

## Hand Scanner Fun!

### check list:

1. scanner

**Tip:** Wear sunglasses for this make so that the light from the scanner isn't too bright on your eyes.

## 1 Making Your Hand Look Long and Skinny

Place your hand on the scanner and press the scan button. When the scanner light moves, move your hand slower and in the same direction as the light. Your hand printout will look long and skinny.

## 2 short and Stubby Hand

Place your hand on the scanner and press the scan button. Move your hand slowly in the opposite direction that the light is moving. This time, your hand printout will look short and stubby.

## 3 Fingertip Fun

If you tap your fingers on the scanner really, really quickly while the light is moving, the printout will look like water ripples.

**You just made some really cool art with only your hands and a scanner.  
Now that's Artzooka!**
