

Spaghetti Facial Expressions

check list:

1. fun foam
2. scissors
3. buttons
4. pipe cleaner
5. dry spaghetti

Let's create facial expressions. You can use a mirror to look at your own face to remind you what different facial expressions look like!

1

Begin by cutting the shape of a face out of fun foam.

2

Then add buttons for the eyes and add a pipe cleaner for the nose.

Now for the expressions:

3

Break up a piece of dry spaghetti.

4

To create an angry facial expression, place the spaghetti eyebrows on an angle pointed down and add eyebrow creases with smaller spaghetti pieces. Add a straight line for the mouth.

5

To create a look of surprise, place the spaghetti eyebrows on the opposite angle. Use small pieces of spaghetti to make the mouth look like it's saying, "oh!"

6

Now make a sad face. Adjust the eyebrows just a little closer to the eyes and turn the mouth into a frown.

7

To make a happy face, raise the eyebrows, create a smile and add dimples to each side of the mouth!

Making little changes to where the spaghetti is changes the entire expression. If you like experimenting with facial expressions, try using cooked spaghetti that bends. You can create some crazy expressions with bendy spaghetti!

Facial expressions are fun to Artzooka!
