

## Thumbprint Art

### check list:

1. craft foam
2. ink

Fingerprints are so cool! Nobody in the entire world has the same fingerprints as you. Those swirly lines are yours and yours alone. So, go ahead and Artzooka some fun, one-of-a-kind prints with your prints!

# 1

Use scissors to cut small squares out of craft foam.

# 2

Dip your thumb into the ink and press it onto the craft foam.

# 3

To give your thumbprint a different look, slowly roll your thumb back and forth onto the craft foam. This will result in a slightly smudged print.

You can see how the same thumbprint can look different depending on how you press it onto the fun foam.

# 4

Make as many prints as you want. The thumb portraits look like pop-art when they are grouped together.

# 5

You can even put one of your thumbprints onto a scanner and scan it! Enlarge your print, and you've got a cool picture that you can frame.

**TIP:** Make sure that if you're putting your thumbprint onto the scanner, it's COMPLETELY DRY!

**Your very own, one-of-a-kind thumbprint art!**  
**No one else in the world can make this Artzooka but YOU!**
