

### check list:

1. white paper (8.5 x 11)
2. pencil
3. scissors
4. empty plastic bottle
5. black marker
6. clay or dough
7. modelling mat
8. twist tie
9. paint (dark purple, light purple, white)
10. white glue
11. 2 small paintbrushes (one smaller than the other)
12. string

# 1

Fold a piece of white paper in half lengthwise. Starting at the folded sided of the paper, draw one bat wing with a pencil. The start and finish of the bat wing should be on the fold.

# 2

Use scissors to cut along the lines you drew.

# 3

Unfold the wing. You now have two bat wings. Neat!

# 4

Place the paper wings on an empty plastic bottle. Trace all the way around the wings with a black marker. Discard the paper wings.

# 5

Ask an adult to help you cut out the wings! To make cutting easier, first cut out a huge chunk of bottle around the wings, then cut along the wings' lines.

# 6

Fold the bat wings in half to make a crease down the middle. Set aside.

# 7

To make the bat's body, use any type of clay or dough. You can also make the body by mixing glue and cornstarch together.

# 8

Break off a piece of dough, and roll it in your hands to make a skinny bat body. Place the body on a modelling mat so it doesn't stick to the table.

# 9

Break off another piece of dough to make the bat's head. Roll the dough around in your hands to make a ball. Squish the ball gently onto the top of the body.

# 10

To make bat ears, break off two really small pieces of dough and shape them into points. Attach the ears to the bat's head.

# 11

Break off another piece of dough and roll it in your hands. Make the dough as long as the bat's body, but skinnier.

# 12

Turn the bat's body over on the modelling mat, then place the wings onto the bat's back.

# 13

Place the long skinny piece of dough down the middle of the wings along the crease. Gently push the skinny ends into the bat's body as this is what keeps the wings attached.

# 14

Twist a twist tie into a loop, then poke the tie into the top of the bat's head between the ears, with the loop sticking out the top. When you are done making the bat, you can hang it up by the loop.

# 15

Use your fingers to shape and smooth the bat's body. Let the bat dry for two days.

# 16

When the bat is dry, paint its body with dark purple and light purple paint. Use white paint for the bat's eyes.

# 17

Now, to make the bat's wings look cool! Mix white glue into the two different shades of purple paint. (The glue will help the paint stick to the plastic wings.) Paint the front of the wings with light purple paint.

# 18

Use a smaller paintbrush to outline the bat's wings with dark purple paint.

# 19

Paint a couple of dark purple lines from the top of the bat's wing to the bottom. The lines look like the bones in the bat's wing! Paint dark purple lines on the other wing. Set aside to dry.

# 20

Try making another Artzooka dough creature, like a butterfly. Don't they look cool?

**Put a piece of yarn through the bat's loop, and hang your bat in a window or wear it like a necklace!**
