

Twig Figures

check list:

1. a bunch of twigs
2. modeling clay
3. toothpicks
4. cotton swabs

Creating twig art is all about how you see it! When you turn the twig a certain way, what do you see — a person? an animal? a building? **Anything is possible, so have fun with it and let your creativity lead the way!**

1

Start by taking a twig and turning it around. Decide what you think it looks like. If you think it looks like a person or an animal with legs, attach a bit of modeling clay to one of the legs to help your twig figure stand.

2

Use modeling clay to give your twig figure a head.

3

You can create eyes out of modeling clay and stick them onto the head.

4

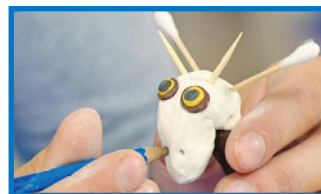

If your twig figure needs ears, try toothpicks!

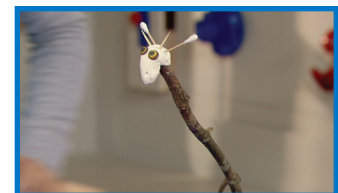

Also, cotton swabs cut in half make terrific horns!

5

6

Poke nostrils with a sharp pencil.

great art created by nature and captured by Artzooka!
