PREFACE

The purpose of the Education Statistics Digest is to provide basic statistical information on education in Singapore. The statistical information includes data on schools, enrolment, teachers, educational outcomes and finances.

The statistics presented here are divided into three sections. The first section contains statistics on primary, secondary and pre-university education for 2012. The second section covers the Institute of Technical Education (ITE), LASALLE College of the Arts, Nanyang Academy of Fine Arts (NAFA), polytechnics and universities. To give the reader a historical perspective of the developments in education over the years as well as the trend, time series on major education indicators are provided in the third section.

OVERVIEW OF THE EDUCATION SYSTEM

Singapore's education system aims to nurture every child and help all students discover their talents, realise their full potential, and develop a passion for life-long learning. We want to nurture in our young the willingness to think in new ways, solve problems and create new opportunities for the future. Equally important, we want to help our young acquire sound values and develop the strength of character to deal with future challenges. National Education aims to foster strong bonds among students and develop in them a deep sense of belonging and commitment to family, community and country.

Thinking Schools, Learning Nation (TSLN)—adopted in 1997 as our vision in education—describes a nation of thinking and committed citizens, and an education system capable of meeting the challenges of the 21st century. Since 2003, we have also focused on nurturing a spirit of **Innovation and Enterprise** (I&E) among our students and staff. **Teach Less, Learn More** (TLLM) was a call made by PM Lee Hsien Loong in his inaugural National Day Rally speech in 2004 for our schools and teachers to teach better, improve the quality of interaction between teachers and students, and equip students with the knowledge, skills and values that prepare them for life. Teaching will be focused on developing understanding, critical thinking and the ability to ask questions and seek solutions.

A cornerstone of Singapore's education system is the bilingual policy which allows each child to learn English and his Mother Tongue to the best of his abilities. Being proficient in English allows them to plug into a globalised world. Being proficient in Mother Tongue provides a link to their heritage and Asian roots, and provides them with a competitive edge with the rise of China and India, and integration of ASEAN.

There are opportunities for every child in Singapore to undergo at least ten years of general education. The school system features a national curriculum, with national examinations at the end of the primary, secondary and junior college years. In recent years, we have also moved towards a more flexible and diverse education system, aimed at providing students with greater flexibility and choice. Upon completion of their primary education, students can choose from a range of education institutions and programmes that cater to different strengths and interests. To allow a greater range of student achievements and talents to be recognised, selected secondary schools, junior colleges, polytechnics and universities have the flexibility to admit a percentage of their intake using school-based criteria in the direct or discretionary admission exercises.

PRIMARY EDUCATION

At the primary level, students go through a six-year course designed to give them a strong foundation. This includes developing language and numeracy skills, building character and nurturing sound values and good habits. The primary school curriculum focuses on three main aspects of education – subject disciplines, character development and knowledge skills.

Subject disciplines comprise subject areas such as Languages, Humanities & the Arts and Mathematics & Sciences which ensure that students have a good grounding in subjects across different areas of study. With Subject-based Banding, English, Mother Tongue Language, Mathematics and Science will be taught at the appropriate level at both Primary 5 and Primary 6 according to the ability of the student.

Knowledge skills focus on developing students' thinking, process and communication skills. These are all essential skills for learning. Knowledge skills are taught through a variety of subjects and often through project work. This enables students to use the full range of knowledge skills, work together and clearly demonstrate what they have learnt.

Character development is facilitated through daily teacher-student interaction as well as programmes in the non-academic curriculum. They focus on instilling sound values, to take students through life as responsible adults. Students have many opportunities to develop life skills through Co-curricular Activities, Character and Citizenship Education, Social Emotional Learning and Physical Education.

At the end of Primary 6, students take the Primary School Leaving Examination (PSLE), which assesses their suitability for secondary education and places them in the appropriate secondary school course that will match their learning pace, ability and inclinations.

SECONDARY EDUCATION

At the secondary level, three core courses, designed to match students' learning abilities and interests, are offered:

- **Express Course¹.** This is a four-year course leading to the Singapore-Cambridge General Certificate of Education (GCE) 'O' Level Examination. In this course, students learn English and Mother Tongue², as well as Mathematics, the Sciences and the Humanities.
- **Normal (Academic) Course.** This is a four-year course leading to the GCE 'N' Level Examination. Students who do well at the 'N' levels will qualify for an additional year to prepare for the GCE 'O' Level Examination, or progress to Higher Nitec courses at the ITE. Selected students may offer 'O' level subjects at Secondary 4, or, bypass the 'N' levels and progress directly to Secondary 5 to take the 'O' levels. In the Normal (Academic) course, students learn a range of subjects similar to those in the Express courses. Starting from 2013, students who do very well at the 'N' levels will have two new "through-train" pathways to the polytechnics: (i) a one-year Polytechnic Foundation Programme (PFP) and (ii) a two-year Direct-Entry-Scheme to Polytechnic Programme (DPP). The latter builds on the existing ITE Direct Entry Scheme (DES).
- **Normal (Technical) Course.** This is a four-year course leading to the GCE 'N' Level Examination. In this course, students learn English, Mother Tongue, Mathematics and subjects with technical or practical emphases. Since 2005, schools have also been offering Elective Modules, which cover a wide range of subjects including nursing, hospitality, digital animation and precision engineering. To enhance experiential and practice-oriented learning, a revised Normal (Technical) curriculum has been implemented in all schools from 2007.

While students may be initially placed in a particular course, depending on their ability to cope with the learning pace and style, there are opportunities for lateral transfers mid-stream to more appropriate courses.

Since 2006, secondary schools have also been offering Advanced Elective Modules in collaboration with polytechnics, to allow students to experience and benefit from practice-oriented learning in fields as diverse as digital media and entrepreneurship. Upper secondary students in participating schools are eligible to offer these modules.

¹ Starting from the Secondary 1 students in 2008, the Special and Express Courses merged into the "Express Course".

² Students can opt to study Mother Tongue at either the standard, higher or Syllabus B levels depending on their ability and eligibility.

SPECIALISED SCHOOLS

Specialised Schools such as Northlight School and Assumption Pathway School offer customised programmes for students who are inclined towards hands-on and practical learning.

In addition, Crest Secondary School, the first of two Specialised Schools catering to Normal (Technical) students, began admitting students in January 2013. Crest Secondary School adopts a whole-school approach in providing a customised learning environment to develop its students. It also works closely with the Institute of Technical Education (ITE) and industry partners to develop vocational programmes and provide attachment opportunities for its students.

SPECIALISED INDEPENDENT SCHOOLS

The Specialised Independent Schools – NUS High School of Mathematics and Sciences, School of Science and Technology, School of the Arts and Singapore Sports School – offer programmes to develop students in areas such as mathematics, sciences, the arts and sports.

INTEGRATED PROGRAMME

Students who are academically strong and prefer a more independent and less structured learning environment also have the choice of the Integrated Programme (IP), which spans secondary and junior college education without intermediate national examinations at the end of secondary school. Time previously used to prepare students for the GCE 'O' Level Examination would be used to engage them in broader learning experiences. Selected schools also offer alternative curricula and qualifications (e.g. International Baccalaureate).

POST-SECONDARY AND TERTIARY EDUCATION

After Secondary 4 or Secondary 5, most students proceed to one of the following post-secondary institutions for further education/training.

- **Junior Colleges / Centralised Institute.** Students who are academically inclined and have the necessary GCE 'O' level qualifications may apply for pre-university education at the junior colleges (two-year course) and centralised institute (three-year course). This course of studies leads to the GCE 'A' Level Examination.
- **Polytechnics.** Students who prefer a more applied tertiary education and have the necessary GCE 'O' level grades can apply for diploma courses in Singapore Polytechnic, Ngee Ann Polytechnic, Temasek Polytechnic, Nanyang Polytechnic or Republic Polytechnic. Polytechnic graduates who perform well in their diploma studies have the opportunity to pursue further tertiary education at the universities. Since March 2010, polytechnic graduates have also been able to apply for degree programmes offered by the Singapore Institute of Technology (SIT).

The polytechnics offer a wide range of courses in the fields of engineering, applied sciences and biotechnology, info-communications, health sciences, business studies, accountancy, social sciences, mass communications and digital media.

- **Institute of Technical Education (ITE).** Students with GCE 'O' or 'N' level certificates can opt for full-time courses offered by the ITE. Courses at ITE lead to the National ITE Certificate (Nitec) or the Higher National ITE Certificate (Higher Nitec). Those who do well in these courses can proceed to the polytechnics to pursue diploma studies. Apart from full-

time institutional training, students can also acquire skills certification through traineeship programmes conducted jointly by companies and ITE.

- **Arts Institutions.** Students interested in the creative arts can choose to enrol in the LASALLE College of the Arts or the Nanyang Academy of Fine Arts (NAFA) which offer diploma and degree programmes in visual and performing arts such as music, theatre, dance, interior design and fashion design.

Universities

Singapore's university education aspires to prepare students not only for today's economy but also for a future one where there will be jobs that have yet to be invented and challenges not yet foreseen. Today, there are four publicly-funded universities in our higher education landscape.

- The **National University of Singapore (NUS)** is a research-intensive, comprehensive university with 15 faculties and schools. Both undergraduate and graduate programmes are offered at the Faculty of Arts and Social Sciences, NUS Business School, School of Computing, Faculty of Dentistry, School of Design and Environment, Faculty of Engineering, Faculty of Law, Yong Loo Lin School of Medicine, Yong Siew Toh Conservatory of Music and Faculty of Science. More graduate programmes are provided through the NUS Graduate School for Integrative Sciences and Engineering, the Saw Swee Hock School of Public Health, the Lee Kuan Yew School of Public Policy, and the Duke-NUS Graduate Medical School which offers a graduate entry model programme for students to obtain the Doctor of Medicine (MD) degree. For undergraduates, the University Scholars Programme offers an inter-disciplinary academic experience, while the Yale-NUS College, which is set to matriculate its first students in 2013, will offer a four-year liberal arts undergraduate programme.

NUS also has many collaborative university partners that help to enrich the student's educational experience and student life – offering dual degree or joint programmes, research opportunities and student exchange programmes.

- **Nanyang Technological University (NTU)** is a research-intensive, comprehensive university, with Engineering as one of its key strengths. It is organised into four Colleges and five autonomous entities. Schools under the four Colleges offer undergraduate and postgraduate programmes including Chemical and Biomedical Engineering, Civil and Environmental Engineering, Computer Engineering, Electrical and Electronic Engineering, Materials Science and Engineering, Mechanical and Aerospace Engineering, Business, Biological Sciences, Physical and Mathematical Sciences, Art, Design and Media, Humanities and Social Sciences, and Communication and Information. The five autonomous entities are the Lee Kong Chian School of Medicine, Earth Observatory of Singapore, National Institute of Education, S. Rajaratnam School of International Studies and Singapore Centre on Environmental Life Sciences Engineering. The National Institute of Education (NIE) conducts professional training for teachers while the S Rajaratnam School of International Studies (RSIS) offers postgraduate degrees in international and strategic studies. The Lee Kong Chian School of Medicine was established in collaboration with Imperial College London and will admit its first batch of students in 2013.

NTU collaborates with many overseas institutions such as the Massachusetts Institute of Technology and Imperial College London, offering dual degree or joint programmes, research opportunities and student exchange programmes.

- **Singapore Management University (SMU)** is styled after an American university and has Business and Social Sciences programmes at its core. It has six schools—the School of Accountancy, the School of Business, the School of Economics, the School of Social Sciences, the School of Information Systems and the School of Law. In addition to offering

single degree programmes with a second major, SMU also allows its undergraduates to combine a double degree from any of its six schools.

SMU offers undergraduate and post-graduate programmes in Business and Management-related areas, ranging from Professional Accounting, Economics, Finance, Wealth Management, and Information Systems. SMU also hosts a wide range of research activities focusing on the social sciences including Research Institutes such as the Behavioural Sciences Institute.

- **Singapore University of Technology & Design (SUTD)** is Singapore's fourth publicly-funded autonomous university, established in collaboration with the Massachusetts Institute of Technology and Zhejiang University. It is a small, top-tier research-intensive university focusing on technology-intensive design education in the disciplines of engineering and architecture and seeks to leverage both partner universities' strong tradition of engineering excellence and entrepreneurial spirit.

SUTD matriculated its first cohort of undergraduates in April 2012. It offers undergraduate programmes in the following four areas - Architecture and Sustainable Design, Engineering Product Development, Engineering Systems and Design, and Information Systems Technology and Design.

The university also houses an International Design Centre (IDC) that conducts world-class research on technologically intensive design. The IDC has identified three Design Grand Challenges: Sustainable Built Environment, Design with the Developing World and ICT-enabled Devices for Better Living. IDC faculty, staff and students work together to design devices, systems and services that address strategic needs of Singapore, the region and the global community.

Singapore Institute of Technology (SIT)

The Singapore Institute of Technology has offered degree programmes since AY2010 in partnership with reputable overseas universities in key growth sectors of the economy such as Engineering & Applied Sciences, Health Sciences, Design, Interactive Digital Media, Education and Hospitality.

SIT has a unique tripartite model with overseas university partners and the five local polytechnics in offering polytechnic graduates degree upgrading opportunities. In AY2012, SIT offered 24 degree programmes in partnership with 10 overseas universities. SIT programmes build on the industry-oriented training that our polytechnic graduates receive today, and are mostly conducted in the polytechnic campuses. By AY2015, SIT will be Singapore's fifth publicly-funded university and offer its own degrees.

CONTINUING EDUCATION AND TRAINING IN THE POST-SECONDARY INSTITUTIONS

Adult learners can undergo Continuing Education and Training (CET) at the post-secondary institutions. CET programmes aim to address manpower and skills gaps, so as to support industry development and job creation, facilitate education and career transition via various pathways, and enable the workforce to stay employable amidst rapid shifts in the economic landscape.

ITE offers for adult learners part-time *Nitec*, *Higher Nitec* and ITE Skills Certificate courses. They are offered in modules of six months' duration, giving adult learners the flexibility to sign up for training based on their needs. In addition, companies that are Certified On-the-Job Training (OJT) Centres by ITE can offer their employees OJT. Working adults also have access

to courses conducted by Approved Training Centres off-the-job. ITE conducts skills evaluation tests for public candidates and instructional skills and related programmes for industry trainers. For adult learners who wish to resume or continue with academic upgrading at the secondary level, ITE offers MOE-subsidised lessons for levels from Secondary One Normal to GCE 'N' and GCE 'O' levels, under its General Education Programme.

The **polytechnics** offer working adults academic CET programmes at diploma and post-diploma level, covering areas such as Engineering, Environmental Technology, Chemical Processes, Pharmaceuticals, Electronics, Construction, Aerospace, Marine & Offshore, Logistics, Business, Accounting & Finance, Security, Infocomm Technology & Digital Media, Early Childhood Education, Healthcare, Sports, Retail and Tourism.

- **Part-time diploma** courses are designed to be modular and more compact than full-time courses, so as to provide more flexible and accessible upgrading for adults with working experience.
- **Post-diploma** courses cater to adult learners who already hold diplomas and preferably have working experience in relevant or related fields. They are modular, shorter in duration than diploma courses, and mostly designed for part-time study. These include the Advanced Diploma courses that cater to adults seeking to deepen their skills and knowledge in the field in which they are trained or practising in, Specialist Diploma courses that cater to adults seeking to acquire skills and knowledge in a specialised area of their field, and Diploma (Conversion) courses that cater to adults seeking training in a different discipline so as to facilitate career switches.

The universities offer academic CET through part-time undergraduate courses. **NUS** and **NTU** are the two autonomous universities offering part-time basic degree courses, specifically in engineering. The NUS courses lead to the award of the Bachelor of Technology, while the NTU courses lead to the award of the Bachelor of Engineering. **SIM University (UniSIM)**, offers a range of more than 60 part-time undergraduate and postgraduate courses in 4 schools – the School of Arts and Social Sciences, the School of Business, the School of Human Development and Social Services and the School of Science and Technology.

Note:

- 1) The category Mixed Level, which caters to schools with multiple levels, encompasses Primary & Secondary Schools (P1-S4/5), Secondary & Junior College Schools (S1-JC2); and Upper Secondary and Junior College (S3-JC2). Figures prior to 2004 refer only to Primary and Secondary Schools and are classified by type according to their secondary sections.
- 2) The first junior college (National Junior College) for pre-university studies was opened in 1969.
- 3) Centralised Institutes, which provide a 3-year pre-university course leading to GCE A-level certification, were introduced in 1987.
- 4) Figures exclude the number of Pre-U Centres, which are indicated in parenthesis. Introduced in 1979, Pre-U Centres are secondary schools that also offer a 3-year pre-university course leading to GCE A-level certification.
- 5) "Spec Indep" refers to "Specialised Independent" and "Spec'd" refers to "Specialised".

Note: 1) The channelling of Primary 3 pupils into Primary 4 Normal, Extended and Monolingual streams was last implemented in 1989/90, and was replaced in 1991/92 by Channelling at Primary 4 into Primary 5 EM1, EM2 and EM3 streams.

2) Total primary enrolment includes Primary 7 and Primary 8 students from the Extended and Monolingual streams.

3) From 2004, the distinction between the EM1 and EM2 streams was removed and schools were given the autonomy to decide on how best to band their pupils by ability, in ways that add the most educational value.

From 2008, subject-based Banding was introduced in Primary 5 cohort to replace the EM3 stream.
