

Light Stick & Filter

check list:

1. a sheet of card stock
2. scotch tape
3. tinfoil
4. coloured electrical tape
5. LED lights
6. 4 strips of cardboard
7. wax paper

Need help?

Watch the video:
www.cbc.ca/kidscbc/artzooka

1

Roll the card stock into a tight tube.

2

Use a piece of tape to hold the tube together.

3

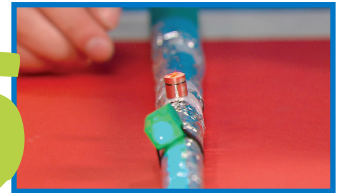

Cover the tube in tinfoil.

4

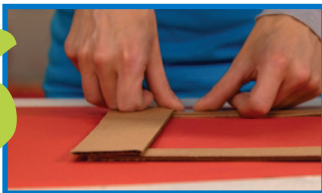

Wrap electrical tape around one end to make a handle.

5

Attach the LED lights. If it's a strap-on light, just use the strap to attach it. If it's a light with a magnet, tape the magnet onto the tube. Add as many lights as you want.

6

Now let's make a light filter:
 Tape the four strips of cardboard together to make a picture frame.

7

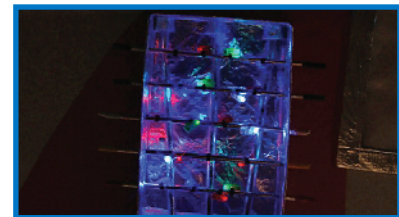

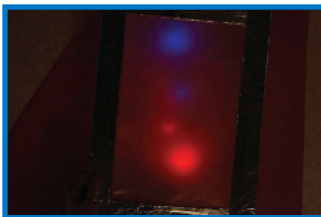

Cover your picture frame in tinfoil to make it shiny.

8

Turn over your frame and tape a piece of wax paper on the back.

Way to go – now you can turn out the lights and watch your very own light show!

Add more of these sticks to a foil-lined box and you've got your very own
Artzooka Party-in-a-Box!
