

## Dinosaur Egg

### check list:

1. tinfoil
2. scissors
3. newspaper
4. papier-mâché paste (see recipe)
5. round balloon
6. paint brush
7. masking tape
8. white glue
9. sand
10. 2 bowls for the sand/papier-mâché

### Make papier-mâché paste!

Mix 1/2 cup of flour with 1 cup of water and add a pinch of salt. Mix well.

**\* This project does require overnight "dry" time.**

### The Dinosaur

Tear off a big piece of tinfoil and use scissors to cut the corners off. It should look like a big plus sign.

Slightly tear the tinfoil on each of the four inside corners. One flap will become the dinosaur's head and the other flap will be the tail of the dinosaur.

Now make a longer tear down the middle of the top part of your tinfoil, and another one at the bottom of the tinfoil. This will result in four flaps that will become your dinosaur's four legs.

For the dinosaur body, crumple a separate piece of tinfoil into a ball. Don't make it too round.

Place the ball in the middle of the tinfoil.

Now it's time to get scrunching! Take one of the leg flaps, and twist it into the shape of a leg. Do the same thing to make a leg on the other side. You should now have two back legs.

To make the tail, twist and scrunch the flap between the back legs so that it looks like a long tail.

Now, twist the front legs and the dino's head into shape. When you're twisting your tinfoil, keep pushing it into the tinfoil ball that is your dinosaur's body. The great thing about tinfoil is that you can twist and shape it any way you like.

### Making The Egg

Blow up a small balloon and cover it in papier-mâché. Leave space for the end of the balloon to poke through.

Set your egg aside to dry overnight.

Once the egg is dry, cut the balloon end off with your scissors and carefully peel the top of the egg off. Don't make the hole too big, just big enough to fit your baby dinosaur inside!

Put your baby dinosaur into the egg.

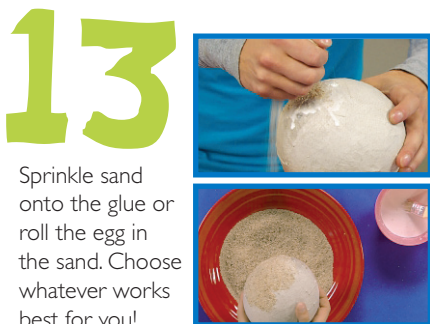

Tape the top back onto the egg.

Cover the top of the egg in papier-mâché. Make sure that the top is firmly in place. Once you're finished, set it aside to dry.

Paint white glue onto the egg.

Sprinkle sand onto the glue or roll the egg in the sand. Choose whatever works best for you!

Set it aside to dry one last time...

And when your egg is ready to hatch, just break it open!

**There you have it! Another egg-cellent art idea from Artzooka!**
