1

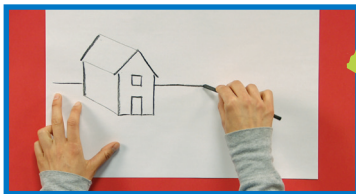

Use charcoal to draw a basic house.

2

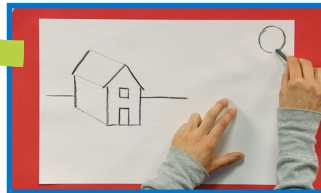

Extend the lines of your house to give it a 3D effect.

3

Draw a line across the background a little bit higher than the door. Now it looks like the house is sitting on the ground.

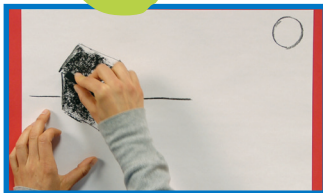

4

Draw a sun in the top right corner of the picture.

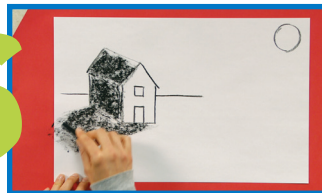

Here's a shadowing tip:
 if your sun is on the right side, everything on the right side of the house will be bright and everything on the left side of the house will be dark. So...

5

Use the side of the charcoal to darken the left side of the house.

6

Also add a shadow to the bottom left side of the house.

7

Make your picture really cool and draw a big tree beside the house. Remember where the light is? Darken the left side of the tree.

8

Now add a shadow to the bottom of the tree.

Way to go - you've taken a flat house and made it 3D by adding some shading and shadows the Artzooka way!
