

MATERIALS

- Standard transfer paper
- Scissors or cutting tool
- Iron (no steam)
- T-shirt or other material

Instructions

NOTE: Project assembly is intended for adults only.

1. Print your page in accordance with the transfer paper instructions and allow it to dry completely.
2. Cut out your design, leaving 1/4" of white all the way around.
3. Place your T-shirt or other material on a smooth, hard, nonporous surface.
HINT: Do not use glass or a padded ironing board. We suggest a Formica countertop or an old wooden table.
4. Preheat your iron for ten minutes before using.
Set it on the highest dry setting—no steam.
5. Place an ironed pillowcase on the ironing surface for padding.
Make sure the pillowcase and ironing surface are completely smooth.
6. Place the T-shirt or other material on top of the pillowcase. Iron the area on the item where the transfer will be applied (avoid placing the transfer on seams).
7. Let the surface of the item cool before placing the transfer on top.
Place the transfer with the image face down and the white side up.
8. For best results when ironing your design, carefully follow the instructions included with the transfer paper.

Care instructions

1. Wash in cold water using a detergent with color protection.
2. Always turn the item inside out to wash.
3. Remove the item immediately after the wash is done.
4. For best results, line dry.

If the colors are bleeding, wash again in cold water until the excess ink disappears.
