FALCON 900LX

LET THE PLANE THAT OUTPERFORMS ITS COMPETITION
HELP YOU OUTPERFORM YOURS.

PERFECT FOR QUICK HOPS AND 4,800-MILE NONSTOPS

Only the Falcon 900LX gives you the size, range and speed you want — with the efficiency and flexibility you need. So you can take your whole team on a spur-of-the-moment trip to an out-of-the-way airport. Or make a round-the-world, major-market journey — with equal ease. Getting up above the weather and traffic in 20 minutes. And whisking eight passengers from New York to Moscow, Mumbai to London or Caracas to Paris nonstop.

WITH TRI-JET SECURITY AND WIDE-CABIN STYLE

There is nothing more relaxing on any flight than having three powerful engines behind you in Falcon's trademark tri-jet design — especially over oceans and mountains. Unless of course it's the spacious layout, extra elbow-room, sophisticated amenities and latest electronics that let you work, entertain and even sleep in a cabin that Falcon owners around the world call the "quietest in the sky."

New York

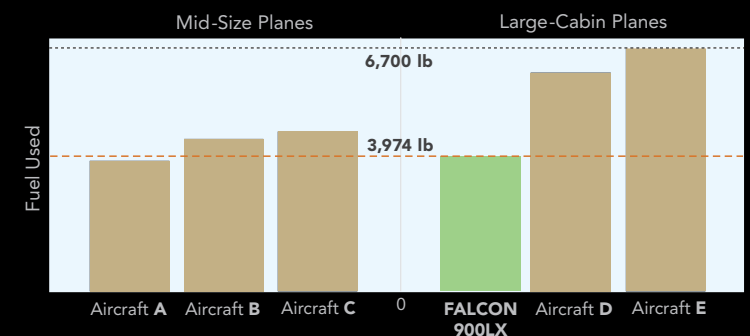

Paris

Mumbai

Long-Range Freedom. Short-Field Efficiency. Low-Cost of Operation.

Fuel Comparison: 1,000-nm flight with four passengers.

THE ADVANTAGES OF A BIG PLANE - THE AGILITY OF A SMALL ONE

The Falcon 900LX gives you the luxury of long-range — plus the ability to do what other planes its size can't do. It lands at slower speeds, giving you access to many more small airports. It easily handles short runways at high altitudes, like Aspen and St. Moritz, even in hot weather — allowing you to fly farther from those places than other jets its size. The 900LX also has the unique ability to land with a virtually full fuel tank. Which means you can tanker up on (lower-cost) local fuel and hop from city to city, picking up passengers, then leap across an ocean — without refueling.

55-70% BETTER EFFICIENCY

Give yourself this ongoing advantage over volatile fuel prices and costly carbon emissions — on every flight. And enjoy the lowest cost of operation without giving up an inch of comfort. See how the 900LX stands up to other large business jets in its class — and smaller mid-size jets — in the fuel comparison chart above.

GIVE YOURSELF A COMFORTABLE LEAD
WITH TWO WORLD-CLASS BUSINESS JETS IN ONE.

AVIONICS THAT LEAD THE EDGE IN TECHNOLOGY AND SAFETY

A world of pilots has welcomed the intuitive ease of Falcon's EASy Flight Deck. Its instant flight plans, integrated workflow, 14-inch screens, moving map, problem-solving software and head-up displays bring out the best in the best of pilots. With less stress on short flights and less fatigue on long ones. Giving pilots unprecedented command and control. And owners unparalleled peace of mind.

QUALITY THAT ENSURES A TIMELESS TREASURE

Beneath its lithe looks and sumptuous style, your 900LX lives up to Falcon's reputation for rugged reliability. Its advanced materials, technologies and design — backed by over fifty years of fighter jet experience — set the true standard for lasting value. Making it an asset destined to satisfy the most discerning of owners for decades to come.
