (1d10+7) bludgeoning damage, and the target is pushed 5 feet. If the Penultimate Antagonist scores a critical hit, it rolls damage dice three times instead of twice, and the target is pushed 10 feet.

Hammer Shot. *Ranged Weapon Attack:* +13 to hit, range 300/1,200 ft., one target. *Hit:* 15 (2d8+7) piercing damage, and the target takes an half damage at the beginning of its next turn.

Reactions

Resilient Biology (Non-Minion). As a reaction, if the Penultimate Antagonist is hit with a non-critical attack, the attack misses.

POWERED ARMOR

EMPEROR

Large construct, any unaligned

Armor Class 17 (natural armor)

Hit Points 157 (15d8+75)

Speed 30ft., Fly 40 ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	16(+3)	21(+5)	15(+2)	16(+3)	12(+1)

Saving Throws Str +10, Con +9

Skills Acrobatics +7, Athletics +10

Damage Immunities lightning, poison; bludgeoning, piercing, and slashing from non magical weapons that aren't adamantite

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 13

Languages Common

Challenge 9 (5,000 XP)

Actions

Multiattack. The emperor makes any other four attacks, though only one can be a railgun attack.

Alpha Strike (recharge 5,6): The emperor uses the Disengage, Dash, and multiattack action.

Slam. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target. *Hit:* 7 (2d4+2) bludgeoning damage, and the target is knocked prone.

Railgun. *Ranged Weapon Attack:* +8 to hit, range 300/1,200 ft. *Hit:* 19 (2d8+11) piercing damage, and the target is pushed 10 feet. This weapon has the AP property.

Shoulder-Mounted Machine Gun. *Ranged Weapon Attack:* +8 to hit, range 100/400 ft. *Hit:* 12 (1d8+8) piercing damage.

Reactions

Ablative Armor (once). Once the emperor is reduced to half hit points (or 80), it loses its damage immunities, both ground and fly speed increase by 5 feet, and it is healed to full hit points.

In NeuroSpasta, the first expansion for Ultra-modern5, these same monsters all have a Firewall listing, which operates the same as AC, except it involves virtual attacks instead of physical ones. Refer to that book for these opponent's Firewall values.

HOSTILE ARMORED RESPONSE MECH (HARM)

Huge Construct, any unaligned

Armor Class 19 (armor)

Hit Points 207 (18d12+90)

Speed 35 ft.

STR	DEX	CON	INT	WIS	CHA
23(+6)	16(+3)	21(+2)	15(+2)	15(+2)	14(+2)

Saving Throws Str +11, Dex +8, Con +10

Damage Immunities lightning, poison; bludgeoning, piercing, and slashing from non magical weapons that aren't adamantite

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses darkvision 120 ft., passive Perception 13

Languages Common

Challenge 15 (13,000 XP)

Actions

Multiattack. HARM makes three heavy piton leg attacks.

Perimeter Sweep. HARM makes a single electronic pulse rifle attack to each target within 50 feet it can see.

Heavy Piton Leg. *Melee Weapon Attack:* +11 to hit, reach 10ft., one target. *Hit:* 17 (2d10+6) piercing damage, and the target is pushed 15 feet.

Electronic Pulse Rifle. *Ranged Weapon Attack:* +8 to hit, range 200/1,000 ft. *Hit:* 18 (3d6+9) piercing damage. This weapon has the AP property.

Air Mortar (Recharge 6). HARM targets an area 20-feet in radius within 100 feet. Each creature in that area must make a DC 19 Dexterity saving throw, taking 66 (12d10) explosive damage on a failed save, or half as much damage on a successful one.

Legendary Actions

The HARM can take 3 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. HARM regains spent legendary actions at the start of its turn.

Recovery. The HARM is healed of 10 hit points.

Fortified Platform. HARM stands up, costing no movement to do so.

Deployment. The HARM's AC increases to 21 until the end of the next enemy's next turn.

The visual style of this artwork is consistent with the NeuroSpasta setting, but given how generic some monsters are (like the adversaries), you are more than welcome to hunt down any surrogate artwork that fits the bill.

MINOTAUR BATTLE ARMOR

Large construct/vehicle, unaligned

Armor Class 13 (natural armor)

Hit Points 78 (12d8+24)

Speed 40 ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	18(+4)	17(+3)	15(+2)	11(+0)	5(-3)

Saving Throws Str +9, Dex +7

Damage Resistances lightning, poison; bludgeoning, piercing, and slashing from non magical weapons that aren't adamantite

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 120 ft., passive Perception 10

Languages Common

Challenge 5 (1,800 XP)

Minotaur Rush. The minotaur cannot be targeted by opportunity attacks. When the minotaur moves, it ignores difficult terrain. The minotaur cannot be knocked prone.

Actions

Iron Onslaught (Recharge 6). The minotaur makes a *slam* attack against each enemy in reach during its movement. On a hit, the target is knocked prone. The minotaur can only attack each target once.

Slam. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target.
Hit: 24 (4d8+6) bludgeoning damage.

120mm Cannon. *Ranged Weapon Attack:* +7 to hit, range 300/1,200 ft., *Hit:* 19 (1d10+14) piercing damage. This weapon has the AP property.

Reactions

Eruption. When the minotaur is reduced below half hit points (or 47), as a reaction, the minotaur recovers from all conditions it suffers from and makes an *iron onslaught* attack.

UNIQUE OPPONENTS

JACKAL

Medium human, neutral evil

Armor Class 18 (armor) plus *instinctual camouflage*

Hit Points 153 (18d8+72)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	20(+5)	18(+4)	20(+5)	18(+3)	18(+4)

Saving Throws Dex +9, Con +8, Wis +8, Cha +8

Skills Deception +8, Intimidation +8, Perception +8, Stealth +8

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses passive Perception 18

Languages Common

Challenge 12 (8,400 XP)

Instinctual Camouflage. The jackal's AC increases to 20 against ranged attack.

Oswald Complex. When the Jackal scores a critical hit, he gain an additional action (he can only gain one action per turn..

Actions

Close and Personal. *Melee Weapon Attack:* +8 to hit, reach 5 ft., one target. *Hit:* 8 (1d8+4) slashing damage, and repeat the same attack. Continue repeating the attack until the jackal misses (or hits four times).

Assassin's Round. *Ranged Weapon Attack:* +9 to hit, range 400/1,600 ft., one target. *Hit:* 13 (1d8+5) piercing damage, plus the target suffers 1 damage at the beginning of it's turn until the jackal is killed, the target is killed, or five minutes have passed. This ongoing damage is cumulative with successive hits with *assassin round* (maximum ongoing 10 damage). This weapon has the AP property.

Cover to Cover. The Jackal uses the Disengage action, Dash action, and can make a Dexterity (Stealth) check.

MERC LEADER

Medium human, any alignment

Armor Class 17 (armor)

Hit Points 136 (16d8+64)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	18(+4)	18(+4)	17(+3)	16(+3)	18(+4)

Saving Throws Wis +7, Cha +8

Skills Insight +7, Perception +7

Condition Immunities charmed, exhaustion, frightened

Senses passive Perception 17

Languages Common

Challenge 10 (5,900 XP)

Knightly Presence. All allied creatures in sight of the merc leader gain a +2 bonus to damage rolls and saving throws. If the merc leader is killed, all allied creatures suffer a -2 penalty to damage rolls and saving throws for five minutes.

Relay Command. As a bonus action, one ally can take an action.

Actions

Multiattack. The merc leader makes three pinpoint pistol attacks.

Pinpoint Pistol. . *Ranged Weapon Attack:* +8 to hit, range 100/400 ft. *Hit:* 7 (1d6+4) piercing damage.

Patton Complex (Recharge 5, 6). One ally regains hit points equal to one quarter the target's original hit points.

Reactions

Placed Loyalty. If the merc leader is hit by a ranged attack, one ally within 20 feet swaps his location with the merc leader and suffers the hit instead.

JAGANNATH

Large construct, neutral

Armor Class 19 (natural armor)

Hit Points 189 (18d8+90)

Speed 40 ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	18(+4)	15(+2)	16(+3)	15(+2)	15(+2)

Saving Throws Str +11, Dex +9, Con +10

Skills Perception +7

Damage Immunities lightning, poison; bludgeoning, piercing, and slashing from non magical weapons that aren't adamantine

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses darkvision 120 ft., passive Perception 17

Languages Common

Challenge 15 (13,000 XP)

Direct Attack. The jagannath can use 20 ft. and make either a nuclear caster or a metal fists attack.

Phase Shield. The jagannath can spend 30 ft. of movement to erect the phase shield, which lasts until the beginning of its next turn. When the shield is up, the jagannath gains a +1 bonus to AC and can Disengage taking no action.

Actions

Multiattack. The jagannath makes two attacks from either the nuclear caster or its metal fists..

Nuclear Caster. Ranged Weapon Attack: +9 to hit, range 300/1,200 ft., Hit: 19 (1d10+14) energy damage, and the target suffers 10 energy damage at the end of its next turn. This weapon has the AP property.

Metal Fists. Melee Weapon Attack: +11 to hit, reach 5ft., one target. Hit: 17 (2d10+6) bludgeoning damage

Legendary Action

The jagannath can take 3 legendary actions, choosing from the options below. Only one legendary action option can be used at a time and only at the end of another creature's turn. The jagannath regains spent legendary actions at the start of its turn.

Nano-Reconstruction: The jagannath regains 10 hit points.

Topographical Analysis: The jagannath can take the Disengage action and move up to 20 feet.

Caster Surge: The jagannath makes a nuclear caster attack.

MISPLACED MARTIAL ARTS

Medium human, any alignment

Armor Class 20 (armor)

Hit Points 153 (18d8+72)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	20(+5)	18(+4)	14(+2)	15(+2)	15(+2)

Skills Acrobatics +10, Athletics +9, Perception +5,

Senses Passive Perception 15

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Languages Common

Challenge 13 (10,000 XP)

Like a Bullet. When Misplaced Martial Arts Master uses the Dash action, he gains a +4 bonus to AC.

Actions

Multiattack. The misplaced martial arts master makes two attacks from the following list: hiyaa!!, roundhouse, and front kick.

Hiyaa!! *Melee Weapon Attack:* +10 to hit, reach 5 ft., one target. *Hit:* 9 (1d8+5) bludgeoning damage, and if the attack is a critical hit, the misplaced martial arts master gains an action he must use this same turn. He can only gain two actions this way per turn.

Roundhouse. The misplaced martial arts master makes a single hiyaa!! attack against each enemy in reach.

Front Kick (Recharge 4-6). *Melee Weapon Attack:* +10 to hit, reach 5 ft., one target. *Hit:* 11 (2d6+5) bludgeoning damage, and the target paralyzed until the end of the misplaced martial arts master's next turn.

SHELL

Large construct, unaligned

Armor Class 18 (natural armor)

Hit Points 178 (17d8+55)

Speed 30ft.

STR	DEX	CON	INT	WIS	CHA
22(+6)	17(+3)	21(+5)	12(+1)	16(+3)	8(-1)

Saving Throws Str +10, Dex +7, Wis +7

Damage Immunities lightning, poison; bludgeoning, piercing, and slashing from non magical weapons that aren't adamantite

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses darkvision 120 ft., passive Perception 13

Languages Common

Challenge 11 (7,200 XP)

Regeneration. The Shell recovers 5 of its hit points at the beginning of its turn unless it has less than 100 hit points.

Actions

Multiattack. The shell makes three clamp attacks.

The Clamps. *Melee Weapon Attack:* +10 to hit, reach 10ft., one target. *Hit:* 15 (2d8+6) bludgeoning damage plus a Medium or smaller target can be grappled (escape DC17). The shell has advantage on attacks against targets it is grappling. The shell can grapple two different targets or one with both clamps—if the latter, the target has disadvantage when attempting escape. If grappling a target with both clamps, shell can make a rend attack.

Concealed Pulse Rifle. *Ranged Weapon Attack:* +10 to hit, range 200/1,000 ft. *Hit:* 16 (4d6+4) piercing damage. This weapon has the AP property.

Rend. *Melee Weapon Attack:* +10 to hit, reach 5ft., one target the shell is grappling with both clamps. *Hit:* 23 (3d6+11) bludgeoning damage.

135

CHAPTER EIGHT

ADVENTURING

Ultramodern5 supports multiple styles of gaming, from long-running campaigns to fast run-and-gun missions, and can service just about any modern or sci-fi genre from high-stakes espionage to the zombie apocalypse. Because it is built on the 5th Edition framework, many of the same considerations that go into planning a fantasy game are applicable to *Ultramodern5*. Of course, it differs in a few ways as well.

after the end of an adventure. These would come in the form of raw credits, not paintings, jewels or magic items. If the player takes an item as loot (a piece of equipment or a weapon, for example), the value of that item is deducted from that character's share of the group's financial reward at the end of the adventure.

SET PIECES

And sometimes you just want action. *Ultramodern5* can be about plot, or it can be about gunplay. Occasionally, a group may find itself involved in a life or death struggle including several encounters back to back. Even though the intervals between encounters might not be considered a "short rest," they can count as one, allowing the resetting of abilities and the spending of Hit Dice. You can then jump right back into another combat encounter and stack these quick battles into one large action scene. These action "set pieces" usually occupy a single session. Set pieces are not episodes but can often be the hook or climax of one. You can also extend the sequence of events and expand a set piece into an entire episode. This can be especially helpful after an adventure with little to no gunplay. The useful thing about set pieces is variety. You can use the same map in several different ways. Here are only a few examples.

136

TEAMWORK

99% of the time, you're not going to be going adventuring with some random dudes you met in a bar. An *Ultramodern5* character is usually part of a team. Character creation should take that into account, and be a collective experience, each member taking time to discuss their concept and finding their niche. Be sure the players broadly understand what sorts of challenges they can expect to run across, and make sure the GM understands what sorts of action the players are interested in facing.

THE REWARDS ARE STILL SWEET

In *Ultramodern5* games, enemies rarely come with convenient treasure drops. The best way around this is to include a financial reward system which is paid out

SPI — THE RUINED CITY

Unlike the urban city map, the ruined city map is a congested powder keg. The characters have found themselves (intentionally or accidentally) in a confined city block with little room to maneuver and enemies, real or imagined, hiding in every corner.

Area A - Tower

This is a bell or clock tower seven floors high. It is the highest location on the map. Entering from the east takes one right to the stairs. The outlook is only two squares wide. The ledge grants cover against all attacks. From this altitude, characters from this location have clear line of sight to any target on the map not in a building. Targets in buildings may have normal or superior cover depending on each situation. For example, targets in Area B can be attacked as there is no roof but the southern walls are intact, offering cover depending on how close targets are to the wall.

Hit Points: 100 and the building collapses. Those on the top floor fall 70 feet to the ground.

Area B - Guttled

This building has taken a shell or has suffered a bomb detonation. The southern and western walls are still intact but the roof and most of the north and eastern walls have collapsed. Although there are no functional stairs, characters can still climb to the second and third levels. Level 3 has a concrete barrier, offering cover from Area A (the tower). Vehicles attempting to escape by driving through this building (around the bus in Area E) will find themselves stuck for up to 10 rounds (or until cleared).

Hit Points: Doing 50 damage to any functional walls (south or west) will bring the second and third levels down like a pancake (10 foot and 20 foot drop respectively). Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris.

Area C - Blockade

Three vehicles are blocking the road to the west. They are placed in such a way that ramming any of them would be futile (as the vehicle behind is too large to be moved when struck by the other two). This assumes players are not driving a tank, as that will be able to smash through pretty much anything.

The vehicles might drive into position to block the way, starting the encounter, or they might have been there to begin with. The vehicles don't have accessible keys and cannot be easily moved. Vehicles grant cover.

Hit Points: 40 for each vehicle but destroying one does not remove the obstruction. If destroyed, the vehicle bursts into flame, immediately inflicting 7 (2d6) damage to every target that moves through or enters a square the vehicle occupies and for 5 feet around. This lasts for five minutes.

Area D — Impassible

A hastily erected obstruction occupies this entire road, end to end. Half of it is stacked garbage and the other half is larger chunks of debris that have been covered in gasoline and lit on fire. Rushing this barricade is useless. It cannot be destroyed and absorbs all damage inflicted. The fire inflicts 7 (2d6) damage to every target that moves through or enters a square the fire is occupying and for every adjacent square. This effect lasts for the entire set piece's duration.

Area E — Bus

A large, weathered, and aged city bus has been wedged across this street, operating as a barricade similar to Area C. It is still intact and functional but is even more difficult to move than the trucks in Area C. Targets can have up to superior cover from anything on the other side. The top of the bus is 10 feet up, allowing cover against opponents at ground level.

Hit Points: 60. If it is destroyed, it explodes. The fire inflicts 7 (2d6) damage to every target that moves through or enters a square the fire is occupying and for every adjacent square. This lasts for the entire set piece's duration. Destroying the bus does not remove the obstruction.

Area F — Café

This tiny café has been gutted from weapon fire. The door to the south has broken down and there's a large gap to the sky above. The stairs have collapsed, forcing characters to climb to the roof on level 2. On the other hand, the moderate walls to the west and south offer cover. From the roof, characters have view of the road and to the roof of the building in Area G. They also have cover against every attack except from those originating in Area L.

Hit Points: 100 as this building is fairly well made. If someone really wants to punish it, the southern and western walls can collapse (50 each) but this still won't bring down the roof. Reducing the entire structure to 0 hit points will bring the roof down (10 foot and 20 foot drop respectfully). Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris.

Area G — Undamaged

This small house has managed to escape damage. It has three rooms, including a bathroom and kitchen. A set of stairs lead to the roof. Regardless of the application of the set piece, characters will find a family in here (father, mother, and daughter). The roof grants cover against every attack except from those from the roof in Area L. There are few windows on the lower level, and the flaming car in front blocks line of sight to the south.

Hit Points: 100 and reducing the entire structure to 0 hit points will bring the roof down (10 foot drop). Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris. The family members are non-combatants and if caught in the collapse, they will die.

Area H — Drop

This house is very similar to the one in Area G except that this one was not as lucky. Building decay or an explosive has brought down the center of the roof. There are still three rooms but the house is abandoned. Roof access is still available via a ladder. The roof grants cover from every opponent.

Hit Points: 100 and reducing the entire structure to 0 hit points will bring the roof down (10 foot and 20 foot drop respectfully). Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris.

Area I — Not Much

This building has been completely destroyed. A set of stairs leads up to a second floor, except that the second floor is gone save for a small patch by the south. Luckily, all four walls are still standing, granting cover to those behind. However, it doesn't take much to bring one of these walls down. The real threat comes from the roof in Area J, which has clear line of sight to anyone not against the southern wall.

Hit Points: 40 for each wall and it collapses.

Area J — Looming

This area is on the southern edge of the combat area, so it's not detailed on its lower level. Its top level, 30 feet up, has clear line of sight to the entire road except from areas blocked by the building in Area K. It grants cover against attacks except from those in the tower in Area A (unless a character moves right against the ledge barrier).

Hit Points: 150 as this building is virtually intact. Destroying this building will cause it to collapse. Those on the roof, fall 30 feet. Those within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris.

Area K — Office

The largest building in the block, this area has only one functional floor, as both the stairs and elevator shaft have collapsed. The building is intact with thick concrete walls.

K1 – Restaurant: There are tables and a bar in the southeast corner. The windows are large and don't offer much for concealment.

K2 – Kitchen: This area is well-stocked with a functional fridge. Characters can find various kitchen implements from knives to stand mixers.

K3 – Women's Restroom: The water flows and the toilets flush.

K4 – Men's Restroom: The water does not flow and the toilets do not flush.

K5 & K6 – Hallway: Broken windows supply access points but not much of a firing angle. Buildings in Area I and Area J block line of sight.

K7 – Conference Room: Scattered tables and chairs can be used as cover or stacked to form a barricade in a pinch. A rear door provides access.

K8 – Storage: Characters will find food for days. There are hundreds of cans and cartons of various non-perishables.

Hit Points: 500. This building cannot be hurt by small arms fire and has resistance to bludgeoning and slashing damage. If destroyed, creatures within must make a DC15 Dexterity saving throw or suffer 15 damage from falling debris.

Area L — Looming 2

This area is on the northern edge of the combat area, so it is not detailed on its lower level. Its top level, 30 feet up, has clear line of sight to the entire road except from areas immediately in front of the buildings in Areas F, G, and H. It grants cover from all attacks except from those in the tower in Area A.

Hit Points: 150 as this building is virtually intact. Destroying this building will cause it to collapse. Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris.

Area M — Bunker

This building has been fortified by sandbags and garbage. It used to be a remarkable structure, but the entire front window, once a glass curtain wall, has since shattered, opening this side of the building. A concrete hedge still grants cover. It has a second floor roof with no protective walls, granting cover against attacks from ground level.

Hit Points: 100 as this building is fairly well made. It has resistance to bludgeoning and slashing damage. Reducing the entire structure to 0 hit points will bring the roof down (10 foot drop). Creatures within must make a DC15 Dexterity saving throw or suffer 15 damage from falling debris.

Area N — Street

The street is wide and vulnerable. Two vehicles are on fire, immediately inflicting 7 (2d6) damage to every creature that moves through or enters a square the vehicle occupies and for every adjacent square. This effect lasts for the set piece's entire duration. One vehicle is overturned but not on fire while another is functional near the eastern edge. Undamaged vehicles can be destroyed or even operated.

Hit Points: 30 for each vehicle but destroying one does not remove the obstruction. If destroyed, the vehicle bursts into flame, immediately inflicting 7 (2d6) damage to every creature that moves through or enters the area square the vehicle occupies and for five feet in every direction for five minutes.

Area O — Intersection

A turkey-shoot, this area is open and dangerous. There are no obstructions. Vehicles stopped here are sitting ducks, taking fire from all directions.

SP2 - THE HIGHWAY

This long stretch of road can either be congested or empty. It features a small bend, concrete dividers and a nearby abandoned house. The road is elevated on a verge. In a pinch, this road can be redrawn as a bridge. Simply state that at the border of the verge and shoulder is a 200-foot drop.

Area A — Jersey Wall

Crash barriers and water-filled barrels protect this opening in the jersey wall. The wall is three feet high and grants cover to anyone using it. They have resistance to bludgeoning, slashing, and piercing damage. The barrels are not as effective. Tanks are the only vehicles that can cross the wall, forcing others into the one solitary opening. The barrier is difficult terrain for all creatures.

Hit Points: 50 for each square of wall, 20 for each barrel. Destroying a barrier allows ground vehicles to cross but it is still considered difficult terrain.

Area B — Verge

The road is seven feet above the lower ground. The verge is the patch of manufactured land the road is built upon. Those at the base of the road have basic cover from attacks on the road. The same is true for prone targets at the road's edge. Vehicles driving off the road must make a DC20 vehicle control check or roll.

Area E — Barrier

An old-fashioned steel barrier prevents cars from going off the road. It grants cover the same as the jersey wall. It has resistance to bludgeoning, slashing, and piercing damage.

Hit Points: 10 for each square of wall.

SP3 — OFFICE BUILDING

The office map is of any floor of any building the characters may find themselves in. Unlike other maps, the main walls here are all alike. Squares with furniture are considered difficult terrain and grant cover or concealment if the character is in an adjacent square. Doors are locked but weak.

Doors

All interior doors have 20 hit points. Being behind one grants cover.

Furniture

Tables and chairs have 10 hit points. Being behind one grants cover, but only to adjacent squares.

Walls

Outer walls have 25 hit points per square. Inner walls have 15 hit points per square.

Area C — Highway

This is a major road between two locations. The tarmac is in good condition and features a center jersey wall, two lanes and a ten-foot hard shoulder. Other than the jersey wall, the highway is extremely vulnerable. There are no vehicles on the map by default, allowing the GM to place any obstacles along the way. This can include moving and stopped traffic as well as barricades and wrecks.

Area D — House

There is a single house in this wide-open area. It has two floors and is high enough that the roof has line of sight to anyone on the road. The ledge wall grants cover. Unfortunately, the house is not very well built.

Hit Points: 100 and reducing the entire structure to 0 hit points will bring the roof down (10-foot drop). Creatures within must make a DC15 Dexterity saving throw or suffer 15 damage from falling debris.

Electronics

Several offices may have computers or other electronic devices. If used as cover and shot, the electronic device is instantly destroyed and rendered useless.

Flammable

Most furniture is flammable and if lit on fire will do 7 (2d6) damage to all creatures entering or within a square occupied by the flames. The fire lasts until the end of the encounter and may also ignite adjacent items.

Area A — Reception

The counter grants cover. This entrance assumes a ground level entrance. If not, then this area can lead from the elevators.

Areas B - F — Offices

The offices are filled with furniture and electronics.

1 sq. = 5ft

Area G — Service

This area includes storage as well as photocopiers. It is very confined.

Area H — Conference

The conference room has a paper-thin divider separating the two tables. The southern wall is also removable. These walls are thinner (10 hit points).

Area I — Cubicles

The cubicles have short walls granting concealment but have no hardness or hit points. They can be pushed aside with a DC20 Strength check.

Area J — Conference

Another conference room, though much smaller than the one in Area H.

Area K — Kitchen

This may be stocked with food. Various implements including knives and pans can be found here. There is a fridge and a microwave but no stove. Most of the food is non-perishable.

Area L & M — Various

These are miscellaneous rooms with desk and tables. One might be a lunchroom while another could be

computer terminal room. Two storage closets lay east of Area M.

Area N & O — Washrooms

Both fully functional.

Area P — Terrace

This open area can serve as an access point or an escape route. This can be especially useful with encounters where the set piece is located several floors off the ground. There is a thick transparency around the eastern and southern walls.

Hit Points: 5 and the transparency shatters.

Area Q & R — Stairs

These areas can be ignored depending on where the set piece is located.

SP4 - RURAL

Much smaller than the city map, this set piece is designed for engagements where characters must move between rooms and houses. Action scenes can take place inside a specific room and move slowly into the street or start outside and work in. Characters may also be held up inside one house, pinned from outside opponents.

Area 1 & 2 — Houses

These houses can be lived in or not. You can populate them with a TV or kitchen appliances. If there is furniture, it may be used as cover. Tables and chairs have 5 and 10 hit points. Being behind one grants cover, but after only a few hits, they get destroyed.

Hit Points: 100 and reducing the entire structure to 0 hit points will bring the roof down. The houses have resistance to bludgeoning and slashing damage. Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris.

Area 3 — Road

The road here is two lanes with a single line. It features extra wide shoulders for parking. The vehicles here may be functional or not. They are all simple sedans. No sports cars or armored transports. Being behind or in one grants cover.

Hit Points: 20 for each vehicle but destroying one does not remove the obstruction. If destroyed, the vehicle bursts into flame, immediately inflicting 7 (2d6) damage to every creature that moves through or enters the area the vehicle occupies and for 5 feet in every direction.

Area 4 — Building

This larger structure would obviously be the center point of the encounter. Characters need either to break in or break out safely.

Each area can be filled with furniture and people, depending on the building's purpose. If an office building, it may be better to use the office map instead. Tables and chairs have a hardness of 4 and 10 hit points, and only grant cover to adjacent creatures.

Hit Points: 100 and reducing the entire structure to 0 hit points will bring the roof down (10-foot drop). Creatures within must make a DC15 Dexterity saving throw or suffer 15 damage from falling debris.

SP5 - COMPOUND

Deep in the wilderness, or just a few blocks out of town, lays this secluded building. There is an open plain, surrounded on all sides by forest. More than likely, the characters will be forced to raid the compound, assassinate or rescue someone inside, and make their escape. Vehicles have been placed which can be stolen or destroyed.

Tents

These covered areas block line of sight from above. Other than that, they grant no cover from ground fire unless barricades are placed.

Vehicles

The vehicles are basic sedans, but they can be replaced with armed vehicles to fight against or steal. If basic sedans, they follow the same rules as other vehicles.

Hit Points: 20 for each vehicle but destroying one does not remove the obstruction. If destroyed, the ve-

hicle bursts into flame, immediately inflicting 7 (2d6) damage to every creature that moves through or enters the area the vehicle occupies and for 5 feet in every direction.

Compound

The main facility is broken up into three rooms, two entrances, and an outside set of stairs leading to a flat roof. This roof doubles as a helicopter landing pad. There is no other protection on this roof but prone characters are granted cover against ground attacks. The compound has weak inner walls, so if on a rescue, take precautions.

Hit Points: 200 and reducing the entire structure to 0 hit points will bring the roof down. Creatures within must make a DC15 Dexterity saving throw or suffer 10 damage from falling debris. The compound has resistance to bludgeoning, slashing, and piercing damage. If the helicopter is on the roof, it crashes and explodes, resulting in a second DC15 Dexterity saving throw or suffer 20 damage. The building is also on fire. A creature moving in and out of any square the compound occupies suffers 6 damage.

APPLICATIONS

The following are generic plot events that can be woven in your adventures. Each one can be tailored to suit your needs.

Level: The challenge rating for this application.

Landscape: The map this application employs.

Objective: The purpose behind the adventure.

Setup: How to organize the map to begin the first encounter.

Encounters: Specific combat and non-combat encounters as they occur. These encounters assume a five-person party. The XP offered with each encounter is adjusted based on perceived advantages the players may have.

HOW LONG TO WAIT

Level: 8

Landscape: SP2-Highway

Objective: The characters find themselves in the middle of a long and empty road. They have been waiting for hours for the passing of a convoy they will need to strike. There is something or someone they need to acquire. The road is isolated. The group must strike fast and safely retrieve the objective from opposing forces.

Setup: The characters have unlimited time in order to prepare for the ambush. They may not know which vehicle contains the precious cargo. There is a house nearby the group may take possession of. The enemy convoy consists of three sport utility vehicles, fully crewed. The players need to prevent the vehicles from driving away without damaging the target vehicle.

ENCOUNTERS

Initial Strike

144 The characters initiate the start of an encounter by striking first. They are granted a surprise round. To add to this, enemy units must take move actions to exit disabled or destroyed vehicles. Because of this preliminary attack (probably accompanied by explosives), the initial encounter is a powerful one. A DC20 Wisdom (Perception) check is required to notice the last vehicle sagging on its rear suspension.

Encounter (XP 15,200)

Lead Vehicle

9 band brother minions with the regimented unit trait

Middle Vehicle

3 flesh fortresses with the regimented unit trait

3 band brother minions with the regimented unit trait

1 machine gun menace with the regimented unit trait

1 cell lieutenant with the regimented unit trait

The characters may take notice that no one is emerging from the rear vehicle. The target of the assault is located in this vehicle.

The vehicle will attempt to get away if it can. It must be disabled or it will escape.

SUV

Maneuver Disadvantage

Speed 30 ft.

AC 17

Resistances fire and cold damage, as well as bludgeoning, slashing damage, and piercing damage. (with reinforced plating)

Hit Points 50

Size Large

Even though the encounter ends, and players may have a short rest, the second encounter actually occurs immediately after.

A Final Hazard

The final vehicle tears itself apart.

Encounter (XP 3,600)

2 minotaur battle armors

After the minotaurs have been destroyed, the cargo can be retrieved.

NOT A GOOD PLACE FOR AN AMBUSH

Level: 13

Landscape: SP1-The Ruined City

Objective: The characters are escorting a caravan through a war-torn city. These could be refugees, supplies, or oil tankers. Mercenaries have staged an ambush. The characters must fend off the attackers and find a way out of the ambush.

Setup: Don't place the map until the encounter begins. Let the caravan approach the intersection when three trucks drive up to block the road. The garbage barricade is already in place. If the group attempts to turn south, the bus will arrive; otherwise, the bus will block the road one turn later. The caravan will be clumsy to turn around. The drivers may be NPCs.

ENCOUNTERS

Ambush

The caravan is forced to stop as enemy units emerge from opposing vehicles. These opponents are not untrained peons.

Encounter (XP 20,000)

- 9 advanced combatant minions with the trained trait
- 1 force commander with the trained trait
- 1 Emperor
- 1 pyrophiliac

Two advanced combatants can be found in each vehicle (with the rest in the bus). The force commander is hiding in Area M, behind cover. The emperor will literally tear itself from inside the bus on round 4. The caravan will be stopped if it attempts a ram any blockade. If the players make an earnest attempt to drive backwards or turn around, another vehicle will drive up behind them to stop their escape.

Even though the encounter ends, and players may reset abilities and spend Hit Dice, the second encounter occurs immediately after.

Escalation

With the initial attack proving unsuccessful, the mercenaries will have to double their efforts.

Encounter (XP 30,000)

- 3 Land Whales
- 1 Emperor

Even though the encounter ends, and players may reset abilities and spend Hit Dice, the third encounter occurs immediately after.

No More Play

Eventually, the players should be able to turn or reverse from the ambush. When that happens, the finale encounter will emerge from Area N.

Encounter (XP 7,200)

- 1 Shell

The shell ensures the job succeeds. He will force vehicles off the road that attempt to rush past him.

NEGOTIATIONS ARE FAILING

Level: 6

Landscape: SP2-Office Building

Objective: Terrorists have secured hostages on the tenth floor of an office building. They have issued demands that cannot be met. For reasons which are clear

(and varied), the players are the only hope to settle the situation without further innocent loss of life.

Setup: Obviously, a very specific motivation would be needed for the terrorists. If this is politically motivated, there are hundreds of possibilities. Regardless, the player characters are the ones to call. The characters will need to infiltrate and determine enemy strength before formulating a plan. Do not place enemy forces until character locate them. This set piece only has one encounter.

ENCOUNTERS

Insertion

Enemy units are scattered throughout the level. They have taken precautions and deactivated the cameras, as well as shut down the elevators and locked off both flights of stairs. They are fanatical terrorists but are untrained. They are not all on active watch. If the main group in area H is alerted to the raid, they will start executing hostages. There are ten civilian minions kneeling and being used as cover. Enemies will alert others if they see a character or witness an ally being shot or killed. If alerted, make a save at the beginning of the terrorists' next turn. Upon a failure, they will execute one hostage. On their second turn after failing, they will kill two more, then two on the third turn, and so on.

Encounter (XP 13,000)

- 21 band brother minions with the fanatic trait.
- 1 force commander

This is the breakdown of enemy placement:

- 2 in Area A
- 1 in each office from Area B, C, D, and E
- 1 in Area G
- 6 in Area H
- 3 in Area I
- 2 in Area J
- 2 in Area K
- 1 in Area N
- 3 on the terrace in Area P

The terrorist leader is in Area H but will not directly kill a hostage. In a raid, he will attempt an escape with a hostage in tow.

The opposition does not expect an attack nor do they have a ready action prepared. Opponents will be surprised if characters make successful Stealth checks (at least until an alert is issued). The south wall of Area H can be destroyed with ease.

Once it becomes clear a raid is happening, the remaining terrorists will swarm into Area H.

SEARCH, RESCUE, PROTECT, SURVIVE

Level: 7

Landscape: SP1-The Ruined City

Objective: An aircraft has crashed in an urban wasteland. This could be a combat vehicle which as has been brought down by enemy fire. The characters are the only ones available to render assistance. They must fight their way to the crash site, secure it, and hold out until help arrives.

Setup: The wreck is a large object placed in the middle of the intersection in Area O. Characters enter from the eastern side of the map. If they try to airdrop, numerous of enemies will emerge, forcing the aircraft to set down a block away.

ENCOUNTERS

146 Initial Ambush

When the group passes the flaming car in Area N, the opposition strikes.

Encounter (XP 18,000)

30 x band brother minions with the guerrilla trait.

Place enemy units in Area F, G, H, and I, firing from windows and rooftops. Place a few behind non-flaming vehicles. If the group takes cover in Area K, several enemies will emerge as the players enter, firing on readied actions. No more than two band brothers will emerge from cover to get a closer shot. The remainder will continue to be cautious.

Do not put all enemy forces on the table. Only place ones that fire at the group or ones the players have

line of sight on. If the party fights on, introduce more enemies as combat migrates towards the wreck. After 30 opponents are defeated, the enemy retreats, ending the encounter.

Defending Exposed

The characters reach the crash. The default for the application has the party finding two survivors: one pilot, and one VIP. If part of a larger story-arc, perhaps the VIP contains vital information. The pilot is pinned and requires five to ten minutes of cutting to remove him (depending on party resources). A crowd of rebels emerge, sweeping into the street. They don't bother with cover. Hidden among them are three larger opponents.

Encounter (XP 18,000)

3 machine gun menaces with the mob trait.

30 ammo waster minions with the mob trait.

Place 10 enemy units on the map around areas C, D, and E. Opponents seldom take cover. Two turns later, place 10 more and two turns later, place the remaining 10. Each time, insert one machine gun menace within the crowd.

A DC20 Wisdom (Perception) check will locate the larger opponent. The crowd is actually much larger but when the required number of enemies has been defeated, the others will flee until the evening.

The Elite Threat

The survivors have been freed but it is far too dangerous to walk them through the street. The players may attempt to cross the road or wait for ground transport. The sun will set, limiting non-enhanced vision to 100 feet. During sunset, or if the players attempt to race back to the aircraft, an elite mercenary team will intervene.

Encounter (XP 10,000)

- 1 force commander with the trained trait.
- 1 bell tower sniper with the trained trait.
- 2 flesh fortresses with the trained trait.
- 3 band brother minions with the trained trait.

These opponents will not immediately exit from cover. They will begin from Area M. The bell tower bastard will not move from his position in Area A. If the sniper is the last opponent, he will not wait for the players to converge. He will make his escape using Stealth to the roof in Area J. There, he will wait and enter the final encounter at full hit points. He can be hunted down separately.

Help or Escape

Regardless if the group is escaping to the aircraft or waiting for an armored carrier, the mercenary's commander will emerge as the player characters attempt their escape.

Encounter (XP 18,000)

- 1 minotaur battle armor or 1 force commander with the guerrilla trait.
- 24 x band brother minions with the guerrilla trait.
- 1 bell tower bastard (if still alive)

The players need not kill every opponent. If they make it out of the map, the set piece is over.

SMASH AND DASH

Level: 7

Landscape: SP5-Compound

Objective: The characters are tasked to infiltrate an enemy compound and steal or kill a specific target.

Setup: Enemies are patrolling the compound but can be surprised if approached using Stealth. Feel free to replace the vehicles with transport trucks or SUVs. The characters will be able to keep their distance and monitor targets throughout the map, enabling their awareness of enemy locations outside the main building.

ENCOUNTERS

Raid

The characters may attack from any direction but the greater distance contains fewer opponents

Encounter (XP 9,000)

- 1 force commander with the guerilla trait
- 21 band brother minions with the guerilla trait

Place 10 band brothers on the eastern side of the compound, near the forest. Place 5 on the western side. The remaining 6 and force commander are inside the

building. Obviously, when the gunfire breaks out, alerts will sound and bring the other adversaries.

Getaway

Players may reset abilities and spend Hit Dice. When the characters locate their objective, the sound of three vehicles will be heard outside. Three more SUVs have arrived and enemy units have begun to file out.

Encounter (XP 10,000)

- 9 band brother minions with the guerilla trait
- 1 pyrophiliac with the guerilla trait
- 2 flesh fortress with the guerilla trait

The characters will have cover inside the compound while the enemies outside will only have the vehicles' (and not all of them will benefit from such cover).

STREET SWEEPER

Level: 4

Landscape: SP4-Rural

Objective: An opposing force has infiltrated this small town. Characters must work through the town, clearing out opposition.

Setup: This bizarre application involves one large encounter the characters move through. Place enemies as they become visible to the characters. Choose a random insertion point for the party.

ENCOUNTERS

Cleanse

Enemies out of sight only appear as the characters move in close. Each player character has an awareness range of close burst 10, with enemies appearing the moment the characters move into the area. They must appear from behind cover.

Encounter (XP 7000)

- 36 brutal thug minions with the drone trait
- 2 cell lieutenants with the trained trait

The gang fillers are robots—automated drones under control by an unknown third party. Place down up to 10 gang fillers within 15 squares of the player group. As the characters move between and through buildings, place more opponents on the table, adding in a cell lieutenant for every 10 opponents killed.

VULNERABLE LOCATION

Level: 2

Landscape: SP2-Highway

Objective: The characters are travelling across a bridge when enemy vehicles block the road ahead and behind. At the same time, an aircraft rises to eliminate the characters.

Setup: The highway is now a bridge, running end to end of the map. There is now a railing between the shoulder and the verge as well as the shoulder and the road. It grants cover (hardness 10, 10 hit points per square).

Two SUVs block the north side of the map, one in each lane. The same happens at the south edge.

ENCOUNTERS

Holding Ground

Enemies appear from both sides of the bridge, utilizing cover from vehicles. They will not move from cover unless forced to.

Encounter (XP 4,400)

- 27 brutal thug minions with the trained trait
- 1 phallic compensator with the trained trait

Check line of sight since both sides will most likely not have line of sight on a single character. Also check ranges as both sides may suffer from attack penalties. The vehicles are large and hard to move but moving closer to one side will force the enemies from the opposite side to move from cover to converge.

Even though the encounter ends, and players may reset abilities and spend Hit Dice, the next encounter occurs immediately after.

148 High Ground

Just before it seems the players may be able to make their escape, an aircraft full of enemy reinforcements arrive.

Encounter (XP 4500)

- 2 bell tower snipers with the trained trait
- 1 qualified combatant with the trained trait
- 1 flesh fortress with the trained trait

The transport plane closes in to drop off the flesh fortress and the man with pipe wrench. The plane will then remain ten squares out from the bridge, where the bell tower bastards will fire from their secured position. The transport grants cover. The characters may try to take down the transport but it will be hard (and unnecessary). Taking out the snipers inside will be easier.

Tilt-Jet Transport

Maneuver —

Speed 40 ft.

AC 18 (with driver Dexterity)

Hit Points 100

Size Huge

Movement Mode: A tilt transport in hover-mode cannot move faster than x8 its speed. If it attempts to move faster, it enters overland mode, and the tilt transport counts x14 its speed as x8.

Resistances: Tilt transports have resistance to acid, cold, fire, and thunder damage, as well as slashing and bludgeoning damage.

When the opposition is killed, the tilt-jet will make its escape.

WHERE THE HEART IS

Level: 7

Landscape: SP2-Office Building

Objective: The player characters have finally crossed the wrong opponent. This foe has hired a mercenary team to remove their threat once and for all. Perhaps, as an alternative, these attackers seek something and have arrived to take or destroy it. Characters must survive consecutive encounters as enemies converge on home turf.

Setup: This is the character's base of operations (or it is the location the characters are at currently when the ambush occurs). There are civilians that may (and probably will) get caught in the crossfire. The characters may be undergoing a briefing when the attack occurs. They are not prepared for the attack when it begins so it is doubtful they are armed.

ENCOUNTERS

Principle Assault

The initial attack comes way of an incursion through the southern windows. Place a dozen civilian ill-equipped combatants with the mob trait around the office. These must be targeted in order to be killed. Two tilt-jet transports in stealth mode have positioned themselves above the building.

Encounter (XP 19,000)

- 9 advanced combatant minions with the regimented trait
- 2 flesh fortress with the regimented trait
- 2 machine gun menaces with the regimented trait

Place 2 advanced combatants in Area A through E as they smash through windows. One flesh fortress will arrive in Area A with another in Area B. The machine

gun menaces will fly into Areas C and D. They will immediately start killing all minions in line of sight, gaining the characters' attention. This is the initial strike force.

Even though the encounter ends, and players may reset abilities and spend Hit Dice, the next encounter occurs immediately after.

Fire Team

The secondary team, the main force, having used the principle attack in order to get into position, makes their move.

Encounter (XP 24,000)

2 Land Whale

6 advanced combatant minions with the trained trait

The second team all arrives in Area P. They approach by stealth, if possible, then attack targets in Area I as the players search the fallen members of the initial strike.

Even though the encounter ends, and players may reset abilities and spend Hit Dice, the next encounter occurs immediately after.

Insurance Policy

In typical boss-fight fashion, the enemy commander, controlling all the robots from the aircraft, crashes his most expensive acquisition through the walls into Area J.

Encounter (XP 15,900)

1 Merc Leader

2 Emperors

The emperors plow through walls, stepping over chairs. Make sure you indicate which areas have been destroyed to aid in player maneuvers and line of sight.

WITHOUT A SHOT

Level: 2

Landscape: SP2-Office Building

Objective: The players must infiltrate a secured building and retrieve a person or vital piece of data contained in a flash drive. Unlike other set pieces, this single encounter is far too powerful for this level. The players must infiltrate and use stealth.

Setup: The entry points are in Area A, E, Q, or R. The destination should be on the opposite wall (Area E, G, or M). Characters can only locate opponents via cameras or Perception. This can include deactivating security measures.

ENCOUNTERS

Infiltration

The characters insert into their starting location and must use stealth in order to reach their goal. Remember, the characters need to escape as well.

Encounter (XP 4,000)

6 qualified combatant minions with the trained trait

9 brutal thug minions with the trained trait

Don't differentiate between qualified combatants and gang fillers. Place the figures randomly around the map. At the start of the enemy's turn, have them wander and move about the facility. Killing or submission is acceptable but if an opponent has an opportunity to alert others, the entire level of enemies will converge to the characters' positions.

If a character attempts a full combat encounter without stealth, add additional enemies and put the party through a meat grinder.

CHAPTER NINE

BIOHAZARD

LEVEL: 4

ADVENTURE SUMMARY

150

The characters are elite members of a first response sensitive operations team being sent into a quarantine zone. The town of Happyland was struck with a virulent strain of a previously contained virus. The CDC (or PHOC, or any health organization you wish) was brought in to analyze the epidemic and recover the virus in hopes of a vaccine. The military isolated the mining town, closing all roads, only allowing the CDC and its military escort access. Seventy-five hours into the quarantine, the scientists at the PreFab (the lab set up to handle the outbreak), reported a breakthrough. They had recovered a pure sample of the original virus and were able to construct a vaccine. This was good news considering ten more cases had occurred in various parts of the world before the town was isolated. Less than a day later, all contact was lost with the CDC and military escort team.

Given the last report, the military hierarchy believes the outbreak was staged by a terrorist group—a group most likely still within the town. The player's objective is to enter the town, find, identify, and if necessary, eliminate the opposition, as well as recover the CDC's data, including the vaccine. This disease is exceptionally virulent and the chance of exposure is high.

Given the combat parameters, hazmat suits are illogical, meaning characters will be exposed and most likely infected, so the recovery of the vaccine or data is imperative.

Alas, it will not be as easy as that. The town of Happyland has been overrun by zombies. As the char-

acters air drop into town, they discover it abandoned. Soon after, hordes of monsters pour out of buildings. The group is forced to fight their way to the PreFab. There they discover the lab mostly destroyed but with enough data remaining to recover the vaccine data, though not necessarily the vaccine.

They still need to recover the pure virus, fighting their way to the town's core-sample office, where they retrieve the sample from a recovered meteorite. Although the players have contact with the outside world, the government will not intervene or bring in additional personnel. The virus is too virulent and it would be more logical to firebomb the entire region and hope the cure can be found elsewhere.

As the characters recover the CDC data and rework the vaccine, they suffer nearly constant attack. When the vaccine code is finally cracked, the military send in a chopper for recovery. The virus data is transmitted back home. It is at this point the group finds evidence of a survivor in another building. The players fight to recover the survivor and find a closet computer geek, Bobby Piper. He looks fine with no signs of the disease. He informs the group that he never left his house when the calls began. He locked himself in when those calls turn to screams.

Although it may look like Piper was never been infected by the virus, he in fact was. He recovered naturally, as could anyone else. Despite the virus causing massive surface damage, the human body does fight it off on its own without the vaccine... but the combination of the vaccine and the virus caused the zombie outbreak. The truth is revealed as the chopper arrives but the infected bring down the craft, destroying it and all communication to the outside world. Before the radio is lost, the group is informed of a second

rescue by APC. The group must fight their way to the APC. The vehicle is overturned by an infected zombie. As the characters realize the end is near, they use the onboard APC radio to inform HQ about the truth of the vaccine.

ENCOUNTER SUMMARY

The encounters in this module involve huge volumes of enemies approaching in waves with the occasional larger target mixed in. Use coins or rocks if you don't have enough miniatures to fill the table. There may be only five opponent types in the module but they are seldom alone.

Encounter Table	Encounter
Patient Zero	1 Infected drone Wave 1—4 Infected drones Wave 2—20 Infected grubs
Containment	30 Infected grubs
Gene Mapping the Virus	
Core Office (Optional)	Wave 1—20 Infected grubs Wave 2—20 Infected grubs
Core Office	Wave 1—1 Infected Animal 6 Infected guards Wave 2—6 Infected Animals
False Ending	Wave 1—4 Infected drones 4 Infected guards 4 Infected animals Wave 2—40 Infected grubs
Downfall	Wave 1—5 Infected grubs 4 Infected drones 1 Infected behemoth Wave 2—4 Infected guards 6 Infected drones
Sacrifice	Wave 1—1 Infected behemoth Wave 2—60 Infected grubs

PLAYER BEGINNING

SPIDER (SPecial Intelligence DEployed Response) is a Special Forces team tasked with military operations with unique mission parameters most teams cannot fulfill, including biological and chemical attacks. They differ from standard deployment teams as they have several members trained in biochemistry, medicine, and engineering.

You are members of the SPIDER ground team. This is the first time you've ever been deployed on home soil. You're being sent into the quaint mining town of Happyland (population 1800), off the southern tip of Burrow National Park. Your task is to eliminate a terrorist threat and halt their plans to release a deadly plague into the general population.

Four weeks ago, a bizarre virus struck Happyland. The CDC quickly tried to isolate the outbreak but before quarantine was established, a dozen other cases appeared worldwide, spreading from Canada to Japan. The CDC set up a PreFab near the local hospital and identified the culprit as a new class of virus that is genetically similar to both a lyssavirus like rabies, and a papillomavirus--which involves physical deformations. It was tracked to a similar strain found in Afghanistan. Before any deaths were reported, the CDC located a pure strain of the modified virus and was able to concoct a vaccine from it using a sample of the rabies vaccine on file. Two hours later, all contact was lost with the

PreFab and its military protection detail. There is still no information which terrorist group is responsible but evidence indicates they are still located within the resident population. The last word was that the CDC had already fabricated this vaccine on site.

The military quarantine is still secure. Team members will be dropped immediately, investigate threats, and eliminate them. If possible, identify the terrorists behind this attack, but most importantly, investigate the CDC facility and recover this vaccine. A physical sample is not necessary; just transmit its code over the satellite communicator. This is the only means of contacting the outside world, as part of the quarantine is a jamming field to prevent cellular communication, and land lines have been suppressed. With cases appearing across the world, it is vital this vaccine be distributed throughout the populations of infected areas immediately. If threats are too severe, backup will have to arrive from the quarantine patrol, but that may take several hours to mobilize. They are the only ones equipped with the proper environmental protection.

The entire population was infected quickly, which means the SPIDER team will also be exposed. A fully-prepped hazmat suit is simply not feasible in a potential combat situation. Gas masks are provided but according to the CDC's report, they will not be 100% effective. It is in your best interest to recover this vaccine. The military cannot send armies in to secure the location if there is no cure on site. The helicopter flying you in can respond within thirty minutes when called. The sat radio you have is the only communication to the outside world. Weather restrictions have prevented satellite imaging since the outbreak began. The damned coal fire at the mine gets credit for that one.

You are being dropped in at 1400 hours.

Good Luck.

THE INFECTED

The Infected came about because of a reaction of the virus and the vaccine that was administered. The infestation comes about as the virus creates lesions, warts, and boils on the skin as well as causing inflammation within the brain. When administered, the cure mutated the virus to cause sudden cancerous growth as well as speeding along the virus's neurological damage. This creates a rabid mutated abomination that only thinks of eating and destroying.

The virus is extremely infectious and can render the target violently ill for days or weeks, bringing them near the point of death, but 95% of those infected make a full recovery. However, if they are given the vaccine before or after being infected, they turn into a zombie within an hour. The transformation is irreversible. The virus runs the target hot, increasing energy use, pumping adrenaline, and making the targets faster and stronger.

Infected behemoths are a freak occurrence when the subject grows out of control. The creature turns into a grotesque abomination.

The players will also often notice red scarves or red tape wrapped around the left arm of the Infected. This is the first clue as to the origin of the plague.

EXPENDABLE NPC

It would be a good idea to include an expendable NPC in this adventure, as that character can be killed early on to show the extent of the threat. Give him a name but don't spend too much time on a character. He won't be lasting long anyway.

PATIENT ZERO

The SPIDER team parachutes from a black hawk helicopter, which departs soon after. The sun has passed the afternoon but the thick fog has made it dim. Despite the group's skill, they are unable to locate the Pre-Fab in their descent and touch down several blocks away at the center of town. Vision is reduced to 50 feet at this time.

The group comes up behind location 4, approaching the overturned car. The car is an inexpensive sedan. It lost control and struck something, causing it to roll on its side. The object the car hit cannot be found though there are heavy markings of blood on the bumper. There is also blood in the driver's seat but the driver is missing.

The group smells smoke as they approach the T-intersection.

There they find another accident and the ruins of two cars which have struck their corners and hooked themselves. The smaller car has caught on fire and is still burning. There are no drivers in those cars either. The group sees two normal houses on the opposite side of the street.

Automobiles

Though the vehicles the characters have encountered thus far are non-functional, if they search for one, they may find one that is functional. None of them have keys. Each car found has 1d6 gallons of gas inside but the players have no containers to transport the gasoline. A DC 25 Intelligence (Engineering) check will allow a character to hotwire a vehicle. Vehicles have few hit points and can be destroyed easily.

THE TOWN SP4-Rural Map

Read or paraphrase the following:

The town of Happyland is a quaint little mining town off the edge of a large nature reserve. As a result, the builders attempted to keep a rustic look to the dwellings. The coal and nickel mine is located south of town and had enjoyed mediocre profits for the past thirty years, but times took a turn for the worse recently when a coal fire ignited which has since covered the town in a thick black fog. Despite the dwindling cloud, the fire is still expected to last for another three months. Only then can normal mining operations continue. Until then, the town of 1800 people has been reduced to a mere 850, mostly maintenance and custodial staff along with their immediate families. Only a small group of miners were allowed to work in the one remaining uncontaminated shaft. They are considered to be the source of the outbreak.

I. House One

The first thing the characters will notice is the smashed open door and the broken windows. This is a split level house with an unfinished basement and main floor.

The door is in pieces but a skilled DC20 Wisdom (Perception) check will find a red scarf stapled to front of the door. This is a marker that there is someone infected in that house. The windows are boarded.

The house has three bedrooms and one bathroom. There is no one here.

2. House Two

The second house is similar to the first but smaller. The main level has a living room, a kitchen and a small bathroom. These doors are locked and there is no scarf. The players will have to force their way in. No one answers the door; it is empty.

3. The Main Street

Beyond the rolled car and the crash, the other vehicles look either abandoned or parked. There are no bodies. Following this road for three blocks will reach the CDC compound. A DC 20 Wisdom (Perception) check will notice a blood stain on the pavement.

4. The Core Office

The core office is a larger government building that is the center of the mining surveys. The main doors are heavy gauge steel. They are unlocked and closed. The core office hasn't been used much since the coal fires broke out, even though a few mining teams are still snaking through shafts that have not been contaminated.

It is at this moment where your NPC should meet his unfortunate end. As the group investigates the area, The NPC will notice something. He can be killed in one of two ways:

A. The Car. The NPC approaches one car with an open door. A blood soaked figure reaches out and drags the NPC into the car. Snagging his foot on the door, it closes behind as he is pulled in. As the group attempts a rescue, he is pulled out missing his throat and he dies moments later as the infected rips itself free from the car to attacks the rest of the group. Alternately, she can pull him under the car as well.

B. The Straggler. The NPC finds a survivor moving aimlessly about the street. When he approaches her, she lunges for him and gnaws on his head.

In all these situations, this Infected attack triggers the encounter. Only when this tougher Infected is killed does the first wave move in.

Encounter (XP 1250)

- 1 Infected drone
- Wave 1
- 4 Infected drones
- Wave 2
- 20 Infected grubs

The waves appear from houses 1 and 2 unless the players have cleared them, or from the end of either streets. Because line of sight is limited to 50 feet, the infected are nearly invisible until then. They make noise and a direction could be guessed but the penalties to attack still apply.

There is only one round between waves one and two, enough time to seek cover, or for a plan to be hatched (like burning a vehicle or seeking cover in building). Infected run at full speed until they reach to melee range. Wave 2 arrives from two different directions.

After the battle is concluded, the players can spot up to six stragglers that are wandering that have not noticed the characters yet. They are simple grubs which can be dispatched at ease (for no XP).

After the battle is concluded, they can radio back but still have to make their way to the CDC PreFab.

Scavenging: The primary weapons of any dead NPCs can be salvaged.

CONTAINMENT

SP5—Compound Map

Read or paraphrase the following:

The CDC PreFab consists of one building used as their HQ and primary lab, four long-body trailers placed side by side. The trucks were sealed and their joining walls brought down. The compound was placed in a field looking over a dense forest with the town on the other side. Along with the lab, there are two large medical tents which were obviously used to house either infected or those that were cured. There are still lingering lights on the corners of the PreFab, flickering from dying batteries.

Tents

When any character checks on them, they find 20 Infected grubs (part of the encounter below) in each. If a character makes his presence known, they all attack. The character can make a Stealth check against the grubs' passive perception to walk away without an alert.

Vehicles

Two of the vehicles have had their windows smashed and extensive damage done to their interior. A third is much more alarming. It looks like it was twisted in half like a pretzel with a huge impression in its hood. None of them are functional or occupied.

The PreFab

The PreFab has few windows and resembles an ugly grey brick. It is quite literally four motor homes glued together. It runs off its own power supply of ten lithium-ion battery packs which are usually resupplied by solar power (ineffective in this town's weather). As a backup, they have a half dozen side-mounted generators when the primaries fail. The lithium-ion batteries are quiet, the generators are not. The walls are thick and the lab could make a secured defensive position. The top floor acts as a helicopter landing pad, though the ramp access is on the outside of the building.

1. Containment Lab 1: This room looks like a slaughterhouse. Infected body parts are scattered everywhere, all of them wearing lab coats or military grade combat armor. One Infected is present—a military officer. It is drenched in blood from head to toe. It has been locked in here and has been feeding on its kills and other infected for the past few days. Every beaker and fridge has been destroyed.

2. Containment Lab 2: Unlike Lab 1, the doors of Lab 2 were breached, so there is little left that hasn't been stripped and eaten or pulled away. There is nothing here, not even blood. The infected are very thorough.

3. Isolation Lab: This heavily fortified area has not been touched since the outbreak. A completely clean environment, the only access in or out is via an airlock which will not open until the outer door is closed. It is

both airtight and sound proof. All the laboratory equipment is working but the computers have been smashed, including the memory system.

The walls are exceptionally thick but with only one way out, this may be a last ditch survival option. The characters will find one body slumped over a computer chair.

The scientist, Dr. Mitchell Condor, has committed suicide by injecting a volatile concoction into his bloodstream. A waist paper basket has significant burn damage from a recent fire.

Salvage

There are several items of interest around the camp which could be used in combat encounters when they occur:

Gas: There is still gas in the cars, which can be drained and used to fuel a fire (40 total squares of coverage; anything moving through one of these squares instantly takes 7 (2d6) damage).

Chemical Tanks: The CDC PreFab has three chemical tanks which can be used as an explosive (DC15 Dex Saving Throw, 10 ft. radius blast, 11 (3d6+2) damage, save half).

Barricades: Barricades can be erected to block access to the building but barricade walls have hardness 4 and 20 hit points for each square. Infected will start to break through any obstacle.

There are several ways for the next engagement to start:

A. Clumsy in a Tent

A character walks into one of the tents and is spotted by the horde. The character has two rounds to run and alert the others before the waves hit.

B. Generators

The players notice the power is out in the PreFab and the lithium-ion batteries are dead. The generators are on the outside and when they are started up, the noise alerts the monsters in both tents.

C. Car Alarm

One of the cars in the lot, even though the window is broken and the steering wheel is gone, still has a live alarm and if any player brushes against or touches it, it will go off. If this doesn't occur, then a straggler grub appears between two cars. When killed, it falls on one of the vehicles and sets off the alarm.

Encounter (XP 1,500)

30 Infected grubs

Ten grubs appear each round.

Scavenging

Infected have IDs and wallets but no weapons. Even the infected who were once soldiers have neither their weapons nor ammo. There is no evidence of where these went.

GENE MAPPING THE VIRUS

(XP 1000)

The team can try to put the puzzle pieces together about what happened and how the virus can be stopped. One of the first steps is acquiring a blood sample from an Infected—an easy task. Further, each team member will also need to be tested to gauge their level of exposure thus far.

Note: Each attempted roll requires one hour of work so this challenge may bleed into later encounters, especially if only one character is attempting this. A character can stop between skill checks to help others without needing to start over. Every moment that passes could bring in hordes attracted to either the lights or the noise. By this time, night falls, and another encounter is imminent. The checks must be made under ever-increasing opposition.

Intelligence (Engineering) (DC 15) - First Check: The group must have power to the installation to attempt this check.

You manage to recover some data from the destroyed computer system. It looks like they had managed to map the virus in less than twelve hours. It is a new class of virus genetically similar to lyssavirus and a papillomavirus and probably derived from the latter.

Apparently an antibody had been developed but that, and any samples, have been lost. The information here details the hard computer work that was done processing the blood samples that been acquired. This data was relayed to CDC HQ but the formula for the final vaccine was not.

Intelligence (Engineering) (DC 15) - Second Check: The players manage to get the majority of the lab equipment up and running. They are now able to run blood tests. They can make a DC20 Wisdom (Medicine) check against each applicable team member. A failure causes a misread and an hour's delay for a retest. A success shows the evidence of infection in all members—a slight inflammation in the brain. Prognosis obviously doesn't look good. According to the briefing, the group has about 48 hours before succumbing.

Wisdom (Perception) (DC 15): The characters can rummage around the lab and find papers which have not been totally destroyed. One the technicians discovered that in the first few cases, all the subjects had bizarre trace amounts of rhodium in their body, a rare earth metal usually only found in meteorite craters. Only the initial cases had indicated this. The first few were also miners, specifically, the six-man mining staff which were permitted to work in the one remaining shaft not contaminated by smoke.

Intelligence (Sciences) (DC 15): The virus has genetic markers similar to a lyssavirus and a papillomavirus. It creates lesions, warts, and boils on the skin as a way to transmit the virus but then releases itself into the bloodstream to attack the brain. It is able to cross the blood/brain barrier to cause an inflammation of the brain while cancerous growths appear under the skin. What's bizarre is that the cancer is rampant but benign, meaning no matter the extent of the tumor growth, the subject remains alive. Further, since the virus increases adrenaline and blood pressure, natural strength and agility are also increased.

Once each of the above checks succeed, read the following:

You have created a full genetic map of the virus and its morphology, however, one piece remains—you still require a sample of the original virus from either one of the original patients, or from the mineral sample which contained it. Any reports of strange deposits would have been logged in the town Core Sample office, located back in town. Someone will have to return to the office, find the logs, and see if there is a core sample that may contain the virus. Once that occurs, you can use it as a roadmap to recreate the vaccine. You are quick to point out that the odds of the virus surviving in a core samples for the thousands of years it was down there is nearly zero. It must have been preserved somehow.

CORE OFFICE

When the players discover where they need to go, night has either fallen or is falling. Every moment they wait could bring the horde their way. If they decide to wait it out (unwise given their own and the world's time constraints), they will have a night time ambush (see below).

Encounter (XP 2,000)

(CDC Compound Map)

Night ambush (if the players wait until morning to go to the core office)

Wave 1

20 Infected grubs

Wave 2

20 Infected grubs

10 Infected appear from each corner of the map and after the first wave is dead, another 10 from either side appear on the next round.

SP4-Rural Map

Approaching the city street again, visibility is now limited to only the player's flashlights. They must keep their ears open for Wisdom (Perception) checks and noises should be kept down to a minimum.

Street lights are still working but they are murky in the fog. There is a single car parked outside which chirps if someone gets too close. If someone sets it off after that, it calls in a horde the same as the night ambush above.

Inside the largest building, they find random Infected grubs in nearly every side room except the final one marked "A". A DC 20 Wisdom (Perception) check can hear the breathing of enemies behind closed doors. They are in bathrooms and behind office desks.

In total, six are randomly spread about the facility. Infected have horrible perception and won't be alerted unless someone taps them on the shoulder, a character makes a loud noise, or someone shines a flashlight in their face. If one is alerted, the remaining five will run to the other's location and will have to be dealt with.

Most of the rooms contain fake wood desks and filing cabinets. There is one bathroom by the entrance. There are only three rooms of interest, labeled A, B, and C. When the party approaches the intersection to rooms B and C, begin the encounter.

Room A

This is the data storage room. Luckily, everything is still on paper here. A DC 20 Wisdom (Perception) or

Intelligence (Investigation) is required to locate the file in question. It was a core sample pulled out of an unusual deposit thirty miles south of town. This was discovered not in a mine but by a survey team that was drilling a mile into the earth. The sample contains trace elements of rhodium and iridium so it was shuffled to the processing room to be broken down. It was then when the mining team fell ill. The sample components were stored in another room (Room C). The characters obtain the sample number.

Room B

The machinery in this room grinds up the samples and breaks them down to separate various metals. A sample of strange green fluid is on one of the test slides but only a thorough search via a DC25 Wisdom (Perception) check will locate it. This green goo is what secreted from the core sample, which caused the outbreak. This sample is not in good condition. The group would be better retrieving the full core sample from the containment room.

Room C

The containment room stores all the core and mining samples taken over the past forty years of the town's existence. One is the most recent sample, which started the outbreak. Somewhere, hidden in the remains of this sample, should be a lump of green goo sitting in suspended animation. If the group doesn't go to room A before coming here, a DC 25 Wisdom (Perception) check is required to locate the sample: if they do, the encounter begins as they pass the main hall attempting escape.

Encounter (XP 950—1,250)

Wave 1

- 1 Infected animal
- 6 Infected guards
- +6 Infected grubs from other rooms

Wave 2

- 6 Infected animals

The players will notice an Infected wolf wander out of Room B; it will instantly notice the lead character and emit an unnatural howl. Its mouth will then open far wider than the animal could naturally and charge.

It has made enough noise to bring the horde. If the 6 grubs placed earlier are still alive, they will rush in from their locations on the second round.

One round after the Infected animal is dropped, 4 Infected guards will attack from the outside. The characters notice they are in military combat armor. These are armored soldiers from the CDC protection team.

One round after that, 6 more Infected animals will storm in from every window and door (place an Infected at every entrance).

The path is now clear for the group to return to the compound or retrieve the sample.

SURVIVOR

After the group returns to the compound, they can begin using the data from the goo sample to create a computer simulation of the antibody, which is all that can be done as the facility was too damaged to properly create the vaccine here.

It begins to rain outside, and the fog begins to dip, allowing the group to see the town from the hill the PreFab was built on. They see hundreds of infected wandering the streets.

Antibody Simulation

This requires a DC 18 Wisdom (Medicine) and an Intelligence (Sciences) check—in fact, it requires three each. It also requires complete attention to finish. Each attempt requires one hour.

Meanwhile, any other character looking out over the town can make a DC 15 Wisdom (Perception) check to notice a flashing light from a house. It looks like Morse code. It isn't...but it looks someone faking it. There is still a survivor in the town.

In this situation, the one character can be locked in the clean room to continue the work while the others attempt to rescue the survivor. It should be obvious by now that despite the state of the antibody, this town cannot be recovered and must be destroyed upon success of the mission.

The survivor's name is Bobby Piper, and he can be found on the top level of building 2 in the rural map. This is a different section of town that just looks remarkably similar (low cost film budget).

The trip to the house is uneventful but characters can make a DC 20 Wisdom (Perception) check to notice distant Infected in trees and in other buildings. The fog has dropped enough to extend line of sight range to 200 feet unless the encounter is at night, in which case the group is still limited to flashlights.

Piper has barricaded himself on the upper level and has been living off stored junk food. He claims he never got infected. He locked himself in his house the moment it all began and has not left it since.

Piper is not a small or limber human being, and as he walks down the stairs, he stumbles and falls over himself or over another character.

As he flops down, he triggers a bizarre series of accidents like a Rube Goldberg machine. A broom falls across a table, which topples a book around, which lands on a remote that opens the drapes, which brushes against a cardboard standing display for *Dungeons & Dragons*, which falls over a deployed TV table, which falls back into a glass end table, shattering it. The remote on it turns on the TV, which screams a test pattern at full volume.

This should give the party a fright, but does not attract the horde.

MEANWHILE...

Back at the lab, any remaining characters inside the clean room can make a DC 15 Wisdom (Perception) check. Sudden vibrations are shaking the beakers every slightly. Something big is nearby.

Outside is an Infected behemoth, wandering past camp. The shudders get louder and louder. One character may even spot a portion of its grotesque body as it

saunters around the camp, even approaching to look inside the PreFab. It eventually moves on. If the characters *want* to attack it, they can. If they want to remain safe, they should stay in the clean room as it masks any scent the humans may be giving out.

FALSE ENDING

The group is reunited. It is a new day and the characters have had an extended rest. By sunrise, the fog has rolled back up to mask the town but not the CDC Compound. The group has finally cracked the formula for the antibody. They can then relay that information back to base, which receives it successfully. A black hawk helicopter is being deployed to pick them up from the PreFab roof. It should arrive in just under an hour.

The perimeter team is also sending in a huge LAV-25 armored personnel carrier, which should arrive an hour later to permanently retrieve any salvageable machinery from the site before the location is razed.

Obviously, such a loud machine will bring in the horde. The group can make any preparations before the impending attack.

Remember Piper is here and not very combat effective, though he does have a +2 bonus to any pistol handed to him. Don't kill him just yet. He spouts some rhetoric about learning about bravery from *Dungeons & Dragons*.

When the chopper is 10 rounds away, the players can spot their ride and hear it as well. From the forest emerges the horde.

Encounter (XP 2,800)

Wave 1

- 4 Infected drones
- 4 Infected guards
- 4 Infected animals

Wave 2

- 40 Infected grubs

Note: For encounters like this and the final one, to speed up game play, only place the front row of infected grubs, no more than fifteen or twenty at time, and move the fallen to the rear, keeping a running count of the defeated.

The first wave arrives in full force from the forest line. One round after the last Infected dies, the second wave roars into view, 20 from the forest, the other 20 from the opposite side, between the tents.

Two rounds before the helicopter arrives, the character closest to Piper notices a lesion hidden in his sleeve. He admits he was infected, like everyone was in this town. He locked himself in and never came out. He didn't respond to the call when the population received the antibodies. The red scarves around the arms of the Infected are indicators that they were given the vaccine. After a few days, Piper made a full recovery without requiring the vaccine.

Any character proficient in Wisdom (Medicine) or Intelligence (Sciences) or who has an Intelligence of at least 16 (or a random character if none of them possess these) realizes the truth—the antibody must mutate the virus in some way or perhaps the cure reacts differently in the test subjects than in the general population. The antibody is the source of the horde. Despite the virility of the disease, the antibody cannot be distributed or a zombie apocalypse will surely occur.

Before the characters can transmit this information, one of two things can happen:

- An Infected animal jumps on top of the helicopter, causing it to tumble and crash onto the PreFab.
- An unseen behemoth throws a piece of a car to the helicopter, causing it to tumble and crash onto the PreFab.

Each creature on the top level of the Pre-Fab must make a DC15 Dexterity saving throw or take 15 points of damage (save half). All targets are knocked prone. Targets that fail the save are also stunned for one turn. The satellite radio is destroyed in the crash. The remaining Infected in the encounter are destroyed if they are not all already dead by this point.

DOWNFALL

SP5—Compound Map

Piper survives the crash. The group has no way of relaying the truth about the vaccine to command. Without input, their superiors will distribute the vaccine in areas where the virus breaks out and when it spreads throughout the population, instead of curing them, it will turn them all into Infected.

The group has ten rounds to prepare before the arrival of the APC, which has a proper radio. The moment the players see the APC, they can radio them to forward the information. Before the APC can do this, an Infected behemoth appears. It throws the APC on its side at the edge of the map.

Encounter (XP 2,250)

Wave 1

- 5 Infected grubs
- 4 Infected drones
- 1 Infected behemoth

Wave 2

- 4 Infected guards
- 6 Infected drones

The APC had six personnel but the driver was killed with the behemoth attack. The others are killed by the behemoth as they try to escape. This takes two rounds. The APC is on the other side of the compound, past the tents. The APC has ammunition, a resupply of grenades, and the long range radio transmitter. The characters must fight their way to the vehicle and destroy the Infected behemoth before it tears the vehicle apart. After it kills the crew, the behemoth will only turn on the characters once they attack it.

As the characters break from the PreFab, 5 Infected grubs will emerge around the building and chase the characters. 4 drones will emerge from between the tents as the group fights its way to the APC. After the first wave is destroyed, the characters only have two rounds to prepare before the second wave emerges from around the tents.

APC Capacity: If the group searches the APC, they will find \$2d6x1000 of ammo and weapons.

SACRIFICE

SP5—Compound Map

Level 8 Encounter (XP 4,600)

- 70 Infected grubs
- 1 Infected behemoth

This encounter begins with 20 Infected grubs at least 150 feet away, coming from around buildings. One round later, 20 more arrive from the same loca-

tions. Three rounds later, one more infected behemoth emerges, followed two rounds later by 30 grubs.

By this time, the characters will have forwarded the information to command—a transmission they will receive and acknowledge, unless the GM intends a zombie apocalypse campaign to follow this adventure, in which case interference will cloud the signal.

The ending has three options:

A. Fight it Out.

They can continue to fight until dead or until their ammunition runs dry, their last image being the hundreds of Infected running up from the town. Just as they die, they see an A5 Galaxy (a very large plane), buzz the compound and drop a MOAB, incinerating the town and everything around it.

B. Call It In.

The characters see the approaching invasion and do the noble thing—they call the air strike in early. Before the characters are overrun, they see the bomb drop. The blast wave incinerates them and everything around them.

C. Pull off the Miracle.

The characters survive the battle. There may be casualties but they defeat the Infected menace before being totally overrun. This should be rewarded. As the characters take a round to breath, they hear the screams of a hundred more Infected emerging from around the Pre-Fab. Before the monsters move into range, the A5 drops its explosive on the town but the blast does not reach the APC. Instead, a dozen more APCs and another black hawk helicopter emerge from the forest to fight off the horde and extract the survivors. The SPIDER teams lives to fight another day.

THE INFECTED

INFECTED GRUB

Medium human, neutral evil

Armor Class 8

Hit Points 15 (3d8+3)

Speed 20 ft.

STR	DEX	CON	INT	WIS	CHA
13(+1)	6(-2)	12(+1)	3(-4)	6(-2)	5(-3)

Senses Passive Perception 8

Languages None

Challenge 1/4 (50 XP)

Voracious: The infected grub gains a +1 bonus to damage for each infected creature within 5 feet of it.

Nerve Shot: Any critical hit to the infected grub reduces it to zero hit points immediately.

Actions

Bite. *Melee Weapon Attack:* +3 to hit, reach 5 ft., one target.
Hit: 3 (1d4+1) piercing damage.

Burst Speed: The infected grub moves 30 ft.

13(+1)	6(-2)	16(+3)	3(-4)	6(-2)	5(-3)

Senses Passive Perception 8

Languages None

Challenge 1/2 (100 XP)

Voracious: The infected drone gains a +1 bonus to damage for each infected creature within 5 feet of it.

Force of Attack: If the infected guard scores a critical hit, it knocks its opponent prone and may immediately follow up with a bit attack.

Nerve Shot: Any critical hit to the infected drone reduces it to zero hit points immediately.

Actions

Bite. *Melee Weapon Attack:* +3 to hit, reach 5 ft., one target.
Hit: 3 (1d4+1) piercing damage.

Grab. *Melee Weapon Attack:* +3 to hit, reach 5 ft., one target.
Hit: The target is grappled (Escape DC 14).

INFECTED ANIMAL

Medium beast, neutral evil

Armor Class 14

Hit Points 13 (3d8)

Speed 40 ft., climb 30 ft.

STR	DEX	CON	INT	WIS	CHA
14(+2)	15(+2)	10(+0)	3(-4)	6(-2)	5(-3)

Skills Perception +4, Stealth +6

Senses Passive Perception 12

Languages None

Challenge 1/4 (50 XP)

Pounce. If the infected animal moves at least 20 feet straight toward a creature and then hits it with a claw attack on the same turn, that target must succeed on a DC 12 Strength saving throw or be knocked prone. If the target is prone, the infected animal can make one bite attack against it as a bonus action.

Nerve Shot: Any critical hit to the infected animal reduces it to zero hit points immediately.

Actions

Bite. *Melee Weapon Attack:* +4 to hit, reach 5 ft., one target.
Hit: 5 (1d6+2) piercing damage.

Claw. *Melee Weapon Attack:* +4 to hit, reach 5 ft., one target.
Hit: 4 (1d4+2) slashing damage

INFECTED BEHEMOTH

Large human, neutral evil

Armor Class 8

Hit Points 75 (10d8+30)

Speed 30 ft.

STR	DEX	CON	INT	WIS	CHA
19(+4)	6(-2)	17(+3)	3(-4)	6(-2)	5(-3)

Senses Passive Perception 8

Languages None

Challenge 4 (1,100)

Force of Attack: If the infected guard scores a critical hit, it knocks its opponent prone and may immediately follow up with a bit attack.

Actions

Multiattack: The infected behemoth makes two slam attacks.

Slam. *Melee Weapon Attack:* +6 to hit, reach 10 ft., one target. *Hit:* 13 (2d8+4) bludgeoning damage

Hulk Rend. *Melee Weapon Attack:* +6 to hit, reach 10 ft., one target. *Hit:* 16 (3d8+4) bludgeoning damage, and the target is stunned until the end of the infected behemoth's next turn.

Debris Throw. *Ranged Weapon Attack:* +6, range 60/120 ft., one target. *Hit:* 18 (4d8+4) bludgeoning damage. The target and all creatures within 10 feet of the target must succeed on a DC 14 Strength saving throw or be knocked prone.

LEVEL: 14

ADVENTURE SUMMARY

An unidentified alien strike force lands in Baghdad. This bizarre menace resists any attempt to establish a dialogue or explain its motivation. They only wish to absorb and destroy all life they encounter. The characters are citizens from various nations, ethnicities, and/or religions. Some are unaligned mercenaries while others are patriots. They all held some motivation prior to the invasion, but none of those matter anymore. Armed, behind enemy lines, and lacking any communication, the characters must fight their way through their mistrust of others as well as the destroyed city in the hopes of finding salvation.

160

Along the way, the characters are forced to engage this mysterious threat as well as care for a group of civilians they find along the way. When the truth that the invasion force has landed by mistake is discovered, the players must dare to get to the epicenter in a daring attempt to convince the alien force that it's on the wrong planet.

ENCOUNTER SUMMARY

All encounters in this adventure are built around a 5-person party.

Encounter Table	Encounter
First Exchange	12 skinner minions
First Exchange	2 widows 9 skimmers minions
The First Gun	Skill challenge
The V.B.I.E.D.	Skill challenge
Practical Chaos	1 widow 6 skimmers minions 2 punks
The Second Gun	Skill challenge
Convenient Consequences	Phase 1 12 pistol packers with the guerilla trait Phase 2 1 mother screamer 6 baby screamer minions
Uninvited Responsibilities	1 beast
Pragmatic Madness (The Rescue)	1 widow 6 skinner minions
Pragmatic Madness (The Defense)	Phase 1 2 widows 9 skinner minions Phase 2 1 chank 1 widow 9 skinner minions

Encounter Table	Encounter
The Final Gun	Skill challenge
The Tao of Id (optional)	Phase 1 1 chank 2 punks 3 skinner minions Phase 2 1 extension node 2 widows 9 skinner minions Phase 3 1 beast
Reluctant Diligence	1 chank 2 widows 9 skinner minions
By the Toll of a Billion Deaths	Phase 1 1 widow 21 skinner minions Phase 2 9 baby screamer minions
By the Toll of a Billion Deaths(alternate)	Spirit / Tri-Pod 3 skinner minions

PLAYER BEGINNING

Political turmoil is sweeping across the Middle East. Citizens are rioting in the streets of Tehran, Riyadh, and Damascus. Although a unified alliance of democratically elected Arab nations seems poised to gain power, the way is strewn with the minefields of fanatics and traditionalists. With chaos brewing in Afghanistan and Pakistan, a lasting peace still appears a distant dream.

UN forces have begun to handle the daily affairs of peacekeeping, with American military tasked with uprooting insurgents. This leaves an army's worth of security firms consigned to protecting numerous corporate interests in the region. To fill the rest of this armed crock pot, tens of thousands of local militia and army personnel struggle with their own loyalties against the shifting priorities of their governments.

Terrorists still strike random civilian and military targets across the continent in a vain attempt to disrupt progress. Thankfully, these dwindling radicals are finding themselves pushed further and further out of civilized regions.

For the past few months, or perhaps even years, you've been situated in Baghdad, once a powder keg of discord, now a growing and developing region. Political corruption has slowed the advancement of progressive ideas and occupying foreign powers have yet to depart. With local law enforcement, Iraqi military, US army, UN peacekeepers, corporate security, and local insurgents, the city has six different armed organizations claiming a portion of land and/or authority as their own.

There is about to be a seventh...

THE INVADERS

They don't want our resources. They don't want our brains. They don't want our water. They certainly don't need our women. These invaders don't speak any discernible language, and they aren't afraid of our germs.

The threat is not like any menace the players could anticipate. This invasion is the result of an error in navigation and only accounts for a single unit of a much larger armada en route to another world involved in an interstellar war. However, the invaders are incapable of discriminating save for their own kind.

The invasion is only comprised of nanites arriving via a spacecraft barely larger than a house. Since the crash, the microscopic machines have been building weapons and drones, utilizing on-hand materials including resident machines. For shock troops, the nanites have been converting the population into unrecognizable cyborgs. The damage is irreversible; death is their only release. Altered to resemble preconfigured alien designs, nothing human remains. Meanwhile, the machines continue to receive instructions from the command vessel, and its solitary alien commander. The alien force became quickly known among their opponents as shells.

The invasion force consists of "skinner" shock troops and "widows"—command and control shells. Shells can often be seen as larger powered machines, including slave suits called "chanks" and flying vehicles called "screamers". There are also rarely seen larger "beast" mobile strongpoints.

The general appearance of the shells is of walking garbage. The armor and flying vehicles look like a lazy collection of engines and weapons clad together with spit and glue. The skimmers are pale-skinned humanoids with as much as 95% of their body replaced with machinery. The parts replaced are seldom human looking and are not always consistent. One skinner will have organic legs while another will have a sensor ball for a head.

Shells have basic intelligence and with the help of a widow, can coordinate their actions and formulate tactics. However, their overarching strategy of the entire force depends on "Spirit"—the alien commander locked in the fallen spacecraft.

PLAYER ENTRANCE

The player characters can all come from different walks of life or they can be all members of one cohesive unit at the beginning of the story. The group should decide whether they wish their characters to possibly quarrel amongst themselves or unite together under a common threat, despite divergent motivations.

UN Peacekeepers

The UNPKF are the traditional blue-capped soldiers meant to maintain civil order with a strict policy in place to neither engage nor aggravate the resident population unless the soldiers themselves are under direct threat. They are comprised mostly of Canadian, French, and Indian soldiers with a few from Pakistan. They are commonly bilingual and answer to the UN commander in the region, Admiral Hollace of the British army. Characters would occupy the traditional role and equipment of UNPK personnel, complete with blue beret or helmet.

THE CITY OF BAGHDAD

United States Armed Forces

The US armed forces continue to work out of their "temporary" base in the region once dubbed "the Green Zone" as well as the Victory Base Complex, probing areas of the city in search of terrorists and other radicals who threaten the stability of the territory. The role of the ground troops is not too dissimilar from that of the UNPK, except that the US is still actively searching for terrorist cells through the city. A character could either be a ground pounder or a crashed air force pilot further in the adventure.

Local Law Enforcement

Wrong place; wrong time. Don't expect the average police officer; a cop from this part of the world is hardened with experiences that would make an American cop envy a desk job. Local law enforcement deal with civil discourse but are often as armed as their military counterparts. A character from this path is caught in the crossfire and has no choice but to fight.

Security Company

Private security mercenaries are only here for money. They've been leased out by either a corporation or a government. Employees are poached from military circles, and have the same quality of weapons and armor. However, unlike the moral-bound paths listed here, a security goon only cares about his paycheck. This comes from guarding VIPs and collecting bounties on known terrorists. It does not extend to threats not detailed in the contract. A player with this origin cannot survive on his own. He must forge an alliance not bound by greed.

Insurgents

Insurgents are the enemy. They are local radicals trying to prevent the progress of civilized society. They only care about returning their land to the old days, something democracy and capitalism will not tolerate. These rebels concentrate on placing bombs and using sabotage to impede and harm occupying forces. When a far greater force occupies the land, certain rivalries may have to be put aside.

PROPER TIMING

It may be better for certain characters to enter the adventure after landfall. Some will be interested in investigating the impact while others may only be interested in surviving the next twelve hours. Therefore, insurgents and security company personnel may stumble into the first battle unavoidably as the other characters investigate the impact.

THE CITY

The switch from calling the Green Zone "the International Zone" only occurred in 2009. Bases mentioned in this module may be closed or have their names changed by the time you read this. You can keep with the names listed here or do research to add a layer of authenticity to the adventure.

The map of Baghdad included is a public domain image with several place markers for locations important to the adventure. These are simply used for reference and should not be used to measure exact distances. Like any good Hollywood movie, some creative license is permitted. Instead of measure walking speed,

characters move at the "speed of plot".

A - Opening

The adventure opens up with the players in area A, in a region called Jazeera. Baghdad is divided by the Tigris River and this fact becomes important to the story as its meandering route impedes the group's progress.

B - The International Zone

The IZ, previously known as the Green Zone is a walled enclave once entirely controlled by the US military but now administered by an international coalition. It is one of the most safeguarded regions on the planet. The UN and US armed forces still guard the few entrances into the zone, the most well known of these being Assassin's Gate (notable for its tall triumphal arch). The only area of the IZ not walled is the large portion facing the Tigris. The IZ contains dozens of buildings including the Ibn Sina Hospital and both the old and new US Embassy.

The IZ has utterly been destroyed by the invasion by the time of the characters' arrival there.

C - U.S. Embassy

The US Embassy is not one building, but over a dozen located behind one of the most heavily guarded fortifications on the planet. The embassy is larger than the Vatican and features its own airpad, hospital, and back-up power network. It is located within the International Zone, an enclave within an enclave.

Like the IZ, the US Embassy has been destroyed by the invasion force by the time of the characters' arrival, though it does still contain needed supplies. It is also the location of survivors the characters must take charge off.

D - Victory Base Complex (VBC)

This immense plot of land completely surrounds Baghdad Airport. It is the nerve center of all US armed forces in Iraq. This is commonly but incorrectly considered synonymous with Camp Victory, which is only one camp of many within the VBC. Camp Victory is the largest of them and contains the headquarters of the US armed forces.

The VBC is located over 15 miles from the International Zone, outside of the interference shroud the aliens have erected. It is not a location the characters can sensibly reach. It holds off the enemy advancement while the characters remain behind enemy lines. When the alien commander realizes it is on the wrong planet, it makes a move towards the VBC to use its communication network.

E - Rasheed Airport

A smaller military airbase, Rasheed is located east of the Tigris and south of Sadr City. Being closer to the characters' location at the start of the adventure, it becomes an optional encounter.

By the time of the characters' arrival, it has been destroyed.

F - Sadr City

The slums of Baghdad, the worst of the worst, Sadr City remains a hive for corruption, crime, and ethnic violence. More murders and kidnappings occur in Sadr City than anywhere else in the world. The vast majority of Baghdad-based insurgents, terrorists, and general criminals reside in Sadr City. The dense labyrinth of Sadr is the only quick way through Baghdad for the characters to reach the epicenter of the impact, where

the source of the invasion stems from.

G - Camp Justice

Another US military base, Justice is the only other human sanctuary close the character's location once Rasheed Airport and the International Zone are discovered destroyed. It becomes the source of civilian evacuation.

H - 14th of July Street

This is a major four-lane road that connects Camp Justice with the IZ. It involves several overpasses.

I - Impact Point

This is the epicenter where the alien vessel crashes and from whence the invasion spreads. This is the final destination of the characters.

J - Black Hawk Crash

A vital piece of intelligence lies where this aircraft has fallen. When the characters learn about this location, they must secure and defend against a coming attack.

UNINTENDED LANDFALL

Read or paraphrase the following:

An explosion rips through the city. The wounded are shepherded away. The damage is examined. The usual suspects are considered.

A new day arrives, the same way it began yesterday.

You've gathered around the chaos as a sunrise gilds a horizon of low clouds laden with rain. Some people are here to watch, some to investigate or maintain the order. Some are even here to admire. It was just another bomb marking another morning. This one claimed several victims in a corner café...and the week was going smashingly until now. It broke a 5-day trend that offered hope that normality was returning again.

UNPK personnel maintain order. The US Army is tasked with investigation. Local police are on scene first and must now relinquish authority to foreigners. After the group gets settled in their roles, read or paraphrase the following:

You hear another explosion; this one reverberates from above you like a thunderclap, like something large breaking the sound barrier. A brilliant white plume of fire and smoke breaches the upper atmosphere. It streaks overhead, blotting out the dawn, and crashing at the center of the city. The earth shudders. You feel the vibrations in your feet before the thunder of the impact reaches your ears. From over the epicenter, a concussion waves expands upwards, vaporizing the clouds and sending a mist of ash and water raining below.

Something has come down at the center of the city, but given the size of the tail that blitzed across the sky, the impact should have been more severe. Within seconds a dust cloud envelops everything, turning day into dusk. Soon after...

The street lights go dark. Radios go dead. Satellite uplinks stop responding. Cell phones find no signal. Something is blocking out communication. This is not an electromagnetic pulse, as your short range radios are functioning

and your weapon reticles haven't faded away.

The region falls into chaos. Civilians are screaming and running in droves from the epicenter. Many are injured, covered in dust. Ambulances can be heard.

Wisdom (Perception) (DC20): The impact point is 15 kilometers from the characters' location. It is only 3 kilometers away from the US military base, an obvious safe harbor the characters can make for. No organization a player can be associated with has enough manpower to control the pandemonium (unless all the players possess the same origin).

What to Do: With communication cut, the characters are on their own to decide the next course of action. If the characters wish to act like life savers instead of life takers, they can progress towards the suspected impact point and help those they find along the way. They can also similarly head towards the International Zone, which is close to the same route, deeper into the encroaching dust field. What they should not do is turn around and retreat back west to the VBC. Brothers and comrades may be hurt. Soldiers don't run away from the gunfire; they run towards it. If they try to retreat, crowds, impact damage or other obstructions block their way.

As the characters venture deeper into the fog, the number of civilians running the other way diminishes until vanishing altogether. The group then begins to hear violence, sporadic at first and quite distant.

Even this diminishes over time.

FOG OF WAR

The dust and smoke churned up by the explosion blocks line of sight through most encounters. At the beginning of each encounter there will be an entry for fog of war. This is the effective range of line of sight to targets before the onset of concealment. Past this distance, up to double the range, targets gain concealment. Past double this distance, up to triple, targets gain superior concealment. Beyond triple the entry, targets are beyond line of sight and are considered invisible. Targets will still be in line of effect unless behind cover. Concealment penalties compound to the next grade if targets are benefitting from other forms of concealment (smoke grenade or if it is dark).

Example: If fog of war is listed at 50 feet, then targets within 50 feet are within line of sight, targets between 50 and 100 feet benefit from half cover, and targets between 100 feet 200 feet benefit from three-quarters cover. If a target already benefits from cover, then it is upgraded by one step

Fog of war is currently set at 50 feet.

THE SHROUD

The shroud is an electromagnetic bubble generated by the alien ship at its impact point. It serves two purposes. It acts as a network to coordinate the actions of alien troops and to disrupt other forms of communication. Transmissions over a distance of two kilometers are disrupted. Any wireless transmission is prevented from reaching out of or into the shroud. This inhibits human troops from coordinating their actions inside the shroud.

Although characters will have access to short range wireless communication between themselves (if they are smart to bring radios), they are unable to contact any higher authority. This includes the IZ, Rasheed Airport, and Camp Justice, all of which lie within the

shroud. They also cannot communicate with the VBC, which lies outside.

As the alien invasion spreads away from the impact point, *extension nodes* allow the range of this field to expand with the invasion.

At this point in the adventure, the player characters know none of this. All they know is that they hear static or heavy interference on every channel. If players split up (for whatever reason), the effective range of any of their radios is two kilometers (or one mile).

If characters attempt to use a land line phone, they find them without a signal. This is altogether not a shock since the impact could have damaged a phone exchange. The Baghdad telecommunications network has never been a reliable one.

NON PLAYER FILLER

The hero group can consist of just player characters but it may be advisable to include various NPCs as filler. Give them names and randomized origins; don't have the entire group be from one organization. Stress to the player group that even if they are all from the same organization, breaking up military personnel in the light of the communications blackout is strategically unsound and frankly irresponsible. The GM should not control more than five or six non player members of the hero group. Kill one or two every second or third combat encounter. If you assign them monster stats, make them Pistol Packers with the Trained trait. During combat, you may wish to assign tactical control of these NPCs to the players.

FIRST EXCHANGE

Map

SP1—Ruined City Map

Entry Point

This would be a good place for other characters (like security personnel or insurgents) to enter. They may mistakenly fire upon the rest of the group. You could also include an NPC that fires on the characters, thinking they are a threat, who is then killed when the real danger appears.

Fog of War

75 feet.

Setup

The invaders have set up ambush points. Others are moving on patrol. The players start at the east end of the city map. The vehicles placed are not there as a result of an ambush, but of the chaos that came from the invasion.

Too Quiet

The characters have been walking for some time through the city, without an encounter...until this moment.

Encounter (XP 23,600)

12 skinner minions

After the group is completely assembled (regardless if alliances are yet forged) and when they pass the first set of cars (area H), the skimmers attack. Read or paraphrase the following:

A click, a whistle, and a sudden clap like a sledgehammer against a steel barrel, three sounds roll over one another in a moment quicker than a heartbeat. It was not a sound from any firearm you've ever heard. But as one man drops with a hole in his side bigger than a grapefruit, you don't require further evidence. What probably was a second later but felt more than five, the lick/whistle/clap is followed up with a dozen more in rapid succession. White streaks of phosphorus slam into buildings and cars, creating further grapefruit-sized holes. The shots come from down the street, but from different directions. You can't immediately identify exact firing points, as only two seconds have passed, with the first casualty just hitting the dirt.

The skimmers are attacking from areas F and I, and gain a surprise round. The skimmers can't be seen, but their tracer fire can pinpoint their locations to allow counter fire. The ashen fog still covers the encounter.

Both the players and the skimmers gain cover at this range. If the characters move past area N or closer to area F or G before concluding the encounter, introduce another identical set of monsters (from areas F, I, M, and B) and double the encounter XP.

The characters should be given the opportunity to figure out that if they keep rushing through the open street, they are going to be overrun. They have to find cover and attempt to fight it out.

If the encounter is allowed to end with all visible enemies defeated, the characters can take the opportunity to get a short rest. If they do, they do not encounter further enemies until they reach the intersection. As they approach, they find one of the fallen opponents. Read or paraphrase the following:

One of the bodies has fallen across the side of a toppled vehicle. What initially resembled a person from a distance looks more mechanical under scrutiny. What you thought was a body draped in debris and garbage is actually something rather unpleasant. A human face appears stapled to a metallic skull resting upon the broad shoulders of a robotic torso. You spot human fingers from a hand attached to a cybernetic arm: only one hand, with the other arm connected to a three-barreled rifle far too large and clumsy for a normal man to wield. The face is still smiling despite the abomination appearing dead, the expression forced by the fasteners on the skull. If that wasn't alarming enough, the broad and armored torso appears comprised of several armored plates, one of which sports the insignia of the US Army.

The weapon is out of ammo and broken. If someone attempts to remove it, it breaks into three pieces, having taken damage in the fall. The process to make this creature appears rushed, as the end result is awkward-looking, though effective.

New Complications

It is assumed that a conversation among the members of the group will ensue. Before any final decisions are made, the player with the highest passive perception notices more opponents appearing on the truck by area E.

Encounter (XP 29,500)

2 widows
9 skimmer minions

The player that notices the ambush can take a free action to alert the others, denying the enemy the surprise round.

The enemy force is divided into two lines. On the first round, place 1 widow and 4 skimmers on the truck by Area E. On the second round, place the rest moving over the garbage by area D, far closer to the player characters. This will allow a proper view of the widow. Read or paraphrase the following.

You wouldn't have believed it a moment earlier, but recent events have permitted you certain leaps of faith that what you are witnessing can actually be real. Both sides of enemies appear led by a slightly larger unit, featuring a human upper torso mounted upon a bed of inhuman cybernetic appendages. Some are tentacles, while others are insect-like exoskeleton legs.

166 PROBABLY A TERRIBLE IDEA

Fog of War 100 feet.

After the conclusion of the last battle, players are able to attend wounds, pray to gods, ask for mothers, and investigate the enemy fallen. The fog of war is still present, but lifting slowly.

Vehicles may be hotwired. Most are cramped and vulnerable. There are no functional military vehicles in sight. The best the group can find are taxis and mid-sized trucks.

The widow has nothing usable to salvage, and observation during the battle (DC 20 Wisdom (Perception)) would have noticed that the creature preferred to keep back, appearing to have the capacity to synchronize the actions of the drones--meaning they can work independently or united through the C&C unit, making

them far deadlier. It would be advisable to remove them from the field the moment they are located.

Unlike the previous encounter, several skinner weapons may be scavenged. However, this takes time and each one has taken some measure of damage. None of them can be used as a weapon unless one player is proficient in Engineering. If so, the group can attempt technology salvage.

TECHNOLOGY SALVAGE

Each shell has the capacity to drop technology which players may be able to salvage. If a shell is destroyed via an explosive attack or if the shell suffers a fall greater than 20 feet, nothing can be salvaged from the creature.

The group must succeed at reverse engineering in order to use specific technology. Only when they succeed can the group scavenge that specific technology.

Creature	Technology Dropped
Skinner	1 x plasma rifle or 1 x M energy cell
Widow	Nothing
Punk	1 x pulse mini gun or 1 x H or M energy cell
Chank	1 x Dense Plasma Focus Cannon 2 x H or M energy cells
Screamer (Mother)	1 x pulse mini gun or 1 x H or M energy cell
Screamer (Baby)	1 x plasma rifle or 1 x energy cell
Beast	Nothing

THE FIRST GUN (Reverse Engineering) (800 XP)

Time: Each attempt takes ten minutes and the group cannot move until this task is completed. Only when all three initial skill checks have succeeded can you proceed to **Success**.

Intelligence (Engineering)—(DC20): The weapon is partially grafted to the user's forearm. The firing and target tracking is handled by nerve impulse. You might be able to override the firing mechanism, but the target tracking will be impossible without cybernetics. If you cannibalize an assault rifle, you might be able to implant a traditional firing trigger into the alien mechanism. Perhaps. If you make a mistake, you may end up destroying two weapons.

Wisdom (Perception)—(DC20): One of the larger cables coming off the weapon does not implant into the arm of the user, rather it weaves through the limb, without interfacing with the nervous system of the body. It exits out the shoulder where it plugs into a backpack power source. It shouldn't be that difficult to develop a backpack power setup that circumvents surgery.

Intelligence (Sciences)—(DC20): The weapon is neither a chemical propelled round nor a magnetically propelled flechette. It does employ high powered electromagnets, but its use is in the creation and sustaining of a magnetically-bound compact toroid of superheated plasma (or pulse).

Success: This is some kind of high energy plasma rifle. You can attempt another Intelligence (Engineering) check to build a usable weapon.

Intelligence (Engineering)—(DC23): It requires one assault rifle and three skinner plasma weapons, and if the group possesses all four parts, they are able to fabricate a TL5 Plasma Rifle.

Since three weapons were destroyed, their energy cells were also destroyed. The group can scavenge cells from any of the remaining weapons or attempt to convert them as well. The group must decide if it wants one weapon with several clips or several weapons that may run dry. The group will have opportunities for additional weapons and better ones later on.

PRACTICAL CHAOS

Map

SP2—The Highway. The map will be used as a highway or a bridge depending on the group's decision. If using it as a bridge, ignore any features outside the bridge and cut the map before the road turns.

Fog of War

100 feet

Current Situation

Read or paraphrase the following:

Given what few features you've been able to make out, you wager your location to be near a fuel truck depot in Muradiyah, near the Dawrah Expressway, a safe bet as you believe the pillar of fire barely visible in the east to be that very fuel depot.

If your intent is the International Zone, that would involve going northwest, across the Basatin Bridge, into Karradah, then across the Arbataash Tamuz Bridge into Karkh. Once you see the arch of Assassin's Gate, you'll know your home free.

The complication is that bridges are highly exposed. You could circumvent the river and the bridge, following the expressway, but this will extend the journey, and you run the risk of reaching darkness before reaching the base. With the Tigris River snaking around the region, these are your only two options...unless of course, you abandon the IZ and make way for Rasheed Airbase, where there could be an evacuation. That's due east, further away than the IZ and involving a bridge, a big one at that.

Without communication, the group must decide the best course of action. This does not affect the encounters to come. Regardless if the group makes for Rasheed or the International Zone in Karkh, the group will find it leveled to ash.

Rasheed Airbase

Rasheed has armored shelters and fortified defense. It is also the home of the US Air Force in that region. It is due east, through an industrial area, and over a bridge. If the group elects to take this route, then the Highway Map becomes the bridge the Expressway runs across. The group makes it through the industrial zone without encounter.

The International Zone

There are two routes. One goes over two bridges; the other circumvents the river but takes twice as long. If the group decides on the direct route, they will make it over the first bridge with trepidation but without encounter. It is the second bridge, the Arbataash Tamuz,

where the encounter occurs. If the group decides on the long route, then the encounter takes place on a stretch of the Dawarah Expressway, either a raised section or across an interchange, which still leads to walled edges over a drop (though not as severe as the bridge). Regardless of the route, read or paraphrase the following:

You can hear faint gunfire echoing miles away. In the breaks between the pattering concussions, you pick up only the crackling of buildings on fire. You note the lack of screaming people or buzzing aircraft, not even indistinctly against the pattering gunshots. You also become aware of the lack of any bodies around you. Houses are empty; vehicles are abandoned. As you travel further, you notice the vehicles have been cannibalized of useful parts, rendering most of them non-functional or at the very least structural unsound. The lack of any contact, human or hostile, is beginning to weigh on you.

The group approaches a road block, caused by jack-knifed vehicles (mostly small cars but enough of them so a large vehicle couldn't punch its way through). If on the highway, there are 10 foot-tall jersey barriers on the either side of the road, up and down this stretch. If on the bridge, the blockage is near the middle of the span. Moving them is possible but time consuming (estimated at around five minutes).

Wisdom (Perception)—(DC 20): Any character searching or attempting to move the vehicles can attempt the Perception check; otherwise, check if any characters have a passive Perception of 15 or higher.

If successful, the character either catches a significant drop in a certain vehicles suspension, indicating an extremely heavy weight in the trunk, or loose wires leading from the driver's area in the car to the trunk.

Any character proficient in Intelligence (Demolitions) should immediately intervene if anyone attempts to open the trunk of the vehicle or poke around (plant the hint if they don't notice). Regardless if anyone has proficiency in Demolitions, the trunk can be opened without accidentally detonating the contents. If someone has Demolitions, read or paraphrase both paragraphs below; otherwise, only read the first.

Every impulse in your body stops. You can almost feel your blood congealing as you stare at the unmistakable characteristics of an improvised explosive device. You count a baker's dozen undetonated artillery shells and jerrycans wired into a single red tool box and held down with bungee cables and zap straps.

As your blood pressure recovers, your brain begins working, and you immediately run an inventory of what you see. The wiring is lazy but conveniently wound into a tool box that can be opened (if you want to). The explosive yield is enough to take out everything in a hundred feet. The setup looks extremely volatile and it shouldn't be jostled.

Staying still in such an open area should be a concern. Tensions are on the rise. The group can attempt to analyze the VBIED (Vehicle Borne Improvised Explosive Device) and attempt to disarm it or the entire group can back track. This involves either navigating crowded and jumbled side streets or detouring over another bridge. Both options will cause further delay and risk. They can abandon vehicles and move past the bomb on foot. If so, skip to the encounter.

THE V.B.I.E.D. (700 XP)

Time: Each skill entry takes one minute. All skills can only be attempted by characters proficient in Intelligence (Demolitions). Only when all four initial skill checks have succeeded can you proceed to **Success**.

Intelligence (Demolitions)—(DC 20): The full inventory includes six Russian-made 122mm fragmentation shells. That alone would be enough to kill everything within a hundred feet of this vehicle. However, given the compromised structural integrity of the road around you, it could collapse the whole thing.

Intelligence (Demolitions)—(DC 20) OR Intelligence (Sciences)—(DC 18): The six jerrycans are filled with acetone peroxide—a traditional high explosive known for being relatively stable when pure. This doesn't look pure. The issue is the staggering heat and the time these explosives have been simmering in the car. Crystals are already growing from the caps. This makes the explosive sensitive to shock or heat. To make matters worse, these old Russian warheads aren't like the US spec counterparts, and may detonate if caught in the blast of another explosive.

Wisdom (Perception)—(DC 20): All the wires from each of the explosives run separately into the red tool box. Two wires stick from either side and lead further into the vehicle. There doesn't appear any trip-circuit on the tool box cover, making it safe to open.

Intelligence (Demolitions)—(DC 20) OR Wisdom (Perception)—(DC 20): The wires leading into the vehicle cabin are dummy cables to a false trigger. This was meant to be an unwilling suicide bomber, meaning the real trigger is a cell or radio detonator in the tool box.

Failure: Assuming the bomb doesn't explode and kill everyone, you can try again, each attempt taking more time. Allowing a second attempt at a failed skill check is optional (see below).

Success: You can easily clip the warheads and jerrycans from the detonator but they can all still explode if caught in a sympathetic blast. One option would be to place them a safe distance away from the road or toss (gently) over the edge.

If the player inquires, and the skill checks succeeds, another detonator can be implanted into the IED. The explosive can also be adjusted depending on the needs of the player. Re-priming the explosives requires new Demolitions checks.

Jerrycan (6): *Damage* 1d10; *Type* Physical; *Exp* 10 ft.; *Weight* 5 lbs.; *Sympathetic* Yes; *Detonator* Explosive.

Fragmentation Shell (6): *Damage* 3d6+6; *Type* Physical; *Exp* 15 ft.; *Weight* 5 lbs.; *Sympathetic* No; *Detonator* Detonator.

Note: If all 6 fragmentation shells are allowed to detonate in their location, it will collapse the bridge in a close burst 6 around the detonation square.

Special: Re-priming the explosives requires new Intelligence (Demolitions) checks.

The moment the skill challenge is concluded (or the group attempts to depart from the map), the enemy appears on the opposite side. An ambush only occurs if players are not on watch. However, because of the fog

of war, targets do not become visible until 30 squares away.

Encounter (XP 37,700)

1 widow
6 skinner minions
2 punks

There is a new opponent in this encounter. The two punks take the lead and show themselves to start combat. The skimmers and widow will then move in front and advance on the players. Read or paraphrase the following to introduce the punks.

Through the thick haze, you see two larger shapes. Their silhouette matches that of the command and control machine you engaged earlier, but as they approach, you notice they are considerably larger. Four broad mechanical legs support a partially organic torso and half a skull mostly replaced with targeting equipment. It sports a weapon on one arm twice the size of anything you have seen so far.

The enemy models appear at the extreme edge of the fog of war (150 feet). If the punk does not hit with its weapon arm, it will move closer. The skimmers and widow will never be more than 10 squares away from the punks. Because of the difficult nature of the encounter, using the explosives would be advised as the aliens have no way of detecting the explosive and will continue to walk past the vehicles.

Salvage: If "The First Gun" has been completed, the group can take the same amount time with the same components, and fabricate more pulse weapons, assuming the enemy hasn't fallen into the water. Any creature killed by an explosion in this encounter cannot have its weapon or energy cell scavenged. Characters do not need to redo "The First Gun" if they succeeded the first time when making further alien plasma rifles.

If any of the punks are intact, the group can attempt to scavenge one of these new weapons.

THE SECOND GUN (Reverse Engineering) (800 XP)

Requirement: The group must have succeeded at "The First Gun" before attempting this one. Only characters trained in Engineering can attempt this challenge.

Time: Each attempt takes ten minutes and the group cannot move until this task is completed. Only when both initial skill checks have succeeded can you proceed to **Success**.

Wisdom (Perception)—(DC 18): This larger weapon will require a bit more work. It is also considerably heavier. It takes a unique energy cell, meaning the cells from the skimmers won't fit (they also can't be adapted as you don't have the time or the tools to go mucking about with an energy source). Like the skimmers, this weapon is grafted onto a limb, but here, the entire limb is replaced.

Intelligence (Engineering)—(DC 20): You'll need to sacrifice one of your assault rifles, as well as two of these larger plasma weapons to make one functioning plasma heavy gun.

Success: It requires one assault rifle and two punk plasma heavy guns, and if the group possesses all three

parts, they are able to fabricate a pulse mini gun.

Failure: One alien weapon is destroyed in the examination. If the group tries again, they run the risk of another attack given their exposed position.

After the battle is concluded, the group can continue on their way. If the road is destroyed with the enemy creatures over the affected area, the creatures are destroyed as well. However, the group will have to find another route. The only option is to divert east across the Jadriyah Bridge, adding another 90 minutes to the journey. If going to Rasheed airbase, their route is effectively cut off as the only other route takes the group through the International Zone.

If the group decided on the long expressway route around the Tigris, or if they blow the bridge and are forced to divert, then night falls before the group reaches the International Zone (unless vehicles are used).

CONVENIENT CONSEQUENCES

Map

SP4—Rural or SP5—Compound, depending on if the group reaches Rasheed Airbase or the International Zone respectfully.

Fog of War

150 feet (100 at night).

Radios

Despite being in range of Rasheed or the IZ, the characters receive no indication of life via their radios.

It may be dusk depending on if the group took the long route to the International Zone. Read or paraphrase the following.

Rasheed Airport

You spotted the smoke plumes blocks away. You had hoped they were outside of the fence. They weren't. The hardened shelters that withstood bombing after bombing for over thirty years have collapsed. Craters the size of cars pepper the runways. The headquarters complex appears completely gutted, its upper floors having pancaked onto the sublevels.

International Zone

You count at least a dozen breaches along the Bremer wall. As you approach Assassin's Gate, you find a pair of gutted and still smoldering cougar armored fighting vehicles. Passing them and making a closer inspection, you spot no bodies inside. Entering the secured zone, you find utter devastation. Ibn Sina Hospital lacks a north wall and the bottom two floors have collapsed.

Read or paraphrase the following regardless of where the characters are.

Every building is either razed and smoking or still ablaze. You stumble through a field of debris, cybernetics grafted onto human limbs, broken weapons, and tens of thousands of shell casings. Debris too small to be salvaged was left in place. Everything else appears to have been taken and converted. You don't know how many kills your friends, brothers, and comrades had claimed in the battle. It could have been thousands. All that matters was that in the end, they lost.

The group can reconnoiter for weapons and gear. DC 15 Wisdom (Perception) checks (DC 20 if dark) will find the following depending on how long the characters search.

5 Minutes: \$5,000 in various equipment.

10 Minutes: +5,000 load points in various equipment.

15 Minutes: +4 skinner plasma rifles (with 1 energy cell each).

20 Minutes: +2 pulse mini guns (with 1 energy cell each).

As before, the players don't need to redo any skill checks they have succeeded in order to convert the weapons to human use. All the same rules apply (3 alien rifles + 1 assault rifle makes 1 human pulse rifle; 2 alien heavy guns + 1 assault rifle makes 1 human pulse

heavy gun; energy cells are used in the conversion so 1 alien weapon provides 1 clip unless it is used to make another gun).

At 20 minutes or when the characters stop searching (whichever comes first), start the next encounter.

Encounter (XP 21,800)

Phase 1

12 advanced combatants with the guerilla trait

Phase 2

1 mother screamer
6 baby screamer minions

Map: Use SP5-Compound for Rasheed Airport or SP4-Rural for the International Zone (ignore the trees in both cases).

A DC 20 Wisdom (Perception) check is required to notice the ambush. Unless the group is actively waiting for ambush, use passive Perception. If no one notices the insurgents, they gain a surprise round.

These are local guerillas from Sadr City that have escaped the impact, kept close to the Tigris, and survived the invasion. They have migrated into the International Zone for cover and supplies. They believe this invasion to be the work of Americans.

The insurgents ambush from cover and will remain at a distance for the encounter. They appear in clumps, six from one location, and six from another. After two rounds of fighting, read or paraphrase the following:

Just barely above the gunfire, you hear an oscillating noise not unlike an approaching helicopter. Salvation may finally be at hand. You have a moment of hope for a possible evacuation, but the sound is too high pitched for any helicopter you know. A block away, from behind a partially collapsed building, a vehicular abomination floats into view. Constructed from various US and UN fighting vehicles--mostly aircraft--the machine is kept aloft via fanjets located at its corners. It features numerous spotlights, weapon turrets, and docking clamps from which launch smaller versions of itself. The machine emanates a high pitched squeal, like fingernails across a blackboard mixed with a pig being slaughtered.

The shells engage both the remaining insurgents and the PCs. If the characters attempt cover inside buildings, the baby screamers will move in while the mother remains outside and continually builds more

units while also attempting to destroy the building.

After the encounter, the insurgents should all be incapacitated or killed; the group can salvage their equipment and ammo and see to their injuries.

The Next Step

If at the International Zone, the players have a second destination, to investigate the US Embassy, a smaller but more heavily fortified location. The next encounter occurs there. If the encounter above occurred at Rasheed Airport, then the players have to make for the International Zone. The above encounter does not repeat. Proceed with the next encounter as they approach the embassy.

UNINVITED RESPONSIBILITIES

Map

SP3—Office Building

Fog of War

Unlimited while inside the office building. 100 feet (75 at night) outside.

Read or paraphrase the following:

The embassy is in poor shape and has fallen to the enemy like the rest of the International Zone. However, it does appear that the embassy held out for some time, given the debris and shell casings found outside. Some of the interior buildings have collapsed. Most of the vehicles look undrivable. Some were damaged by weapons fire while others looks to have been torn apart, repurposed by the enemy. As before, you find no bodies. The embassy is comprised of a dozen buildings, including the main complex. It would take hours to search them all.

As per the previous encounter, the group can reconnoiter for weapons and gear. DC 15 Wisdom (Perception) checks (DC 20 at night) will find the following depending on how long the characters search.

5 Minutes: \$5,000 in various equipment.

10 Minutes: +2 skinner plasma rifles (with 1 energy cell each).

15 Minutes: +1 pulse mini guns (with 1 energy cell).

Regardless of how long the group looks, they will also locate two operational cougar fighting vehicles (APCs). They have had their doors pulled out and a wheel or two removed, but their engines are intact and a character trained in Engineering only needs 30 minutes to cannibalize parts from the inoperable cougars to make two functional ones.

While the engineer works on repairing the vehicles, and before the group searches longer than fifteen minutes, read or paraphrase the following:

As you cross the shadow of the embassy headquarters, one of you feels a light tap off your helmet, as a fallen pencil deflects across the Kevlar. Your attention and weapon reticle is immediately trained above—the others follow suit in a unified maneuver. You scratch the trigger but pull your finger back at the last second as you spot a human hand waving. Thankfully that hand is connected to a living person. She wears a worn business suit and frazzled chestnut hair—an employee of the embassy. She gestures one hand for attention while the other holds a finger over her lips. She points behind her, implying where the enemy is. She then holds up one finger to indicate the number of threats.

Any attempt to communicate further will bring frantic waving from her in her attempt to shut the characters up. She then dives back into the building. The characters will have to enter the embassy in order to investigate.

Alternate Introduction

It is possible that the characters will immediately enter the embassy headquarters without searching the main compound, hoping that it may have secured communication or better weapons. If so, they will immediately find the cougars outside. They can then search inside

of the office building. In this case, the encounter with the woman above is optional. However, one situation makes the characters alert to the threat, and the other does not.

Encounter (XP 11,500)

1 beast

As the group enters the fourth floor (where the survivors are) they hear noises. Something big is rustling through the level. Despite the hallways, cubicles, and furniture, the beast can move anywhere it wishes simply by pushing through flimsy walls. It treats the entire encounter area as difficult terrain. Mark areas it destroys as it passes: these areas become difficult terrain for the characters as well. Until the beast moves through a wall, it is still considered a wall that impedes line of sight and (sometimes) line of effect. Read or paraphrase the following:

The shape is like that of an animal, a techno-organic hairless lion with a beetle-like head, floating tentacles trailing from its shoulders and articulate claws it uses to push aside debris looking for bodies. It finds one, clamps its pincers around it, and dozens of tendrils from its body go to work, rebuilding the corpse into an alien drone, like the ones you've encountered numerous times already.

Because the characters are made aware of the creature, they can organize an ambush. The creature is actively searching but proper Stealth checks could evade its detection. However, it must be dealt with as it is approaching the location of the survivors.

171

SURVIVORS

The characters will find four survivors in the room, two male, two female—three adult, one child.

Staff Sergeant Dr. Elina Clarke

Elina is the one that alerted the group. She is an enlisted NCO with the Air Force medical corps that volunteered for the 86th Combat Support Hospital, based out of Ibn Sina Hospital.

Talent: At each long rest, as long as Clarke is alive, each character recovers 1d4 additional Hit Dice.

Dr. Richard Virchow

Virchow is a German Foreign Military advisor to the US Ambassador. He speaks six languages (Arabic, English, French, German, Mandarin, and Spanish) and has degrees in history and human resources, with a masters in mathematics.

Talent: As long as Virchow is alive, characters are granted a +2 bonus with Intelligence (Science) and Intelligence (Engineering) checks.

Zaidoon Adnan Al Durra

An Iraqi taxi driver, Zaidoon fled to this region and found sanctuary when the enemy attacked. Zaidoon had expressed anti-American feelings at one point, and had been approached and attended Al-Qaeda meetings (a player with that background or one with a police background may recognize Zaidoon). His opinion has become more moderate since then. Zaidoon is not an idiot and knows these attacks are not caused by Zionists. He won't bring up his political beliefs in casual conversation.

Talent: As long as Durra is alive, the group gains a +1 bonus to Dexterity (Stealth) and Wisdom (Perception) checks.

Yousaf Zadari

Zadari is a 13-year old orphan that has lived out of a nearby foster home until it was destroyed by the invasion. He had squeezed out a living selling bootleg Hollywood movies to the American soldiers. He was working in the International Zone when the attack occurred. Despite what the group may assume, Zadari has never held a gun in his life.

Talent: As long as Zadari is alive, the group gains a +2 bonus to Wisdom (Perception) checks.

Rules Regarding Survivors

The safety of the survivors should be the group's primary responsibility. That being said, their automatic survival should not be assumed. They can be killed in encounter if the characters don't ensure their protection:

- If a survivor take one point of damage, they are killed.
- Survivors have an AC of 20.
- The first hit against a survivor in an encounter automatically misses.
- A character can cover a survivor as a reaction to a hit. If so, the survivor is immune to direct and area attacks but the character becomes the target of any attack against the survivor.
- Enemies have disadvantage with attack rolls against survivors with cover.

INFORMATION

The survivors have been holed up in the embassy since all this began and witnessed the devastation firsthand. Since the embassy had a secured independent land line to the VBC, surveillance and tactical intelligence were relayed before the line was severed. The survivors relay the following information (you can determine who answers depending on how the conversations play out, though suggestions are offered):

Enemy Activity (Clarke)

"There were a lot at first, sweeping out from the blast center, then it just died down. We only see small patrols now. We assumed they concentrated their forces on expansion and not establishing any foothold here."

Communications (Clarke)

"All the phones connected to the Baghdad exchange went dead at the moment of impact. A wire center was either destroyed or damaged. The embassy had an independent line to Rasheed and the VBC. Rasheed went quiet a few hours ago when they reported enemy contact. Last word had them evacuating people south. VBC appears to be on the outside of the shroud that's blocking out wireless. We were relaying intelligence and organizing an evacuation when we were hit. The line was damaged in the firefight, but last word we had, the VBC was gearing up for one hell of a fight."

Communications (Virchow)

"This shroud is obviously an artificial construct. I had thought the interference was a jamming field consisting of random noise and modulating electrical fields, but it is actually electromagnetic interference with a distinctive pattern, all radiating from a transmission source at the epicenter in Sadr City. I believe, given the synchronized nature of the machines they are using, that this is a blanket network to coordinate their actions, and the disruption of ours is a side effect. It would be logical to deduce that they would have some way to expand this field as they push further out."

The IZ Evacuation (Clarke or Virchow)

"The helicopters took off, taking all the VIPs, but word was they were going to Rasheed. Except one. Apparently, some egghead made a breakthrough regarding the jamming field. They brought a Black Hawk to evacuate him. They were going to take him to Camp Victory, but we saw it go down only about two miles west of here."

Impact Point (Clarke)

"The last word we got said the epicenter of the impact was somewhere either in Sadr city or just east of it. The dust cloud is still too thick to confirm."

Possible Invasion Origin (Virchow)

"Before the landing, Reuters had reported that an object had been detected entering the atmosphere. They added that the lack of warning was upsetting. There was not enough time to warn the population, but until the communication lines were cut, it was still the only impact. However, it has been several hours, so this may have changed. This suggests to me that this event is either a precursor to a larger

invasion force, or a mistake in navigation.

"If they truly wanted to overwhelm us, they would have dropped dozens—hundreds—of these payloads across the planet, seeding the globe and wiping out all intelligent life in hours. They would not drop just one, or else the civilization under threat would do the uncivilized and use nuclear weapons to eradicate the enemy once and for all."

Invasion Migration (Durra)

"I saw a large group of them passing this area, ground and air forces. They do not appear to wish to secure land, only to expand. After they passed, we see only few patrols and stragglers. It would be suicide for us to head west—that was the direction they all appeared to be heading, towards the largest collection of armed forces at Baghdad airport."

Enemy Weakness (Zadari)

"Well, they don't appear to like water. Maybe the machines can't swim. They've just been avoiding water when they can."

If not already known, it will be revealed that Rasheed Airport has been overrun.

WHAT NEXT?

Even though the characters may endorse several possible routes, only three make sense.

Evacuate All Personnel

With Rasheed overrun, the nearest evacuation point is Camp Justice, just north of group's location. It is four miles away, along the 14th of July Street, which runs parallel to the Tigris all the way from the IZ to Kadimiya.

Investigate the Black Hawk

Only two miles west, with a smoke plume still visible, it may be a good idea to investigate the crash and see if there are any survivors or valuable Intel. Considering the importance of the cargo, it would be a tactical mission as well as a merciful one.

Divide with Consequence

If the group is large enough, it may be reasonable to accomplish both of the above tasks. Short range communication is still possible so both parties will be able to maintain contact, at least until reaching the limit.

Regardless of the decision the group makes, if it is not fully dark by now, it will be shortly. The group can take an extended rest before moving at dawn. Leaving now would be risky, especially with civilians in tow.

PRAGMATIC MADNESS

Map

SP1—Ruined City Map, though its setup will alter depending on the location.

Fog of War

200 feet.

Setup

This map involves two encounters. One involves the group rescuing a location already in the middle of an attack. The second is the group defending a location from an attack. The map is the same but it involves

two different destinations, Camp Justice and the Black Hawk crash. The first location the players go to will have the first encounter, while the second location will have the second encounter. You can reverse these if you see fit.

CAMP JUSTICE

If Camp Justice is the first destination, read or paraphrase both paragraphs below; if it is the second, only read the second.

Before you even get within sight of the camp, you hear the gunfire. You first pick up the whizz-clap of alien pulse weapons, followed quickly by the gratifying melody of American small arms fire. The exchange is intense. Someone is still alive at the base.

Camp Justice resembles the end of a six-hour Monopoly game, with dozens of single-colored prefabricated buildings rising from flat land. Every surface is drab and lifeless. The barricade defense has been compromised at several locations. Buildings behind the gates are on fire, though you quickly spot the American armed forces still manning the checkpoint. They are bloodied and resolute in their defense of their base, but they continue to hold.

BLACK HAWK

If the Black Hawk is the first destination, read or paraphrase both paragraphs below; if it is the second, only read the second.

Before you even get within sight of the crash, you hear the gunfire. You first pick up the whizz-clap of alien pulse weapons, followed quickly after by the gratifying melody of American small arms fire. The exchange is intense. Someone is still alive at the crash.

The Black Hawk appears to have clipped a minaret on its way down, breaking the tail and sending it across a block to embed itself into an apartment building. Out of control, the helicopter countersunk to the intersection and belly flopped onto a parked taxi. It then rolled on its side, shredding its rotors through the nearby coffee shops, and pulling the taxi off its wheels in the process. Of the footage and photos of other crashes you've seen, this one looks to have survived better than most.

THE RESCUE

Encounter (XP 17,700)

1 widow
6 skinner minions

The heroes can save the day, salvage technology, and check the location.

CAMP JUSTICE

There are ten survivors left at Camp Justice. They have ground vehicles but no aircraft. The commanding officer is Lieutenant John Ironhorse of the US Army. His men are well armed but are tired, with mounting casualties. Justice is on the northern edge of the shroud. They had been ordered to hold the base until an air evacuation, which is already two hours overdue.

The hotline to the VBC is functional, though sporadic. Ironhorse explains the following:

"This enemy force cares nothing about securing land. It functions more like a virus—attacking, infecting, and expanding, with no quarter for what it leaves behind. It's effectively a scorched-earth tactic utilizing ground troops. The screamers they have in the air have prevented surgical strikes from our aircraft. Missile guidance and navigation don't work in the shroud. Command is considering carpet bombing from high altitude, but we haven't done that since Vietnam. You can imagine the political blowback from that decision. We were hoping more survivors would make it out of the city."

Ironhorse knows little else since communication was cut. Since then, Justice has been hit every few hours but the specifics of the terrain have forced ground forces into a very narrow firing line. It is also most likely that most of the shell ground force is being gathered to push on to the VBC. It is only a matter of time before a large enough force is sent north to overrun Justice.

Supplies

The characters will have time to resupply and salvage enemy technology (other than what they already acquired if there was a previous encounter here).

- \$3,000 in various equipment.
- 4 plasma rifles.
- 2 pulse mini guns.

Preamble

A helicopter will arrive within a few hours, offering the group enough time to check out the Black Hawk crash (unless already done) or recover. If Camp Justice is the second location, and before the evacuation arrives, the enemy appears down the street (second encounter).

BLACK HAWK

There is only one survivor at the crash, the pilot, Captain William Turcott. He has been firing his weapon from the exposed cockpit, having been pinned inside since the crash. The co-pilot survived the crash, but both gunners and the civilian did not. The co-pilot died shortly after from enemy fire.

Turcott is unable to move with the controls wedged onto his waist. His pelvis is broken and no matter the healing powers the player characters have, he is unable to move on his own. He will require at least two people to move him and all three are slowed while doing so. Like the civilians, Turcott is a minion but while being carried, he cannot be the target of a non-area attack.

However, the first task is to remove him from the cockpit. This requires either an Engineering tool kit (or just a saw or a blowtorch) or brute force. Brute force will take an hour. An engineer kit will take ten minutes.

Supplies

Other characters can reconnoiter the crash for supplies and technology (other than what they already acquired if there was a previous encounter here).

- \$500 in various equipment.
- 2 plasma rifles.
- 1 pulse mini gun.

Intelligence

Searching the crash will locate the body of Dr Emile Klinste. In his broken and scorched briefcase is a slightly damaged tablet computer. If Virchow is pre-

sent, he'll reveal the password as "Mecha12345"; otherwise, the group will have to return to Camp Victory to ask him. If there is no way for players to gain this information, then have them find a piece of paper with the password in Klinste's wallet.

The maps and photos contained in the folder "Keydata-Uber" reveal that there was an explosion in the upper ionosphere and that the other fragments vaporized during re-entry. Photos show the impact point through various visual filters. Thankfully, Klinste prepared a summary document to explain everything. Reveal the *Keydata-Uber document* to the players.

The *Bishop Transmitter* mentioned in the document can be found in the wreckage with a successful DC 25 Perception check. It is intact and functional. Trying to continue the Black Hawk's mission to take the transmitter to the VBC would obviously be suicide as it involves the group passing through the shell expansion force.

Preamble

If the Black Hawk is the second location, the enemy appears down the street (second encounter) just before Turcott is freed.

THE DEFENSE

The enemy is not concealing their approach. If the characters place sentries, the enemy will be spotted several minutes before the attack. If not, the aliens herald their entrance when they destroy a blocking vehicle down the road.

Since the players have some time leading into the encounter, they may have had the opportunity to plant defenses including barricades and demolitions. The following encounter is difficult and strategy is imperative to surviving it.

There is no need to control NPC allies in the encounter. Assume they are firing their weapons alongside the player character and taking out foes not involved in the player encounter; the creatures placed on the map are those the players are responsible for.

Both locations use the same map, but the layout is different.

Black Hawk

Place a Black Hawk template in the center of the intersection; players will fight from that location. Enemies will appear from the end of the long road east. Be generous in extending the road east up to 40 more squares.

Camp Justice

The eastern map edge is the entrance to Camp Justice. Expand the map east or connect the eastern side of the map with the Compound map.

Encounter (XP 63,100)

Phase 1

- 2 widows
- 9 skinner minions

Phase 2

- 1 chank
- 1 widow
- 9 skinner minions

The second phase appears at the map edge at the beginning of the third round in the encounter. When that occurs, read or paraphrase the following:

You hear a loud shriek that increases in pitch until it goes beyond your capacity to hear it. It seems to overwhelm all the sounds of gunfire, ejecting magazines, allies screaming, and even the wind whistling underneath it all, leaving the region eerily silent. An instant later, a loud thump destroys a vehicle and part of the neighboring building, and the sounds of warfare return. Through the settling debris, you spot the least visually shocking enemy unit encountered thus far, a four-legged walking gun. It begins to ramp up to fire again.

The chank will remain back and pound the player locations from a distance until the players find some way to remove the threat. When the chank fires, its discharge resembles a bolt of lighting.

After all opponents are defeated, the PCs can gather technology.

THE FINAL GUN (Reverse Engineering) (800 XP)

Requirement: The group must have succeeded at The First Gun skill challenge and the The Second Gun skill challenge before attempting this one. Only characters trained in Engineering can attempt this challenge.

Time: Each attempt takes ten minutes and the group cannot move until this task is completed. Only when both initial skill checks have succeeded can you proceed to **Success**.

Wisdom (Perception)—(DC 20): You're initially thankful that this thing doesn't appear to contain organic parts. When you open the weapon you discover the living nerve clusters webbed through the system. There is no way to remove these; they'll have to remain. It appears to be a slave unit, with little to no intelligence of its own, requiring the input for any external operator. Unfortunately, it requires an alien interface. Too bad, this could have been easy. The first step will be to remove any unnecessary non-functioning technology. The legs would be a good start.

Intelligence (Engineering)—(DC 24): This is some sort of energy-based artillery weapon system, more powerful than anything you have seen so far. It uses a dense plasma focus reactor to generate a pinch, making the weapon more a lightning gun than a plasma gun. After decades of whimsical science fiction and science geek wet dreams, you finally have the capacity to make a Tesla death ray. Eggheads would love to dissect it, as the miniaturized reactor inside this thing could power a city for a year. But for now, given you're in the midst of an alien invasion, you want and need your big frigging gun.

Failure: One alien weapon is destroyed in the examination. Since there are no more chanks here, the

group will have to wait until one is encountered again.

Success: It requires one assault rifle and one chunk plasma heavy gun, and if the group possesses both parts, they are able to fabricate a plasma artillery weapon

Failure: One alien weapon is destroyed in the examination. Since there are no more chunks here, the group will have to wait until one is encountered again.

THE TAO OF ID

(OPTIONAL ENCOUNTER)

Map

Any

Fog of War

Unlimited or 15 at night.

Setup

If the group remains at Camp Victory for any length of time, or if the group desires more combat, or if you think the players don't deserve a moment's peace, you can use this optional encounter.

While the players are preparing for their next move, perhaps even planning an assault against the alien mothership with their newfound intelligence, the alarms at the base sound.

The enemy is assaulting, but this time, they want to do more than just overwhelm the base. With them is an extension node, which will be able to extend the shroud and allow the alien force to expand north by several kilometers. This is a major attack against the base. Not only must the players fight off this menace, but they must be able to take out the extension node. By destroying this, the enemy will retreat.

Encounter (XP 76,900)

Phase 1

- 1 chunk
- 2 punks
- 3 skinner minions

Phase 2

- 1 extension node
- 2 widows
- 9 skinner minions

Phase 3

- 1 beast

The extension node has an AC of 18 and 50 hit points. After appearing, it will duck behind buildings and other forms of cover to protect itself.

Phase 2 arrives at the beginning of round 4. Phase 3 arrives at the beginning of round 8. When the extension node arrives, read or paraphrase the following:

For a brief moment, you locate a new unit at the back of the approaching force. It looks completely mechanical, with four clumsy legs not unlike a spider and a torso comprised of a single two-storey tall cylinder with a spinning red light at the top which clicks away like a frantic shutterbug. As it steps forward, you notice the interference in your radios getting louder. Before you can train your weapons, however, it ducks behind a building.

When the node is destroyed, any remaining functional shells well retreat. If the characters pursue, then

the shells stand their ground and fight to the end. After the encounter, the players can salvage what they can.

RELUCTANT DILIGENCE

Map

SP2—The Highway OR SP1—Ruined City Map. Select which one is appropriate depending on the direction the players take as well as their prevalence over which map they enjoy more.

Fog of War

Unlimited

Reasonable Objective

The players should have all the information they require to make a logical decision regarding their next course of action. They should have the Bishop device required to transmit vital information to the alien pod. However, due to interference from the shroud, they must be within sight of the pod for it to work.

To reach the impact point, the group must travel via cougar over the A'Imma Bridge, through Maghrib Square, follow along Antar Street, to reach Sadr city. The encounter can occur through Sadr or before it, depending on the map choice. The party will have the vehicles along with weapons any mounted on them.

Why Not Just Leave

If the group attempts to escape north and work their way around the shroud to Baghdad Airport, it would take some time and by then, the VBC will be under siege from the expanding alien invasion. With the intelligence to hand, the VBC would need a group of soldiers to go in undercover (via ground transport or halo jump) to reach the pod with the transmitter.

As it stands, the players are already behind enemy lines. Eventually, the allied armed forces will be forced to level the impact point with traditional ordinance. However, like *War of the Worlds*, this tactic will not succeed, and given time, nuclear weapons will eventually be deployed. Such a weapon will disrupt communication far worse than the shroud does, conceal the impact point further and prevent any human from approaching. The alien pod will no doubt have some form of recall signal, assuming the pilot dubbed "Spirit" is still alive.

If the group manages to contact the VBC through inventive measures (like moving out of the shroud and using traditional communication or locating a functional land line), Camp Victory will answer and state the information above—that the VBC has no capacity to either reinforce the players or send a military force to assist them and that the allied forces have agreed to drop a payload of precision-guided munitions onto the impact point, following with a nuclear payload if that does not succeed. If contact is made, the voice from the VBC will add that the players are few in number and are thus unlikely to sway the battle in any significant way by joining them at the VBC. They may do better by attempting to communicate with the alien pod after the traditional ordinance has dropped.

The End Result

Whether the group is directed or goes by choice, the will still have the capacity to prep their vehicles for the fight, mounting weapons and storing extra ammunition.

Evacuation and Reinforcement

Before the players depart, a single Black Hawk will land to evacuate the civilian survivors and the casualties from Camp Justice. Clarke, Virchow, and Zadari will volunteer to join the PCs, though the latter should be taken with caution. The players could also conscript any of the NPCs from Camp Justice, though it is important not to spread the base defenses too thin (it is the only secured allied location behind enemy lines).

The Long Drive

It is a 14-18 kilometer drive from Camp Victory to the impact point. The enemy appears at one random point along that drive. They block the opposite road. Although the encounter can occur at any time, it would be suggested to have it occur through the dense network of buildings in Sadr city.

Setup

If using the ruined city map, it may be advised to replicate it to expand the city. If the group stops and holds their ground, that won't be necessary. However, if the group decides to go on a cavalry charge, any creatures not killed and driven past will reappear further up the map. This will cause a rotation of enemies until either all the enemies in the encounter are killed, the party passes through four maps, or is unable to continue driving (vehicles damaged or roadblocks too severe) and must stand their ground. Because each map has a roadblock at one end, the group will have to be inventive. Or they can just smash through them.

Encounter (XP 39,500)

- 1 chank
- 2 widows
- 9 skinner minions

After the battle, the group will eventually approach the impact point. But before arriving, the air strike will occur. If the player characters know of the strike, then they can stop and wait for it to occur.

Read or paraphrase the following:

The familiar roar of those four General Electric turbofans is a symphony to rival anything by Bach. You turn your heads to the clear sky as the alien-looking but very human-built triangle silhouette of a Northrop Grumman B-2 Spirit stealth bomber soars overhead. The maw of the payload bay is wide open and you stop in your tracks as the bomber makes its run on the target.

From within drops a single weapon, a GBU-43 Massive Ordnance Air Blast bomb, all 30 feet and 11 tons of it. With needle-point accuracy, the explosive begins its descent. The drogue parachute blossoms from the back and the bomb drifts quickly to its target. You don't see the point of impact, but you do see it detonate moments later, followed by the shock-wave, as nine city blocks are flattened or incinerated in an instant. It's a safe assumption you will not be encountering further opponents until you reach your destination...

BY THE TOLL OF A BILLION DEATHS

Map

SP6-Wasteland

Fog of War

150 feet

Setup

This setup requires the placement of the alien pod, which should fall just off center, with characters entering from the distant end.

Set the Mood

Read or paraphrase the following

You knew there was nothing left living in this region when the bomb dropped. Even with that safe assumption, you're still downcast by the apocalyptic aftermath of the explosion. The airburst flattened every building for a half mile in every direction. A few surviving walls remain stalwart despite collapsed roofs and crushed road signs. With the deluge of debris scattered about, you are unable to discern ruined buildings from obscured roads. Despite your distance, you can just make out through the dust the scorched but relatively undamaged chrome-plated egg of the alien dropship, half buried in dirt and wreckage.

As expected, the alien ship survived the bomb detonation. Before the players are able to setup and/or transmit successfully to the alien pod, enemy forces rise from the ashes to attack.

Encounter (XP 64,900)

Phase 1

- 1 widow
- 21 skinner minions

Phase 2

- 9 baby screamer minions

The skimmers rise up scattered across the battlefield, but no more than 75 feet from a character. The screamers show up at the beginning of the third round (or when the skimmers are reduced to 10, whichever comes first).

At some point, the players must attempt to communicate with the alien ship. One character (NPC or PC) must use a minor action each round to sustain the transmitter. If so, then combat ends when the above creatures are destroyed. In truth, the enemy is still rising up to attack, and you can mention that another wave rises up, the same as the last one, but at this point, the transmission succeeds. Read or paraphrase the following:

The enemy freezes in its tracks. You don't notice initially until realizing the enemy has stopped evading or returning your fire.

You hold your weapons a moment to verify your suspicions. You heard neither a siren's call nor a radio's squawk. The shroud hasn't fallen. The only other change is a cool breeze that drifts by you, revealing that time hasn't, in fact, stopped.

You keep your weapons trained on the petrified shells, unsure if firing upon them while inert will cause a negative reaction from the pod. You count the seconds. You hold your breath until it hurts. No movement from the enemy; no response from the pod. You wonder if your allies back at the base are witnessing the same. Suddenly, you lose your breath as the ground around the pod erupts, sending a concussion beneath you that causes the last few nearby walls to collapse. The pod rises into the air, supported by three tentacle-like appendages underneath. Legs fully extended, the tri-pod stands eight storeys, and immediately begins stomping through the wasteland on a determined march west.

Encounter (XP 18,900)

Spirit / Tri-Pod

3 skimmers or remaining forces from the previous encounter.

The skimmers are what remain of the previously inert shells left on the battlefield (including the reinforcements which arrive at the time the shells go inert). If the players had made an effort make sure the battle was swept clean, have four shells rise up regardless. They attempt to protect Spirit as it makes it way to the VBC.

Spirit will engage the players, but always attempt to make its move west. This involves moving it from one wasteland map to another, and then through an urban map (if you want to spice things up). The bomb damaged the shield of the tri-pod. However, before it can drop for good, the players must inflict single hit which deals at least 50 points of damage. After that is done, the characters will notice their ground fire visibly impacting the vessel directly instead of sliding off its shield.

After the tripod is destroyed, the characters can find Spirit inside, a shriveled humanoid of barely 40 lbs., wired up at every joint to the machines around him. The machine dies but Spirit's fate can be left ambiguous. The shroud falls at the same time, opening communication between the character's and Camp Victory. They have weathered the invasion and survived, despite suffering numerous casualties. They will send a pickup immediately to the players' location.

The characters may never know where the alien pod was headed to, or what Spirit had intended to do if he communicated with its people. But as the shroud falls, the shells fall silent, then begin dropping like puppets with their strings cut. Hundreds of thousands of people have died; the invasion has been stopped. All that remains are questions.

178

The newly risen tri-pod is making its way west. The shroud is still functional, disrupting communication. The tri-pod is now moving directly towards the base. Its motives are unknown.

Characters will notice as the tri-pod passes that its reflective finish sports several fractures along its hull, probably caused by the impact and by the MOAB drop. The characters may figure out on their own or determine through a DC 20 Wisdom (Perception) check that the only reason why the tri-pod would make a move for the base is because of its communication network and the fact that the US armed forces may be less likely to drop a nuclear weapon on their own airspace.

If the characters attempt to communicate or impede the tri-pod, begin the encounter with the tri-pod firing upon the characters.

SHELLS

SKINNER

Skinner is a jumbled collection of cybernetic and organic parts. They are produced in the thousands from on-site materials.

SKINNER

Medium construct, unaligned

Armor Class 19 (natural armor) or 18 with minion

Hit Points 136 (16d8+64) or 34 with minion

Speed 30 ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	18(+4)	18(+4)	15(+2)	11(+0)	5(-3)

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 120 ft., passive Perception 10

Languages None

Challenge 10 (5,900 XP)

Minion. Skinners can be used as minions in a battle. A skinner used this way decreases its AC to 18 and its hit points to 34. Three skinners count as 1 normal skinner at the listed challenge.

Actions

Multiattack. The skinner makes two merged weapon attacks (one if a minion).

Merged Weapon. Ranged Weapon Attack: +8 to hit, range 200/1,000 ft., one target. Hit: 12 (2d8+4) force damage.

Slam. Melee Weapon Attack: +8 to hit, reach 5 ft., one target. Hit: 9 (1d10+4) bludgeoning damage.

Reactions

Backup System (1/day) (Non-Minion). When the skinner is reduced to zero hit points, it regains 1 hit point.

WIDOW

The widow is an advanced skinner that has the capacity to influence if not outright control the skinners around it. The widow has very few organic components, sometimes as little as 2%. It also doesn't always completely follow the humanoid form. Some have synthetic tentacles while others have multiple legs. Individual units have been nicknamed "scorpion," "centaur," "tarantula," and "octopus."

WIDOW

Medium construct, unaligned

Armor Class 18 (natural armor)

Hit Points 153 (18d8+72)

Speed 30 ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	16(+3)	18(+4)	14(+2)	12(+1)	8(-1)

Skills Stealth +7

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Damage Resistances bludgeoning and slashing from non-magical weapons

Senses Darkvision 120 ft., passive Perception 11

Languages None

Challenge 12 (5,900 XP)

Pulse Sequence. The skinner can use 30 feet movement to disengage all shells within 10 feet.

Actions

Slam. Melee Weapon Attack: +8 to hit, reach 5 ft., one target. Hit: 16 (3d8+4) bludgeoning damage.

Direct Control. The widow selects one skinner within 50 feet; targeted skinner makes one merged weapon attack with advantage.

Bonus Actions

Uplink. The widow selects one skinner; until the start of the widow's next turn, the target can make one additional merged weapon attack as a bonus action.

PUNK

The punk is a larger infantry support unit with four legs, capable of laying down heavy fire against single or multiple targets. What's left of its organic head has been supplanted with considerable tracking equipment to pinpoint distant targets. The punk is also often seen as an anti-aircraft weapon. It is often flanked by at least a half-dozen skinners.

PUNK

Medium construct, unaligned

Armor Class 16 (natural armor)

Hit Points 110 (13d8+52)

Speed 30 ft.

STR	DEX	CON	INT	WIS	CHA
14(+2)	17(+3)	18(+4)	13(+)	11(+0)	5(-3)

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 10

Languages None

Challenge 13 (10,000 XP)

Tracking System. The punk can spend 30 feet of movement and gain a +1 bonus to its pulse cannon attacks until the end of its turn.

Actions

Multiattack. The punk makes two pulse cannon attacks, or three if directed at the same target.

Pulse Cannon. Ranged Weapon Attack: +8 to hit, range 250/1,000 ft., one target. Hit: 13 (1d12+7) force damage.

Slam. Melee Weapon Attack: +7 to hit, reach 5 ft., one target. Hit: 9 (2d6+2) bludgeoning damage.

CHANK

This unfortunately nicknamed cybernetic mobile artillery unit is only seen coupled with larger units. It has few organic components in its assembly, mostly consisting of recoil absorption hardware and armament. As the chank has no close combat capacity, it depends on its guards to protect it.

CHANK

Medium construct, unaligned

Armor Class 17 (natural armor)

Hit Points 152 (19d8+76)

Speed 35 ft.

STR	DEX	CON	INT	WIS	CHA
18(+4)	21(+5)	18(+4)	13(+)	11(+0)	5(-3)

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 10

Languages None

Challenge 13 (10,000 XP)

Platform: The chank cannot use its *Self Propelled Artillery System* if it moves on its turn; if it uses this weapon, its speed is reduced to zero until the beginning of its next turn.

Actions

Self Propelled Artillery System (Direct Attack).

Ranged Weapon Attack: +10, range 250/1,000 ft., one target. Hit 25 (5d10+5) force damage

Self Propelled Artillery System (Area Attack). Select

a 20 foot radius sphere within 1,000 feet. Each creature caught within must make a DC 18 Dexterity saving throw, taking 20 (4d10+5) force damage on a failed save, or half as much damage on a successful one.

Slam. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target.

Hit: 11 (2d6+4) bludgeoning damage, and the target is pushed ten feet.

Bonus Actions

Capacit or Purge: Increase the damage of the chank's next *Self Propelled Artillery System* by 5 (1d10), max 20 (4d10).

SCREAMER, BABY

Medium construct, unaligned

Armor Class 18 (natural armor) or 17 with minion

Hit Points 135 (18d10+36) or 34 with minion

Speed fly 80 ft.

STR	DEX	CON	INT	WIS	CHA
10(+0)	21(+5)	15(+2)	15(+2)	15(+2)	5(-3)

Skills Perception +5

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 17

Languages None

Challenge 10 (5,900 XP)

Minion. Baby screamers can be used as minions in a battle.

A skinner used this way decreases its AC to 17 and its hit points to 34. Three baby screamers count as 1 normal baby screamer at the listed challenge.

Actions

Multiattack. The baby screamer makes two pulse rifle attacks (one if a minion).

Pulse Rifle. *Ranged Weapon Attack:* +9 to hit, range 100/400 ft., Hit: 11 (2d6+5) force damage, and the baby screamer can move 5 feet.

Slam. *Melee Weapon Attack:* +9 to hit, reach 5 ft., one target.

Hit: 10 (1d10+5) bludgeoning damage.

Bonus Actions

Dash. The baby screamer disengages from all targets and moves 5 feet.

SCREAMER, MOTHER

Large construct, unaligned

Armor Class 18 (natural armor)

Hit Points 180 (19d10+76)

Speed fly 80 ft.

STR	DEX	CON	INT	WIS	CHA
10(+0)	18(+4)	18(+4)	15(+2)	16(+3)	5(-3)

Skills Perception +7

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 17

Languages None

Challenge 13 (10,000 XP)

Actions

Multiattack. The mother screamer makes three pulse rifle attacks.

Pulse Rifle. *Ranged Weapon Attack:* +7, range 200/800 ft., Hit 9 (1d10+4) force damage

Slam. *Melee Weapon Attack:* +5 to hit, reach 5 ft., one target.

Hit: 14 (4d6) bludgeoning damage.

Special Actions

Deployment. The mother screamer uses 80 feet of movement and a bonus action to place one baby screamer within 5 feet. A baby placed this way acts on the mother's initiative. Only three baby screamers can be active this way at a time.

180 SCREAMER

Screamer is an umbrella term for one-manned aircraft operated by the shells. Both are considered attack vehicles as neither can be used as a transport. The smaller screamer is used in close quarters as a high-ground support platform for ground based infantry shells while the larger one is an anti-vehicle / crowd disposal device. The only organic compound used in the screamer is a brain (the baby often sports an exposed human skull).

BEAST

Also known as a conversion unit, the beast is a mobile command node that expands the shells' influence and sphere of control. Although capable of combat, the beast prefers to remain back, while constructing more shells. While fixed and defended facilities produce larger units like screamers and punks, beasts expand though uncontrolled and populated areas producing ground units as fast as they can acquire raw materials. To destroy one is to cripple the enemy advancement in that area. Unfortunately, beasts are incredibly difficult to defeat. Unlike many shells, the beast, although cybernetic, has no visible human features.

BEAST

Large construct, unaligned

Armor Class 19 (natural armor)

Hit Points 195 (17d12+85)

Speed 40 ft.

STR	DEX	CON	INT	WIS	CHA
23(+6)	18(+4)	21(+5)	14(+2)	16(+3)	5(-3)

Saving Throws Dex +9, Con +10, Wis +8

Skills Acrobatics +9, Perception +8, Stealth +9

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 18

Languages None

Challenge 14 (11,500 XP)

Raw Materials. Place six corpses within 50 feet of the beast after establishing initiative. The beast must be adjacent to a body to create a skinner.

Actions

Multiattack. The beast makes any three other attacks.

Plasma Caster. *Ranged Weapon Attack:* +11 to hit, range 200/800 ft., one target. Hit 13 (2d6+4) force damage

Claw. *Melee Weapon Attack:* +11 to hit, reach 5 ft., one target. Hit: 17 (2d10+6) slashing damage.

Flesh Hooks. *Melee Weapon Attack:* +11 to hit, reach 20 ft., one target. Hit: 10 (1d8+6) piercing damage, and the target is pulled within 5 feet of the beast, and immediately suffers a claw attack.

Bonus Actions

Convert. Target one corpse or killed creature within 5 feet. The target is replaced with a skinner. A skinner placed this way acts on the beast's initiative and can act immediately after being placed.

SPIRIT / THE TRI-POD

Spirit is the code-name attached to the alien believed to be responsible for the shell invasion. This creature only resides in the core of the shell invasion pod. Spirit is unaware that it is invading the wrong planet, but without a way of communicating, there is no way to convince him otherwise. The monster below is not Spirit, but rather its mobile command tri-pod.

SPIRIT / TRI-POD

Gargantuan construct, unaligned

Armor Class 19 (natural armor)

Hit Points 212 (17d12+102)

Speed 50 ft., climb 40 ft.

STR	DEX	CON	INT	WIS	CHA
25(+7)	16(+3)	23(+6)	16(+3)	15(+2)	16(+3)

Saving Throws Dex +9, Con +12

Skills Perception +7

Condition Immunities charmed, exhaustion, frightened, paralyzed, petrified, poisoned

Senses Darkvision 200 ft., passive Perception 18

Languages None

Challenge 15 (13,000 XP)

Force Field. Spirit is immune to all damage until a single hit inflicts 50 damage or more.

Tender Center. If the tri-pod is destroyed, Spirit will be vulnerable inside his command node. He has 1 hit point.

Actions

Multiattack. Spirit can make either two heat ray attacks or three tentacle whip/crush/throw attacks.

Heat Ray. *Ranged Weapon Attack:* +12 to hit, range 1,000/5,000 ft. one target. Hit: 14 (2d6+7) fire damage and 14 (2d6+7) force damage.

Tentacle Whip. *Melee Weapon Attack:* +12 to hit, reach 30 ft., one target. Hit 14 (2d6+7) bludgeoning damage, and the target is grappled (escape DC 18). Until this grapple ends, the target is restrained. The tri-pod has six tentacles, each of which can grapple one target.

Tentacle Crush. *Melee Weapon Attack:* +12 to hit, reach 30 ft., one target tri-pod is grappling. Hit 18 (2d10+7) bludgeoning damage.

Tentacle Throw. *Melee Weapon Attack:* +12 to hit, reach 30 ft., one Large or smaller target tri-pod is grappling. Hit: The target is thrown 40 feet. If the target hits an obstruction, it suffers 18 (2d10+7) bludgeoning damage.

Reactions

Power System's Repaired. When Spirit is reduced to 0 hit points, it's Force Field re-activates and Spirit regains 100 hit points.

<Keydata-Uber Document>

Author: Dr Emil Klinte

Dated: August 4th, 20XX

Collation of Data: Keyhole 234 "Beholder", data packet 37849, Surveillance via Predator drone before shroud deployment, Specimen Alpha-Shell.

Data Preface:

Impact Point is located at coordinates 33.351305 x 44.438646, 0.75 km east of Sadr City.

The object was first detected as it crossed the thermosphere, where it released a burst of neutron radiation which was detected by the Chandra X-ray Observatory.

The object then decelerated considerably, without any form of obvious output.

Original calculated point of impact was originally the Persian Gulf but fifteen seconds after first contact, it altered its course, also without any visible evidence as to how.

Impact occurred at more than 385 kph. It appears very unlikely this object was intended to impact at this speed, even if the internals could sustain an impact exerting this many hundreds of Gs.

Infrared Photos taken from Keyhole 234 "Beholder" indicate that the object is generating considerable energy but also possesses "cold spots" indicating certain systems are not working and/or are damaged.

Specimen Alpha-Shell was recovered after the first strike against the US Embassy, which occurred at 11:15 am. The specimen was identified as Christopher Bishop, a dishonorably discharged ex-Marine lieutenant employed by the McKindliss/Rutger Security Firm (identification was located upon person).

Approximately 25% of Mr. Bishop's body had been cyberized. This is an exception to most other observations, as all other units recovered, including the troop units we have dubbed "skinnners", were more heavily cyberized, leaving very little of the human form remaining. Also, unlike other units encountered, Mr. Bishop was not terminated when he was converted. Once crippled, we were able to retrieve the body and conduct an investigation.

It was during this investigation that the specimen regained consciousness.

Data Analysis: Mr. Bishop's faculties were greatly diminished and the subject expired less than ten minutes after regaining consciousness, by his request.

The interrogation was conducted by Colonel Walter Geddison, who unfortunately was killed in the second attack. I was allowed to witness the interrogation and remain the only living member of the observation team.

Mr. Bishop claimed that the machines evolve in the field and

that the first models he saw died the moment they were activated. Apparently, they were preconditioned for a specific environment and were incapable of prolonged function outside of it. In addition, several skinnners died because of lack of life support for their organic systems. Bishop saw one comrade converted, only to suffocate moments later.

Bishop was part of the third group. The first appear to be wholly alien machines that either emerged from the fallen pod or were built from nearby materials. Most of the third group did not make it out of Sadr. Every opponent encountered since then has been part of the fourth group.

Mr. Bishop added that "voices from the clouds" spoke strangely at first, and were relaying conflicting instructions to the smaller units. It was then Mr. Bishop revealed that "Spirit"—his word for the voice emanating from impact point—was unable to speak to his "family."

Theoretical:

It is my belief that this impact was accidental, the result of either a mistake in navigation or damage from a previous conflict. The intelligence residing within the core artifact is unaware or uncaring of its current location. I also believe that "Spirit" is unable to communicate with the outside world and only has control over its military force.

We have the opportunity to not only seize this fragment of isolated technology, but perhaps establish a dialogue with an advanced alien species.

Application:

I believe the next course of action will be for someone to establish contact with "Spirit". Unfortunately, the shroud prevents any long range radio communication. I have included a modified transmitter using fragments taken from Mr. Bishop which should be able to communicate with Spirit, but at only at a range of a few hundred meters. I have preconfigured the data stream with a series of binary intelligence markers along with a primer to decoding our data. The key to the transmission is a series of data streams. Without enough time to construct one from scratch, I used modified existing cosmic call transmissions like that from Arecibo along with what I could pull from my own collection, including images of the Pioneer Plaque and clips from the Voyager Golden Record. It is a shotgun approach, but it is the best chance we have.

Addendum:

Despite my best judgment, Colonel Geddison also insisted that I add several images of nuclear weapon detonations, making our threat of a final solution in the event that the alien does not understand its mistake.

End Report.

Saving Throws Strength +6, Dexterity +4

Skills Athletics +6, Acrobatics +4, Perception +3

Languages English

Proficiencies. All armor, shields, simple weapons, one-handed and two-handed small arms, heavy weapons, super heavy weapons, all ground vehicles and aircraft, electric torch.

Equipment. Assault rifle, autoloader, force body vest, shotgun, trophy from a fight (official or informal), \$120 in loose bills, standard adventurer's kit, four clips for each weapon.

Attacks

Assault Rifle. *Ranged Weapon Attack:* +6 to hit, 100/400 ft., one target. *Hit:* 1d8+4 piercing damage. *Properties:* Auto (1d10), reload (50 shots).

Shotgun. *Ranged Weapon Attack:* +6 to hit, 30/120 ft., one target. *Hit:* 1d10+4 piercing damage. *Properties:* Feed (6 shots), shotgun.

Autoloader. *Ranged Weapon Attack:* +6 to hit, 20/100 ft., one target. *Hit:* 1d6+4 piercing damage. *Properties:* Reload 8 (shots).

Concussion Grenades. *Ranged Weapon Attack:* DC15 Dexterity Saving Throw, 20/60 ft. *Hit:* 1d6+4 physical damage (or half with a successful save), 2d6+4 to the target on the impact point.

Features & Traits

Fire Support—Assault (Tier 1). Whenever you make an autofire attack, you inflict additional damage equal to the amount you beat the enemy's AC by, up to a maximum of 5 (for an auto weapon) or 10 (for an auto-heavy weapon).

Good Cardio. Your speed is not reduced when moving through difficult terrain.

High Pain Threshold. You can take a punch. When reduced to zero hit points, you do not fall unconscious until you fail your first death save.

Solid Frame. When wielding a two-handed small arm, you do not suffer the -2 penalty to firing while moving.

Take A Knee. You are able to crouch quickly and brace your elbow against your knee for a secured firing position. Spend 30 feet of movement and make an additional ranged attack as part of an Attack action this turn. You cannot use this feature if you are within reach of an enemy or an enemy is in reach of you.

Weapons Platform. Spend 30 feet of movement on your turn to gain a +1 bonus to attack rolls with auto or auto-heavy weapons until the start of your next turn.

Backstory. Your father is alive; mother committed suicide. You have a slightly younger brother, a baby sister, and a slightly older brother, the latter vanished. You are good friends with Louie.

Saving Throws Dexterity +6, Wisdom +4

Skills Acrobatics +6, Athletics +6, Perception +4
Languages English, French

Proficiencies. Light and medium armor, simple weapons, one-handed and two-handed small arms, all ground vehicles and aircraft

Equipment. A set of fine clothes, \$300 in a fine leather wallet, two autoloaders, ballistics armor, standard adventurer's kit, electric torch, four clips for each weapon.

Attacks

Autoloader. *Ranged Weapon Attack:* +6 to hit, 20/100 ft., one target. *Hit:* 1d6+4 piercing damage. *Properties:* Reload 8 (shots).

Club. *Melee Weapon Attack:* +4 to hit, reach 5 ft., one target. *Hit:* 1d4+2 bludgeoning damage.

Features & Traits

Cat Balance. If you move at least 10 feet while moving towards a wall, the remaining movement is your climb speed until the end of that turn. This movement can be any direction as long as it follows a vertical surface.

Cinematic Style-Two Weapons. Wielding two one-handed small arms is the same as wielding two light melee weapons for the purposes of two-weapon fighting. As such, you can use a bonus action to attack with your second small arm. You don't add your ability modifier to the damage of the bonus attack, unless the modifier is a negative.

Converging Fire. When attacking a creature 5 feet or closer with one or two one-handed small arms, you gain a +1 bonus to attack rolls and a +2 bonus to AC.

Disease Immunity. You rarely get sick. You have advantage on saving throws against disease.

Disciplined Lungs. You've always had the capacity to hold your breath longer than others. You can go without oxygen for as many minutes as twice your Constitution modifier.

Kata. You are able to use kata exploits fueled by kata points. You have 6 kata points. You regain all spent kata points when you finish a short or long rest. You can only use one exploit per turn.

Abnormally Fast (Kata Cost: 1). Spend 1 kata as part of your movement to double your speed until the end of your turn. If you are hit with an attack before the beginning of your next turn, you gain 1 kata.

Between the Eyes (Kata Cost: 1). Spend 1 kata before making a ranged attack roll to have advantage on that attack roll. If both attack rolls hit, double your attribute modifier damage. If both miss, you regain 1 kata.

Boundary Threshold (Kata Cost: 1). If you are within 5 feet of at least two enemies, you can spend 1 kata along with 30 feet of movement to make one ranged attack to one of those enemies.

Power to Weight Ratio. You can change Strength (Athletics) to Dexterity (Athletics) and Wisdom (Perception) to Intelligence (Perception). You can also use Dexterity in place of Strength for attack or damage rolls with all weapons without the heavy property

Backstory. Your parents died in a viral outbreak, and you joined the military soon after. You are an only child, and a bad gambler, loosing your estate to the addiction.

LOUIE

Class & Level Sniper 4

Armor Class 15

Initiative +3

Speed 30 feet

Hit Point Maximum 34

Hit Dice 8d8

Strength 14 (+2)

Dexterity 16 (+3)

Wisdom 18 (+4)

Constitution 16 (+3)

Intelligence 14 (+2)

Charisma 11 (+0)

Passive Wisdom (Perception) 16

Saving Throws Dexterity +5, Wisdom +6

Skills Acrobatics +5, Animal Handling +6, Perception +6, Stealth +5, Survival +6

Languages English, French

Proficiencies. Light armor, simple weapons, one-handed small arms, two-handed small arms, and all weapons with the sniper property. All ground vehicles and aircraft

Equipment. A set of common clothes, backpack, bedroll, blanket, one autoloader, a basic sniper rifle, ballistics armor, standard adventurer's kit, electric torch, four clips for each weapon.

Attacks

Autoloader. *Ranged Weapon Attack:* +6 to hit, 20/100 ft., one target. Hit: 1d6+4 piercing damage. *Properties:* Reload 8 (shots).

Basic Sniper Rifle. *Ranged Weapon Attack:* +6 to hit, 100/400 ft., one target. Hit: 1d8+4 piercing damage. *Properties:* Feed 5 (shots), sniper +1).

Features & Traits

Hunter. You can use Wisdom in place of Dexterity for attack and damage rolls with ranged attacks.

Natural Equilibrium. You can also use an action and make a DC15 Constitution ability check to reduce your exhaustion level by 1. Each time you attempt this save, the DC increases by 5. When you finish a long rest and ingest some food and drink, your ability check DC (listed above) drops back to 15.

Toughness. Each time you suffer damage from a piercing or slashing weapon, you suffer 2 points of damage less.

Backstory. Both parents were killed in a car crash, leaving him an only child. A girlfriend, a whistleblower, was assassinated. Louie believes a corporation was responsible and has vowed revenge.

Marksman's Talent. If you hit a target 25 feet away or further with a sniper weapon, you can spend marksman points to employ one or more of the talents on the following list.

You have 8 marksman points. When you take a short or long rest, you recover any spent marksman points. Additionally, if you kill a target with a sniper weapon, you gain 2 marksman points. You can spend 2 points per attack.

Academic Kill (Marksman Cost: 1). Use when you hit with an attack to inflict additional 1d6 damage. This increases to 2d6 at 5th level, 3d6 at 9th level, 4d6 at 13th level, and 5d6 at 17th level. You can spend 2 marksman points to double the number of additional dice damage.

Assassin Psychology (Marksman Cost: 1). Use when you roll a natural 18, or 19 on an attack roll to make the hit a critical hit.

Boom! Head Shot (Marksman Cost: 2). Use when you drop a creature: all Medium-sized enemies in a 5-foot radius around the target have disadvantage on attack rolls until the start of your next turn. Each enemy can only be affected once per long rest.

Dum-Dum (Marksman Cost: 1). Use when you hit with an attack: the target also suffers disadvantage on saving throws and ability checks until the beginning of your next turn.

Hollowpoint (Marksman Cost: 1). Use when you score a critical hit: you roll three times the damage dice instead of two.

Magic Bullet (Marksman Cost: 1). Use after dropping a creature to 0 hit points with a sniper weapon: you can make a single ranged attack against one creature within 20 feet of the original target. You use no additional ammunition. You can repeat this process until you fail to drop a creature to 0 hit points, you run out of enemies in range, or you hit three creatures.

Pinpoint Accuracy (Marksman Cost: 4). Use when you score a critical hit: the target is stunned until the beginning of your next turn.

Systemic Inflammation (Marksman Cost: 3). Use when you hit a living creature: the target is poisoned for one minute (ten rounds) or until it passes a Constitution saving throw. The DC for the saving throw is 8 + your proficiency bonus + your Wisdom or Dexterity modifier (your choice).

Twitchy Fingers (Marksman Cost: 1). Use after scoring a critical hit: make 1 additional attack with the same weapon as part of the same action against the same target.

Weak Spot (Marksman Cost: 2). Use when you hit with an attack: until the beginning of your next turn, all your subsequent attacks on the target have advantage.

Dead Eye. If a creature 25 feet or closer scores a critical hit on you, you automatically switch to your pistol and make a ranged attack against the target.

Failure Is Not An Option. If you roll a natural 1 on an attack roll with a sniper weapon, you can re-roll. You cannot use this feature if you have disadvantage.

SUSAN

Class & Level Medic 4
Background Intellectual
Ladder Savant
Race Human

Experience Points 2701
Proficiency Bonus +2

Initiative +2
Speed 30 feet.
Hit Point Maximum 18
Hit Dice 4d6

Strength 14 (+2)
Dexterity 14 (+2)
Wisdom 16 (+3)
Constitution 10 (+0)
Intelligence 18 (+4)
Charisma 12 (+1)

Passive Wisdom (Perception) 15
Saving Throws Intelligence +6, Wisdom +5

Skills Engineering +6, Medicine +5, Computer Use +6, Demolitions +6, Engineering +6, Perception +5, Persuasion +5, and Sciences +6
Languages English, Spanish

Proficiencies. Light armor, simple weapons, one-handed small arms, poisoner's kit

Equipment. A set of common clothes, a handful of textbooks, 15\$ in a wallet, autoloader, medical kit, drug kit, synthetic weave, automatic watch, standard adventurer's kit, electric torch, four clips for each weapon.

Attacks

Autoloader. *Ranged Weapon Attack:* +6 to hit, 20/100 ft., one target. Hit: 1d6+4 piercing damage. *Properties:* Reload 8 shots.

Features & Traits

Training Beats Experience. You can use Intelligence in place of Dexterity for attack and damage rolls with one-handed and two-handed small arms. You can also use Intelligence or Wisdom as your modifier to AC instead of Dexterity.

Not Stupid. You gain the insight to discover if something is simply...stupid. This can come in the form of an ally's word or your own. The GM may volunteer that something is stupid if it is clearly foolish yet haven't learned this yourself, or you can ask if something is stupid. If borderline stupid, the GM's answer may be cryptic. You can ask as 4 times, regaining all lost questions after a long rest.

Quick Healer. Very useful when you were a child—you regain 1 additional lost Hit Die when you take a long rest.

Backstory. Both your parents are alive and well. You have a slightly younger sister and a baby brother, neither approve of your vocation or life choices. You had a secret affair with your teacher, but said relationship didn't last.

Medical Exploits. As a medic, you gain exploits you can use to aid allies or hinder enemies. Exploits require both the use of your hands and appropriate materials to perform. Unlike spells, medical exploits require neither contemplation nor studying each morning; you regain the use of them each day automatically. You do not need to choose which exploits to prepare ahead of time: you can employ any exploit on the list of a level that you can use.

You also know medical applications. These are at-will abilities you can use as long as you have the requisite materials and action to perform them.

You can cast three level 1 exploits. To enact one of these exploits, you must expend a slot of the exploit's level or higher. You regain all expended exploit slots when you finish a long rest.

Exploit save DC = 14

Exploit attack modifier = +6

Target Avoidance. As a bonus action, you can take a Dash action or a Disengage action.

Primary Target. If you don't make an Attack action on your turn, you gain a +2 bonus to AC until the start of your next turn.

MEDICAL APPLICATIONS

Evasive Overdrive

Activation Time: 1 bonus action

Range: Self

Components: None

Duration: 1 round

You're able to do everything in your power to avoid getting hit. You gain a +1 bonus to AC against one creature you can see, and you don't provoke opportunity attacks from the target until the beginning of your next turn.

Field Shot

Activation Time: No action
Range: Self
Components: Firearm
Duration: Instantaneous

If you use a medical exploit as your action, you can make a single ranged attack as your bonus action this same turn. You only inflict half damage on a hit with this attack.

Live, Damn You

Activation Time: 1 action
Range: Touch
Components: Medical kit
Duration: Instantaneous

You use your Medical kit on a willing creature. If the target has been reduced to 0 hit points, the target becomes stable. If above 0 hit points, the target recovers hit points equal to your proficiency bonus + 1d6. This increases to 2d6 at 10th level.

1st LEVEL EXPLOITS

Anatomy Expert

Activation Time: 1 bonus action
Range: Self
Components: Firearm
Duration: Instantaneous

Target one creature you scored a critical hit on this turn—double the amount of dice rolled for damage.

Clamp The Artery

Activation Time: 1 action
Range: Touch
Components: Medical kit
Duration: Instantaneous

Target one living creature. The target is healed of any damage incurred by the last hit it received since the end of your previous turn.

Cortical Reinforcement Injection

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: 24 hours

Target one living creature. The target is immune to being blinded.

Advanced: At 10th level, you can target two creatures, though each one requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

Diagnose And Cure

Activation Time: 1 minute
Range: Touch
Components: Medical kit
Duration: 24 hours

Target one living creature suffering from disease or poison. The target has advantage on any saving throws to recover from disease or poison.

Emergency Patch

Activation Time: 1 action
Range: Touch
Components: Medical kit
Duration: Instantaneous

Target one living creature. The target regains hit points equal to your proficiency bonus + your Wisdom modifier + your level.

Advanced: At 10th level, you can either increase hit points recovered to triple your Wisdom bonus or you can target two creatures instead of one.

Stanazolol Injection

Activation Time: 1 action
Range: Touch
Components: Drug kit
Duration: 1 hour

Target one living creature. For one hour, the target has advantage on Dexterity skill checks and saving throws, and +10 feet bonus to speed.

Advancement: At 10th level, you can target up to 2 creatures, but each requires an action: you can sacrifice the action on your next turn in order to administer both injections this turn.

Dexterity 12 (+1)
Wisdom 10 (+0)
Constitution 16 (+3)
Intelligence 14 (+2)
Charisma 14 (+2)

Passive Wisdom (Perception) 10
Saving Throws Strength +6, Constitution +5

Skills Deception +4, Athletics +6, Intimidation +4
Languages English, Russian

Proficiencies. Thieves' tools, all armor, shields, simple weapons, one-handed and two-handed small arms, heavy weapons, super heavy weapons, all ground vehicles and aircraft

Equipment. Military combat armor, autoloader, standard adventurer's kit, electric torch, assault rifle, autoloader, machine light cannon, four clips for each weapon.

Attacks

Assault Rifle. *Ranged Weapon Attack:* +6 to hit, 100/400 ft., one target. *Hit:* 1d8+4 piercing damage. *Properties:* Auto (1d10), reload (50 shots).

190 **Autoloader.** *Ranged Weapon Attack:* +3 to hit, 20/100 ft., one target. *Hit:* 1d6+1 piercing damage. *Properties:* Reload 8 (shots).

Machine Light Cannon. *Ranged Weapon Attack:* +6 to hit, 100/400 ft., one target. *Hit:* 1d10+4 piercing damage. *Properties:* Auto-heavy (1d12), heavy, reload (120 shots)

Features & Traits

Artillery Talent. Several talents require a Dexterity saving throw. The DC to resist your attack is 14.

Overwatch. You are able to target large areas in the battlefield and impede enemy advancement. While wielding an auto or auto-heavy weapon, spend 30 feet of movement on your turn and select a 20-foot cube (30-foot with auto-heavy) within

your weapon's range. Until the beginning of your next turn, the area is considered difficult terrain to any enemy targets attempting to move through it. As a reaction, you can force an enemy that enters the area to make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a successful one. You expend ammunition with each saving throw attempted.

Rapid Fire: As an action, while wielding an auto or auto-heavy weapon, each creature in a 20-foot cube (30-foot with auto-heavy) within weapon range must make a Dexterity saving throw. A target takes your weapon damage on a failed save, half as much damage on a successful one. You expend ammunition with each saving throw attempted.

Enhanced Secondary Senses. You have advantage with Wisdom (Perception) checks regarding taste or smell.

Imposing Frame. Spend 30 feet of movement and gain a +1 bonus to AC and provide 3/4 cover for all allies within 5 feet until the beginning of your next turn. You also have advantage against being moved against your will until the beginning of your next turn.

Power Up. As an action, you can commit to a power up. When you *power up*, you gain a power rank. You lose all power rank when you finish a short or long rest, roll for initiative, suffer any damage, or use a power up ability listed below. Each power rank gains all previous rank bonuses.

Power Rank 1. You have advantage on your next attack; if you hit, the damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12).

Power Rank 2: Regardless of your next attack roll, it hits; the damage die of any weapon you wield increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12)—two total when combined with rank 1.

Power Rank 3. Regardless of your attack roll, your next attack is a critical hit.

Power Rank 4. Re-roll all 1s and 2s on your damage dice of your next hit. Each time you roll the maximum result on a damage dice, roll that dice again and add the additional result to damage. Re-rolled damage dice also benefit from this ability.

Power Rank 5. With your next hit, double all damage dice—this stacks with your critical hit.

Strength Over Agility. You can use Strength in place of Dexterity for all attack and damage rolls when wielding two-handed small arms, heavy weapons, or super heavy weapons. When wearing medium armor, your max Dex modifier is increased to 3. When wearing heavy armor, you gain a max Dex bonus of 1.

Backstory. Both your parents are in jail; you were adopted by parents later murdered by gang violence. An only child from both sets of parents. You were awarded a distinguished medal for service. You are popular with numerous friends in his career.

Constitution 16 (+3)

Intelligence 16 (+3)

Charisma 18 (+4)

Passive Wisdom (Perception) 18

Saving Throws Intelligence +8, Charisma +9

Skills Intimidation +9, History +8, Perception +8, Deception +11, Persuasion +9

Languages English, Spanish

Proficiencies. Light armor, medium armor, simple weapons, one-handed and two-handed small arms, heavy weapons, all ground vehicles and aircraft

Equipment. One set of dice, 50\$ in a wallet you always try to keep on hand, an assault rifle, an autoloader, aramid combat suit, standard adventurer's kit, electric torch, four clips for each weapon.

Attacks

Assault Rifle. *Ranged Weapon Attack:* +10 to hit, 100/400 ft., one target. *Hit:* 1d8+4 piercing damage. *Properties:* Auto (1d10), reload (50 shots).

Autoloader. *Ranged Weapon Attack:* +3 to hit, 20/100 ft., one target. *Hit:* 1d6+1 piercing damage. *Properties:* Reload 8 (shots).

Machine Light Cannon. *Ranged Weapon Attack:* +6 to hit, 100/400 ft., one target. *Hit:* 1d10+4 piercing damage. *Properties:* Auto (1d12), reload (120 shots).

Features & Traits

Aramid Combat Suit. You have resistance to fire damage and bludgeoning damage.

Autocratic. If an ally suffers a critical hit from a creature, you can use your reaction to give another ally a single attack against the creature that inflicted the critical hit.

Big Picture. As an action, select one ally able to see and hear you. If the ally hits with an attack before the beginning of your next turn, that hit gains a damage bonus equal to your Wisdom modifier + your level.

Brains And Good Looks. Duke can change Wisdom (Insight) and Wisdom (Perception) to Intelligence (Insight) and Intelligence (Perception). Additionally, after taking a long rest, if Duke wears no armor and wields no weapons, he gains a +2 bonus to Charisma or Intelligence (select one) until he makes an attack roll.

Compelling Directive. After Duke finishes a long rest, roll a d20 and put the result aside. Duke can swap out any roll he, an ally able to communicate with him with that result—Duke then takes the replaced die roll and put that aside like before. He should always have a d20 result put aside this way, but after swapping two die rolls, he cannot swap another until finishing a short or long rest. After finishing a short or long rest, Duke always rolls a new d20.

Focus Target. As a bonus action, you can grant an ally within 5 feet of you a single ranged attack against the same creature you hit with a ranged attack this same turn.

For The Good Of The Team. As an action, you can allow one ally within line of sight to take any action normally available to her as a reaction to you or as an additional action on her next turn. Additionally, you can swap your initiative order with another ally once per round.

Light Sleeper. It's been a positive and a negative, but you cannot be surprised by sleeping. Alas, it can also be difficult to get a proper night's sleep.

Pat On The Back. When the party takes a short rest, you can award any of your Hit Dice to an ally. Allies cannot have more Hit Dice than their level.

Quadruple Tap. You can attack four times, instead of once, whenever you take the Attack action on your turn.

Backstory. Both your parents are alive, still living on the farm you were raised on, along with a much older sister that left the farm on her own terms. You were awarded a distinguished medal for service. You are still morose from a recent big breakup.

Command Presence

Your words and actions generate a presence that can motivate or generally boost those you deem your allies. Each command presence can also be temporarily boosted, after which you cannot boost it again until you finish a long rest. Unless otherwise stated, you gain no benefit from your own command presence.

Intimidating Mug. Opponents take one look at you and begin to rethink their approach. All enemies within 20 feet of you treat the area as difficult terrain.

Menacing Mug (boost): As an action, you double the range of *intimidating mug* for one minute (10 rounds). You can use *menacing mug* twice before needing to finish a long rest.

Mask Of Authority. Your friends believe themselves better knowing you are around. All allies that can see and hear you can re-roll all 1s and 2s on their damage rolls.

Personification of Authority (boost). Use an action, and for one minute (10 rounds), all allies that can see and hear you gain a +3 bonus to damage rolls.

Stand As One. As long as you stand, no one falls. All allies that can see and hear you reduce all damage inflicted on them by 3.

Brotherhood (boost). As an action, you advise your allies on the best way to avoid damage. Select an energy type (acid, cold, fire, force, lightning, necrotic, poison, psychic, radiant, or thunder)—for one minute (10 rounds), all allies that can see you gain resistance to that energy type.

MILITARIST (Archetype)

Reevaluate Strategy. Instead of using your Hit Dice to recover hit points during a short rest, you can use them to gain TP points. For each Hit Die spent this way using a bonus action, you gain 1d4 TP.

Coordination. You receive 1d4 TPs (Tactical Points) each time something unfortunate happens to you or an ally. As these points compound, you are able to counter with positive effects. Points are lost when you take a short rest or long rest or when you roll for initiative. Spending points usually takes either a bonus action or a reaction.

You receive 1d4 points when each of the following occurs.

- 192
- An ally you can see or communicate with rolls a natural 1 on an attack roll.
 - An ally suffers a critical hit.
 - An ally is reduced past half hit points.
 - An ally is reduced to zero hit points.
 - Three or more allies suffer damage from an area effect.

You can then spend acquired TPs the followings ways.

Elevate Strategy (3+ points). As a bonus action, select one ally per 3 points spent; the targeted ally immediately gains an action and can either move or take a bonus action. Targeted ally still gets her turn when it comes up.

Eyes Around (2-6 points). As a bonus action, select one ally per 2 points spent (maximum 3 allies); the targeted ally makes a single attack.

Intelligent Defense (1 point). One ally gains a +3 bonus to AC until the beginning of your next turn: if you move before then, the bonus is lost.

Opportune Weakness (2 points). As a reaction, one ally's hit becomes a critical hit.

Outmaneuver (1 point). Spend 1 point and 30 feet of movement to move a creature within 30 feet of you that is your size or smaller up to 5 feet (it cannot be moved into hazardous terrain). The target suffers disadvantage on attack rolls until the beginning of your next turn.

Shift Battle Theater (1-3 points). As a bonus action, select one ally per 1 point spent (maximum 3 allies); the targeted ally can either make Disengage action for free on her turn or can move immediately up to 20 feet.

Reverse Course Of Action (10 points). As an action, all enemies you can see are stunned until the beginning of your next turn.

Languages English, Bad English

Proficiencies. Carpenter's tools, all armor, shields, simple weapons, one-handed and two-handed small arms, heavy weapons, super heavy weapons, all ground vehicles and aircraft.

Equipment. One set of artisan tools, \$50 in well-earned money, assault rifle, autoloader, rotary cannon, standard adventurer's kit, electric torch, four clips for each weapon, full combat warrior

Attacks

Assault Rifle. *Ranged Weapon Attack:* +10 to hit, 100/400 ft., one target. *Hit:* 1d8+5 piercing damage. *Properties:* Auto (1d10), reload (50 shots).

Autoloader. *Ranged Weapon Attack:* +10 to hit, 20/100 ft., one target. *Hit:* 1d6+5 piercing damage. *Properties:* Reload (8 shots).

Rotary Cannon. *Ranged Weapon Attack:* +10 to hit, 100/400 ft., one target. *Hit:* 1d10+5 piercing damage. *Properties:* Auto (special), heavy, reload (250 shots).

Father's Old Rifle. *Ranged Weapon Attack:* +10 to hit, 100/100 ft., one target. *Hit:* 1d8+5 piercing damage. *Properties:* Feed (5 shots).

Features & Traits

Artillery Talent. Several talents require the use of a Dexterity saving throw. The DC to resist your attack is 18.

Attack of Necessity. As an action, while you are wielding an auto or auto-heavy weapon, each creature in a 15-foot cone (or 20-foot for auto-heavy) centered on you must make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a successful one. You expend ammunition with each saving throw attempted. Targets your size or smaller are knocked prone if they fail their saves.

Rapid Fire. As an action, while you are wielding an auto or auto-heavy weapon, each creature in a 20-foot cube (30-foot with auto-heavy) within weapon range must make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a successful one. You expend ammunition with each saving throw attempted.

Easy Target. When attacking a Large or larger creature with a weapon using the auto or auto-heavy property, you gain a bonus to damage against the target for every size above Medium the creature is. You gain this damage bonus with both autofire and area-effect attacks using auto and auto-heavy weapons.

Auto: Large +2, Huge +3, Gargantuan +4.

Auto-Heavy: Large +3, Huge +4, Gargantuan +5.

Overwatch. You are able to target large areas in the battlefield and impede enemy advancement. While wielding an auto or auto-heavy weapon, spend 30 feet of movement on your turn and select a 20-foot cube (30-foot with auto-heavy) within your weapon's range. Until the beginning of your next turn, the area is considered difficult terrain to any enemy targets attempting to move through it. As a reaction, you can force an enemy that enters the area to make a Dexterity saving throw. A target takes your weapon damage on a failed save, or half as much damage on a successful one. You expend ammunition with each saving throw attempted.

Full Combat Warrior. The full combat suit is a mixture of aramid padding and titanium plates in water-resistant layers of nylon and metallic fibers covered by patterned camouflage.

Nightvision. You can see in dim light within 60 feet of you as if it were bright light, and in darkness as if it were dim light. You can't discern color in darkness, and the system renders everything you see in shades of either green, yellow, or blue (user's preference).

Stealth. If your camouflage pattern matches your terrain, you gains a +2 bonus with Dexterity (Stealth) checks. It takes a full minute to adapt a suit to the terrain.

Targeting. You gain a +1 bonus to damage rolls with ranged weapons within normal range.

Resistance. You have resistance to fire damage, as well as bludgeoning and slashing damage.

Full Torque: You can use Strength in place of Dexterity for all attack and damage rolls with ranged weapons. You cannot use this ability with thrown explosives. Alternately, when wielding two-handed small arms, heavy weapons, or super heavy weapons, you can use Constitution in place of Dexterity for all attack and damage rolls.

Good Cardio: Your speed is not reduced when moving through difficult terrain,

Ladder Gains. The juggernaut gains the following additional benefits:

- You recover 1 hit point every hour, provided that you have at least 1 hit point.

- Your regain 1d4 additional lost Hit Dice when you take a long rest.

Quick Healer. You regain 1 additional lost Hit Die when you take a long rest.

Strongpoint. You can take one additional action on your turn if both this and your normal action are used to employ artillery talents. When you use this feature twice, you cannot use it again until you finish a short or long rest. You can also expend a Hit Die as a bonus action, not recover any hit points and gain an additional use of *strongpoint*, though you cannot gain more than 1 additional action per turn.

Too Close. If you are hit by an opportunity attack, you can make a single melee attack, using your weapon as a club, as part of that same action.

Backstory. Both your parents are alive in an ordinary childhood. You have three slightly younger sisters (triplets). You keep his father's rifle as a memento and personal family heirloom. You have been in a long-term relationship with someone back home. Eventually, you'll pop the question.

INFANTRY SUPPORT SPECIALIST (Archetype)

Weapons Platform. Spend 30 feet of movement on your turn to gain a +1 bonus to attack rolls with auto or auto-heavy weapons until the start of your next turn.

Focused Barrage. As an action, if using an auto or auto-heavy weapon, you can target a single creature with a barrage. The DC of the Dexterity save to resist your attack is 18. A target takes double dice of your weapon damage on a failed save, or half as much damage on a successful one.

Lawnmower Barrage. You can move 5 feet without incurring attack penalties with two-handed small arms and heavy weapons (but not super heavy weapons). You can plant a super heavy weapon as a bonus action.

The Mean One. All opponents within 20 feet of you suffer disadvantage on any attack that doesn't include you, and you gain a +5 bonus to damage rolls with ranged weapons against them.

Languages English, Cantonese

Proficiencies. Flute, light and medium armor, simple weapons, one-handed and two-handed small arms, all ground vehicles and aircraft

Equipment. A flute, two caseless pistols, an assault rifle, ballistics armor Mk2, standard adventurer's kit, electric torch, four clips for each weapon, \$200 in a fine leather wallet.

Attacks

Caseless Pistol. *Ranged Weapon Attack:* +11 to hit, 50/250 ft., one target. *Hit:* 1d6+6 piercing damage. *Properties:* Mastercraft, reload (8 shots).

Assault Rifle. *Ranged Weapon Attack:* +11 to hit, 100/400 ft., one target. *Hit:* 1d8+6 piercing damage. *Properties:* Auto (1d10), reload (50 shots).

Features & Traits

Cat Balance: If you move at least 10 feet while moving towards a wall, the remaining movement is your climb speed until the end of that turn. This movement can be any direction as long as it follows a vertical surface.

Converging Fire. When attacking a creature 5 feet or closer with one or two one-handed small arms, you gain a +1 bonus to attack rolls and a +2 bonus to AC.

Gun Fu. You can attack three times, instead of once, whenever you take the Attack action on your turn. Additionally, if all ranged attacks you make with an

Attack action are directed at the same target, you can make one additional ranged attack against that target.

High Pain Threshold. You can take a punch. When reduced to zero hit points, you do not fall unconscious until you fail your first death save.

Heroic Bloodshed. You become a staple of action films. If wielding two one-handed small arms, you double the number of ranged attacks you make with your Attack action, your Bonus action and any Reactions until the beginning of your next turn. If wielding one one-handed small arm, until the beginning of your next turn, if you hit with an attack roll, that attack is automatically a critical hit and you double all dice rolled. Once you use this feature, you cannot use it again until you finish a short or long rest.

Kata. You are able to use kata exploits fueled by kata points. You have 9 kata points. You regain all spent kata points when you finish a short or long rest. You can only use two exploits per turn. All exploits require the use of one-handed small arms. Certain kata exploits cost more than one point.

Abnormally Fast (Kata Cost: 1). Spend 1 kata as part of your movement to double your speed until the end of your turn. If you are hit with an attack before the beginning of your next turn, you gain 1 kata.

Between The Eyes (Kata Cost: 1). Spend 1 kata before making a ranged attack roll to have advantage on that attack roll. If both attack rolls hit, double your attribute modifier damage. If both miss, you regain 1 kata.

Boundary Threshold (Kata Cost: 1). If you are within 5 feet of at least two enemies, you can spend 1 kata along with 30 feet of movement to make one ranged attack to one of those enemies.

Equilibrium (Kata Cost: 1). Spend 1 kata as part of a reaction when an enemy misses with a ranged attack—you make a ranged attack. If you score a critical hit with said attack, you recover 1 kata.

Hydrostatic Shot (Kata Cost: 1). Spend 1 kata after hitting a target; you inflict additional damage equal to your level, and if the creature is your size or smaller and moves or attacks before the start of your next turn, you can knock the enemy prone as a reaction.

Rapid Kill (Kata Cost: 2). Spend 2 kata after hitting a creature to turn that hit into a critical hit.

Power To Weight Ratio. You can change Strength (Athletics) to Dexterity (Athletics) and Wisdom (Perception) to Intelligence (Perception). You can

also use Dexterity in place of Strength for attack or damage rolls with all weapons without the heavy property.

One Weapon. If wielding only one one-handed small arm, you gain a +6 bonus to damage rolls with that weapon.

Reflex Shot. Starting at 9th level, when wielding a one-handed small arm, you can use a ranged attack as an opportunity attack.

Backstory: Both your parents are alive, but your father was abusive, resulting in you running away at a young age. You became an alcoholic, a condition you recovered from recently (you steers clear of anything fermented). You saved the life of a diplomat, who owes you a favor.

COUNTRY GUNMAN (Archetype)

Improved Reaction Time. Each time you roll initiative roll 2d6 and add this value to your initiative.

Precise Shot. If you act first before any enemies can act, you have advantage with all attack rolls made with one-handed small arms until the end of your first turn.

Quick And The Dead. After establishing initiative order, if you have the highest initiative value, said value is a damage bonus to your first hit with a one-handed small arm.

Languages. English

Proficiencies. Cook's utensils, light and medium armor, simple weapons, one-handed small arms, tinker's tools, all ground vehicles and aircraft

Equipment. Cook's utensils, a TL2 engineering kit, a caseless rifle, aramid combat suit, standard adventurer's kit, electric torch, four clips for each weapon, gas mask, duct tape, sunglasses

Attacks

Caseless Rifle. *Ranged Weapon Attack:* +11 to hit, 100/400 ft., one target. *Hit:* 1d8+6 piercing damage. *Properties:* Auto (1d10), reload (100 shots), mastercraft, TL1

Features & Traits

Economical Plating. You gain a +1 bonus to AC (already added). Additionally, you can temporarily increase your armor's potential, spending one tech point as an action to increase your AC an additional +1 for five minutes.

Empathy. You've always been able to understand someone's emotional state, allowing for sympathy or manipulation. You gain a +2 bonus to Wisdom (Insight).

Immediacy. Spend one tech point to gain an additional action on this turn. This action can be used to take any action except an Attack action.

Not Stupid. You gain the insight to discover if something is simply...stupid. This can come in the form of an ally's word or your own. The GM may volunteer that something is stupid if it is clearly foolish yet haven't learned this yourself, or you can ask if something is stupid. If borderline stupid, the GM's answer may be cryptic. You can ask 4 times, regaining all lost questions after finishing a long rest.

McGuy Something. You are able to construct useful items or tools to accomplish something generally not allowed given the available resources available. Either the GM can supply a random assortment of items you can use to create a tool or you can make a case for common items one is likely to find in order to solve an immediate crisis. This may involve searching an area or assuming certain items are available; if your widget bag currently contains at least 20 uc worth of parts, you can always be assumed to have a variety of small useful items such as screws, nails, paper clips, duct tape, and chewing gum. If the GM is convinced by your argument, make an Engineering skill check to see if the improvised gadget or solution works. When you use this trait, you cannot use it again until you finish a long rest.

Midas Touch. While you are wielding a firearm, its damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > d28 > 2d10) (already added).

Pioneer. You can attack three times, instead of once, whenever you take the Attack action on your turn.

Priorities. Instead of using your Hit Dice to recover hit points during a short rest, you can use expend them to regain tech points. For each Hit Die spent, you recover 2 tech points. You cannot have more tech points than your maximum.

Shiny Red Button. You can put a button on your firearm. You only need eight hours of work to put the button on a new firearm but only you can press it without breaking the weapon. The button's function is determined by your choices from the options that follow. You can add as many functions into your button as you have available tech points, but each modification can only be added once per configuration unless stated otherwise. If you don't alter the function outside of a battle, your last configuration is used (if you have the available points).

Pressing the button takes no action. When you press the button, you spend the tech points corresponding with each of the functions added. If you don't have enough tech points when you press the button, the entire configuration does not function. Once pressed, its effects last five minutes.

You can own multiple weapons with different configurations, as the points are not spent unless the button

is pushed, though pushing multiple buttons during a single battle would be rather wasteful. Changing a configuration takes five minutes, though you can attempt to change a configuration as an action with a DC15 Intelligence (Engineering) check (you cannot change a configuration while one is in effect without voiding the invested tech points of the previous configuration).

Additionally, you can attempt to regain a lost tech point with a DC5 Intelligence (Engineering) check. Each check takes 1 minute, and successive checks increase the DC by 5 (DC10, DC15, etc). The DC increases regardless if you succeed in recovering the point or not, and the check reverts back to DC5 when you take a long rest.

Charge Shot (Cost: 1 point). Each time you hit a target your size or smaller, you shove it 5 feet. If the target cannot be shoved, it takes 1d6 additional damage. You can add this modification twice to push the target 10 feet and increase the damage to 2d6.

Explosive Round (Cost: 1 point). When you score a critical hit, you roll all damage dice thrice instead of twice.

Floating Reticle (Cost: 2 points). You gain a +1 bonus to attack rolls.

Hydroshock (Cost: 2 points). You deal additional damage with a hit equal to the difference between your attack roll and the target's AC. Add this modification a second time to inflict 3d6 additional damage.

Increased Caliber (Cost: 2 points). Your weapon's damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). This stacks with any other effects that increases damage die size. You can add this modification twice.

Increased Rate Of Fire (Cost: 2 points). You double the rate of fire of your weapon (10 for auto, 20 for auto-heavy). When using burst fire, you add double your proficiency bonus to the save DC and you always use the upscaled damage dice. If targeting single creatures, your weapon's damage die increases by one step (1d4 > 1d6 > 1d8 > 1d10 > 1d12 > 2d6 > 2d8 > 2d10). This stacks with any other effect that increases damage die size.

Increased Round Velocity (Cost: 1 point). When you roll a 1 or 2 on a damage die, you can reroll. You must accept the new roll, even if it is a 1 or a 2.

Muzzle Flash / Bang (Cost: 2 points). Any creature you hit within 20 feet of you has disadvantage on attack rolls against you until the beginning of your

next turn.

Pop-Up Eyepiece (Cost: 1 point). If you roll a 2 or 3 on your attack roll, you can re-roll. You must accept the second result.

Rapid Loader. (Cost: 4 points). You gain one additional attack whenever you take the Attack action on your turn. You can add this modification up to two times. This stacks with Pioneer.

Smart Tracking (Cost: 6 points). You have advantage on attack rolls.

Target Scanning (Cost: 3 points). Your weapon scores a critical hit on a natural roll of 19 or 20.

Tech Points. You have 24 tech points (TP) which can be used to boost abilities and perform exploits representative of your training. Your available tech points reset after you finish a long rest.

Training Beats Experience: You can use Intelligence in place of Dexterity for attack and damage rolls with one-handed and two-handed small arms. You can also use Intelligence or Wisdom as his modifier to AC instead of Dexterity.

Widget Bag. You have a widget bag. It contains random spare parts, useful materials, and salvage worth 5,000 uc. During a short or long rest, you can scavenge for components: in most areas you will be able to recover 10 uc worth during a short rest and 20 uc worth during a long rest, but the GM may award more or less (or none at all) at her discretion.

Backstory. Your parents died in a murder/suicide, and you an only child, joined the military (and no, that's not your real name). You've undergone considerable combat training and only think of yourself as a weapon.

MACHINE OF WAR (Archetype)

Adrenaline Rush. Each time you make an attack against a creature within 30 feet of you, you regain 1 hit point of damage. For every ten hit points recovered this way, you gain one additional attack with your next Attack action.

Glazed Look. If you are reduced to 0 hit points by a non-critical hit, you automatically use and roll a Hit Die as a reaction, but only regain half the result (round up).

You Want Some Of This. You can allow enemies to have advantage on you until the beginning of your next turn. Until the beginning of your next turn, you have advantage on attack rolls and regain 2 hit points instead of 1 with Adrenaline Rush.

Charisma 12 (+1)

Passive Wisdom (Perception)

Saving Throws Strength +7, Dexterity +11

Skills. Religion +7, Intimidation +6, Acrobatics +11, Perception +6

Languages: English

Proficiencies. Armor: All armor, shields, simple weapons, one-handed and two-handed small arms, heavy weapons, super heavy weapons, all ground vehicles and aircraft

Equipment. ESP rifle, caseless pistol, rocket launcher, two Concussion Grenades, full combat warrior, standard adventurer's kit, electric torch, four clips for each weapon.

Attacks

ESP Rifle. *Ranged Weapon Attack:* +12 to hit, 80/320 ft., one target. *Hit:* 1d8+6 piercing damage. *Properties:* ESP (1d10/1d12), reload (80 shots), TL1, [ESP weapons have both the auto and auto-heavy property. You can only have one in effect at a time, and can switch between them as a bonus action.]

Caseless Pistol. *Ranged Weapon Attack:* +11 to hit, 50/250 ft., one target. *Hit:* 1d6+6 piercing damage. *Properties:* Mastercraft, reload (16 shots), TL1, [A mastercraft weapon deals +1 damage if any of its damage dice result in a maximum result.]

Rocket Launcher. *Ranged Weapon Attack:* +11 to hit, 30/120 ft., special. *Hit:* 2d6+6 bludgeoning damage. *Properties:* AP, direct (2d6+6), exp (5 ft.), heavy, loading, TL1, two-handed. [When using any weapon with an area of effect, you don't make a ranged attack but rather establish a Dexterity saving throw DC that affected creatures must beat. The DC for the Dexterity saving throw is 18.

Concussion Grenades. *Ranged Weapon Attack:* DC18 Dexterity Saving Throw, 20/60 ft. *Hit:* 1d6+6 physical damage (or half with a successful save), 2d6+6 to the target on the impact point.

Features & Traits

Calm Reflexes: Jackson can use Wisdom for all attack and damage rolls with ranged attacks, unarmed attacks and attacks with melee weapons without the heavy property.

Cauterize. You can use your action to heal an injured ally. The target recovers hit points equal to 1d6 / your level. When you use this feature, you cannot use it again until you finish a short or long rest.

Combat Ineffective. If an allied character in line of sight is reduced to 0 hit points or less, you have advantage on attack rolls against the creature that hit the ally until the creature is destroyed or until the felled ally recovers hit points.

Fire Support-Precision (Tier 4). You gain a +1 bonus to all non-autofire attack rolls. If you score a critical hit with a non-autofire attack, roll all damage dice three times instead of twice. Set aside a natural 20. Replace one missed attack roll you make with a non-autofire weapons with that natural 20. Once you do, you cannot set aside another natural 20 until you finish a short or long rest. If you roll a natural 2 or 3 on a non-autofire attack, you can re-roll.

Front Line Deployment. Select one ally within 10 feet as a bonus action. Until the beginning of your next turn, the targeted ally gains a +1 bonus to AC.

Good Guess: Jackson gains 4 re-rolls to any die rolls he makes. This occurs as part of the same action (or reaction); if he suffer from advantage or disadvantage, he gain the re-roll after taking the final result—he can then select whichever roll you want. Once Jackson uses *good guess*, he cannot use it again until the beginning of his next turn. Jackson regains all his *good guess* re-roll dice when finishing a long rest.

Meat Shield. An enemy is more useful to you when it's dead. As a reaction—or part of your action if on your turn—when a creature within 5 feet is killed or otherwise reduced to below 0 hit points, you grab it; it now grants you half-cover until you move. If using a two-handed small arm, you suffer a -1 penalty to attack rolls while holding the target. You cannot use a heavy or super heavy weapon with *meat shield*. You also cannot use *meat shield* with *take a knee*.

Poison Immunity. Tastes minty. You have advantage on saving throws against poison.

Quadruple Tap. You can attack four times, instead of

once, whenever you take the Attack action on your turn.

Snap Out Of It. Use your action to remove one of the following conditions an ally suffers from, unless you suffer from the same condition: charmed, frightened, stunned, or unconscious (unless dying). When you use this feature, you cannot use it again until you finish a short or long rest.

Solid Frame. When wielding a two-handed small arm, you do not suffer the -2 penalty to firing while moving.

Take A Knee. You are able to crouch quickly and brace your elbow against your knee for a secured firing position. Spend 30 feet of movement and make an additional ranged attack as part of an Attack action this turn. You cannot use this feature if you are within reach of an enemy or an enemy is in reach of you.

Backstory: Father was murdered in a targeted attack. Has two slightly older sisters (twins) and a baby brother, the latter who didn't agree with Jackson's beliefs. Alas, said brother was later killed in a terrorist attack which also injured Jackson as well, though the scars are purely internal and psychological.

MAN-AT-ARMS

This Is My Rifle. You gain a +1 bonus to attack rolls (already added) and also do not suffer disadvantage on attack rolls when prone with your ESP Rifle. This is your chosen weapon for all man-at-arms abilities. When reaching a new level, you may select a different weapon.

My Weapon Is My Best Friend. You can change a clip, magazine, or a cell on your chosen weapon without taking an action. Once you use this feature, you cannot use it again until you finish a short or long rest.

200 **Fire My Weapon True.** Once per turn if you have advantage on your ranged attack roll with your chosen weapon and both rolls hit, you are considered to have hit twice (using additional ammunition accordingly).
