

## Artzooka Flashlight

### check list:

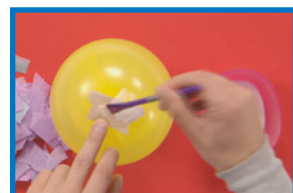

1. balloon
2. large empty yogurt container (cleaned)
3. masking tape
4. little pieces of tissue paper (different colours)
5. white glue and water mixture
6. small paintbrush
7. Styrofoam cup
8. scissors
9. 2 paper towel tubes
10. paper towels
11. toilet paper rolls
12. gold paint
13. small flashlight

# 1

Blow up a balloon and tie a knot in the bottom. Place the balloon in an empty yogurt container. Use a small piece of masking tape to tape the balloon to the container.

# 2

Place a few pieces of tissue paper on the balloon. Use a paintbrush to spread the white glue and water mixture over the tissue paper and balloon. Cover the entire balloon with tissue paper. Set aside to dry.

# 3

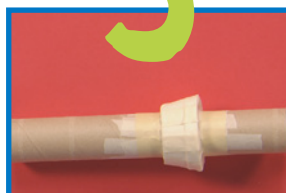

To make the flashlight's handle, cut the bottom out of a Styrofoam cup, then slide the cup a little less than halfway over a paper towel tube.

# 4

To keep the cup in place, stuff the cup with pieces of paper towel.

# 5

Once the cup is stuffed, tape it in place with masking tape.

# 6

Cut five diamond shapes out of toilet paper rolls and fold them in half, lengthwise, to make a crease down the middle of each diamond. Unfold the diamonds.

# 7

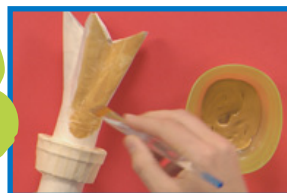

Tape the diamonds around the top of the paper towel tube, then cover the entire flashlight in masking tape.

Here is an example of what the flashlight will look like covered in masking tape.

# 8

Paint the entire flashlight with gold paint. You may want to do two coats. Set aside to dry.

# 9

To attach the tissue paper balloon to the flashlight, dab glue along the inside of the diamond edges, then place the balloon inside the flashlight. Keep the balloon in place with two strips of tape. Set aside to let the glue dry. When the glue is dry, remove the strips of tape.

# 10

Find a flashlight and another paper towel tube. The flashlight should be small enough to slide into the end of the paper towel tube, but big enough that it won't slide all the way through. Cover the bottom half of the tube with masking tape. The tube should be the same size as the handle of the Artzooka flashlight.

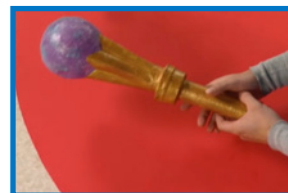

# 11

Turn on the flashlight and stick it inside the paper towel tube (the lit side should peek out).

# 12

Slide the flashlight tube from Step 11 all the way into the bottom of the Artzooka flashlight. Your Artzooka flashlight will glow in the dark when you turn off the lights!

### Take your Artzooka flashlight to a friend's sleepover!
