

BANG & OLUFSEN
...Customised For Eureka

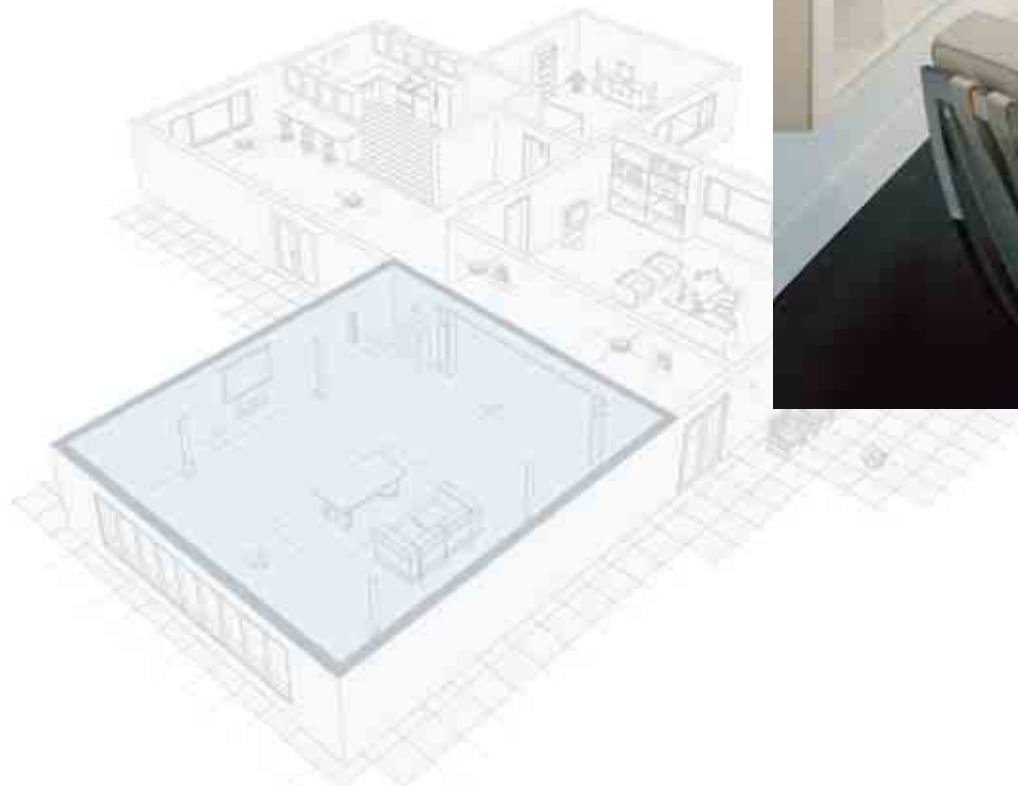

Our Philosophy

By combining innovative design and intelligent ideas with ultimate performance, we create solutions that stimulate the senses and touch the emotions. We strive to make our products as flexible as possible with regard to functions, colours and placement options.

Bang & Olufsen is dedicated to working with you to create home audio and video systems seamlessly integrated into your life. By combining the finest sound and vision products available, complemented by operational simplicity, we design home entertainment systems customised to where and how you want to use them. With B&O, you control the technology rather than the technology controlling you.

In a world full of choices, you can choose to stand out. Let us show you how...

Customise Your Life

Now you can have complete command of your home environment which has been custom-fitted to suit you. We examine your particular needs and work with you to develop a home entertainment solution. B&O is dedicated to offering the most effective seamless operation for your home.

To put it all together, our specialists work with you, your architect and interior designer to provide the right solutions for your home. The possibilities are only limited by your imagination. Discover how Bang & Olufsen can customise your life.

Curtains & Blinds – Home Automation

Imagine turning your living room into a movie theatre at the touch of a button. Using the one remote, Beo4, you can control your curtains, blinds and lighting to create exactly the mood you want – without leaving your sofa or bed.

Lighting Solutions – Home Automation

Think about the variety of ways you use a particular room: TV and movie viewing, listening to music, entertaining guests or just reading and relaxing. Bang & Olufsen gives you the ability to orchestrate a combination of lighting levels for any, or all, of a room's possibilities. With one-touch, pre-set lighting

controls, you can adjust your lighting to fit a range of scenarios. B&O is able to interface with a number of home automation systems, using the Beo4 remote control.

BeoLink®

Bang & Olufsen has been creating multi-room distribution solutions for more than twenty years. In every type and in any size of home, BeoLink® lets you distribute all of your video and audio entertainment sources from one room to wherever you would like to enjoy it with B&O products.

Beo4 – Remote Control

Imagine, the controls to your entire environment all at your fingertips. The key to moving sound and picture with BeoLink® is the Beo4, the single remote control that gives you simple but total control of all sources.

BeoLink® connects all your equipment, then extends the experience by having your audio and video sources available all over your home, on any scale you want. All you need to control it is one easy to operate, slim, stylish Beo4 remote.

Sound Solutions

Discover the ultimate sound through loudspeakers that blend seamlessly into the surroundings of any room in your home. You need big sound, not big boxes. You need something to match your taste, not something that is better hidden away.

Bang & Olufsen loudspeakers add to the interior, either in the way they blend in, or in the way they stand out. This is the hallmark of B&O.

Bang & Olufsen completes your home

As you plan your new home – whether it takes the form of a completely new structure, renovation or refurbishment – Bang & Olufsen provides the solution when it comes to complementing your home with a complete home entertainment experience.

Bang & Olufsen represents the ultimate in audio and visual products that combine exceptional performance, design and seamless integration. B&O delivers products of a superior quality – a principle which extends to our installation and service.

We invite you to visit a Bang & Olufsen showroom where one of our consultants can demonstrate our comprehensive range. We welcome the opportunity of working with you, your architect or interior designer to review your requirements. Our service extends to conducting home visits to review your requirements. We can assist you in tailoring the best solution to fit your needs.
