

## Nature Collage

Bob and his friends in Sunflower Valley provide a safe environment for animals, plants, flowers and trees. Help your child start to understand and appreciate the environment by taking some time to explore the outdoors around your home. Take a "nature walk" around your neighbourhood, stopping to collect grass, leaves, rocks, twigs, etc. Talk to your child about what the items are that he or she has chosen, where they come from and encourage him or her to talk about the colour, shape, size and why each piece was chosen. When you arrive back at home, create a nature collage by gluing the items on a piece of paper. This is a great way to explore the natural world and create a fun memento of your nature walk.
