

Nestled Boxes

check list:

1. small, medium, large boxes that fit into each other
2. scissors
3. masking tape
4. paint

1

Collect boxes that fit into each other:

2

If your box doesn't have a lid, here's how to make it open and close. Open both ends of the box and flatten it out. Use scissors to cut it right through the middle.

Now that you have two halves, use a little masking tape to close up one end of each half.

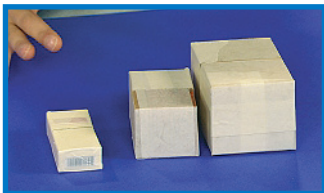

3

4

To get the two 1/2 size boxes to fit together, cut four small pieces of cardboard to fit inside the bottom part of your box. Once they fit, tape the pieces in place and add tape around the corners to make it strong. Your box can now open and close.

5

Once you have all your boxes made, cover the top and bottom in masking tape. That makes them easier to paint.

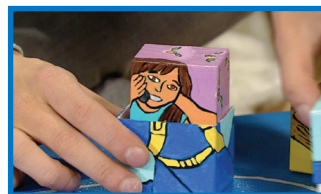

6

Paint and decorate the boxes any way you like.

Now comes the fun part!

Start with the smallest box, and put a special treasure in it (anything you like). Close the small box, and put it into the box that is the next size up. Close up that box and put it into a box that is a bit bigger...and keep going until all the boxes are inside the biggest box. And there you have it – nestled boxes.

Now, when you open up a box, there will be another box to open, and then another and another...until you reach your tiny treasure!

That's what we call Artzooka inside Artzooka inside Artzooka!
