Remove the hard plastic from the inside of the hair roller so that you're just left with the foam part.

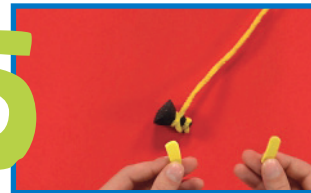

Cut about a half an inch off of the end of the foam.

Pinch the tip of the foam and wrap the yellow pipe cleaner once around. This will be the bee's head.

Now, wrap the yellow pipe cleaner just once around the bee's body, leaving the rest of pipe cleaner free.

Use scissors to cut out two small bee wings out of craft foam. Poke small holes at the end of each wing.

Poke the pipe cleaner through the holes in each wing and slide the wings towards the body.

Once the wings are in place, continue wrapping the pipe cleaner around the back end of the bee. Cut off any extra pipe cleaner.

Make a bee stinger by cutting about an inch of grey pipe cleaner and poking it into the foam at the back end of the bee. Careful you don't get stung!

Wrap a piece of yellow pipe cleaner around the bee's head.

Cut a pair of eyes out of Styrofoam and use your marker to add some eyeballs. Use white glue to glue the bee's eyes into place.

Turn the bee upside down and stick a piece of leftover pipe cleaner through the bottom of one of the bee's stripes. Pull the pipe cleaner half way through and attach it right to the zipper of your backpack and twist!

**Sweet! You've just made your own Artzzzzzzzzzoka Buzzzzzzzzzzing Backpack Zzzzzzzzzzipper Bee!**
