INTERIORS

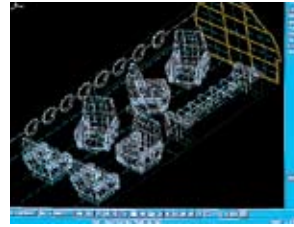

Since most long trips include two or even three meals, you'll appreciate the extra thought we've put into our galley selection. There's a complete range of equipment — sinks, microwave ovens, coffee makers and cold food compartments — to serve up anything from sushi to soup. Dinner for two or a business lunch for twelve is never an issue with our high-capacity galleys.

THE SECRET TO CREATING YOUR ONE-OF-A-KIND FALCON INTERIOR

The beauty of your Falcon's interior design is that it is an integral part of the plane — not an afterthought or add-on.

And it is designed to your specifications in every detail before your plane is built.

Our secret lies in CATIA® — the world's leading computer design and manufacturing system — whose design-to-build program brings your plane into being with unmatched precision and efficiency.

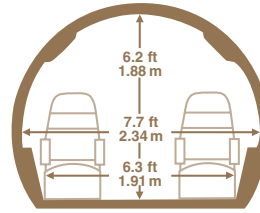

Beyond saving time, our system allows some of

the world's finest designers, artisans and technicians to work their magic with amazing results.

Their goal is to design a cabin that will continue to be as beautiful, enjoyable and valuable in the future as it is the very first day you step aboard.

But more about that later. (A complete description of our process is at the back of this book.)

For now, why not look over a sampling of the state-of-the-art technology and sumptuous furnishings you can enjoy in your own unique Falcon.

WE BUILT THE PERFECT CABIN
THEN BUILT THE PERFECT PLANE AROUND IT

*A*s business demands increase, the ability to move comfortably around the world becomes even more crucial.

Time spent en route can be long — especially on intercontinental missions.

It was clear to Falcon designers that cabin size and layout were critical concerns. And so, beginning with the Falcon 900 series, we took an unprecedented approach: We designed the perfect cabin cross-section and then

built an entirely new plane around it.

You'll appreciate the rightness of that decision the moment you step aboard any of our big Falcons.

To assure a maximum amount of natural light, there are long rows of large windows — as many as 12 along each side.

And your cabin is at its widest just where you want it — at elbow height — for the greatest comfort whether you're resting or working.

BUSINESS OR PLEASURE
NO OTHER PLACE IS MORE ACCOMMODATING

*F*alcon interiors give you abundant space to stand tall and move about easily — so you can have yours configured to make the most of your time.

Coffee tables can be raised and expanded to handle a full conference. Conference rooms can be transformed into elegant dining rooms. Comfortable seats can be turned into even more comfortable sleeping berths.

You can have separate areas for lounging or private conferences. With ample room for passengers to spread out work or stretch out and relax.

And for all its functionality and flexibility, every detail will bear the stamp of your own personal style.

PRIVATE SPACES, QUIET PLACES

*T*ypically on a business flight, several things are happening simultaneously: Two executives might be reviewing a contract, while others map out a marketing campaign, and still others discuss an upcoming sales call over morning coffee.

For lesser aircraft, this is a huge problem. Not so in the big Falcons.

At 6 ft. 2 in. high and 7 ft. 7 in. wide (1.88 m. and 2.34 m.), the cross-section is ideal.

This gives you abundant space for a higher level of comfort — especially on long flights, when narrower cabins begin to close in on you.

And there's generous room for you to get up and walk about — even to accommodate separate meeting areas if you like.

On long overnight flights, your Falcon can be divided into discrete sleeping compartments. Seats are fully berthable and your three-place divan can turn into an extra-wide bed.

PROJECT YOUR EXECUTIVE STYLE
REFLECT YOUR PERSONAL TASTE

*I*n a world of sophisticated leaders, Falcon ownership has earned its place as the *ne plus ultra* — not only for aeronautical excellence and uncompromising craftsmanship but also for consummate taste.

Because every Falcon interior is as unique as its owner, and we go to the ends of the earth for each and every one.

Our full-grain leather coverings are flawless, hand-selected European hides — custom aniline-dyed to match any color and embossed to any design of your choosing.

Our sumptuous carpets are 100 percent high-lustre virgin wool imported from New Zealand.

Our pure silk is imported raw, custom-dyed to match any color or design, then tufted and sculpted by hand.

Our metal surfaces come in eighteen different finishes, including white- or yellow-gold, nickel, brass and silver.

And no one can offer you a wider, more beautiful choice of exotic woods, with entertainment and information systems — virtually any amenity — so seamlessly built in.

Gold-plating is done within our facility, ensuring quality that is second to none.

EVERY NEED IS THOUGHTFULLY ADDRESSED

*Y*our Falcon offers all the comforts of home — and then some. It's a profile in refinement. A sophisticated, well-planned marriage of textures — replete with polished stone and rare wood, accented with metals of various colors and finishes.

Space and refinement — especially in the

commodious stand-up lavatory — are themes carried throughout. Personalized details add a refreshing touch.

It is elegance reminiscent of the features one would find in a luxurious home or yacht.

Small wonder. Creating exquisite environments that accommodate your needs and enhance your comfort has always been our hallmark.

OLD WORLD CRAFTSMANSHIP WITH
THE WORLD'S NEWEST TECHNOLOGIES BUILT IN

*B*eneath the exquisite surfaces of rare wood, leather, textile, stone and metal, you can have any modern convenience your business demands or your heart desires.

Computer and communications systems for use in presentations or entertainment come with screens, speakers and earphones that can be

accessed quickly or tucked away beautifully.

Luxury seats come with electronic controls for selecting the perfect position for work or relaxation. And a state-of-the-art climate control system keeps passengers comfortable in both temperature and humidity throughout the plane.

A PRICELESS TREASURE

A TIMELESS PLEASURE

Every Falcon is an expression of its owner's personal taste and a reflection of the company, government, family or other entity that will be using it.

With that in mind, we offer a complete range of amenities — as utilitarian or as luxurious as can be — for you to choose from.

The list is long — china, silver, crystal, table linens, serving ware, barware, pillows, blankets and more — but the point is simple:

Your wish is our command.

So, you may want to share the choosing with others from your office or family.

Needless to say, our designers and stylists will also be helpful in practical matters of usage.

Whatever your choices, we will see that every flight aboard your Falcon is truly yours in a very personal way — a timeless pleasure.

And that your Falcon will stand out as a priceless treasure for all who use it.

THE DESIGN-TO-BUILD SECRET
TO CREATING THE
PERFECT FALCON INTERIOR FOR YOU

Our secret is the world's leading technology. Virtually all of the world's designers and manufacturers use computer technology based on CATIA. And we continue to advance the leading edge of 3D modeling software.

The result is a design-to-build system that we use to control every aspect of every Falcon — from the drawing board to delivery and beyond.

Which gives you all the flexibility and control you want in selecting your interior — allowing you to view the finished product even before it's begun.

And guaranteeing that your Falcon is delivered on spec, on budget and on time — upholding a record unmatched in our industry.

SEE IT — AND MOVE IT — IN 3D

Our CATIA 3D modeling software is the most advanced in the world. It lets you see exactly how your Falcon will look in different layouts, materials and colors — from every angle. Cabin alternatives are as limitless as your imagination. Once your three-dimensional version is approved, it sets in motion a sophisticated design-to-build program unique to the Falcon.

This allows us to precheck everything for fit, form and functionality. Because the same software that controls the design process, controls the fabricating process.

YOUR PERSONAL DESIGN STAFF

Because the choices are so varied and so important, we offer a Specifications and Design staff, whose sole responsibility is to help you create the Falcon perfectly suited to your mission requirements and personal taste. Our experts are well versed in every area — materials, structure, equipment and ergonomics — and work with you from start to finish.

Falcons are famous for their comfort, design logic and durability — all the result of our deep experience with our owners and our near-fanaticism about quality.

ON BUDGET, ON SPEC AND ON TIME

After consulting with you and/or your designee, the designer's input is translated into a highly sophisticated custom assembly program tied into our ordering and assembly planning system.

This ensures that every component, every piece of metal, wood, cloth and leather, comes together precisely as needed. At one of the most efficient facilities in the world. To meet our unmatched record for on-time delivery.
