Decide what you want to make and use your marker to draw an outline on a piece of cardboard.

Use your scissors to cut your shape out. Select another piece of cardboard to be used as your background. Set your cutout on top of the cardboard.

Give your creature a face by cutting a circle out of a paper plate. Once you get the face where you want it, glue it on.

Cut strips of cardboard to create eyes, nose and a mouth. Add any kind of cool shapes that you want. Glue each piece on as you go along!

Cut out fun shapes and glue them onto the background – that will make your picture really pop!

Brush glue mix over your entire picture and add pieces of tinfoil while the glue is still wet. If the tinfoil rips, just glue another piece on top. Use your fingers to smooth out the foil around the cardboard shapes.

Once the picture is covered with tinfoil, it's time to paint it.

Dip your sponge in the paint and dab it on to your picture.

Use a dry cloth to wipe away some of the paint. Don't worry because when you do that, the paint spreads out. The more paint you wipe away, the lighter it becomes. Leave some of the raised parts of your picture dark and other parts light to give your picture texture.

As a finishing touch, tape painted Popsicle sticks to the back of your painting. This makes a great frame. You can also tape a piece of string to the back of the painting so you'll be able to hang it on the wall.

A 3D tinfoil Artzooka sensation! Very cool!
