

Thank you for downloading Lifeline PC voice recognition demo (hereinafter referred to as the demo). Before you install the software, please read the following:

The content of the demo is different from the full version of Lifeline™ for Sony PlayStation®2 computer entertainment system (hereinafter referred to as the full version).

The demo features only the voice recognition function of the game.

Although the demo uses the same voice recognition engine as that of the full version, the words recognized by the demo and reactions of the character are different from those in the full version.

**Requirements:**

- You need a microphone to play the demo.
- You need the microphone input function on the PC (or the sound card) and a microphone or a USB microphone connected to the PC.
- \* Some PC microphones may not work for the full version.
- You need to install Macromedia Flash Player to play the demo.

You can download the latest version from:

<http://macromedia.com/>

**System Requirements:**

OS: Windows 98SE/ME/2000 Professional/XP

Software: Macromedia Flash Player

You can download the latest version from:

<http://macromedia.com/>

CPU: Pentium 600MHz (833MHz is recommended)

RAM: 64MB (256MB recommended)

Hard drive: 50MB free space

Monitor: 16 bit color (24 bit color recommended), 800 x 600 (1024 x 768 recommended)

Other devices: Soundblaster16 compatible sound card, microphone or USB microphone

**Prohibition:**

Commercial use and web publication of this demo are expressly prohibited.

**Indemnity:**

Konami will not be liable nor compensate for any direct or indirect damages that may arise from this demo.
