

## Wrapping Paper

### check list:

1. scanner
2. balloons
3. sheet of plastic wrap
4. recycled styrofoam
5. scissors
6. black paper
7. marbles
8. coloured construction paper

create your own wrapping paper using these ideas:

# 1

### Balloon Wrapping Paper

Place a bunch of colourful balloons onto the scanner. Take the time to arrange the colours the way you like, and when you're happy with your design, scan it!

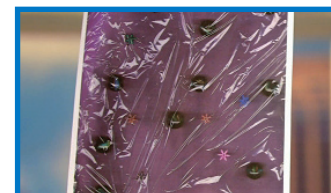

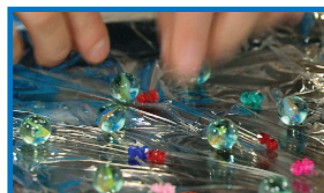

**TIP 1:** If you don't like the way it looks the first time, move the balloons around and try again.

# 3

### Marble Wrapping Paper

Before we start, place a sheet of plastic on the glass of the scanner to make sure it doesn't get scratched up. Also, the plastic will give it a cool look!

GENTLY place marbles and plastic stars or little toys (or whatever you like) onto the plastic wrap on the scanner. When you're ready, place a sheet of coloured construction paper on top, close the lid and scan.

**TIP 2:** If the wrapping paper needs to be bigger, print more sheets and tape together.

# 2

### Doggy Bone Wrapping Paper

Use scissors to cut different shaped dog bones and place them on the glass of the scanner. Once you've arranged the bones the way you want, place a sheet of black paper on top and press scan.

Add pizzazz to your gifts by adding pipe cleaners, dish scrubbies, or elastics to really give your wrapped gifts a finished look!

**Turn ordinary gift wrap into AMAZING Artzooka wrapping paper!**
