Start with the eyes. Draw the upper part of each eye so it sits on the middle line.

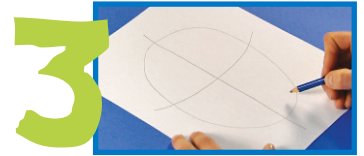

Use a pencil to draw a large oval on your paper.

Split the bottom half of the face into three equal parts, and mark each section with a dot.

Draw a vertical line down the centre of the oval. Don't worry, you'll erase this line later.

Draw a horizontal line across the middle with a slight upwards curve.

On the first dot, roughly sketch out the bottom of the nose.

On the second dot, sketch the mouth.

Draw thin ovals at the side of the head. These will become ears. The top of each ear should be at the horizontal middle line, and the bottom should be in line with the bottom of the nose.

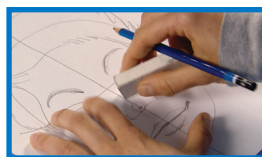

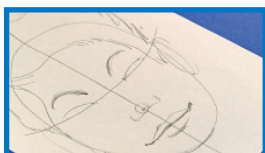

Now, draw in hair. The hairline should come part way down the forehead and along the sides of the head. The top of the hair should be above the top of the oval shape.

Add eyebrows above each eye.

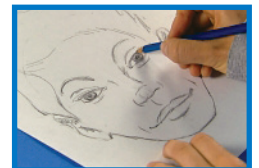

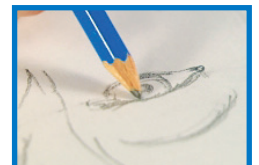

The corners of the mouth should be in line with the middle of the eyes. Use your pencil and add more detail to the mouth.

Erase the original guidelines, including the top part of the original oval.

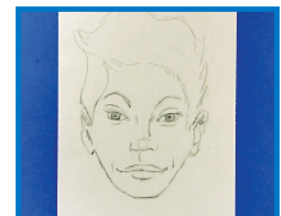

Finish off the eyes, adding the bottom part of each eye, and sketching in pupils and eyelashes.

Add some detail to the ears.

Finally, add more detail to the nose.

And there you have it...a picture perfect Artzooka portrait!
Now try sketching your family and friends using these drawing tips.
