Recipe for Window Paint

- fabric glue
- food colouring
- dish soap
- stir stick

Add a little bit of fabric glue with some food colouring and a drop of dish soap. Mix well!

Paint a picture on the plastic. You can paint your own picture, or find a drawing, slide it into the plastic sleeve (or under plastic sheet) and paint the picture that you see.

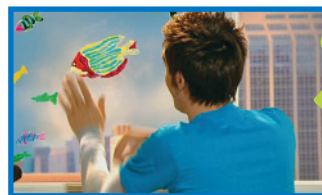

Make sure to put the paint on really thick.

Finish your painting and let it dry for at least one hour. Remove the paper.

Is your painting see-through yet? If yes, then it's dry. Carefully peel it off.

Stick it on your window!

There you have it! Now you can Artzooka a scene on your window.
You can even move it around – just make sure that you peel it off carefully.
