1

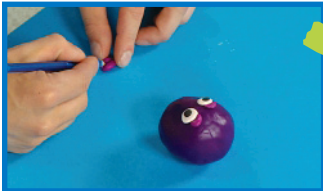

Roll some clay into a ball to make a head.

2

Add white clay for the eyes and black clay for the eyeballs. You can also add eyebrows if you like!

3

Roll up a little red clay to create a mouth and trace the mouth shape with a pencil.

4

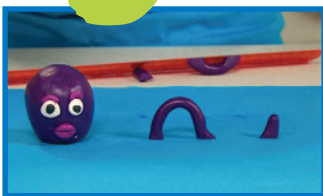

For each arm, roll out a piece of clay until it's long and fairly thin.

5

Wiggle the clay into an 'S' shape and use the ruler to slice the arm in half.

6

Spread out the pieces of arm so it looks as if it's underneath the surface. Add seven more arms and you'll have an eight armed octopus.

7

Add suction cups to make your octo-arms more realistic. Roll a small amount of clay into a ball, then poke the ball with the tip of your pencil and attach it to the arms.

8

Make as many suction cups as you like! And be as creative as you want – add shoes, socks and rollerblades!

Way to go – you've just made your very own Artzooka octo-pal.
