

check list:

1. cardboard
2. ruler
3. scissors
4. clear tape
5. tracing paper
6. toilet paper roll

Turn a television picture into a piece of art!

1

Measure the height and width of your TV. Cut two long strips of cardboard the same width as your TV, then cut two shorter strips of cardboard the same height as your TV.

2

The next step is to attach the four cardboard strips to make a box. To do that, place one long strip and one short strip side by side, then tape the ends together with clear tape.

3

Fold the taped ends to make an L shape. You've made half the box so far!

4

Tape the other long and short strips together the same way as in Step 2, then tape the two L shapes together to make a box.

5

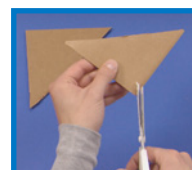

To strengthen the box so it doesn't move around, cut a little square piece of cardboard. All four sides of the square should be the same height as the side of the box.

6

Cut the square from corner to corner. This will give you two triangle pieces.

7

Cut each triangle piece right down the middle, so you have four equal size triangles.

8

Tape a triangle onto each corner of the box. These little triangles will strengthen the box.

9

To make a screen for the box, place the box on tracing paper, triangle sides down. The tracing paper should be a bit bigger than the box. Fold the tracing paper up the sides of the box and tape into place.

Here is what the box should look like with the tracing paper taped to it.

10

The next step is to make a whole bunch of little rolls of paper. To do this, you need a toilet paper roll and a piece of white paper. First, fold the paper in half, then fold it in half again.

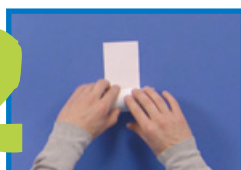

11

Unfold the paper and cut along the creases. This will give you four equal strips of paper.

12

Roll one strip of paper around the toilet paper roll.

13

Once the paper is all rolled up, tape the ends of the paper together. Now slide the paper off the toilet paper roll.

14

Cut the white roll in half to make two smaller rolls.

18

Fit the box over your TV screen. Make sure your favourite cartoon is playing! Now sit back and enjoy the pixelated piece of art!

Attach the two rolls together with a piece of tape.

15

Tape the rolls to the inside of the cardboard box. The ends of the rolls should be resting on the tracing paper.

16

17

Follow Steps 10 to 16 until you fill the entire box with white rolls! Be sure to tape the white rolls in the middle to each other

Invite your friends over to watch pixel art TV!
