1

Break a toothpick in half and stick the thickest end in the large ball and then attach the small ball to the other end of the toothpick. This will hold the two balls together.

2

Cut two small pieces of fun foam to make ears for your critter.

3

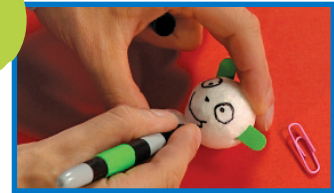

Use the pencil to mark where you want the ears to go. Poke the pencil through the styrofoam to make a deep, single line in the ball.

4

Insert the ears into the slots.

5

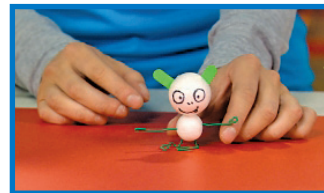

Be creative and draw a face. You can be as wacky as you want!

6

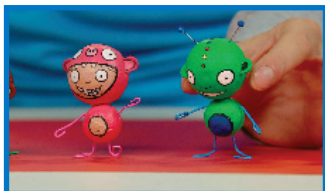

To create arms and legs simply unbend the paperclips and poke them into place!

7

Artzooka your critter with paints, markers, glitter – anything!

You can make a bunch of different critters and decorate them any way you want!
That's Artzooka!
