

PRINTING INSTRUCTIONS

- 1. Load your printer with iron-on transfer paper.
- 2. Open the print dialogue box. Set page scaling to None and printer to Best Quality.
- 3. Place a sheet of iron-on transfer paper in your printer with the back of the paper facing up (print side down).
- 4. Print the iron-on. Remember, the design will print backward.
- 5. Set aside to allow the ink to dry completely.

6. Using an X-ACTO knife (or scissors) and a ruler as your guide, cut around the edges of the design leaving 1/4" of white all the way around.

IRONING INSTRUCTIONS

- 1. Place shirt on a smooth, had, non-porous surface. We suggest a formica countertop. Do not use glass or a padded ironing board.
- 2. Set iron on the highest dry setting (no steam) and let it heat up for 8 minutes before using.
- 3. Place a pillowcase on the ironing surface for padding and iron it to remove any wrinkles. Make sure both are smooth.
- 4. Place the t-shirt on top of the pillowcase. Iron the area where the transfer will be applied. Avoid placing the transfer on seams.
- 5. Let the surface of the shirt cool before placing the transfer on top. Make sure the image is face down with the white side up.
- 6. Iron transfer slowly onto shirt making sure the entire area has been ironed.
- 7. For best results, follow the instructions included with the transfer paper when ironing your design.
