

Fish Reflexology

Treat your feet to Fish Reflexology

Step into Fish Reflexology to the warmth of soft lights, accompanied by the calming sonance of a river stream. With feet relaxed in a warm pool, witness a school of Turkish spa fish swim up and gently nibble on your feet. These adorable little fish consume only the dead skin areas, revealing your smoother and healthier skin – what more interesting way to exfoliate and pamper your feet!

Following the “nibbling massage”, our qualified foot reflexologists will rub and knead your feet to good shape.

A novel spa therapy first discovered in the Middle East, the well-known Turkish *Garra rufa* species, native to the hot springs lakes and river basins, have captured the imagination of beauty spas in many countries.

Experience this unique and revitalizing therapy, complete with a foot massage at Fish Reflexology today.

Only at Underwater World Singapore.
