1

Use a marker to trace the top of the cup onto the recycled plastic.

2

Use scissors to carefully cut the circle out of the recycled plastic.

3

Cover the plastic lid with modeling clay to create a landscape for your tiny world. The modeling clay can be as colourful as you want.

4

If you want, you can add tiny pebbles to the edge of the modeling clay.

5

Make "huge boulders" by adding bigger pebbles.

7

Press the top and bottom together to make it look like an evergreen tree. Use your scissors to trim the extra pipe cleaner:

8

Stick the tree into your clay landscape.

6

To make trees, wrap pipe cleaner around a pencil. Once you've wrapped the whole pencil, slide the pipe cleaner off.

9

Make as many trees as you like. You can also add tiny toys to your landscape.

10

Once you're happy with your creation, place the plastic cup over your world and attach the lid to the cup with scotch tape.

create as many different tiny worlds as you want. You can create an outer space world, an underwater world or even a high-in-the-sky world. The possibilities are endless!

Everyone sees the world differently. what tiny cup world will you Artzooka?!
