

## card city

Make sturdy card buildings that won't fall down!

### check list:

1. Bristol board (different colours)
2. scissors
3. glue
4. markers

# 1

Cut out a square from a piece of Bristol board, making the square 3 cm on each side. Now cut a smaller square (different colour) about half the size of the first square. Glue the smaller square onto the middle of the big square. Cut slits in the middle of all four sides of the big square.

# 2

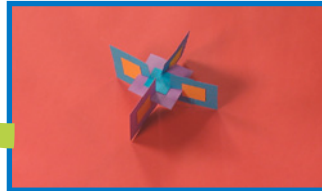

Make four more square cards like you did in Step 1. Use different colours of Bristol board.

# 3

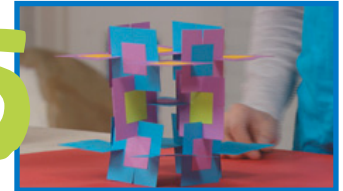

Slide the slit of one card into the slit of another card.

# 4

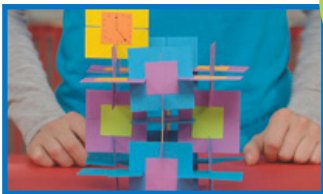

Attach the three remaining cards to the first square by following Step 3. The card structure will be able to stand on the table without falling down.

# 5

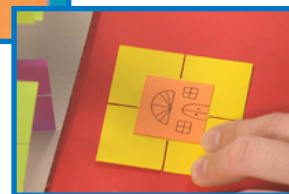

Make more square cards and attach them to each other to make a tall card building, like the one in the photo.

# 6

Add a clock tower to the building. Use a marker to draw clock hands and numbers on a new card, then attach the card to the top of the building.

# 7

Make a huge city out of cards! Just follow Steps 2 to 5, and attach the new buildings to the first building.

**Tip:** Add details to the buildings using markers. Draw a window with a plant, or flowers and trees, or a door and an archway.

### what other buildings can you add to your card city?
