

Plastic Pig

check list:

1. 10 pink plastic bags (5 small, 5 medium)
2. roll of clear packing tape
3. empty paper towel tube
4. scissors
5. plastic bottle with a narrow top
6. 5 condiment cups
7. small plastic cup
8. masking tape
9. 2 black buttons
10. 2 paperclips
11. small garbage bag

1

Wrap a small pink plastic bag around a paper towel tube. Be sure the bag doesn't cover the ends of the tube. Now wrap clear packing tape around the bag a bunch of times. Don't get any tape on the tube!

2

Cut off the roll of tape, then slide the tube out of the plastic. You just made a leg for the pig! Make three more legs the same way.

3

To make the pig's body, slide a plastic bottle (bottom first) about halfway inside a plastic bag. Bunch up the plastic bag over the bottom of the bottle.

4

Wrap clear tape around the plastic bag. Don't get any tape on the bottle! Take another plastic bag and tape it over the first bag. Now slide the taped plastic off the bottle. This will be the lower half of the pig's body.

5

To make the top half of the pig's body, wrap a plastic bag around the top of the bottle and cover the bag in tape—but not the top of the bottle. See the photo? Now tape another bag over the first bag. Slide the taped plastic off the bottle.

6

Place the top and bottom halves of the pig together; then tape them into place.

7

Finish making the pig's legs by sliding a condiment cup into the bottom of each leg, then tape the cups into place.

8

The pig needs a head! Using masking tape, tape a condiment cup upside down onto the bottom of a plastic cup. Wrap the whole thing in a plastic bag, then wrap tape around the bag.

9

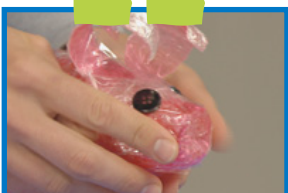

Attach the head to the body with clear tape.

10

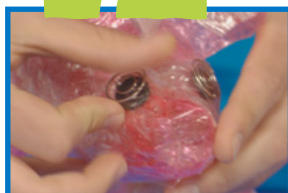

For the pig's ears, make an extra leg by following Steps 1 and 2, then cut two strips from the leg. These strips will be the ears. Tape the curly ears to the pig's head.

11

To give the pig eyes, tape two black buttons onto the pig's head.

12

Make the eyes more interesting by taping two curled paperclips over the buttons.

13

A pig isn't a pig without a curly tail! Cut a small garbage bag into strips, then tape one end of the strips together. Tape this end to the back of the piggy.

14

Artzooka your pig by adding colourful polka dots, or anything you like! Try bending and taping the piggy's legs to make it look like it's running.

oink, oink! Make more pigs using different-coloured bags!
