

## BALLOON ROCKET

You'll need a long piece of kite string, a plastic straw, a balloon, and tape.

1. Tie one end of the string to a doorknob or chair.
2. Slip the free end of the string through the straw.
3. Pull the string tight and have someone hold it or tie it to a chair.
4.  Have an adult blow up the balloon without tying the end. Keep the open end of the balloon pinched to keep air inside the balloon.
5. Use two pieces of tape to attach the straw to the balloon as shown.
6. Count down for launch and let the balloon go!
