

Thunderbird Face

check list:

1. square cardboard box with lid
2. clear packing tape
3. yellow construction paper
4. glue
5. 2 white coffee cups
6. pencil
7. clear tape
8. 2 bottle caps
9. coffee cup sleeve
10. 2 rectangular pieces of cardboard
11. paint (purple, red, orange)
12. paintbrush
13. empty cereal boxes
14. cardboard coffee cup holder

Make a thunderbird face that really pops out!

1

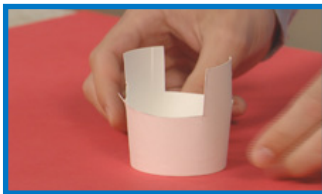

Find a square cardboard box with a lid. Tape the lid shut, then glue yellow construction paper on all sides of the box.

2

To make the thunderbird's eyes, you need two coffee cups. Take one cup and use a pencil to draw two square tabs on each side of the cup, connecting the tabs with straight lines.

3

Use scissors to cut along the lines you drew on the cup. The cut-out cup should look like the photo. Repeat with a second coffee cup.

4

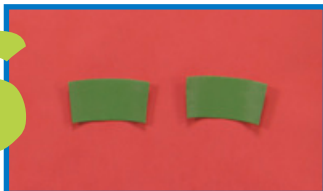

Fold down the tabs on the cup so they lie on top of each other. Tape them into place. Repeat with the second cup.

5

Glue two bottle caps onto the coffee cups to give the thunderbird eyeballs.

6

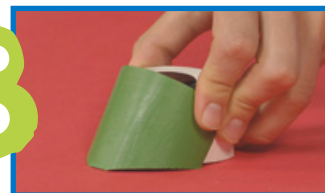

To make eyelids, cut a coffee cup sleeve in half.

7

Cut the two corners off one long side of the sleeve, making a triangle on that side.

8

Place the sleeve's triangle side on the table, then wrap the sleeve around the coffee cup, eyeball facing up. Tape the sleeve into place. You've just made an eye with a really cool eyelid!

9

Make a second eyelid by repeating Steps 7 and 8.

10

Glue the eyes onto the cardboard box.

11

Now for the beak. To make the big part of the beak, draw a diamond shape on a rectangular piece of cardboard. The diamond's top and bottom points should touch the edge of the cardboard.

12

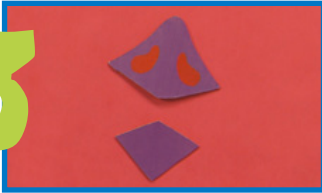

To make the little part of the beak, draw a smaller diamond shape (about half the size of the big diamond) on a second piece of cardboard. Cut out both diamonds.

Thunderbird Face

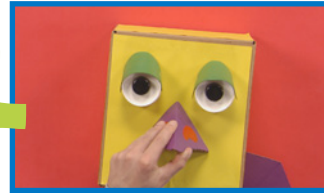

continued from previous page

13

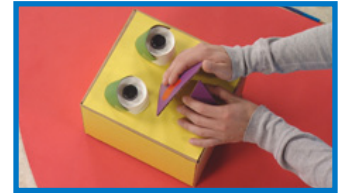

Fold the diamonds in half and paint them purple. Let dry. Paint two red nostrils onto the large beak.

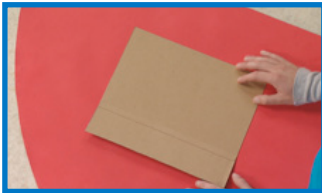

14

When the beaks are dry, fold the big beak in half slightly and glue it to the box. Fold the small beak slightly and glue it below the big beak.

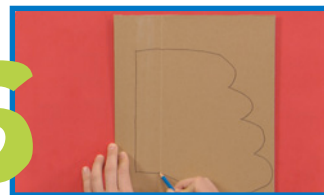

15

To make wings, cut off the back and one side of an empty cereal box (the two pieces should be attached). The side piece is like a flap.

16

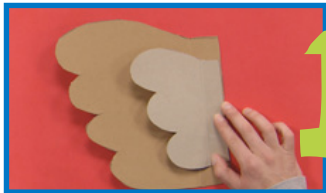

Draw a wing on the cereal box with a pencil. To do this, start drawing the straight side of the wing on the flap of the cereal box, then draw the rest of the wing on the remainder of the box.

17

Cut out the wing. You will use the flap to attach the wing to the thunderbird.

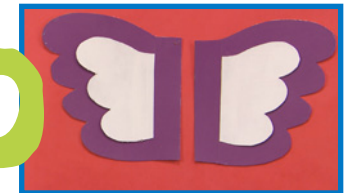

18

Follow Steps 16 and 17 to make another wing, but this wing should be smaller than the first wing.

19

Repeat Steps 15 to 18 to make a second large and small wing.

20

Paint the big wings purple and the little wings white. Line up the edges of the white wings with the creases on the purple wings, then glue the white wing flaps onto the purple wings.

21

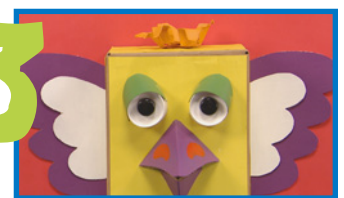

Glue the purple wing flaps onto the back of the thunderbird.

22

To give the thunderbird hair, cut a coffee cup holder into pieces, then paint them orange. Glue the pieces on top of the thunderbird's head.

23

You're done! Look at how the thunderbird's face pops out!

**Make more thunderbirds using different colours of paper and paint!
or try making another animal, like a frog or a raccoon!**
