

Underground World Jar

check list:

1. egg carton
2. tinfoil
3. scissors
4. silver ball cake decorations
5. modeling clay
6. clean 1L jar with a lid
7. pebbles
8. coloured craft stones

1

Use scissors to cut out 8 pieces of egg carton then trim the top off so that you're left with the bottom half of each section. These will become the caves that go in your underground world.

2

Cover the inside of one egg carton cave with tin foil and tear off any extra foil. You don't have to cover the bottom of the cave.

3

Add some silver ball cake decorations into your cave. You can decorate your other egg carton caves any way you like by adding paint, sparkles, gems, candies or rocks!

4

To attach each cave to the jar, take a piece of modeling clay and roll it long enough to go around the top of the cave.

5

Put your hand into the jar and press the modeling clay against the side of the glass.

TIP: If you're having trouble pressing the cave on, try rolling the jar over, and pressing DOWN on the egg carton cave. That can make it easier.

6

Add the rest of the cave to the inside of the jar.

7

Now, pour about half a cup of small colourful pebbles into the jar. To even out this first layer, give the jar a gentle shake.

8

Pour in the next layer of coloured craft stones. Make the layer even by giving your jar another gentle shake.

9

Keep adding layers until you have filled up your jar. Put the lid on, and your done!

With a few colourful pebbles, some glitter, and a lot of Artzooka imagination, you can create your very own underground world!
