

Spaceship (Flying Saucer)

check list:

- | | |
|----------------------|-------------------|
| 1. 2 paper plates | 8. black marker |
| 2. 2 Styrofoam bowls | 9. silver paint |
| 3. pen | 10. paintbrush |
| 4. pushpin | 11. clear tape |
| 5. masking tape | 12. marbles |
| 6. toilet paper roll | 13. bulldog clips |
| 7. button | 14. flashlight |

Place a Styrofoam bowl on top of a paper plate. (Both the bowl and plate should be upside down.) Use a pen to trace all the way around the bowl.

Draw a smaller circle inside the circle you just traced.

Use a pushpin to poke holes all the way along the smaller circle, then pop out the circle!

To attach the bowl to the plate, first place the plate over the bowl, then use two large pieces of tape to hold them together. Now use smaller pieces of tape to tape all the way around the bowl and plate. These small tape pieces should overlap. This is the bottom of the flying saucer.

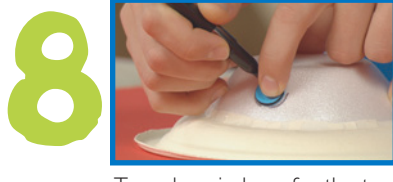

Take a toilet paper roll and press and twist it inside the bowl to make a circular groove. Use a pushpin to poke holes along the groove, then pop it out.

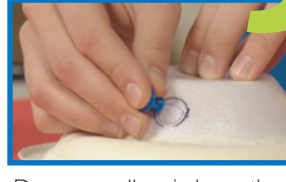

Insert the toilet paper roll about halfway through the hole, and tape it into place.

Repeat Steps 1 to 4 to make the top of the flying saucer.

To make windows for the top of the flying saucer, hold a button on the bowl. Trace the button with a black marker.

Draw a smaller circle on the inside of the window. Use a pushpin to poke holes along the circle, then pop it out. Make five windows in total.

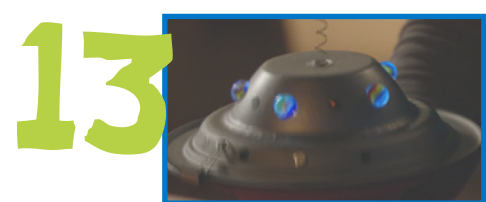

Paint the top and bottom of the flying saucer with silver paint. When the paint has dried, it's time to Artzooka! Turn over the top of the saucer and stick a piece of clear tape across each window (inside the flying saucer).

Turn over the saucer and place a marble in each window. (The tape will hold the marbles in place.) Decorate the flying saucer any way you want! Add sequins, a painted ball on a squiggly wire, or draw designs with markers.

To attach the top and bottom of the flying saucer, use two bulldog clips. Fold down the clips.

Insert a flashlight halfway into the bottom of the toilet paper roll. Turn on the flashlight and turn out the lights!

**The flying saucer is now ready to join the galactic fleet.
Happy space travels!!**
